Mrs. Lyle Burr and children Carolyn and Barbara of Mitchellville came Wednesday and visited until Monday with Mrs. Burr's mother, Mrs. Naska Bock and with other relatives and friends in this community.

Miss Jacqueline Kudje will return home next week from Iowa State Teachers College at Cedar Falls for a ten day vacation before entering summer school. Miss Kudje will teach in the Klamath grade school this fall.

Rev. H. E. Harvey, Ira Overholt, C. G. Waterman and R. A. Jorgenson drove to Clarion Friday evening to attend the 70th anniversary of Cyrene Lodge of Masons. A dinner was served at 6:30 o'clock. An interesting program was given following the dinner.

Mr. and Mrs. Donald Speer entertained their friends at a dance at the Community Hall Saturday night. Mr. and Mrs. Speer are closing their business here for the duration and will go to the west coast where Mr. Speer will work in a war plant.

Phyllis M. Ralph Reece, U. S. Navy, and wife of Norman, Oklahoma, spent Friday visiting with their old Klemme friends. "Bing" was enjoying a nine day furlough from his duties at the Naval Station at Norman. Mrs. Reece is employed in clerical work at the station.

"Red" Buntentbach assisted Mr. Wesley Patterson moving a truck load of furniture to Missouri Valley, Sunday. Mrs. Patterson and baby daughter will reside in an apartment at Missouri Valley for the duration as Mr. Patterson expects to be called into the service soon.

Mr. and Mrs. Ben Crobs and Peggy Lou and Mr. and Mrs. Ed Becker drove to Hudson, Iowa, Sunday to visit with Rev. Harry Buss and family. Rev. Buss preached the Baccalaureate sermon to the graduating class of which his son, Harlan, was a member.

Mr. and Mrs. Verle Keraus and baby son were entertained at a fried spring chicken dinner at the home of Mr. and Mrs. Ed Buntentbach this Wednesday evening. The dinner was in honor of the wedding anniversary of Mr. and Mrs. Keraus on May 20th.

Mr. and Mrs. Kermit Stille and two sons of near Thornton, were supper guests Sunday evening at the George Schoenwetter home in Liberty township.

Mr. and Mrs. Melvin Buseman of near Alexander spent Saturday evening and Sunday visiting Klemme relatives.

Sunday dinner guests at the home of Mrs. J. J. Stille in Liberty township were Mr. and Mrs. Arthur Carlson and family of Clear Lake, Mr. and Mrs. George Stille and baby of Goodell, and Mr. and Mrs. Kermit Stille and family.

Emil Blumer, who has been receiving treatments at the Mercy hospital at Mason City for several weeks, returned to his home in Liberty township, Saturday.

Howard Schoenwetter, son of Mr. and Mrs. George Schoenwetter, has been rehired as instructor at the Midland Radio School at Athens, Georgia. Howard is associated with the Institute of Radio Engineers, an international association. He has also been attending the University of Athens the past year and is a member of the Sigma Pi Sigma, a national fraternity.

Mrs. A. G. Koerner and Mrs. Levi Ridder drove to Garner Friday afternoon for a visit with Mrs. Orville Stokesbary and her new baby son, "Jerry," at the Geo. Stokesbary home.

The heaviest rain this spring fell over north Iowa Saturday, which really saturated the ground and was "made to order" for the farmers. And now we can use some warmer weather!

Mr. and Mrs. Alfred Merkel and daughter, Corinne, were six o'clock dinner guests Monday evening at the home of Mr. and Mrs. Frank Benner, Ventura. The dinner was in honor of Mrs. Merkel's birthday.

Mrs. Oliver Fredlin and sons, Jimmie and Donald, of Agency, Iowa, came last week for a visit at the home of Mrs. C. A. Arnold. Jimmie will remain at the Arnold farm to assist with the work this summer.

Robert Jahnke, son of Mr. and Mrs. Henry Jahnke, and Charles Bock, son of Mr. and Mrs. Phillip Bock, have both passed their physical examinations for army service. Robert left Tuesday for induction into the U. S. Army at Camp Dodge and Charles will report back Saturday.

Volunteer Farm Workers Will Register In Hancock

TO ASSIST IN WORK
THIRTEEN NAMED IN EACH

Registration Will Take
Place On June 10th

Mayor Bourke B. Hickenloop-
y issued a proclamation urg-
ing non-farm people to vol-
unteer for farm work if and when
develops so that Iowa, as
the nation's leading food producing
state, will reach its maximum pro-
duction. The governor proclaimed
that as the date that registration
will be completed in the state.

Hancock County, in compli-
ance with the request, will
make an attempt to register
every man, woman and youth,
now engaged in farming,
who can work on the farm on
a full-time, seasonal or part-
time basis, County Extension
Director Paul Henderson said.

Hancock County registration
will be carried on by the town
leaders. However, anyone
who doesn't have a chance to regis-
ter with one of the block leaders
will register with one of the fol-
lowing representatives of the Unit-
ed Employment Service:

Mullin, Britt; Garvel Ris-
corwith, A. R. Jannesen, Cry-
lake, Ira Langlitz, Goodell;
H. Schnebly, Hayfield; Em-
ma Sheets, Hutchins; L. E. Faber,
Walter Lemke, Klemme;
Valley, Woden; or at the office
of the County Extension Director
Henderson in Garner.

advisory committees have
been set up around each trading
post in the county. All of the
committees are complete but the
advisory committees of Corwith
to assist the above mentioned
representatives of the United Stat-
es Employment Service. The com-
mittees are as follows:

Wille, Ed Thompson, Mrs.
Arnold, and Mrs. Ed. Jacobs.

Kahl, Mrs. R. Baker, Su-
perintendent Thues, Mark Miller,
C. P. Lewis, J. H. Champion,
R. R. Roberts

Truesdell, Ernest Asleson,
June Bird, Mrs. Claus Smith,
Mrs. G. L. Peterson.

Rasmussen, L. W. Baggs,
Gremman, Mrs. C. N. Housh,
L. F. Weaver, Supt. S. T.
and Dale Bardo.

May, Leo Gilligan, Mrs. H.
Johnson, and Mrs. H. H. Stew-
art.

Langlitz, Harry Ruka, and L.
Resenberg.

Formanek, H. H. Stolten-
berg and Oliver Schnebly.

Fredrickson, Stoffer Fischer,
Schnek, Mrs. Luverne
and Mrs. Glenn Broakins.

Corwith committee will be
helped and published later.

assisting in the program
the public schools, Commercial
Farm organizations, county
and the County Farm Labor
Committee.

member of the Agricultural
Service, Mr. Henedrson
have charge of the recruitment,
placement and training of farm
workers, under the law recently
passed by Congress.

canvass of labor needs is being
made in the county. While farmers
use all of the good help they
get, the rush periods will come
for the care and harvesting of
corn, hemp, canning crops, vege-
table crops, and hay.

The farm manpower prob-
lem in some parts of the na-
tion has reached an alarming
state. It is seemingly just be-
ginning to make itself felt in
Iowa.

HAROLD WICKS COMPLETES PRIMARY TRAINING

Aviation Cadet Harold A. Wicks,
son of Mr. and Mrs. Albert Keh-
l of Klemme, Iowa, has completed
his primary training at the Seventh
Army Air Forces Flying Training
Detachment at Oxnard, California.
He is now receiving his basic in-
struction at the Army Air Forces
Basic Flying School, Gardner Field
at Taft, California.

While training at the Seventh
Army Air Forces Flying Training
Detachment, Cadet Wicks received
the Gold Star Training Award for
successful completion without an
accident during his primary flight
training.

MARVIN STOKESBARY LEAVES NAVAL TRAINING SCHOOL

Navy Pier,
May 18, 1943.

Dear Jergie:

Just a few lines to let you know
I am to graduate May 28, so maybe
you'd better stop the paper until I
find out where I'll spend the next
few months. I have no idea where
it will be and won't know until I
get there I guess.

The last two weeks we're here
we work out on the line where we
work on complete planes instead of
old fuselages and wing sections. I
have spent three days out there so
far. Seems like about two trips a-
round the hangar and the afternoon
is gone. I'm sure anxious for grad-
uation.

I may get home a few hours this
Sunday if I get permission to go over
the seventy-five mile limit. We
get overnight liberty Saturday
night. So many of the fellows are
going to try to make it home.

Boy, we've surely had some ter-
rible weather here. Seems like it
rains all the time. Gives me an aw-
ful impression of Chicago.

News is scarce and so is time, so
I'll close. Sincerely,
Marvin Stokesbary

FORMER KLEMMME YOUTH TO BE MARRIED SUNDAY TO INDIANA GIRL

Announcements have been re-
ceived in Klemme of the approach-
ing marriage of Miss Dorothy Mae
Slabaugh, daughter of Mr. and
Mrs. Frank E. Slabaugh of Napp-
anee, Indiana, to Mr. Floyd F.
Klotzbach, son of Mr. and Mrs. Levi
Klotzbach of Klemme, Iowa. The
wedding ceremony will take place
on Sunday evening, May 30th, at
the Hepton Union Church at eight
o'clock.

workers must fill the gap left
by farmers taken by industry
and the armed forces. They
must supplement the remain-
ing farm force of older and
less skilled workers.

Town and city people are urged
to accept an active responsibility in
Iowa's food production program.
The farm season has been retarded
by adverse weather conditions, and
a need for extra help may develop
sooner than was first expected.

"We must make plans right now to
meet any situation that may devel-
op within our county and to solve
that problem within our own com-
munity. We can't expect much help
from outside sources," Henderson
says. It is not enough that the
farmer have labor to merely "get
by." He must have sufficient help
to enable him to reach the very
maximum of production.

If you can arrange to assist at
any time, be sure to volunteer.

Lois Barkema, Belmond, Bride Of Glen Schlichting

COUPLE MARRIED MAY 15 AT REFORMED PARSONAGE AT BELMOND, IA.

Will Make Their Home On Schlich- ting Farm Near Klemme

Miss Lois Leona Barkema,
daughter of Mr. and Mrs. Charlie
Barkema of Belmond, and Glen
William Schlichting, son of Mr. and
Mrs. Adolph Schlichting of Klem-
me, were married in the Immanuel
Reformed church parson at Bel-
mond on May 15th by the Rev. O.
G. Poppen.

Attendants were Miss Eva Bar-
kema, sister of the bride, and Geo.
Schlichting, brother of the groom.

The bride was dressed in light
marquise and lace with blue ac-
cessories and had a corsage of red
roses tied with blue. The brides-
maid wore rose lace with brown
accessories and a corsage of red
roses tied with pink.

The bride has been keeping
house for her grandfather and her
brother on the farm. The bride-
groom is farming with his father
and brother southeast of Klemme.

After their return from a wed-
ding trip the young couple will live
on the Schlichting farm.

RATION BOOK NO. 3 BLANKS BEING MAILED IN IOWA

Do Not Mail Back Cards Before June 1st Says OPA

Postoffices throughout Iowa are
distributing application blanks for
War Ration Book No. 3 to every
family in the state. Distribution
will be completed by June 5. Be-
tween June 1 and June 30 consum-
ers are to mail their cards, which
are pre-addressed, to the OPA
mailing center in Chicago. The
mailing center will mail back the
ration books between June 20 and
July 21. Effective date of the book
has not been announced. One ap-
plication card can be used to secure
ration books for every member of
the family.

The OPA urges the public
not to mail the cards back to
Chicago before June 1, by that
time post offices will have the
mailing channels cleared for
fast handling.

The mailing center will then be
ready to process the cards and
mail out the books.

Consumers are cautioned to be
sure to place a three cent stamp on
the application card in mailing it
to Chicago.

ELECTRIC FRANCHISE HERE CARRIES TWO TO ONE

One Hundred Seventy-Nine Vote At Special Election Thursday

One hundred and seventy-nine
residents of Klemme went to the
polls last Thursday to vote on the
proposition of whether or not to
grant the Central States Electric
Company a twenty-year franchise.
The public measure carried near-
ly two to one with 117 voting yes,
and 61 nos. There was one spoiled
ballot.

As a result of the favorable vote,
the residents of Klemme who are
users of electricity, will receive im-
mediate benefits of new and lower
rates on their June 1st billings.

The Company has had a crew of
men here for the past couple of
weeks rebuilding and improving
transmission lines and doing other
work to improve the service still
more.

COUNTY EIGHTH GRADERS TO GRADUATE FRIDAY

The thirty-ninth annual Promo-
tion Exercises of the eighth grade
pupils of the rural schools of Han-
cock County will be held Friday,
May 28th at 2:00 o'clock at the high
school auditorium at Britt. The ad-
dresses will be given by Mr. Ward
Hamilton of Mason City, Fred C.
Missal will present honor letters
and Certificates will be presented
by Mrs. H. C. Meyer of Britt.

Graduates from around Klemme
include:

Avery Township: Erwin Aus-
born and Dean Roths.

Ell Township: Marjorie Goll, I-
rene Whitehurst, Maxine Groes-
beck, Bill Hanson, Dean Nuehring,
Merle Pannhoff, Donald Quintus,
Margaret Quintus, Clare Rutz.

Liberty Township: Lola Haber-
kamp, Maurice Buckley, Dorothy
Haes, Derwood Helmke, Abigail
Huenemann, Luella Katter, Irene
Lorenz, Mayvis Polsdofer, Margar-
et Ptacek, Delwyn Stromer, Elmer
Wellik.

Twin Lake Township: Paul Ster-
ba and Betty Tegland.

Honor Roll

(In order of rank): Charles Bird,
Emilie Peterson, Gaila Mae Baker,
Phyllis Smith, Maxine Groesbeck,
Lorene Chizek, Laura Moretnson,
Richard Faber, Mary Jane Bleier,
Milton Maddex, Sammy Hanson,
Beverly Mewes, Betty Pannhoff,
James Boehnke, Eloise Knapper,
Irene Lorenz, Betty Tegland, Dar-
lene Lemke, Betty Nyhus, Dorothy
Young, Delwyn Stromer, Norma
Halverson, Fern Juhl, Ada Blank,
Luella Katter, John Torkelson.

KLUCKHOHN'S STORE BROKEN INTO SATURDAY NIGHT

Thieves broke into the Kluck-
hohn Store sometime Saturday
night and stole a small amount of
change and a quantity of candy
bars. Nothing else seemed to have
been disturbed.

Entrance to the store was gained
by breaking out a pane of glass in
a rear door and sliding a bolt that
held the door shut.

WILL DEMONSTRATE METHODS OF CANNING AND FREEZING AT GARNER, MONDAY

Same Demonstration Will Be Held
At Goodell On June 4th
And Klemme June 14th

To canning and freezing demon-
strations will be held in the home
economics room at the school house
in Garner as follows:

Monday, May 31, at 7:30 p. m.
and Tuesday, June 1 at 1:30 P. M.

An evening demonstration has
been planned so as to make it pos-
sible for women who are employed
or for other reasons find it impos-
sible to attend in the afternoon.

These demonstrations are being
sponsored by the extension service
and the OCD and will be presented
by Miss Hazel Grimes, county ex-
tension home economist, with the
cooperation of Miss Charlotte Sten-
berg, the vocational home making
teacher. They will include the use
of hot water bath and pressure
cooker methods of canning fruits
and vegetables, also the preparation
of fruits and vegetables for freez-
ing in a locker.

The demonstrations are open
to all, and every person who
can do so is urged to attend.

The same demonstration will be
presented at the school house in
Goodell on Friday, June 4, at 1:30
p. m.

The demonstration will be held
at Klemme on Monday, June 14th,
at 2:00 p. m. at the economics room
in the Klemme High School, unless
otherwise announced.

OPA GIVES OUT GOOD NEWS TO IOWA FARMERS

The Des Moines district Office of
Price Administration had good
news this week for Iowa farmers.
Under original OPA regulations,
the farmer who brought his own
cattle to a custom slaughtering
plant for slaughter and dressing
was required to surrender red point
stamps for the resulting meat. If
he killed and dressed the animal
himself on the farm, the meat was
"ration free."

Under the revised regula-
tion, the farmer can use cus-
tom-slaughtering facilities with-
out surrendering ration points
for the meat required, provid-
ed the meat is to be consumed
on the farm he owns or oper-
ates. The animal also must
have been raised, or fattened,
by the farmer.

The farmer is also required to
furnish the slaughterer with a cer-
tificate to establish the fact that
the meat is primarily for food for
his family and was produced from
livestock raised on the farm. One
copy of the certificate is filed by
the slaughterer with the farmer's
local ration board within five days
after transfer of the meat, and a
second copy is retained by the
slaughterer.

Regulations require that the far-
mer certify he either raised the
animal from birth or fed it for a
period of at least 60 days immedi-
ately preceding slaughter, or in-
creased its weight by at least 35
per cent during the time he owned
the animal.

Farmers who sell meat from live-
stock produced on the farm must
collect ration points for every sale,
whether they slaughtered the ani-
mals themselves or had them cus-
tom slaughtered.

If a farmer owns a second farm,
he may transfer meat from one of
his farms to another to provide food
for members of the household,
without giving up ration points.
Farm owners who live in town,
however, must give their tenants
ration points for meat they acquire
from them, even though they do
not pay in cash for the meat.

When you have company or take
a trip, that's news. Phone 12.

Save your silk and nylon hoes.
They may save a life.

Klemme Stores Close For Legal Holiday

KLEMMME STORES WILL BE CLOSED ALL DAY MON- DAY, MAY 31

As Memorial Day comes on Sun-
day this year, Klemme Stores will
be closed all day Monday, May 31.

The Memorial Day service will
be held in the Park on Sunday
morning at 10:00 o'clock.

Remember: do your shopping on
Saturday as all places of business
in Klemme will close from Satur-
day night until Tuesday morning.

Other towns in the area are ob-
serving the same closing time.

Surprise the Family With Sandwich Loaf!

(See Recipe Below)

Meals on a Dish

We've heard a lot about hot meals in a casserole that take care of the main course of a meal. But how about cool meals served on a single attractive platter that are most of the time, at least, made up ahead of time? This is one of the very nice things about summer menu planning for foods lend themselves to this kind of serving.

Recently I saw a very attractive platter that was cool, complete and colorful—that any one of you could whip up at short notice. An individual tomato aspic filled with creamed cottage cheese served on a large green glass salad plate was banked by several tiny finger sandwiches, a slice of tongue with horseradish sauce, deviled eggs, a small mound of potato salad and a sprig of watercress. Serve this with coffee or tea and a dish of sherbet or ice cream. Bread with filling forms an interesting base for this salad-sandwich loaf and looks very pretty enclosed in rosy aspic. The fillings, ham and cheese, classic flavor combinations, won't cut into your points heavily, nor will the tomato juice:

*Tomato Aspic Surprise.

(Serves 6)

- 1 small loaf white bread
- Ham Salad
- 13-ounce glass Old English cheese
- 3½ cups tomato juice
- 2 tablespoons onion juice
- 1 stalk celery
- 3 tablespoons gelatin
- ½ cup cold water
- ½ teaspoon salt
- 1 teaspoon pepper
- Watercress

Remove crusts from loaf of bread. Cut whole loaf into three lengthwise slices. Spread one slice with ham salad, cover with second slice spread with cheese spread. Cover with third slice of bread and wrap in wax paper.

Cook tomato juice, onion juice and celery for 5 minutes. Remove celery and add gelatin which has been softened in cold water. Stir until dissolved. Season with salt and pepper. Pour a ½-inch layer into a buttered loaf pan which is a little larger than the loaf of bread. Chill until firm. Place prepared sandwich loaf in this layer of aspic and pour the remaining cooled and somewhat thickened aspic around it and over the top. Chill again until the aspic is firm. Unmold on a platter, garnish with watercress and slice crosswise to serve.

You can still do entertaining even on your ration points! If your best bean or son is coming home from camp, there's no need to worry about stretching those ration points out of place when you serve this loaf serving 12 to 15 people:

Lynn Says:

A Heart of Gold: That's a dandy description of the egg which is good to eat, plus a first class protein. If you like 'em stuffed here's a grand parade of suggestions:

Cut hard-cooked eggs into halves, mash them, season according to taste and refill the whites. Garnish with paprika and a sprig of parsley. Chopped celery with the mashed yolks is a good filling if you like crispiness. Or, mix the yolk with Thousand Island dressing for variety and serve around a salad.

Yolks deluxe include mixing with 1 cup cooked peas, pureed, 2 slices bacon, chopped and fried crisp, 1½ tablespoons cream, 1 teaspoon vinegar, ¼ teaspoon onion juice, 1 tablespoon minced pimento, ½ teaspoon salt and enough mayonnaise to moisten. If you have a dab of leftover ham, mince it fine and add with enough mayonnaise to moisten egg yolks mashed fine and refill whites.

Lynn Chambers' Point-Saving Menus

- * Tomato Aspic Surprise
- Apricot Pie Beverage
- * Recipe Given

Tulip Sandwich Loaf.

(Serves 12 to 15)

- ½ pound cold ham
- ½ pound American cheese
- 6 sweet pickles
- Mayonnaise
- 3 packages cream cheese
- Cream
- 1 small jar pimento
- 1 green pepper
- 1 loaf unsliced sandwich bread

Grind ham and grate cheese. Combine ham, cheese and chopped pickles and add enough mayonnaise to moisten. Remove crusts from loaf of bread. Cut a ½-inch slice of bread the length of the loaf. Remove center from remaining loaf so there is a box ½ to ¾-inch thick on sides and bottom. Spread inside of loaf and one side of slice generously with butter or margarine. Put sandwich filling inside loaf and top with slice on butter side down. Soften cream cheese with a small amount of cream until it is of spreading consistency. Cover loaf with cream cheese. Cut small tulips and leaves from pimento and green pepper and decorate sides of loaf. Chill for 1 hour and when ready to serve, cut in 1-inch slices. Cottage cheese is unrated, a good source of quality protein and calcium. You'll like it in this main dish salad—a meal in itself:

Walnut-Stuffed Tomatoes.

(Serves 4 to 6)

- 4 to 6 whole tomatoes
- 1 pound cottage cheese
- 1 tablespoon minced onion
- 1 tablespoon minced green pepper
- ½ cup broken walnut kernels
- Salt to taste

Wash and remove stem end from tomatoes. Cut out portion of center from tomatoes. Cut this fine and add to above ingredients, combine and fill tomatoes. Serve well-chilled, garnished with salad greens and whole walnut kernels. Serve with french dressing or salad oil and vinegar.

Lima beans, a rich source of protein, are combined with other rich-in-minerals-and-vitamins vegetables to give you a perfect luncheon or supper main dish salad:

Lima Bean Supper Salad.

(Serves 6)

- 2 cups lima beans, cooked
- 2 tablespoons chopped parsley
- 1 bud garlic, chopped
- 1 large onion, sliced thin
- ¼ cup salad oil
- 1 tablespoon vinegar
- 1 teaspoon salt
- ¼ teaspoon pepper
- Sliced tomatoes
- Sliced green onions

Mix with a fork, the lima beans, parsley, garlic and onion. Add salad oil gradually, then vinegar drop by drop. Season with salt and pepper, garnish with tomatoes and green onions.

Hot Tomato Cottage Cheese Sandwich (Serves 6).

- 1 cup cottage cheese
- 6 slices buttered toast
- 2 tablespoons butter
- 2 tablespoons flour
- 1 teaspoon salt
- 2½ cups cooked or canned tomatoes

Spread cottage cheese between slices of buttered toast. Cut sandwiches in half and arrange in buttered baking dish. Melt butter over low flame, blend in flour, then add low flame, gradually, stirring continuously until thickened. Pour over sandwiches and bake for 15 to 20 minutes in a moderate oven.

Are you having difficulties planning meals with points? Stretching your meats? VICTORY GARDEN COMMUNIQUES

BACKYARD AREA (Delayed).—Under continuous heavy pounding the struggle on this front continues to be touch and go. Bad weather has hampered progress, and the time element is now more important than ever in operations in this area. The attack is being pressed whenever possible by the whole family, but the results have not been too encouraging.

There is a tendency to blame inadequate equipment. Tactics so far have yielded mediocre results, but the campaign is still in its early stages.

THE LOT NEXT DOOR.—There has been sharp activity here lately. Large groups have appeared with various types of weapons, some rather unusual for operations of this sort, but there has been no unified drive.

Several battles over boundaries have taken place. Casualties have been rather heavy, many hospitalizations being due to twisted ligaments, overstrained muscles and stiff backs. It is apparent that the participants in this campaign need further seasoning.

COMMUNITY GARDEN CENTER.—Sporadic operations have followed the concentrated and aggressive moves of last week. The large formations of share-the-crop-troops so active earlier have thinned out. Strategy is hard to follow. Small groups appear out of nowhere from time to time and start digging, but they abandon the drive after a minimum of effort.

There is a shortage of equipment, especially wheelbarrows. Those engaged here insist that the supply system is at fault, too. Experts insist that the main trouble is a confusion of objectives. Eight of our more light-hearted gardeners are missing.

OUT BEHIND THE BARN.—What seemed about to develop into a major drive here wound up in a minor argument over objectives. One group wanted tomatoes, lettuce and lima beans; the other held out for corn, carrots and potatoes. Both sides were bringing up replacements late today.

Ely Culbertson, noted bridge expert, is now out with a plan for a post-war world. We think Ely especially qualified to handle the problem, which is as closely related to bridge as anything else. For instance, one of the first questions at the peace table will be: Who is going to be "Dummy"?

The more we think of Mr. Culbertson and war the more we like his playing a hand in the world of tomorrow. What's responsible for most of the trouble the world finds itself in today, anyhow?

Over-bidding, getting the signals mixed, reneging, trumping at the wrong time and not knowing when you're vulnerable.

Of course those bridge party sandwiches have a lot to do with it, too.

MODERN NURSERY RHYMES

Four and twenty blackbirds baked within a pie,
Set before the king whose ration plight was high;
When the pie was opened the birds began to hoot
"We know you asked for chicken but you'll take a substitute."

WHATTA WACKY WORLD!

His wife was a WAVE and he waved at a WAAC.
The WAAC was in front—but his WAVE was in back!
Instead of a wave from the WAAC, be it said,
He won but a whack from the WAVE he had wed.

FRANK LYNN.

This is the time of year when baseball and war followers find themselves in some slight confusion. Millions of Americans, when they see a headline, "Yanks Win," buy a paper to see who pitched.

"To Fix Responsibility for Black Market."—Headline.
It might be a better idea to place the responsibility for the "fix."

Wendell Willkie's book is becoming an all-time best seller. But there is still much doubt that the author will adopt the slogan "I would rather be a writer than be President."

The rumor that the White House copy of Mr. Willkie's book has already gone to Falla is denied.

From the portraits of Mayor LaGuardia throwing out the first baseball, and revealing unmistakable slowness, we assume he has a balata arm.

Down in Washington there seems to be a desire to see how far Mr. Jeffers, the rubber czar, can bounce.

There is this difference between Japan and Nazi Germany. Germany has only one Hitler and one Himmler. Japan has millions of 'em.

MER-MATES

Many a sailor,
Bold and brave,
Perhaps will end with
A permanent "Wave."
Harcourt Strange.

A TISKET, a tasket, a basketful of fresh spring flowers—all ready to "plant" on your bed linens and dresser scarfs. Flower

garlands and prim little nosegays are also included in the large variety of gay embroidery motifs.

Pattern 7486 contains a transfer pattern of 14 motifs ranging from 9¼ by 3¼ to 5½ by 3¼ inches, stitches.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers. Send your order to:

Famous Physician Was Gracious With Encore!

The wealthy man had cracked a rib, and a slight operation was necessary. He engaged a famous specialist.

Local doctors were excited at the prospect of a visit from a big noise, and their request for permission to watch the operation was granted.

When the patient came out of the anesthetic he found himself smothered in bandages. He summoned the nurse.

"What's all this?" he demanded.

"Well, sir, it was such a beautiful operation, and the applause was so tremendous that Dr. Hugo took out your appendix as an encore."

Modern Couch End Units Create Parlor Transformation at Little Cost

THE unit in the upper sketch is the handwork of two amateurs; one using hammer and saw, and the other doing plain sewing. The size of your radio, your tall books and short books, as well as the things to be stored behind the doors will govern the proportions of the end units. Make a rough

plan on paper first with all dimensions indicated. If you do not have the tools for making grooves the shelves may rest on metal angles screwed to the sides of the unit. These angles are useful also for strengthening the corners.

The construction of the bedding compartment is shown in the lower sketch. The padding is cotton

batting and the covering is tacked in place through a lath strip.

NOTE—Complete directions for various types of slipcovers will be found in SEWING Book 1. To get a copy send name and address with 15 cents direct to:

ASK ME ANOTHER?

A General Quiz

The Questions

1. Are American soldiers bigger than they were in World War I?
2. Were any Presidents of the United States baldheaded?
3. What speed does the swing of a pugilist attain?
4. What is a "Blue Ox"?
5. What possession of the United States borders on two oceans?
6. If your ring is stamped 18K, how much gold does it contain?

The Answers

1. Yes. They average two inches taller and are 14 pounds heavier.
2. The only baldheaded President of the United States was John Quincy Adams.
3. A device that times a pugilist's swing shows that the fastest punch of most heavyweight boxers attains a speed of 40 miles an hour.
4. Our fliers call the Norden bombsight, the secret device that allows them to do uncanny precision bombing, the "Blue Ox."
5. Alaska (on the Pacific and Arctic oceans).
6. An 18K ring contains 75 per cent of gold.

MEDICATED POWDER FOR FAMILY USE

HOW NOT TO CATCH A FLY

The SHOT GUN METHOD is the best direct attack with which to dispose of a fly. A ten gauge gun and a number six shell will raise havoc with the fly as well as the neighborhood. Result: a dead fly usually calls forth an aroused police department. A better way is to

Catch 'em with TANGLEFOOT FLY PAPER

The old reliable that never fails. Economical, not rationed, for sale at drug and grocery stores.

6 double sheets 25¢ THE TANGLEFOOT CO. Grand Rapids, Mich.

When the word went out that soldiers overseas wanted packages from home—the response was so overwhelming that Uncle Sam reluctantly had to call a halt. Today, due to shipping space, there are Post Office restrictions on packages to overseas Army men—but you can still send packages to soldiers in the U. S., and to Sailors, Marines, and Coast Guardsmen wherever they are. When you do, remember—one of their favorite gifts is cigarettes, and the favorite brand is Camel. Sales records in Post Exchanges and Canteens show that Camel is first choice with men in all the services. So send him that carton of Camels today.—Adv.

Greater Jupiter

Jupiter's diameter is 11 times that of the earth.

YOU WOMEN WHO SUFFER FROM HOT FLASHES

If you suffer from hot flashes, dizziness, distress of "irregularities", are weak, nervous, irritable, blue at times—due to the functional "middle-age" period in a woman's life—try Lydia E. Pinkham's Vegetable Compound—the best-known medicine you can buy today that's made especially for women. Pinkham's Compound has helped thousands upon thousands of women to relieve such annoying symptoms. Follow label directions, Pinkham's Compound is worth trying!

IN THE TANK FORCES

they say:

"IRON HORSES"
for tanks

"GEAR HAPPY"
for shifting gears too often

"THIN SKINS"
for unarmored trucks

"CAMEL"
for the service man's favorite cigarette

FIRST IN THE SERVICE

With men in the Army, Navy, Marine Corps, and Coast Guard, the favorite cigarette is Camel. (Based on actual sales records in Post Exchanges and Canteens.)

CAMELS ALWAYS TRAVEL WITH ME... THEY'VE GOT WHAT IT TAKES IN TASTE AND MILDNESS. I'VE SMOKED 'EM FOR YEARS

PROCLAMATION

Greetings to the people of Iowa for their fine spirit and splendid cooperation in everything that contributes to the winning of the war and the restoration of peace.

In the production and harvesting of food vital to the successful prosecution of the present world-wide conflict, a heavy responsibility rests upon Iowa. With twenty-five per cent of all grade A land in the United States, Iowa farmers are asked to produce as never before—specifically, 2,410,000 litters of spring pigs, 7,000,000 pounds of milk, 332,170,000 dozens of eggs, as well as record breaking quantities of feed and forage, fruit and garden products.

By their announced intentions, Iowa farmers have indicated they will spur themselves to these goals, by working unprecedented long hours and employing their ingenuity to the end that all available labor now on farms may be used in the most efficient manner possible.

Farm labor is now scarce on Iowa farms. The need for year-round assistance is increasing, and as the seasons progress, there will be definite need for short-time workers in haying and harvest time, and for canning, hybrid seed work, special hemp care and other purposes. This indicates that it will be necessary for every man, woman and youth in towns and cities to share responsibility for Iowa's great agricultural enterprise by volunteering to help when and where needed to the end that every last ounce of food may be produced and saved. This is an Iowa duty that Iowa must not evade.

There is abundant evidence that Iowa farmers and farm women are extending their cooperative efforts by exchanging, neighbor with neighbor, labor and equipment; and this movement should be given even wider application.

Every youth, every man, every woman, not now engaged in farm work, should now volunteer in a spirit of high patriotism for service, each according to capacity and strength and available time. In the big production job, whether it be for full-time part-time seasonal or on hourly basis.

THEREFORE, in order to emphasize the importance of this program, I, Bourke B. Hickman, Governor of Iowa, hereby proclaim the period from June 10, 1943 to June 10, 1944 as

LARGE REGISTRATION PERIOD FOR FOOD PRODUCTION AND PRESERVATION IN IOWA

Register for this great war effort on or before June 10, 1943 at your community or county placement center. Let the Iowa quota be filled that the program of expansion may go forward promptly. A call will be made in each community, and it should not be overlooked. Let not an hour of useful labor go to waste. Individuals, organizations, state and national, should get together upon this program to the end that Iowa, the most important food producing State of the Nation, should lead the parade toward the ultimate goal of "Food for Freedom" in unparalleled abundance.

IN TESTIMONY WHEREOF, I have hereunto set my hand and caused to be affixed the Great Seal of the State of Iowa, Done at Des Moines, this 18th day of May, in the Year of Our Lord One Thousand Nine Hundred and Forty-three, of the State of Iowa the Ninety-seventh, and of the Independence of the United States the One Hundred and Sixty-seventh.

Bourke B. Hickman
GOVERNOR

Ink Spots And Spatters

By Jergie

BETTER DRIVE SLOWLY

Federal surveys show that in one and a half million miles of tire travel on roads in Iowa, Kansas, Missouri and Wyoming, pre-war passenger car quality tires used on concrete roads wore only about two-thirds as fast as 35 miles an hour as at 45 miles an hour. Tires that would wear out in 40,000 miles at 45 miles an hour would give nearly 60,000 miles of service at 35 miles. That's why your government is asking you not to exceed the 35 mile an hour limit. The rule was made to help you get more wear out of your tires.

TO KEEP RABBITS OUT OF YOUR GARDEN

Rabbits will be taking their share of your victory garden unless you do something about it. To make it more difficult, it is against the law to kill rabbits out of season, nor is it permissible to use poison bait to protect our gardens. The big wigs down at Ames say sulphur scattered along the rows and even on the favored plants will repel rabbits. If they become too

numerous and constitute a menace to your garden, then get in touch with Jack Stevens, local game warden at Clear Lake and maybe he can give you some advice.

We still think good old fashioned "lead poison" administered with a shotgun is the most effective. Maybe Jack will not agree with us, but we would hate to be a rabbit in his garden!

RESTRICTIONS LIFTED ON MOST FARM MACHINERY

County quota restrictions on all farm machinery and equipment, with the exception of tractors, combines and corn pickers, were lifted in Iowa, effective May 24, it was announced today by Alfred Josten, chairman of the Hancock County U S D A War Board.

The new rationing order, lifting county quotas, does not eliminate the necessity of securing purchase certificates. Mr Josten declared All machinery and equipment will still be rationed on the basis of need and use.

The revised farm machinery rationing order is designed to facilitate getting farm machinery into the hands of farmers, especially equipment which arrives late in the season.

Tag requirements to the county level are now abolished on all the "non-quota" machinery. This machinery will be tagged only to specify the state in which it is to be sold.

Farmers will be required to locate the machinery they wish to buy before they are given consideration for a purchase certificate by the local farm machinery rationing committee. The "non-quota" machine does not actually have to be in dealers' hands, but the person to whom purchase certificate will be issued must certify he has good reason to believe the machinery will be transferred to him if the local board determines he needs the machine and will put it to maximum use.

Dealers are cautioned to limit promises of delivery to the actual number of machines on hand or to machines which they have assurance will be allocated to them by the manufacturer or distributor.

In the case of tractors, combines and corn pickers, the quota system will still be in effect, Mr. Josten said. The distribution patterns for these machines have already been set up and they will continue to bear a county tag. County Farm Machinery Committees will be limited to the issuance of purchase certificates according to the assigned quotas for these three items.

NOTICE TO BIDDERS

Sealed bids will be received at the office of the County Auditor, Garner, Iowa, until 3:00 o'clock P. M. on June 3, 1943, for gravel surfacing and resurfacing county roads as follows.

Section 1
Pit in the NE corner of section 14, Twin Lake Township.
Avery Township between sections 6 and 7.
Beverly Township South 2-3 between sections 3 and 4.
Amsterdam Township between sections 25 and 26.
Liberty Township between sections 13 and 24.
Liberty Township between sections 14 and 23.
Liberty Township E 1-2 between sections 13 and 22.
Gravel screen, crush and load 4,600 cubic yards. 1-2 mile haul 63,200 units.

Section 2
Pit in SE 1-4 of Section 14-96-24, Garfield Township.
Ell Township between sections 9 and 16.
Ell Township E 1-3 between sections 8 and 17.
Garfield Township between sections 5 and 16.
Resurfacing South 2 1-2 miles of Duncan-Hayfield Road.
Resurfacing South 2 1-1 miles of Garner-Miller Road.
Gravel, screen, crush and load 4,100 cubic yards. 1-2 mile haul 52,000 units.

Section 3
Pit in SW 1-4 of Section 23-97-23
Ellington Township between sections 2 and 3.
Ellington Township between sections 27 and 34.
Ellington Township between sections 20 and 27.
Between Ellington Township sections 36 and Concord Township section 1.
E 1-2 between Ellington Township, section 35 and Concord Township section 2.
W 1-2 between Ellington Township section 33 and Concord Township 4.
Between Ellington Township section 32 and Concord Township section 8.
Concord Township between sections 1 and 18.
Gravel, screen, crush and load 4,200 cubic yards.
1-2 mile haul 35,100 units.

Section 4
Pit in NW 1-4 of Section 7-97-21.
Crystal Township E 1-2 of Section 1.
Between Crystal Township section 34 and Britt Township section 3.
Between Crystal Township section 32 and Madison Township section 8.
Madison Township between sections 7 and 8.
Gravel screen, crush and load 3,150 cubic yards.
1-2 mile haul 29,500 units.

Section 5
Pit in SE 1-4 of Section 27-96-26
Ortel Township between sections 5 and 6.
Ortel Township between sections 7 and 8.
Bingham Township between sections 9 and 21.
Bingham Township between sections 31 and 22.
Erin Township between sections 6 and 7.
Erin Township between sections 3 and 10.
Erin Township W 1-2 between sections 2 and 11.
Erin Township between sections 16 and 17.
Erin Township S 1-4 between sections 8 and 23.
Boone Township between sections 9 and 10.
Boone Township between sections 22 and 27.
Gravel screen crush and load 9,075 cubic yards.
1-2 mile haul 139,000 units.

Hancock County has six gravel trucks which may be used on this project thus reducing the total number of haul miles to be worked at the above office promptly after the time for receiving same has closed.

A certified check or cashier's check amount to five (5 percent) per cent of bid made payable to the County Auditor shall be filed with each bid, which in case of bidder receiving the award, should be held to execute a contract and file a bond within ten (10) days after the acceptance of his bid shall be retained by the county as liquidated damages.

The successful bidder will be required to file a bond for seventy-five (75 percent) per cent of the contract price executed by a responsible surety drawn to protect the County will be approved by the board of supervisors.

Bidders are required to file with the County Auditor, Contractor's Statement of equipment, finances and experience with their bid or prior to the time of opening of bids as by law provided.

Iowa State Highway Commission specification now in force including 1943 amendments shall be strictly complied with.

Bids and specifications for the work may be seen and may be secured at the above office or at the office of the County Engineer, Garner, Iowa.

The County reserves the right to waive all technicalities and reject any or all bids.

Work must be commenced by June 15, 1943, and must be completed by October 1, 1943.

The Clerk was instructed to notify Ell Township Trustees in regard to a fence in Block One Auditor's Sub-Division.
Meeting adjourned
A. J. KUDJE, Clerk

ORDINANCE NO. 36

AN ORDINANCE AUTHORIZING CENTRAL STATES ELECTRIC COMPANY OF CEDAR RAPIDS, IOWA, TO BE SUCCESSORS OF ASSIGNS, WITHIN THE TOWN OF KLEMMER, IOWA, TO CONSTRUCT, MAINTAIN, OPERATE AND REPAIR AN ELECTRIC LIGHT AND POWER PLANT AND SYSTEM FOR THE TRANSMISSION, DISTRIBUTION, USE AND SALE OF ELECTRICAL ENERGY, INCLUDING THE RIGHT TO BUILD AND OPERATE A HIGH POTENTIAL ELECTRIC TRANSMISSION LINE TO AND THROUGH THE TOWN.

BE IT ORDAINED BY THE TOWN COUNCIL OF KLEMMER, IOWA:

Section One
Permission and authority are hereby granted for a period of twenty (20) years from and after the acceptance of this Ordinance as herein provided, to Central States Electric Company of Cedar Rapids, Iowa, its successors or assigns, hereinafter called the Grantee, to construct, construct, maintain and operate a plant or plants for the production of electrical energy, enter upon the public lands, highways, bridges, and other public property of the Town of Klemme, Iowa, as the same are now or may hereafter be extended or located, and thereon thereunder and thereover construct to construct, maintain and operate a system of electrical transmission distribution and sale of electricity consisting of poles, wires, conduits and other construction necessary or incident to said system and its use including a high potential electric transmission line to and through the Town, and to sell and transmit electrical energy to the Town and its inhabitants for all purposes.

Section Two
This Ordinance shall be in full force and effect from and after the approval by the legal electors of the Town of Klemme, Iowa, at a special election called and held for that purpose, and the acceptance of this Ordinance by the Grantee in writing filed with the Clerk within thirty days from and after its approval at such election, and its publication as provided by law.
Passed this 12 day of April 1943

J. E. STILLE, Mayor

BOYS MAY ENROLL IN CLASS A 4-H PROJECT

See your local club leader of the County Extension Director for particulars. The class A projects are designed to give busy boys a part in the 4-H program. They include working with beef, swine, poultry, dairy herds on home farms.

Records must be kept and the member naturally must show where she has contributed to some increase in the war production on that particular phase of the farm operation.

Most of these class A projects are on a management basis and do not require ownership of the animals involved.

Home gardens are also included. A garden vegetable exhibit will probably be added to the 1943 4-H achievement show. So we will be looking for those prize carrots, tomatoes, beets, etc.

RENEWAL OF DRIVERS LICENSES TO BEGIN JUNE 7

Karl W. Fischer, Iowa Commissioner of Public Safety today announced that renewal of drivers licenses would begin June 7.

The Commissioner pointed out that the renewal fee is 75c and that the extension certificate which will be attached to the 1941-1943 drivers license will extend the current license until July 5, 1946. The Iowa Department of Public Safety will have on June 7, field clerks stationed in every county to accept renewals.

Those applying for drivers license renewals will be required to present a 1941-1943 license when making application for the extension certificate.

The current procedure as advised by the Drivers License Division for persons making application for renewal is:

Contact the field clerk and present your 1941-43 drivers license. Do not mail your drivers license and renewal fee to the state house. In the event that a person's 1941-1943 Drivers License has been lost, destroyed or stolen, the applicant must first make application for a duplicate license as extension certificates must be attached to the current licenses. Applications for duplicate licenses may be made at the present time.

Hancock County Board Proceedings

4TH ADJOURNED APRIL MEETING

Garner, Iowa,
May 17, 1943
The Hancock County, Iowa Board of Supervisors met in session on above date with E. J. Schoun, John Chambers and Penn Eckels, present.
The minutes of the last meeting were read and approved as read.
On motion and second a notice of warning to depart is hereby ordered served on Horace Elrick and Carmen Elrick.

Supervisor Schoun is appointed a committee to investigate and cause repairs to be made in DD No. 7, DD No. 37-39, DD No. 5, DD No. 102, DD No. 111, and DD No. 81.

Supervisor Eckels is appointed a committee to investigate and cause repairs to be made in DD No. 61.

Whereas Wm. Henschen, Engineer, has to report that the Florence Construction Company of Thompson, Iowa, has completed its contract for the clearing of the open ditch of lateral No. 20 of DD No. 3 and 4, Hancock County, Iowa, to the entire satisfaction and

WHEREAS there is due a final payment on said contract in the sum of \$522.14,
BE IT THEREFORE RESOLVED, that the report of the Engineer is hereby approved and a final hearing thereon be held at the courthouse in Garner, Iowa, on the 21st day of June, 1943 at 10:00 o'clock A. M. and the County Auditor be and he is hereby directed to give notice of such hearing as by law directed.

WHEREAS Wm. Henschen, Engineer has recommended the surfacing with gravel of certain Hancock County, Iowa roads, and has recommended a letting on the hauling and crushing of twenty-six thousand (26,000) cubic yards of gravel,
BE IT FURTHER RESOLVED, by the Board of Supervisors of Hancock County, Iowa, that a letting be held on the surfacing of certain Hancock County, Iowa roads with gravel on the 3rd day of June, 1943, at 3:00 o'clock P. M. The County Auditor be and he is hereby directed to cause notice of letting to be published.

The Board reserves the right to waive technicalities and to reject any or all bids.
On motion and second the Board adjourned to June 3rd, 1943, at 9 o'clock A. M.
ATTEST
FRED C. MISSAL, County Auditor
F. J. SCHOUN, Chairman

It usually pays to grind or crack wheat when it is fed to hogs, especially if it is to be hand-fed or used in mixtures. Where it is self-fed, it does not pay to grind wheat if the cost of grinding is more than 4 percent of the value of the wheat.

THERE'S PLENTY OF CEMENT You Don't Need a Permit

FOR CONCRETE IMPROVEMENTS ON FARM AND IN THE HOME

- AMERICAN PRODUCTION OF CEMENT is so abundant that there's more than enough for war needs and your needs too. We can sell and you can buy all the cement you need for property improvements without a permit, provided that your total building costs does not exceed the \$1,000 limit of U. S. regulations.
- YOU CAN ADD CONCRETE FEEDING FLOORS to your buildings for housing more stock and poultry, increasing milk and egg production.
- COME IN SOON AND TALK OVER your Building Problems and Needs with us . . .

and testing laboratories.

Pershing's Auto Number

Routine disclosure that Army

Registration No. 17-561 has been is-

sued to a light sedan assigned to

the 503rd Parachute battalion at Fort

Benning, Georgia, recalls that that

was the number of the car used by

Gen. John J. Pershing as command-

er of the A.E.F. in France almost

a quarter of a century ago.

The big locomobile limousine

which he used in France is now in

the museum of the Holabird quar-

termaster depot. After the World war

the car turned up in Washington in

1922. Two years later it was at

Holabird, then returned to Washing-

ton where it was used by the quar-

termaster corps. In 1927 it was

again returned to the Holabird de-

pot, where it stands in the museum.

These mobile surgical or dental

units are hauled to their destination

and the trucks released for other pur-

poses. They cost from \$1,200 to

\$3,000 and weigh from 1½ to 3½

tons. You can help pay for them

U. S. Treasury Department

War Plant Guards Being

Aided by Clever Robots

Tiny robot sentries, many times

more efficient than men in storm,

fog and darkness, are now aiding

human guards along the miles of

high wire fences that enclose some

of the country's greatest war-pro-

duction plants.

Six months of tests under every

conceivable condition were said to

have proved the new sentry system

to be the most efficient yet devised,

with the robots "hearing" even the

whisper of a person, the snap of a

wire-cutter or the sound of a pick,

and relaying these warning sounds

instantly to the human watchman at

his post or to a central guard sta-

tion inside the plant.

Engineers said that the "acoustic

fence" apparatus, as it is called,

has the effect of multiplying by

many times the number of guards

on duty in adverse weather and at

night. During heavy fog, blackouts,

and night storms visibility is often

zero and guards would have to be

placed almost elbow to elbow to

provide absolute protection along

fences that often are 15 to 20 miles

long.

But the robot sentinels can keep

an alert 24-hour watch over every

foot of fence, regardless of weath-

er, enabling the human guardsmen

to hear what is going on for blocks

or even several miles along the

fence line, and to tell instantly the

location of any disturbance. Actual-

ly the fence itself serves as the ro-

bot's ears, capable even of over-

hearing voices speaking in whispers.

Celebrated Italian Tenor

Lived in Two Centuries

Giovanni Battista Rubini was a

celebrated Italian tenor, born at Ro-

mano, near Bergamo, Italy, April

7, 1795. His father, a music pro-

fessor, was anxious that the boy

be a musician, and at the age of

eight young Giovanni sang in church

choirs and played the violin in an

orchestra. He continued concert

work, his first important concert

being at Naples, but his career prob-

ably dates from his first appearance

in Paris in 1825.

Between 1831 and 1843 he sang

either in England or Paris, and in

1843 he began a tour with Liszt

through Holland and Germany. Af-

ter they separated at Berlin, Rubini

went on to St. Petersburg where

the Emperor Nicholas made him

director of singing in the Russian

dominions and conferred on him the

rank of colonel. He retired in 1844

to a home he had purchased near

Romano and when he died there on

March 2, 1854, he left a great for-

tune accumulated from his operat-

ic career.

Police Shows Courtesy Pays

Police officials of Detroit, Mich.,

believe courtesy on the roads and

the absence of traffic cutting and

racing reduce accident rates sub-

stantially, so they are putting into

practice an idea that a ticket of re-

ward should be given courtesy driv-

ers—and by the same traffic "cops"

who ticket their erring ways.

During the few days the tickets

of reward have been issued, they

have been presented to a milkman

who stopped his truck to help a

confused, elderly lady from the

middle of the street; a driver who

helped push a stalled automobile to

the curb after it had stopped for a

red light; and two small boys who

got off their bicycles at busy inter-

sections and pushed them across the

street on the outside of pedestrian

traffic.

While the plan still is in its in-

fancy, the police department hopes

that a system may be developed for

keeping a record of courtesy cita-

tions, and that eventually windshield

stickers will be used to identify care-

ful and courteous drivers.

Decline in Castor Bean Growing

The castor bean plant, from which

we get castor oil, is not a legume, as

many suppose. Although the plant

grows wild and is cultivated in trop-

ical and subtropical countries, it is

cultivated also in the warmer parts

of temperate zones. The plant has

been grown in this country for more

than a hundred years but became

an important commercial crop only

in certain sections of Oklahoma,

Kansas, Missouri, and Illinois in the

latter part of the 19th century, from

1860 to 1900. Since that time, how-

ever, the industry has declined and

practically has been abandoned in

this country. This decline has been

attributed chiefly to the reduction in

price caused by the importation of

large amounts of cheap castor bean

seed from other countries, especial-

ly from India, China and Brazil.

Pots, Pans

A private at famed Kelly Field re-

cently learned that all generals don't

wear stars.

On orders from his first sergeant,

the dazed private walked into head-

quarters and proudly strode up to

the sergeant major.

"I am to report to General Mess

at once," he said with an embar-

rassed importance. The sergeant

major looked at the young man and

then with a smile in his eyes, hum-

bly told him he could find the "gen-

eral" in the main dining room of

the new barracks.

With even more dignity and proud-

ness, the private made his way to

the dining hall, only to see his castle

tumble into a litter of pots and pans.

He was to start a week's tour of

kitchen police, the dining hall and

kitchen being called "General

Mess."

Cotton Research

Botanists at the University of Tex-

as are engaged in a form of research

which may, they hope, result in vast

benefits to cotton growers. This de-

partment has over 20,000 cotton

plants, and an effort is being made,

through cross breeding, to produce

cotton with superior fiber and per-

haps resistant to root rot and other

diseases. They are also working

along lines which they hope will

result in finding a cotton which re-

quires a minimum of moisture. Sur-

veys of national textile mills have

been made and the type of machin-

ery used noted with a view of de-

vising improvements or new ma-

chines which will produce finer

goods at less cost.

Meteorites Are Result

Of Planets Exploding

Our solar system had two addi-

tional planets until about 100,000,000

years ago. They exploded about that

time, scattering their material

through space, and the earth is now

collecting samples of what they

were made of in the form of meteor-

ites. The meteorites are the pieces

of stone or iron, or both together,

that reach the earth unconsumed

when a "shooting star" passes

through the atmosphere.

Dr. William D. Urry of the de-

partment of physical chemistry,

Massachusetts Institute of Technol-

ogy, informed the American Assoc-

iation for the Advancement of

Science at its recent summer meet-

ing that he had calculated the age

of 25 meteorites by measuring

their content of uranium and helium

and found that the ages ranged from

100,000,000 to 2,900,000,000 years,

with most of them over 1,000,000,000

years.

Using various astrophysical argu-

ments the conclusion is reached,

said Dr. Urry, that these meteorites

are the debris of two planets of our

own solar system that came to grief

within the last 100,000,000 years.

The asteroids, extremely small

planets, which number several thou-

sand and go round the sun in orbits

between those of Mars and Jupiter,

are believed to be the remains of a

former large planet. Some astron-

omers have sought to arrange the

asteroids into groups having com-

mon properties, and one believed he

detected three groups with some-

thing in common in the elements of

their orbits, indicating that there

originally may have been three

planets in this space.

Parasite Wasp Shows

It Knows a Thing or Two

Female insects of at least one

group can regulate the sex of their

offspring. Entomologists of the

United States department of agri-

culture find that a parasitic wasp

brought here from the Orient 15

years ago to help control the Jap-

anese beetle varies the treatment

of her eggs according to the size of

the host on which she lays them.

She withholds the sperms that in-

sure a female hatch from eggs de-

posited on the relatively small

worms—beetle larvae—that have

moulted only once to enter the stage

known as the second instar. Nearly

all the young wasps from these eggs

are males. The hatch from eggs

laid on the larger, third-instar lar-

vae, however, is preponderantly fe-

male.

To prove that the female wasp

(Tiphia popillivora) fixes the sex of

her progeny when she deposits her

eggs, the entomologists transferred

eggs laid on second-instar larvae to

third-instar larvae and those laid on

third-instar larvae to second-instar

larvae. Mostly males hatched out

on the third-instar hosts and mostly

females on the second-instar hosts.

War and Womens Clothing

What effect will the exigencies of

war have on the American woman's

wardrobe? For one thing, women

will undoubtedly wear simpler, more

tailored costumes, believes Mrs.

Louise Pinkney Sooy, University of

California associate professor of fine

arts and instructor in costume ap-

preciation for the University's Ex-

tension division. "Another result

that is already becoming apparent

is the simplification or the elimina-

tion of costume accessories. For

years we have dwelt upon the im-

portance of correctly matched, im-

peccable accessories for a costume.

Now suddenly, with the new sim-

plicity wrought by wartime activ-

ities and lack of materials, we find

that they can more or less readily

be dispensed with. No longer will

we insist upon the matching gloves,

bag, shoes, and hat, with severe at-

tention to detail."

Our Air Mail Observes Its 25th Birthday

By ELMO SCOTT WATSON
Released by Western Newspaper Union.

YOU lived on the Atlantic seaboard and you wanted to send a letter to a friend out on the Pacific coast. So you put a two-cent stamp on it, dropped it in the mail and about a week later your friend was reading what you had written.

That was back in 1918.

Today you put a six-cent (air-mail) stamp on your letter and the next day the postman hands it to your friend.

And that, in brief, is the modern version of Aladdin and his magic carpet which has become such a commonplace that we accept it as a matter of course and never give it more than a passing thought.

But Uncle Sam thinks we shouldn't take it so casually. So this month, even while he's busy fighting a global war, he's putting on special ceremonies to honor the 25th anniversary of regular air mail service and he's signed up a number of pioneer air mail pilots, army and navy aviation leaders and others prominent in aviation development, to help him in this nation-wide celebration.

It all began back in May, 1918, when a group of World War I pilots, sitting in the open cockpits of Liberty-powered DeHavillands, began flying the first scheduled air mail service between New York and Washington. Today, as the nation observes the 25th anniversary of that event, air transportation is accomplishing a job which, even two years ago, would have seemed impossible to its most enthusiastic advocates. The 218-mile air route between New York and Washington, which in two decades and a half has developed into respectable proportions as a passenger - mail - express network within the continental United States, and to foreign lands, suddenly has become a vast system of scheduled and unscheduled lines sprawling all over the face of the globe.

Of course, there were demonstrations of the possibilities of delivery by air even before the 1918 New York to Washington venture, such as that of Pilot Earl E. Orvington in carrying letters between Mineola and Long Island, N. Y., away back in 1911. But 1918 is now recognized as the real "birthday" of air mail. For it was in that year that the post office department inaugurated the service in co-operation with the war department which supplied planes and pilots.

President Woodrow Wilson was on hand with a large crowd which saw the start of the service from Washington's Potomac park on May 15, 1918. So successful was the experiment that the post office department began making plans for transcontinental air mail service. It was logical that it should project this route in the air over the mid-continent pathway which had been used by the early explorers on foot, the covered wagon, the Pony Express, the stage coach and the first transcontinental railroad.

The Chicago-Cleveland leg of the route was opened May 15, 1919; the Cleveland-New York section a month and a half later, on July 1; the Chicago-Omaha on May 15, 1920; and the Omaha-San Francisco on September 8, 1920. Thus, in a little over two years air mail began winging its way from coast to coast. True, it had to depend part of the way on the railroad, for the mail was carried by plane only in daytime and then transferred to trains at night. But, even so, it cut down the travel time for letters to approximately three days.

Looking at this plane-railroad arrangement, air mail pioneers said "We can't let air mail grow up with one foot on the ground!" So a group of volunteer post office pilots determined to prove the effectiveness of all-air schedules from the Atlantic to the Pacific. On February 22 and 23, 1921, they celebrated George Washington's birthday by making the first through day and night flight from San Francisco to New York. That paved the way for the lighting of the transcontinental airway which made night flights of mail planes possible and by July 1, 1924, regular day and night service had been inaugurated.

A milestone in air mail history was the transfer of operations from the post office department to private companies in 1926 and 1927. Having proved the practicability of scheduled air mail service, the post office department began turning over routes to private contractors on open, competitive bidding. Predecessor companies of the present-day United Air Lines - National Air Transport on the Chicago-New York

THEN—This DeHavilland was built for the First World War, became a mail plane when the post office department started the first coast-to-coast airway in 1920. Equipped with a 400-horsepower Liberty motor, it carried its pilot and up to 400 pounds of mail at a cruising speed of around 100 miles an hour. It was an open cockpit job—as was the ancient Model T in the background!

NOW—This United Air Lines Mainliner, with its two 1,200-horsepower Pratt and Whitney Wasp engines carries two pilots, a stewardess, up to 21 passengers, baggage, and approximately 2,000 pounds of mail and express at a cruising speed of 200 miles an hour. It flies coast-to-coast overnight.

section and Boeing Air Transport on the Chicago-San Francisco section—took over operation of the nation's first coast-to-coast airline, the pioneer mid-continent route.

Build Special Planes.

Having won their new air mail contracts, the newly formed air mail lines tackled the job with determination and energy. United's predecessor, Boeing Air Transport, for example, built an entire fleet of 25 special mail planes in just 150 days.

THEN—E. Hamilton Lee was one of the original post office department pilots on the New York-Washington air mail route.

NOW—Capt. E. Hamilton Lee is dean of all air mail pilots with a record of 3,500,000 miles of flying. He now flies the San Francisco-Los Angeles section of United's Pacific Coast airway—sometimes accompanied by his son, Robert E. Lee, who is a United co-pilot.

to handle the San Francisco-Chicago operation. In these days of mass airplane production, that doesn't sound so startling, but it was a genuine achievement 16 years ago.

Developments on old "U. S. Air Mail No. 1" between New York and the Pacific coast were rapid. The sturdy single-engine mail-two passenger Boeing 40s which began the service were replaced by 12-passenger tri-motored Boeing 80s. On the Chicago-New York route of National Air Transport, tri-motored Fords made their appearance. Through connections of the two companies, multi-motored coast-to-coast transport service was established, also

T.A.T. soon inaugurated its coast-to-coast rail-air trips.

Among the air mail companies were several no longer in existence, including such companies of the past as Clifford Ball, Inc., Stout Air Services, Universal Air Lines, Interstate Airlines, Gulf Air Lines, Maddux Air Lines and Standard Airlines. Most of these companies became parts of larger group systems. The start was made in the grouping of routes and companies which resulted in American Airlines, TWA, Eastern and other present major companies. Pan American got its start as the world's greatest overseas operator by flying from Miami to San Juan, Nassau and Havana.

One of the greatest technical developments was the adaptation of radio to airplane use. "Father" of this far-reaching project was the late Throp Hiscock of United Air Lines, who insisted that two-way radio-telephone communication between planes and ground stations could be effected. Through his efforts, installations of two-way radio-telephone equipment proceeded on a large scale in 1929. Pilots and ground stations were linked by voice communication to the everlasting benefit of all scheduled air transportation.

Other aids were summoned to add to the efficiency and reliability of mail-passenger-express schedules. Weather reporting services were improved, the radio range came along with its provision of an "aerial highway," planes themselves became more efficient. The Boeing 80s, after five years of meritorious service, gave way to the Boeing 247s of United Air Lines, first all-metal, low-wing, twin-engine transports in the country. These 10-passenger, three-mile-a-minute planes revolutionized air transportation, introducing new factors of speed, comfort and all-around efficiency. Travel time from coast-to-coast was cut to 19½ hours.

Coast-to-Coast Overnight.

Then came the Douglas DC-2—the speedy Lockheed and later Douglas DC-3s and the Lockheed Lodestars again to spell big gains in speed, comfort and efficiency.

By the mid-1930s, air mail had become a habit with a large part of the American public. Business and industry had come to rely on its speed. Air mail poundage had increased year by year, even as air mail rates had gone down. As against the 217,000 pounds carried in 1926, 7,400,000 pounds were carried in 1934. Air mail pound miles performed by the nation's airlines rose from 6,280,000,000 in 1931 to 22,293,000,000 in 1941. Meanwhile, air mail postage had dropped from 10 cents for one-half ounce or fraction thereof in 1927 to a flat six cents per ounce for the transportation of a letter from any place to any place in the United States.

Starting from the keystone of air mail, there has been built under private enterprise in this country the world's greatest air transport system. And that's one of the reasons why Uncle Sam looks back so proudly over his air mail's epic achievement in the relatively short time of a quarter of a century!

AID TO RUSSIA

It is now permissible to reveal that several months ago about 300,000 tons of shipping were tied up in the Persian Gulf waiting to be unloaded.

This represented a super attempt to aid Russia, and although some ships were tied up for weeks, it was not the fault of the War Shipping administration or the army. This was an attempt to show good faith to Russia when she was under terrific siege, when the battle of Stalingrad was in the balance.

In some cases ships rode at anchor 50 and 60 days in the Gulf of Persia, waiting to unload, their crews idle.

Basic reason for this delay is that port facilities along the Gulf of Persia are backward if not medieval. There were no modern docks or cranes, and to unload locomotives without cranes is almost impossible. Also the railroad running north from Basra to the Caucasus is a meandering affair, never completely finished, originally built to reach the Shah's hunting lodge rather than port facilities on the Caspian.

Very little had been done by the British to improve this line, until American engineers got busy. Even before Pearl Harbor, when we first started sending aid to Russia, American railroad men were rushed to Basra. But it was a tough job, and was still unfinished last fall and summer. At that time the Nazis were knocking our Murmansk convoys off Norway into smithereens. So, to keep faith with Russia, ships were piled into the Gulf of Persia.

Today the situation, though still difficult, is greatly improved. In fact, hard-hitting Lew Douglas, dynamo of the War Shipping administration, has pepped up unloading facilities in India, South Africa and other bad bottlenecks where previously U. S. ships had to wait three and four weeks to unload.

WORRIED OVER RAILROADS

Certain Washington officials acquainted with railroad operation are worried about temporary breakdowns of the transportation system, and consequent serious delays in moving war materials.

While it is admitted that the railroads are doing a "grand job," there is no overlooking the fact that the burden is proving too heavy.

Most serious is the situation in westward freight traffic. The country's railroads were built with the idea of moving traffic eastward, with bigger facilities as traffic moves east. But today, with a Pacific war to supply, the westward movement is greater than ever.

Breakdowns have occurred on single-track western lines, requiring re-routing in a circuitous manner, with delays of days and weeks in some cases. A transcontinental freight movement which once was accomplished in five days is now requiring ten and fifteen.

The remedy seems to be an increase in the centralized control of traffic. This smells like government operation, from the railroads' point of view, and they shy away from it. But officials in ODT who have no railroad connections regard such control as necessary for the wartime job.

Note: The burden for meeting these problems falls on the shoulders of V. V. Boatner, director of the division of railroad transport in the ODT. Boatner has now shifted to a "without compensation" basis so he can act as consultant for the railroads and be paid by them, while still officially working for the government.

FARMER CHENNAULT

Freshman Rep. Charles E. McKenzie of Louisiana expected to get a first-hand report on the war in the Far East when he shook hands with his most distinguished constituent, Gen. Claire Chennault, leader of American forces in China, who is visiting in the United States.

But the "Fighting Tiger" almost fumed McKenzie by inquiring: "How's farming down home? I can't wait to get back to my plantation." McKenzie replied that he had just returned from Louisiana, that farmers in his district were doing "very well" considering the shortage of labor and machinery.

"Did you see my place in Concordia Parish?" asked Chennault anxiously.

"You bet, General," replied McKenzie, "and I can report that it is one of the most beautiful and best regulated plantations in Louisiana. I'd like to live there myself, on the banks of Lake St. John."

Note: While Chennault is at war, his Louisiana farm is being managed by his wife and children.

MERRY-GO-ROUND

The carpet in the state department reception room, where Secretary Hull holds press conferences, is bordered with swastikas.

William B. Lewis, chief of OWI's radio bureau, resented "Time's" calling him "smooth, dapper," and one of the "soap salesmen" in OWI. He called "Time's" Washington bureau threatening to write letters of protest to important people. "Write one to us," said Felix Belair Jr., head of the bureau, "if it's good, we'll print it."

THINGS I NEVER KNEW AND STILL DON'T:

(Impersonating a Congressman, eh?)

That there is allegedly a law in Arkansas which permits a married man to whip his wife once a month . . . That manufacturers are experimenting with undergarments (for milady) made of paper . . . Whether you know that plane propellers get tired the same as you. After about 5,000 flight hours they get what is called "metal fatigue." (Read Winchell and become a Quiz Kid!)

That a recent scientific study disclosed that women talk about men, clothes, social affairs. Men talk about business, recreation, women . . . That critic George Jean Nathan says companionship is a matter of mutual weaknesses . . . Why people over here squawk about two meatless days a week (in New York, anyhow) when Switzerland, which is not at war, has three . . . That we have had only one left-handed President (Garfield).

That Emily Post, the etiquette authority, says it is all right for a woman war worker to thumb a ride to work from a gentleman motorist, if she displays her identification tag, if the motorist is driving past the plant and if the conversation is impersonal. Hey, Emily! They're not going to a tea party—it's a TNT party . . . (Now, no copy-cattling, Mr. Levant!)

Whether you've heard the one about the Jap warship that intercepted and destroyed five American torpedoes . . . That the sky isn't blue at all. Explorers of the stratosphere report that it really is deep purple . . . At Chinese funerals the guests are given kerchiefs to weep into . . . That a clock which throws its shadow on the ceiling has been invented for hospital patients.

That Whistler, the famed painter, tied his forelock with a white ribbon, (tee, hee) . . . That there are orange, cream-colored, pink and yellow bananas that taste like peaches, apples, pears and roses . . . That radio short-waves may be used for cooking food on ice . . . That you can live on ordinary grass, which contains all the vitamins you need . . . You cannot hide your strong emotions from your fingers, which get cold when you're in a dither.

That, according to Prof. Warren C. Middleton of DePauw U., six out of ten people do their dreaming in technicolor, and gals have more technicolor dreams than men. (How do I screen, Toots?) . . . That if you have snapshots or pictures of any scenes in Europe, Africa, Asia and the Far East, send them to Army Intelligence, War Dep't, Washington, D. C. You may be able to shorten the war . . . That BBC has a most effective propaganda weapon. It broadcasts to Germany—recordings of Hitler's own speeches to remind his people of the extravagant promises he made.

That Sen. Soaper, the wit, describes an American as one who cheerfully responds to every call—from buying bonds to giving his blood—except to move back in a bus . . . Whether you've heard Bob Hope's swlegant crack about Irving Berlin: "Now that Berlin is in the army, we hope it isn't long before the army is in Berlin!"

That glove makers are experimenting with a new type of glove that can fit either paw—for the benefit of glove-losers. (Ho, hum. Glove will find a way! Who threw that?) . . . That in Denver, they have a law (Oh, I read it!) which prohibits anyone from photographing a woman in a bathing suit without her consent.

That at least nine out of ten Americans do not know what the three-word slogan on all U. S. war bonds is. (It's "America on Guard," and ain't you ashamed?) . . . That Wilfred Funk, the word authority, says the saddest word in any language is "forgotten"—the most beautiful is "love" and the coldest is "no."

How many of you know that Chris Columbus had a wife and that her name was Felipa Moniz de Perestrello? A Portugal who wed him 15 years before he married America . . . That Montgomery's Eighth army includes Nepalese, Poles, Greeks, Frenchmen, Arabs, Austrians, English and South African Dutch . . . That an example of super-acting was the way Duse could actually blush—on cue!

That in a tiny town called Matagorda, Texas (pop. about 700), all activity and business stops for five minutes at 11 a. m. every day—when they pray for the end of the war . . . That the mayor of Ashland, Ohio, has designated every Thursday for the "durationing" as "Beefless Day." It is unlawful there to complain, grumble or "beef" on Thursdays . . . That in Australia they are now rationing adjectives. Advertising copy there must not use wordage like glamorous, exciting, exclusive and lovely.

Uncle Phil Says:

YOU can't make footprints of time by sitting. "Vision" is what some people have when they guess correctly. A go-getter is a person to try anything twice.

Most of us say that money doesn't bring happiness. Then draw a long breath and chasing after money again. What some motorists don't know driving would fill a hospital. The darkest hour is never than 60 minutes.

Practice makes perfect—practice what you preach.

YOUR looks better grown. Moroline Hair Tonic. Gives lustre. Big. ALWAYS only 25c. Sold every.

Money for Clay. Earning money isn't enough only buys some of the things which we mould our lives. Bainter.

MEAT PATTIES. ALL-BRAN MEAT GO FURTHER.

Are you looking for ways to "beat the meat supply"? Then try the delicious recipe for All-Bran Meat Patties! They are made with KELLOGG'S ALL-BRAN—which adds delicious crunchiness to the meat with all the valuable vitamins, minerals, proteins and carbohydrates found in ALL-BRAN.

Kellogg's All-Bran Meat Patties. 1 egg, 2 teaspoons salt, 2 teaspoons pepper, 2 tablespoons minced onion, 1 tablespoon chopped onion, 1 cup milk, 1/4 cup oil, 1 cup Kellogg's All-Bran. Beat egg slightly, add salt, onion, parsley, milk, catsup. All-Bran. Let soak until mixture is taken up. Add beef thoroughly. Shape into 12 balls. Bake in hot oven (450°F) 15 minutes or broil about 20 minutes. Yield: 6 servings (12 2 1/2 inch patties).

NAVAL OFFICE UNIFORM.

Iowa's exclusive Dr. Orator, appointed by U. S. Navy. Uniform—prices established by the U. S. Navy. Dress Blues, Raincoat - Overcoat with removable wool lining, Cap (complete with white cover). Phone for Appointment. BREMER IOWA CITY, IOWA.

Fixed Price for West Africa, the price of a fixed at \$60.

RASHES. RELIEVE the stinging itching irritation, and thus quickly begin to use soothing Resinol.

RESINOL.

SNAPPY FAC. RUBBER.

Neither South American nor rubber nor expensive. Guayule Cryptogamic and other rubber-bearing shrubs. Production will produce many more years, according to government agencies.

In 1941, 86 per cent of all Americans was in cars.

No gas! No car! Ben on plane driving brought a drop of 50 per cent in the price of gas on the streets of New York. Jay workers had a holiday. Automobile deserted roads.

Five in a car instead of just driver and one passenger. 8 tires are saved, if the average three cars to five per plant is considered. The annual saving is \$100,000,000. 22 million in 8 tires is enough for 22 million for life rafts and rubber for 8 plane crews.

In war or peace.

B.F. Goodrich.

FIRST IN RUBBER.

15,000 TONS OF AIR MAIL—It is estimated that the commercial airlines of the United States will carry 30,000,000 pounds of air mail during 1943. Here's a part of it being loaded into a coast-to-coast Mainliner.

Summer Prints Tell Exciting Tales of New Style Technique

By CHERIE NICHOLAS

TIME designers are handling prints in such artful and unique ways that the entire print problem is excitingly new interest. Content with simple regulation patterns, fashionists are playing for drama in working with the new prints. One way of doing this is to team a vividly colorful print with black jersey so as to give accent to the colors by way of contrast to the dull black. It is the method of styling which gave the group the stunning yet casual dress shown to the right and illustrated above. Here the mermaid print is combined with black wool jersey with a yoke that fascinates. It is a one-piece dress with a modified dirndl made of a gorgeously colorful patterned in sea-blue and pink. The top and the set-in sleeves of the sheer black wool jersey felt tam is worn pitched forward on the head in the latest manner. The striped blue and white is also very new, for according to fashion's latest whim a neck-some sort or other really is the worn.

Let our statement that the given to prints this season is an excitingly new story, take a look at the gown centered in picture. The intriguing feature of this charming flower-patterned one-piece done in lime and black is that the yoke and sleeves are crocheted. The sweet neckline here achieved is especially flattering. If you are your dressmaker and can crochet, it is a line of thought to follow up. Crochet is giving smart

Oval Necklines

new are the deep oval necklines and rippling cape sleeves on after-five frock which uses fine rayon sheer molded on reed-lines for grace and chic. It is of this definite simplicity that the newest this season. This type of foretells what is to be in coming months in the way of necklines and brief sleeves that feminine charm their appeal.

accent to many a costume this season. Two styling details are the clever draping of the bodice and the subtle front fullness of the skirt. The belt of lime and brown velvet blends with the general color scheme. Ideal as a top-off to the dress is the lime-colored flower pompadour hat.

Speaking of contrasting yokes which are so definitely in the mode this season, a yoke added to a simple print frock will give it an extra dash of feminine prettiness. In the neck-wear departments you will discover the loveliest and damiest embroidery and lace yoke-collars this year. Those with the low-cut necklines are the most flattering. It's the simplest thing imaginable to baste one of these lingerie yoke collars. After you have it exactly where you want it, stitch it firmly to the print dress. Then from underneath cut away the print and you will have a perfectly "darling" little frock that cost little but has the exclusive look of the new, lace-yoked versions being shown for summer in the better shops.

White blocks on a navy background in symmetrical design make the smart print for the dress worn by the figure seated to the left. This "something different" treatment of small motifs with large takes all the monotony out of both checks and polka dots in the newer versions. The varying sizes give a feeling of border prints such as offer endless possibilities to designers working with these new prints. The dress pictured has different sizes of the blocks on the skirt and bodice with larger blocks at the skirt hemline. The two breast pockets also stress the larger blocks. So much is being done with black and white this season, and with navy and white. The smartest new white accent given to summer costumes is that of wearing a white jacket (satin or flannel) topped with a sprightly little white hat.

Released by Western Newspaper Union.

Bows May Turn Up Almost Anywhere!

Bows are likely to appear in the most unexpected places on suits or coats, blouses or dresses. If you ask your salesperson to show you a "bow suit" you will most likely be shown such unusual modes as strictly tailored classic wool suits with a huge bow here and a huge bow there of wide grosgrain ribbon. Gives the feminine touch with emphasis!

When in doubt, "use a bow" is a timely message to the home sewing woman who feels an extra touch is needed to give the garment she is making swank accent.

A coat dress that fastens to one side takes on intrigue when the lap-over is bordered with a ribbon band along which, placed at intervals, is a series of butterfly bows made of the same ribbon as the banding. Velvet ribbon works out beautifully used in this manner on a gay print coat dress.

'Junior Miss' Goes to a Party in Dainty Cotton

When one comes to discussing junior evening cottons she enters into a fascinating realm. Now that cottons are the smart thing to wear morning, noon and night, juniors will be looking too pretty for words at parties in their dotted swisses, dainty dimities, printed cotton sheers, ruffled organdies, lace-trimmed and embroidered piques, flowery glazed chintzes.

The off-shoulder line is a favorite this season. Pretty as a picture is a frock of red-on-white dotted swiss, the skirt floor length and bouffant. There is a high midriff girdle, and the off-shoulder neckline is formed of a ruche of the dotted swiss edged with tiny red rickrack.

Gold, Diamonds

By Stanley Ross

(WNU Feature—Through special arrangement with The American Magazine.)

I had been a news correspondent in Caracas, Venezuela, for two months when I determined to see the Gran Sabana, scene of a gold and diamond rush as colorful as California in '49 and as tough as the Klondike.

Germany and Japan need diamonds desperately. They are a vital war necessity for a hundred important war purposes, including drawing wire, cutting, drilling and for parts in precision instruments that must not wear down.

Until two years ago the Axis got diamonds from Brazil and Venezuela through LATI, the Italian air line. When LATI was suspended, U-boats took up the job. You can hide a million dollars worth of diamonds in your wooden leg.

I engaged passage for the Gran Sabana (the great plain) on the plane for Santa Elena, its only settlement.

"You are lucky you can fly there," the agent told me. "You will reach it before dusk. If you went by land it would take six weeks."

The Gran Sabana is separated from the rest of Venezuela by one of the most desperate jungles in the world and by a vast series of sheer cliffs, rushing streams and waterfalls. Until five years ago it was known principally through Conan Doyle's "Lost World." Recently, because of the wild treasure hunt, the Venezuelan government extended daily air-freight service to the newly created village of Santa Elena, near the ranch of Dr. Lucas Pena, the territory's sole white settler.

Fly Over Jungle.

We flew over the jungle and the huge sheer cliffs, circled the settlement, and landed. I had expected no style or comfort, and I wasn't disappointed. Santa Elena is 70 palm-thatched huts made of mud, in which 500 persons exist.

I had a letter of introduction to a diamond dealer, but he was away, and so I went to stay with Dr. Pena. It fits the wacky history of this region that the first man to discover this immense alluvial wealth will have no part of it. Even today, Dr. Pena ignores the gold under his dining-room floor and a rich diamond deposit on his ranch.

Early next morning, accompanied by three tough hombres, I started along the twisty, tree-covered, muddy route to the mines. When I reached the diggings, I found that the diamond mines are a collection of holes out of which men drag pay dirt to sluices in the streams. The living accommodations are rudely thatched, wall-less shelters, with hammocks hung so close the men are warmed by the heat of one another's bodies.

Only Place in World of Its Kind.

The Gran Sabana fields are the only place in the world where diamonds are found in pure jungle. Before a miner begins digging he must fell the huge trees and hack away the brush with his machete. The miners work in pairs, threes or fours, digging down 6 to 25 feet until they reach the diamond-bearing gravel, and then sluicing it with primitive troughs and pans.

If a miner puts in a full day's work he can usually average three or four small stones a week. A one-carat stone might be worth \$30, depending on its quality. A two-carat stone is worth about \$100. An eight-carat stone is worth about \$1,000.

I stayed at the mines three days, paying prices that make a New York night club look like a bargain basement. Cigarettes were \$2 a package, eggs \$8 a dozen, chickens \$11 each, apples \$1 each. The difficulty of transportation causes the high prices. Everything comes from Tumaremo to Santa Elena by air at 30 cents a pound. After passing through several money-making hands it must be carried burro-back or human-back, to the mines.

When I first heard about these prices, I wondered how the miners ate. They don't. They starve until they strike it rich, then head for Ciudad Bolivar or Caracas, blow the works and borrow passage back.

Except Dr. Pena, every one of the men and women who endure the hardships of the Gran Sabana is crazed with the lust of riches.

Thirty years ago, at 18, Dr. Pena came to Ciudad Bolivar, seeking latex. In the jungle he drifted away from civilization; adventure and life for life's sake became more important to him than money. He worked his way somehow to the Gran Sabana. A tribe of friendly Indians welcomed him and helped him build his home on the hill. There was a great feast when he married an Indian maiden.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

PETER'S COUNSEL TO SCATTERED CHRISTIANS

LESSON TEXT—1 Peter 1:1, 2:11-25.
GOLDEN TEXT—Honor all men. Love the brotherhood. Fear God. Honor the king.—1 Peter 2:17.

Persecution for Christ's sake has been the lot of believers from the first century down to 1943. Sometimes it has been official, but more often unofficial, yet nonetheless severe and trying.

The manner in which Christians face their difficulties is one of the best testimonies to the reality of their professed faith. Sometimes, however, in the midst of their trials the enemy of their souls brings discouragement—and then they need the counsel and encouragement of others.

Such was the situation when Peter addressed his first epistle to the early believers who were scattered abroad (1:1). His counsel was just what they needed, and is equally helpful to us. They were to be

I. Separated As Pilgrims (1:1; 2:11, 12).

Christians are in this world but not of it. They are passing through, wayfarers on their way to the eternal dwelling place of God. That does not mean that they are not interested in the welfare of those round about them, or delinquent in sharing the responsibilities of life, but it does mean that they are to have the pilgrim's detachment from the things of the world and the flesh.

In the days of Peter, membership in the church was not considered a normal or respectable thing. It marked a person as belonging to a hated sect, one which was falsely accused of many evil deeds. For example, Christians met at night, men and women together for communion service. Because they spoke of this as a "love feast," they were accused of immorality, and because they spoke of the body and blood of Christ they were said to be eaters of human flesh.

Christians must meet such malicious reports. How? By silencing their accusers by their good works.

II. Submissive As Citizens (2:13-18).

One of the hallmarks of Christian character is willing and gracious recognition of proper authority, whether it be in the state, in the place of employment, in the school, or in the home. He does this for the Lord's sake (v. 13), and even when that authority is in the hands of an unreasonable man.

This does not mean that the Christian is to encourage or countenance tyranny and oppression, but that he is loyal to the state and to his employer, even though the present representative be a hard, unjust man. In all well ordered society there will be proper and effective means to correct injustice. But in and through it all the Christian shows his faith by his behavior.

Observe that government, in the plan of God, is for the purpose of keeping order, encouraging the good, and punishing the evil (vv. 13, 14). The powerful influence of the Christian Church should keep it in that right channel, or bring it back if it has strayed. Always loyal and obedient, the believer should use his ballot and his personal influence to establish and support good government.

III. Suffering As Christians (2:19-25).

Christ is our "example" (v. 21). Since some have interpreted this word and the statement "that ye should follow in his steps" as indicating that we are saved by our imitation of Christ, it is well to point out that this would be quite impossible. We would have to begin where He began—He was without sin (v. 22). But we have all "sinned and come short of the glory of God" (Rom. 3:23). We need a Saviour—not an example as far as redemption is concerned.

In the ever present problem of suffering, we as redeemed ones do have Christ as our example. He who was sinless and without fault bore the shame and suffering of Calvary without complaint. When He was reviled He did not retaliate, when He was hurt He did not threaten revenge (vv. 22, 23), but was willing to leave the ultimate judgment in the hands of God, who will have the final word.

We ought to do the same when we suffer for Christ's sake. If we suffer because of our own sin or folly, we can claim no credit for bearing it patiently (v. 20). But when we have done well and then are persecuted, we have opportunity to show whether our profession of being followers of Christ really means anything. At this point some Christians lose their testimony and influence by a bitter, vengeful spirit.

These are trying days for the souls of men. In many parts of the world Christians are forced to drink the bitter cup of persecution. To the glory of God we record the fact that they are doing it heroically and in a true Christian spirit.

NEVER a worrisome moment about your looks when you're wearing this flattering princess house frock.

Pattern No. 8380 is in sizes 34, 36, 38, 40, 42, 44, 46 and 48. Size 36 takes, with short sleeves, 4 1/2 yards 35-inch material. 6 yards ric-rac.

Capt. Kidd Virtuous

Captain Kidd, whose name for centuries symbolized vicious and ruthless piracy, never was a pirate. He actually was a brave and patriotic English sea-captain of the 17th century who, through villainous intrigue and circumstances, was hanged with six of his confederates.

They were hanged along the muddy banks of the Thames river and for many years their skeletons were left to creak and swing in the wind as a warning to passing seamen against piracy.

Miss Jacqueline Kudje, who has completed her year's work at Iowa State Teachers College, has been staying at the Stewart Hevlin home as her mother, Mrs. Kudje, was ill with the mumps. Miss Kudje will return to Cedar Falls to attend summer school preparatory to teaching at Kanawha this fall.

Mr. and Mrs. Walter Ross of Garner were visitors at the John Day home Sunday evening.

Mrs. E. J. Schneider took her little grand daughter, Marilyn back to her home in Omaha last week Friday and visited for a few days at the Schrieber home, where a pair of twins, a boy and a girl, recently arrived.

Mr. and Mrs. Albert Kehl, accompanied by Lorraine and Junior Buntentbach, left Tuesday afternoon for Taft, California where they will visit with Aviation Cadet Harold Wicks, who is now taking his basic army flight training at Gardner Field, near Taft. They are driving Harold's car out for him and will return on the train.

THANK YOU!

I want to take this means of expressing my sincere thanks to my neighbors, friends and relatives who sent me cards, letters, flowers, and who visited me while I was in the hospital. It was all greatly appreciated.

EMIL BLUMER.

People's Responsibility

Eight billion dollars of the 13 billion dollars in this Second War Loan Drive must come from non-banking sources, so the responsibility for the bulk of this 13-billion-dollar drive rests with the American public. Indications are that Americans generally need only to be reminded of this responsibility and how much they should lend their government in order to reach this goal. Americans are backing up their fighting men on the battle fronts. They are supporting the Second War Loan. "They give their lives . . . You lend your money."

Local Happenings

Klemme and Vicinity

DRS. COLBY & HAYDEN, DENTISTS, FOREST CITY, IOWA. OFFICE PHONE 374, RES. 189.

Pfc. Wayne Buseman, of Los Angeles arrived home Saturday to spend a furlough visiting with his parents, Mr. and Mrs. George Buseman and other relatives.

Among other things, Wallace Pavey has recently improved his shop building by having new doors installed at the rear entrance. A new cement walk was recently built around the premises.

H. D. Ramsay and family drove to Eldora Sunday where they met Mrs. Ramsay's relatives and from there Larry Ramsay accompanied them home to spend the summer with his grandparents.

Arthur Kudje and daughter Jacqueline both underwent tonsil operations at the Mercy hospital at Mason City Tuesday morning. They returned home Wednesday morning.

Mr. and Mrs. Ruben Greiman and family and Miss Eloise Etchen of Des Moines spent the weekend at the Albert Etchen home and with other relatives in the community.

The Times last week reported that Mrs. Evert Barz had rented the Dr. Dulmes apartment and would move in soon. Mrs. Barz and children will remain at the Kraus apartment for the present.

Wm. F. Stille had the misfortune to injure his foot one day last week while chopping wood and struck his foot with the ax. His sister, Mrs. Terhufen, is keeping house for him while he is recovering.

Miss Lorraine Buntentbach has completed her first year of studies at Carleton College, at Northfield, Minnesota and is home with her parents, Mr. and Mrs. E. C. Buntentbach to spend the summer vacation.

Dinner guests at the home of Mr. and Mrs. George Lawhorn Tuesday evening were Mrs. Louise Wistey of Clear Lake, and son Edwin of the U. S. Navy; Mrs. A. H. Dulmes of Brigham, Utah, and Ed. Jacobs and family.

Mrs. Wm. Meyer and daughter, Mavis, of near Millre, were Klemme visitors Saturday afternoon.

Mrs. Wistey of Clear Lake and son, Edwin of the U. S. Navy, were dinner guests Thursday evening at the Ed. Jacobs home.

Mr. and Mrs. Raymond Wille entertained to dinner Sunday the following: Mrs. Clara Barz and Avis; Mrs. Lena Schroeder and Mrs. Evert Barz and children. Afternoon visitors at the Barz home were Mrs. Esther Barz and Edward and Grandmother Wille.

Lt. and Mrs. "Toky" Ahrenkeil of California, spent last week in Goodell visiting at the parental Tony Ahrenkeil home. Lt. Ahrenkeil returned to his camp in California, but Mrs. Ahrenkeil remained in Iowa for a longer visit with her folks.

Supt. and Mrs. John Micklick and son, Bobby, left Saturday for Hanlontown where they moved their household goods. Mr. Micklick returns to Hanlontown as superintendent of schools, which position he held there before coming to Klemme two years ago.

Friends of Mr. and Mrs. Howard Wiles of Waukesha, Wisconsin will be happy to learn that their daughter, Marjorie has won a four year honor award of \$1,000 presented by the Milwaukee Downer College. In addition Marjorie also won a \$50 cash prize in another scholarship contest.

Mrs. Earl Schuettpelz and son, Donald, of Marion, came last Tuesday for a two week's visit at the parental Wm. H. Greiman home. Mr. Schuettpelz will come up Memorial Day to get his family. Mr. Schuettpelz is employed by the La Plant Choate Mfg. Co. at Cedar Rapids.

KLEMME LOCALS

Buy a poppy for Memorial Day.

All Klemme business places will be closed Monday, May 31st.

Buy a poppy and wear it on Memorial Day.

Mr. and Mrs. Melvin Buseman of near Alexander, spent Sunday visiting with Klemme relatives.

Rev. Grosshuesch and family were Mason City visitors Tuesday afternoon.

Mr. and Mrs. John Day were Mason City visitors Saturday evening.

Rev. Knight of Goodell gave a talk before the Brotherhood of the Klemme Methodist Church Monday evening.

Mr. and Mrs. Cyrus Griewe and daughter, Dorothy of Sibley, Iowa, were visitors at the Art Wellemeyer home Tuesday.

Mr. and Mrs. Wayne Pavey and daughter spent Sunday at Plymouth visiting with her parents, Mr. and Mrs. Frank Woodhouse.

Mrs. Wayne Pavey, Mrs. John Clements, Miss Luella Lewis and Peggy Coobs were Mason City visitors Saturday evening.

Miss Thelma Chambers, teacher in the Britt high school, spent the week end visiting with her parents Mr. and Mrs. John Chambers.

Ruth Bell, daughter of Mr. Fred Bell, underwent an operation for appendicitis at a Mason City hospital Friday. She is reported to be making a satisfactory recovery.

Donald Bacon and family of Thompson and Mr. and Mrs. Burton Hanson of Wesley, were dinner guests Sunday at the Arthur Wellemeyer home.

Mr. and Mrs. J. M. Neuberger entertained the following to a picnic supper at their farm home northeast of Klemme Sunday evening: Walter Blumer and family; Mr. and Mrs. Raymond Wille; Mr. and Mrs. John Neuberger and daughters, Ruth and Faye.

Mrs. A. H. Dulmes of Brigham, Utah, came Tuesday for a visit until Saturday with Klemme friends. Her son, Dick, is visiting with his grandmother and aunt at Grundy Center. Mrs. Dulmes and Dick expect to spend a month visiting relatives in Iowa, Illinois and Wisconsin. Capt. Dulmes visited here a few weeks ago for a day when he conveyed a trainload of patients from Brigham to an army hospital in Texas.

Mrs. Lyle Wilcox, of Alexandria, Louisiana, arrived home Sunday for a visit with her parents, Mr. and Mrs. C. G. Waterman. Mrs. Wilcox's husband, Lt. Wilcox, is stationed at Camp Claiborne, called out for duty in the stricken area for an indefinite period and Mrs. Wilcox came home to visit until her husband returns to Camp Claiborne.

New Methods In Preservation To Be Demonstrated Here

TIME IS SITE OF CANNING
FREEZING DEMONSTRATION
MONDAY, JUNE 14

Demonstrations Will Be Given
In Several Other Towns

Light canning and freezing demonstrations have already been given in Hancock County this spring. Following are still to be given:

Monday, June 14th, 2:00 p. m. at Klemme High School.
Tuesday, June 15th, 1:30 p. m. at Goodell School House.
Wednesday, June 16th, 1:30 p. m. at the Auxiliary Hall.
Thursday, June 17th, 2:00 p. m. at Corwith School House.
Friday, June 18th, 1:30 p. m. at Miller Church Basement.
Saturday, June 19th, 1:30 p. m. at Miller Church Basement.
Sunday, June 20th, 2:00 p. m. at Miller Church Basement.

These demonstrations will include the canning of acid and non-acid vegetables and fruits by the pressure cooker and the hot water bath methods. The preparation of vegetables and fruits for freezing in lockers will also be demonstrated.

These demonstrations are being sponsored by the Farm Bureau, the Extension Service and the OGD, and are presented by Miss Hazel S. County Extension Home.

To attend whatever demonstration is most convenient for you. They are open to all, and every one who can do so is urged to attend.

Canning and freezing calendars are distributed at the demonstrations and can also be obtained from the Farm Bureau Office in Gar-

Red Cross Will Show First Aid
Picture At Garner

The first division of the Red Cross will show a First Aid picture at the Garner high school gym on Friday night. The program begins at 8:45 and the feature picture begins at 9:15. The show is free and anyone interested in First Aid is invited.

Mr. And Mrs. Emil Lau Married Twenty-five Years May 29

HUNDRED RELATIVES AND
FRIENDS STAGE SURPRISE
ON THEM SUNDAY

Brought Well Filled Baskets For
A Pot-luck Dinner

Saturday, May 29th, was the twenty-fifth or Silver Wedding anniversary of Mr. and Mrs. Emil W. Lau who reside on their farm 1 1/2 miles south of Klemme on Highway No. 69.

In honor of the happy occasion about one hundred relatives, neighbors and friends staged a surprise on Mr. and Mrs. Lau Sunday, when they arrived at the Lau home at the noon hour with baskets of food for a pot-luck dinner.

Those who attended the dinner included Mr. and Mrs. Albert Schmidt and Calvin; Mr. and Mrs. Wm. Schubert, Mr. and Mrs. Howard Baack, Harold Haberkamp and family, Raymond Haberkamp and family, Verner Haberkamp and family, Mr. and Mrs. Lee Hammon, Mrs. August Haberkamp and Ethel, Rev. and Mrs. Calvin Grosshuesch and family, Mr. and Mrs. Ole Eliassen and Richard, Mr. and Mrs. Lloyd Pringnitz and family, Velma Kaduce and Eugene Haberkamp.

Sunday Evening Surprise

Another large group came to offer congratulations and surprise Mr. and Mrs. Lau in the evening. In this group were Mr. and Mrs. Julius Priebe; Herman Priebe; Mr. and Mrs. Henry Josten; Mrs. Peter Josten, Mr. and Mrs. Edwin Josten and Marcelle, Mr. and Mrs. Edmund K. Josten, Ewalt Josten and family, August Josten and family, Alfred Josten and family Mr. and Mrs. Herman Schmidt and La Vern; Fred Schmidt and family; Mr. and Mrs. Paul Goll and Beulah; Mrs. Clara Barz and Avis.

Mr. and Mrs. Geo. Thiemann and Stella; Mr. and Mrs. Fred Becker, Mr. and Mrs. Ervin Haupt; Mr. and Mrs. Verner Priebe and Carol, Fred Neuhring and family, Herman Schult and Marvin Rosendahl.

Were Married At August
Haberkamp Home

Miss A. Ella, daughter of Mr. and Mrs. August Haberkamp, and Mr. Emil J. Lau, son of Mr. and Mrs. William Lau, were united in marriage at the August Haberkamp home on May 29, 1918, with the Rev. Calvin Schmidt, pastor of the Peace Reformed Church officiating.

Soon after the couple moved to the Lau farm where they have resided since.

Mr. and Mrs. Lau are the parents of three sons and a daughter, Paul, Verner, Allan and Lois Ann, all of whom are at home except Paul,

ITS TIME TO SPRAY YOUR
FRUIT TREES AGAIN

Recent cool rainy weather has made ideal conditions for the development of many fruit tree diseases. Those people who have already put one or two sprays on the fruit trees will be disappointed in their results if they do not continue their spraying. Apple scab, brown rot on plums and the cherry leaf spot have had just the right growing condition for an epidemic if the disease organisms are not held in check by the first cover spray. Development of Codling moth has been slowed up but they will soon be entering the newly formed fruit so this cover spray is quite essential.

Usually this spray is applied about 2 weeks after the calyx or petal ball spray, but county extension director Paul Henderson advises that where there has been much cool, rainy weather during the greater part of May that this spray be applied 10 days after the previous spray. Probably about June 10th he suggests, using a rather mild fungicide to prevent burning or russetting of the fruit. Dry lime sulfur usually is the most readily available material, but several others are also satisfactory. In 50 gallons of spray use 2 1/2 quarts of liquid lime sulfur or 2 pounds of the dry form, plus 3 pounds of hydrated lime. A 2-3-50 Bordeaux mixture also is suitable, and so is wettable sulfur at the strength suggested on the package. Add 1 to 1 1/4 pounds of lead arsenate to whichever form is used, plus enough water to make 50 gallons.

Henderson also cautions that all the fruit be thoroughly covered as well as the foliage. Special attention should be given to get the top and the insides of the trees well covered with the spray.

ELL 4-H CLUBS PLAN TO
HOLD MEETING

The Ell Boys and Girls 4-H Clubs will meet at the Jennings Anderson home north of Klemme on Thursday evening, June 3.

The Boys will meet at Lincoln Goll's farm early to go on a project tour. This tour will wind up with the meeting at Anderson's.

The boys and girls extend an invitation to any boy or girl between 10 and 21 to join them with their 4-H work. They also urge that every member be present.

who is employed at the Edwin Josten farm near the Lau farm.

Mr. and Mrs. Lau were presented with a purse of silver.

Tuesday, June 8th, Date Set For 4-H Rally

CATTLE FEEDERS' DAY TO
BE HELD ON JUNE 11
AT AMES

Results of the feeding on six groups of yearling steers will be given at the Iowa Cattle Feeders' "Hey Day" to be held at Iowa State College June 11. These steers have been under observation since November 17, 1942, in checks to compare rations of whole and field chopped alfalfa hay, full and limited feeding of shelled corn, corn and cob meal and a sweetened protein feed. C. C. Culbertson, Iowa State College animal husbandman, has been in charge.

The day's activities will begin at 10:00 a. m. at the cattle yards where the steers will be shown and the feeding results given. The afternoon program will center around discussions of cattle feeders' problems. All cattle feeders throughout the state are invited to participate in the affair.

CHILDRENS' PICTURES WILL
SOON BE PRINTED IN THE
KLEMMME TIMES

The photographs of the children of this community taken a couple of weeks ago, are now in the hands of the engravers and The Times expects to begin printing the pictures about the middle of June.

Watch for this interesting feature to appear exclusively in The Klemme Times. About fifty pictures will be printed.

PURCHASES MODERN HOME
IN KLEMMME

Friday Mr. and Mrs. Fred Neuhring of Twin Lake township closed a deal with A. D. Gimer of Renwick for the purchase of the Gimer residence on the east side of the Park. The house is modern. Mr. and Mrs. Neuhring, however, do not expect to move to Klemme for about a year and a half yet, but they now have a home ready when they will retire from the farm.

HANCOCK COUNTY 4-H GIRLS
PLAN ANNUAL RALLY DAY

An army must be mobilized and then trained before it can be victorious. Rally Day for Hancock county 4-H girls will be a day to mobilize every girl in the county to help in the 1943 Food For Victory program. The day's activities will begin at 1:00 p. m., June 8th, in the high school gymnasium at Garner.

Plans are being made for a short inspirational revue that can be presented for girls, leaders, parents, and friends, without rehearsal. New county officers will be elected and installed. These will succeed Eunice Blank, President; Doris Fox, Vice-President; Dorothy Quintus, Secretary-Treasurer; Ardella Nelson, Historian. A brief review of the club's activities for the past year will be given and a Master 4-H demonstration on Freeze Foods For Victory will be presented.

4-H Girls have a definite assignment in food production and food preservation work this year, and Rally Day has an important place in their calendar.

Mrs. Winifred Jones of the state 4-H staff, will be a Rally Day guest and will give a short inspirational talk.

WAR RATION BOOK 3 WILL
BE MAILED TO ALL

The Office of Price Administration made the decision to distribute War Ration Book No. 3 by mail for a number of significant reasons.

It is estimated that the mail distribution will save thirty million man hours spent by sixty million people traveling to and from registration sites and standing in line. Much of this time is valuable war production time. Untold thousands of gallons of gasoline and pounds of precious rubber will also be saved, as well as 369 tons of freight space that would have been required to ship the copies of Book No. 3 to local registration sites. All Iowa ration books will be mailed direct to applicants from the OPA mailing center in Chicago.

MISSMAN'S SOUTHWEST PACIFIC LAUNDRY

"It's a great life after you get used to it," says Lt. Byrnes Missman of the U. S. Marines, shown above "somewhere in the southwest Pacific," doing his laundry with Lt. Gordon Pepple of Fargo, N. Dak. Missman, the son of Dr. W. F. Missman of Klemme, is a graduate of the Klemme high school, where he was known as a basketball player, and of the college of dentistry at the University of Iowa. He enlisted in May, 1942, in the dental corps of the U. S. Navy Reserve and was stationed at the marine base hospital in San Diego, Cal., before being sent overseas in December, 1942. His wife, the former Jessie Marshal of Atlantic, is director of speech at the Keokuk senior high school (Courtesy Mason City Globe-Gazette.)

HELLO, FOLKS!

and Mrs. Fernon Griggs, of Miller, are the parents of a 14 1/2 ounces baby daughter to them on Thursday, May 13. The new daughter has named Jane Garnet.

FISHING GOOD AT CLEAR LAKE PAST WEEK

For more than a week, fishing has been very good at Clear Lake, and many fishermen caught their limit in wall-eye pike, northern pike as well as getting perch, yellow and silver bass. To date, fishing has been best off of docks or from boats in shore. Many fishermen using waders have brought in strings of fish. The largest fish caught so far at Clear Lake spring was an 18 pound northern which weighed 18 pounds. Big fish was caught off of a dock.

'Bluebird' Towels Make Kitchen G

A FEW cheer-up notes for instance, these busy little birds to embroider on towels. They are quick to do—and how they brighten up the kitchen! Make them to the general color scheme.

Pattern 7492 contains a transfer of 6 motifs averaging 5" by 7"; 12 stitches; list of materials needed. Due to an unusually large demand current war conditions, slightly more is required in filling orders for a late the most popular pattern numbers. To obtain this pattern send 16 cents to:

Sewing Circle Needlecraft Dept.
82 Eighth Ave.
New York 17, N.Y.

Enclose 15 cents (plus one cent cover cost of mailing) for Pattern No.

Name

Address

When you see news photos of soldiers "off duty" in camp behind the battle-lines—notice often you'll see them smoking a cigarette. There's a good reason for that. Army officials say cigarettes are an appreciable factor in maintaining morale—the soldiers themselves add that a carton of cigarettes from home always welcome. What better? Well, sales records in Post Canteens and Canteens show Camels are the favorite cigarette with men in all the service. Though there are Post Office restrictions on packages to overseas Army men, you can still get Camels to soldiers in the U.S. and to Sailors, Marines, and Guardsmen wherever they are. Adv.

MEDICATED POWDER FOR FAMILY USE

Inclined to Read
A man ought to read just a little. Inclination leads him, for what reads as a task will do him good.—Dr. Johnson.

SNAPPY FACTS ABOUT RUBBER

When our present synthetic program has materialized, E.F. Goodrich official predicts the resultant rubber surplus will cause one of the most serious post-war marketing problems. What to do with the huge stocks of synthetic rubber will test the ingenuity of manufacturers and sales executives. A substitute for rubber adhesive tape is being sought. Thousands of pounds of this tape are being used to protect airplane glass in transit to airplane factories. Seventy-three percent of the 140,000 workers of 94 plants in 10 states go to work by private automobile. Nearly three-quarters of the cars used by these workers have tires that are half worn out, many of them unfit for re-capping.

HOUSEHOLD MEMOS... by Lynn Chambers

Children Need Good, Wholesome Foods At Their Parties

Simple parties help make children at ease with their friends, do toward laying the foundations for their social success. Watch them playing host and hostess as little pair is doing.

How do you rate with your young generation? Are you content you keep them clean, get them to school, and give them some tutoring when they need it in English or math?

Yes, that in itself is a big job, you are doing a big job if you do that part in smooth, running. Notice, I didn't say whole because unless you provide for their recreation and play, the child is not getting his rightful share in life.

Future Americans must be a so-called business success as well as business success to be wholesome and happy. To prepare the child for this, you must provide him with a social and recreational outlet—and that means an occasional party to which to invite younger children so the child is at ease in role as host or hostess.

There's a certain excitement at these parties which easily upsets their tummies, and the best to handle them is to have nourishing, wholesome food, rather than "rich" dishes which will upset them even more. You'll find consolation from other mothers if you know you will do everything to make her children at ease. Your decoration be a bit fussy party-ish, of course, but keep it sensible on the food. Have favors, of course, for this is the theme and the children adore it. It stimulates conversation and keeps things going smoothly.

Fresh salmon steaks may be used in making the flaked salmon called in this recipe. Serve it on small rounds and the children will love it.

***Salmon Timbales.**
(Serves 8)
Eggs, slightly beaten
Cups milk
Cup bread crumbs
Teaspoon salt
Tablespoons chopped pimento
Pound salmon, flaked
Teaspoon paprika
Tablespoons shortening
Teaspoon onion juice
Toast rounds

Parsley
Butter and bread crumbs to milk, then stir until all soaked. Slightly beat eggs, flaked salmon 8 to 10 minutes, then pimento, paprika and juice. Pour buttered timbales on greased

Lynn Says:

Sandwich Ideas: Cream cheese cottage cheese with olives and onion. Peanut butter, honey and crumpled fresh yeast, on whole wheat enriched white bread. Peanut butter and chow chow enriched white bread. Cream cheese and orange marmalade on raisin bread. Cashed liverwurst, chili sauce, ketchup on whole wheat or bread. Canned corned beef or sliced beef with horseradish on rye bread.

Quefort cheese, celery and ketchup on white bread or on lettuce as a garnish for salad. Watercress on thinly sliced bread, rolled and kept in refrigerator in damp cloth for 15 minutes.

Finely chopped figs or raisins, nuts, mayonnaise and onion juice, on white or brown bread. Hard-cooked eggs, celery and mayonnaise on whole wheat bread.

Children's Party Menu

- *Salmon Timbales on Toast Rounds
- Celery Hearts
- Carrot Strips
- *Orange Juice with Orange Sherbet
- *Peanut Butter Cookies
- *Recipes Given

custard cups. Bake in a pan of hot water in a moderate oven (350 degrees) for 15 to 20 minutes. Unmold on toast rounds, garnish with parsley and serve.

Few children would pass up this delicious cheese 'n bread dish—it's delicious and good for them, too!

Cheese Fondue.

(Serves 6)

- 3 eggs, separated
- 1 cup grated cheese
- 1 cup bread crumbs
- 1 cup milk
- 1 tablespoon butter
- ½ teaspoon salt

Beat egg yolks until lemon colored. Cook cheese, bread crumbs, milk, butter and salt over low heat, stirring constantly. Add beaten egg yolks. Fold in stiffly beaten whites. Pour into a well-greased casserole. Bake at 350 degrees for 35 minutes or until inserted knife comes out clean.

An afternoon party menu may consist of assorted sandwiches.

Deviled Egg and Cheese Sandwiches.

- 3 hard-cooked eggs
- 1 tablespoon dry mustard
- ½ teaspoon salt
- 1 teaspoon Worcestershire sauce
- 6 slices buttered whole wheat bread
- 3 wafer-thin slices of Swiss-type cheese
- Watercress
- Dill pickles

Cut eggs, crosswise and into halves. Mash yolks and blend with mustard, salt and Worcestershire sauce, mixing well. Fill the whites. Cut eggs into thin slices and arrange on three slices of bread. Top egg slices with cheese and a second piece of bread. Cut in halves and garnish with watercress and dill pickles.

A citrus fruit drink is refreshing, fine for keeping up young spirits busy at play during party time. Keep all the flavor in the orange juice plus valuable vitamin C by squeezing it only just before serving. To have chilled juice, chill whole oranges in refrigerator before extracting juice.

Wholesome drink with a party air is this cool glass of orange juice topped prettily with orange sherbet, decorated sprigs of mint and whole raspberries. Orange float will keep you cool and full of pep, for vitamin C helps mitigate effects of heat.

*Orange Sherbet.

- 1½ cups sugar
- 1 cup water
- 2 egg whites stiffly beaten
- 2 cups orange juice
- 3 tablespoons lemon juice

Boil sugar and water together for 5 minutes. Beat egg whites slowly and add to fruit juices. Mix all ingredients and pour into freezing tray of mechanical refrigerator. Freeze stiff, then beat thoroughly. Return to freezing compartment and freeze until stiff.

*Peanut Butter Cookies

(Makes 2 dozen)

- 1½ cups flour
- ½ teaspoon salt
- ½ cup honey
- 3 tablespoons corn syrup
- ¾ cup peanut butter
- ½ cup shortening
- Apple butter

Sift all dry ingredients together. Cream shortening, add to peanut butter, honey and corn syrup. Add flour and roll dough into size you prefer for finished cookies. Chill for 15 minutes. Cut into thin slices for 15 minutes. Cut into thin slices for 15 minutes. Cut into thin slices for 15 minutes. Cover with a second slice of ter. Bake dough and seal as for a tart. Bake in a slow oven (325 degrees) for 25 minutes.

Are you having difficulties planning meals with points? Stretching your meals? Lynn Chambers can give you help if you write her, enclosing a stamped, self-addressed envelope for your reply, in care of dressed envelope for your reply, in care of Lynn Chambers, 210 her at Western Newspaper Union, 210 South Des Moines Street, Chicago, Illinois. Released by Western Newspaper Union.

People You Meet:

Victor Mature, formerly of Hollywood and Broadway, now of the U. S. Coast Guard . . . He furloughed in the Broadway arena again the other night for the first time in a long spell . . . Just back from long convoy duty, and now gone again . . . Proud of his promotion and the part he is playing in the war . . . The other night his huge hands were weatherbeaten and tough . . . "What!" one of us remarked. "No manicure?"

"Oh, I couldn't have a manicure," he replied seriously. "The fellows on the ship would be in stitches" . . . No squawks . . . Just one little one . . . The way they keep teasing him—about Miss Hayworth.

Amon Carter . . . Prosperous newspaper publisher from Fort Worth . . . He and his wife were divorced about a year ago, but they both patronize the Stork Club a lot . . . And never interfere with each other's pleasure . . . They simply do not talk any more . . . The other night the transatlantic phone operator found him there . . . Friends in London had word of his son . . . Captured by the Nazis in Tunisia . . . The news was a relief . . . There had been none about the boy for so long . . . He wanted to share the news with his ex-wife—but he didn't know how . . . And so he waited for someone they both knew to come in (his daughter) who told the mother.

Bob Russell, who can't speak a word of Spanish . . . He wrote the wordage to three foreign ditties—"Maria Elena," "Frenesi" and "Brazil" . . . "Maria" was the first song in 16 years to hit the million copy division. The words to "Frenesi" he considers his worst lyric . . . His words to "Brazil" lay on a publisher's shelves for over a year—they couldn't see it! . . . His latest lyric is heard at the Versailles where they feature the song, "Dark Blue" . . . His newest thrill is making the Hit Parade last week with a grand torch called: "Don't Get Around Much Anymore."

Then there's **Bea Wain**, whose voice hardly needs an introduction to people who buy recordings and have a radio . . . Bea opened at the Riobamba last night—succeeding Frank Sinatra, whose click was town talk recently . . . Bea was ooily nervous, mister . . . Not only was she taking over the spot vacated by a crowd-puller, but it was her night club debut, too . . . Nervous, it seems, because she was afraid she wouldn't be good enough! . . . Good enough? . . . She's merely been featured on the Hit Parade and Magic Key programs, and her recording of "Deep Purple" sold 2,500,000 copies!

The **Magazines:** The Satevepost's vivid pictures about the siege of Sevastopol chains your eyes to the pages . . . Look points out that the civilization that was saved with blood will have to be reconditioned with brains . . . Ruth Mitchell's story of her life, via American Magazine, is a fine reporting job . . . The notion about the Japs being incapable of fear is such a phony it might have been born on Broadway. Omori Harris, who spent 40 years among them, offers some lowdown on the Japs' alleged courage in Harper's . . . This Week includes a piece about city gals on the farms called: "The Farmer's Step-Daughter." It sounds like the bluest of the anecdotes after the Hays censors laundered it.

Lost Generation:

It was our world . . . and it is not today,
Pour then the wine and trim the candles down,
We were the fools who blithely lost our way
And dumbly played the charlatan and clown . . .
Call for the fiddler . . . name the lazy waltz
Speak of the fragile beauty that has flown,
It is too late to lance us of our faults—
We must go on unheralded and alone.

There in the dust of old, enchanted Inns
We sold the precious heritage of man
For rancid wine and unimportant sins
That stole the theme and purpose of our plan . . .

It was our world and now that world is dead
And loneliness is all that lies ahead! —D. W.

Colin McKenzie is a member of the Merchant Marine . . . Torpedoed three times . . . In 24 hours! . . . Down at the Village Barn war bond rally, he brought a lump to the throats of the patrons when he offered his three "torpedoed" medals to the highest bond bidder . . . One man bought them, but a Mr. Albert Clear of Wall Street bought \$50,000 worth with the understanding that the medals be returned to him . . . McKenzie, who has faced death many times, left the floor crying like a kid.

Speak American, Lady

By Lucie Kinsolving

(WNU Feature—Through special arrangement with Women's Home Companion.)

All over the world, the American soldier likes a joke, even when war puts him in a field hospital. To keep him happy, the American Red Cross girls of the hospital recreation groups help a lot. I was the first of these girls to go to North Africa.

"I'd give a month's pay to talk to an American girl," confided one disconsolate boy. "This morning when I stepped up to a neat little French number and said, 'Bonne jawer, comment aillez vu', she breezed right past me! No American dame would treat me that way."

It's being unable to make themselves understood by the feminine sex over there that's one of the hardest things for our soldiers in North Africa, I found. I interpreted for an hour and a half to a French lady for an American officer. His tactics were Anglo-Saxon directness, hers were Gallic evasion. At the end of that time the gentleman had no idea whether the lady was amused or merely contemptuous.

This incident gives you only a slight idea of the varied ways that we Red Cross recreation workers try to make ourselves useful.

There was a rumor that a very great American general had said a year ago he would never "have wanted women mixed up in a war," but after he saw what Red Cross workers accomplished in England he definitely wanted them in Africa and right away.

Greeted by Soldiers.

When our Red Cross group docked in North Africa on the first sunny day we had had for two months, we were greeted by shouts of welcome from the soldiers. "Speak American, lady," they cried as they had in London where they had stopped us on the street just to hear the home twang.

As we drove up the roadway, the populace of varying races and religions who had learned Americanisms fast, held up two fingers in the Victory salutation, hoping this would bring them chocolate and "chue-gomme."

Some faces wore doubtful expressions, mystified by our women's uniforms, but when we came closer a light broke through. "Voila La Croix Rouge," they shouted enthusiastically. "Vive La Croix Rouge." Imagine what a thrill that gave us!

First Red Cross Club in Africa.

That very night we opened our first American Red Cross club in North Africa. Only a few hours before it had been a barnlike empty automobile showroom. But Al Fink, Herb Siffert and Jim Snider, three of our enterprising field directors, had worked such wonders that as I played the piano for the soldiers to sing I heard one boy blurt out, "Gee, this sure is like home!"

This was in Oran, Algiers, not many days after our troops arrived. Since then in our Oran club hundreds of men have found "a home away from home." In addition to the piano, we have radios, games and at night entertainment by army musicians.

At first we had difficulty providing snacks for the boys, but we found we could fill in the hungry spaces with mandarins and dates.

Our next job was a tough one—to organize a Red Cross hospital for which our six months' supply of everything was lost. I felt like Christopher Robin, for I spent my time going down "to the end of the town," getting warehouses open where there were priceless Red Cross stocks of cigarettes, tooth paste, brushes and shaving cream for the wounded.

Living Problems.

Our personal problems of living are easier than we had imagined, as women in a man's army on a battle front, but they are extremely incongruous. Unbelievable luxuries are mixed with discomforts. We can have coiffures that "do things for you" but no hairpins. We have exotic tropical fruits but no pasteurized milk. Fine handmade shoes are in shop windows, but no stockings. We live in a typical French house surrounded by palms, golden cascades of mimosa, and giant tree ferns.

We have become increasingly resourceful since that hot day in September when, loaded down with musette bags, steel helmets and gas masks, a group of us Red Cross girls hitched up the gangplank of a troopship.

Our quarters were comfortable, on a very crowded ship, and we learned our first lesson then—the chivalry of the United States army.

We were faced with hundreds of homesick and seasick men. I found a tin-piano and started playing. By the end of the evening the crowd was booming.

Attractive Lines

MY, BUT the housework will seem like nothing at all when you're wearing this attractive frock. It has such good lines that you will probably want to drop what you're doing at the moment and get right down to making yourself several. Sew and Save.

Pattern No. 8367 is in sizes 34, 36, 38, 40, 42, 44, 46 and 48. Size 36 takes, with short sleeves, 4 yards 35-inch material, 8 yards braid trimming.

8396
12-20

ASK ME ANOTHER?

A General Quiz

The Questions

1. The solid part of the earth is called what?
2. What American general is called "Blood and Guts"?
3. What proportion of U. S. senators is elected every two years?
4. What type of song is a barcarole?
5. What is a plexis?
6. What is meant by carte blanche?
7. Who was the first President of the United States to be born under the American flag?
8. The liquor derived from sugar cane is called what?

The Answers

1. Lithosphere.
2. George S. Patton Jr.
3. One-third.
4. A boat song.
5. A network of blood vessels or nerves.
6. Full powers.
7. Martin Van Buren.
8. Rum.

An Eye-Catcher

HERE'S a frankly pretty frock to wear when you want to look your prettiest. Sweetheart neck, snug bodice, dirndl skirt . . . real eye-catchers every inch of the way.

Pattern No. 8396 is in sizes 12, 14, 16, 18 and 20. Size 14 takes 3½ yards 39-inch material.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers. Send your order to:

NEVER MISSED

"Dead Shot" Don Swanson, 14-
year-old farm boy living near Merr-
ill bagged three foxes in three
minutes one Sunday morning re-
cently. He used only three shells
fired at 15 yards "And you don't
dare miss, because shells are hard
to get these days," declared the
young hunter

Meteorites Are Result Of Planets Exploding

Our solar system had two addi-
tional planets until about 100,000,000
years ago. They exploded about that
time, scattering their material
through space, and the earth is now
collecting samples of what they
were made of in the form of meteor-
ites. The meteorites are the pieces
of stone or iron, or both together,
that reach the earth unconsumed
when a "shooting star" passes
through the atmosphere.
Dr. William D. Urry of the de-
partment of physical chemistry,
Massachusetts Institute of Technol-
ogy, informed the American Asso-
ciation for the Advancement of
Science at its recent summer meet-
ing that he had calculated the age
of 25 meteorites by measuring
their content of uranium and helium
and found that the ages ranged from
100,000,000 to 2,900,000,000 years, with
most of them over 1,000,000,000
years.
Using various astrophysical argu-
ments the conclusion is reached,
said Dr. Urry, that these meteorites
are the debris of two planets of our
own solar system that came to grief
within the last 100,000,000 years.
The asteroids, extremely small
planets, which number several thou-
sand and go round the sun in orbits
between those of Mars and Jupiter,
are believed to be the remains of a
former large planet. Some astron-
omers have sought to arrange the
asteroids into groups having com-
mon properties, and one believed he
detected three groups with some-
thing in common in the elements of
their orbits, indicating that there
originally may have been three
planets in this space.

Parasite Wasp Shows It Knows a Thing or Two

Female insects of at least one
group can regulate the sex of their
offspring. Entomologists of the
United States department of agri-
culture find that a parasitic wasp
brought here from the Orient 15
years ago to help control the Jap-
anese beetle varies the treatment
of her eggs according to the size of
the host on which she lays them.
She withholds the sperms that in-
sure a female hatch from eggs de-
posited on the relatively small
worms—beetle larvae—that have
moulted only once to enter the stage
known as the second instar. Nearly
all the young wasps from these eggs
are males. The hatch from eggs
laid on the larger, third-instar lar-
vae, however, is preponderantly fe-
male.

To prove that the female wasp
(Tiphia populiavora) fixes the sex of
her progeny when she deposits her
eggs, the entomologists transferred
eggs laid on second-instar larvae to
third-instar larvae and those laid on
third-instar larvae to second-instar
larvae. Mostly males hatched out
on the third-instar hosts and mostly
females on the second-instar hosts.

War and Womens Clothing
What effect will the exigencies of
war have on the American woman's
wardrobe? For one thing, women
will undoubtedly wear simpler, more
tailored costumes, believes Mrs.
Louise Pinkney Sooy, University of
California associate professor of fine
arts and instructor in costume ap-
preciation for the University's Ex-
tension division. "Another result
that is already becoming apparent
is the simplification or the elimina-
tion of costume accessories. For
years we have dwelt upon the im-
portance of correctly matched, im-
peccable accessories for a costume.
Now suddenly, with the new sim-
plicity wrought by wartime activi-
ties and lack of materials, we find
that they can more or less readily
be dispensed with. No longer will
we insist upon the matching gloves,
bag, shoes, and hat, with severe at-
tention to detail."

Pots, Pans
A private at famed Kelly Field re-
cently learned that all generals don't
wear stars.
On orders from his first sergeant,
the dazed private walked into head-
quarters and proudly strode up to
the sergeant major.
"I am to report to General Mess
at once," he said with an embar-
rased importance. The sergeant
major looked at the young man and
then with a smile in his eyes, hum-
bly told him he could find the "gen-
eral" in the main dining room of
the new barracks.
With even more dignity and proud-
ness, the private made his way to
the dining hall, only to see his castle
tumble into a litter of pots and pans.
He was to start a week's tour of
kitchen police, the dining hall and
kitchen being called "General
Mess."

Cotton Research
Botanists at the University of Tex-
as are engaged in a form of research
which may, they hope, result in vast
benefits to cotton growers. This de-
partment has over 20,000 cotton
plants, and an effort is being made,
through cross breeding, to produce
cotton with superior fiber and per-
haps resistant to root rot and other
diseases. They are also working
along lines which they hope will
result in finding a cotton which re-
quires a minimum of moisture. Sur-
veys of national textile mills have
been made and the type of machin-
ery used noted with a view of de-
vising improvements or new ma-
chines which will produce finer
goods at less cost.

For Highway Safety, Here Are '12 Commandments'

- STATE COLLEGE, PA.—Ameri-
can automobile operators were pro-
vided today with "12 command-
ments" for blackout driving by
Amos E. Neyhart, administrative
head of the Institute of Public Safe-
ty at the Pennsylvania State college.
Neyhart claims that accident tolls
will mount during blackouts unless
drivers are extremely cautious.
In listing his 12 "do's and don'ts"
Neyhart placed first and foremost
the warning "stay home if you can."
His rules follow:
1. STAY HOME Don't drive ex-
cept for absolute emergency if you
are home when a warning is sound-
ed.
2. MASK CAR LIGHTS. If you
are in areas where blackouts are
likely to occur, keep material for
temporary masks in your car.
3. DRIVE HOME. When air raid
warning sounds, stop your car at
right-hand curb, turn off lights
while putting on headlight masks,
and drive home immediately.
4. LOCK YOUR CAR. If no masks
are available, park your vehicle
off main traffic arteries, preferably
on private property. Turn out all
lights and lock car securely to pre-
vent possible use by saboteurs.
5. ADJUST EYES TO DARK. If
you must drive, wait from 15 to 30
seconds for your eyes to become
adjusted to darkness.
6. OPEN WINDSHIELD. Regard-
less of weather, open your wind-
shield if possible.
7. DRIVE SLOWLY AND WITH
ALERTNESS. Never drive more
than 15 miles per hour. Assume pe-
destrian doesn't see you.
8. USE YOUR HEAD. Prepare
for an emergency stop. Keep well
to the right of the road. Passing is
extremely hazardous in a blackout.
9. TAKE SPECIAL CARE AT
CROSSINGS AND TURNS. Practi-
cally stop at intersections. The
sides of your car are almost invis-
ible. You can increase visibility by
placing white adhesive tape on edge
of running board and on fenders.
10. ALLOW FOR BLACKOUT
HANDICAPS. Watch carefully for
traffic signs and signals.
11. NEVER BLOCK ROAD. Leave
extra space near fire hydrants and
park at least 25 feet from corners.
12. DIRECT LIGHT BEAMS
DOWNWARD. Masks should be con-
structed as directed by the Office
of Civilian Defense and should direct
your light beams downward. Avoid
leakage of lights.

A Quick Review of the Life of Navy Man Perry

Oliver Hazard Perry (1785-1819),
American naval officer, was born in
Rocky Brook, South Kingston, R. I.
Entering the navy as a midshipman
in 1799 at the age of 14, he joined
his father's ship, the General
Greene. He served in the Tripoli-
tan war. In 1811 he was married to
Elizabeth Champlin Mason and they
had five children.
In 1813 he was assigned to the
command of Lake Erie and on Sep-
tember 10 engaged the British in the
famous battle which resulted in the
capture of the entire British squad-
ron and was to be immortalized in
Perry's laconic dispatch, "We have
met the enemy and they are ours."
Perry died in 1819 of yellow fever
at Port of Spain, Trinidad. In 1826
his body was taken to Newport, R. I.
and was buried there in Island cem-
etery.

Fox Friend or Enemy?

The question of whether the fox
is a friend or enemy to man has
been submitted to scientific inquiry
by Dr. Adolph Murie, of the federal
park service, who studied the diets
of the fox during an eight-months
period on the 1,200-acre reserve of
the University of Michigan, near
Pinckney, Mich. Rabbits were found
to be the fox's favorite food. This
is considered a debit by rabbit hun-
ters, but a credit by orchardists and
farmers. The fox was found to catch
game birds, but in small numbers,
and not during the nesting season.
Offsetting this is his liking for
June bugs, the cubs devouring great
numbers of them. His catching of
mice and lemmings could be either
beneficial or neutral. By killing
moles and shrews he reduces valu-
able insect destroyers. He takes
muskrats when the water cover for
them is very low. Turtle and snake
eating is regarded as neutral, except
that destruction of snapping turtles
is considered beneficial to fish and
water birds.

Gen. Jackson Decapitated!
Over a century after he waged
successful warfare without injury,
Gen. Andrew Jackson was "decapi-
tated" and suffered other minor "in-
juries" to himself and his mount.

The bronze and iron statue of the
warrior and his horse that have
reared in the center of Jackson
square, the heart of the historic
French quarter in New Orleans
since 1856, has fallen prey to time.
Rust split a front leg of the horse,
ate holes in the saddle and nibbled
on the legs of Jackson himself.

A group of playful youngsters re-
cently sent the head of the proud
general tumbling into the dust.
Jackson's head once more, how-
ever, gazes over the surrounding
scenes and Dr. Robert Glenk, cura-
tor of the Louisiana state museum,
cleaned the edifice with kerosene,
repaired the holes and gave the
bronze and iron likeness a coat of
paraffin oil to protect it from fur-
ther destruction by the elements.

War Plant Guards Being Aided by Clever Robots

Tiny robot sentries, many times
more efficient than men in storm,
fog and darkness, are now aiding
human guards along the miles of
high wire fences that enclose some
of the country's greatest war-pro-
duction plants.
Six months of tests under every
conceivable condition were said to
have proved the new sentry system
to be the most efficient yet devised,
with the robots "hearing" even the
whisper of a person, the snap of a
wire-cutter or the sound of a pick,
and relaying these warning sounds
instantly to the human watchman at
his post or to a central guard sta-
tion inside the plant.
Engineers said that the "acoustic
fence" apparatus, as it is called,
has the effect of multiplying by
many times the number of guards
on duty in adverse weather and at
night. During heavy fog, blackouts,
and night storms visibility is often
zero and guards would have to be
placed almost elbow to elbow to
provide absolute protection along
fences that often are 15 to 20 miles
long.
But the robot sentinels can keep
an alert 24-hour watch over every
foot of fence, regardless of weath-
er, enabling the human guardsmen
to hear what is going on for blocks
or ever several miles along the
fence line, and to tell instantly the
location of any disturbance. Actual-
ly the fence itself serves as the ro-
bot's ears, capable even of over-
hearing voices speaking in whispers.

Celebrated Italian Tenor Lived in Two Centuries

Giovanni Battista Rubini was a
celebrated Italian tenor, born at Ro-
mano, near Bergamo, Italy, April
7, 1795. His father, a music pro-
fessor, was anxious that the boy
be a musician, and at the age of
eight young Giovanni sang in church
choirs and played the violin in an
orchestra. He continued concert
work, his first important concert
being at Naples, but his career prob-
ably dates from his first appearance
in Paris in 1825.
Between 1831 and 1843 he sang
either in England or Paris, and in
1843 he began a tour with Liszt
through Holland and Germany. Af-
ter they separated at Berlin, Rubini
went on to St. Petersburg where
the Emperor Nicholas made him
director of singing in the Russian
dominions and conferred on him the
rank of colonel. He retired in 1844
to a home he had purchased near
Romano and when he died there on
March 2, 1854, he left a great for-
tune accumulated from his operat-
ic career.

Police Shows Courtesy Pays
Police officials of Detroit, Mich.,
believe courtesy on the roads and
the absence of traffic cutting and
racing reduce accident rates sub-
stantially, so they are putting into
practice an idea that a ticket of re-
ward should be given courtesy driv-
ers—and by the same traffic "cops"
who ticket their erring ways.

During the few days the tickets
of reward have been issued, they
have been presented to a milkman
who stopped his truck to help a
confused, elderly lady from the
middle of the street; a driver who
helped push a stalled automobile to
the curb after it had stopped for a
red light; and two small boys who
got off their bicycles at busy inter-
sections and pushed them across the
street on the outside of pedestrian
traffic.

While the plan still is in its in-
fancy, the police department hopes
that a system may be developed for
keeping a record of courtesy cita-
tions, and that eventually windshield
stickers will be used to identify care-
ful and courteous drivers.

Decline in Castor Bean Growing
The castor bean plant, from which
we get castor oil, is not a legume, as
many suppose. Although the plant
grows wild and is cultivated in tropi-
cal and subtropical countries, it is
cultivated also in the warmer parts
of temperate zones. The plant has
been grown in this country for more
than a hundred years but became
an important commercial crop only
in certain sections of Oklahoma,
Kansas, Missouri, and Illinois in the
latter part of the 19th century, from
1860 to 1900. Since that time, how-
ever, the industry has declined and
practically has been abandoned in
this country. This decline has been
attributed chiefly to the reduction in
price caused by the importation of
large amounts of cheap castor bean
seed from other countries, especial-
ly from India, China and Brazil.

Pershing's Auto Number
Routine disclosure that Army
Registration No. 17-561 has been is-
sued to a light sedan assigned to the
503rd Parachute battalion at Fort
Benning, Georgia, recalls that that
was the number of the car used by
Gen. John J. Pershing as command-
er of the A.E.F. in France almost
a quarter of a century ago.
The big limousine limousine
which he used in France is now in
the museum of the Holabird quarter-
master depot. After the World war
the car turned up in Washington in
1922. Two years later it was at
Holabird, then returned to Washing-
ton where it was used by the quar-
termaster corps. In 1927 it was
again returned to the Holabird de-
pot, where it stands in the museum.

World's Largest Mobile Community, Built of 3,300 Trailer Coaches, Will House 13,000 Naval Workers

Removal After War Will Leave No Ghost Town; Improvements in Construction Expected to Stimulate Future Use by Migrant Workers.

From wasteland to a city of 3,300 homes in 46 days! That's the wartime "miracle" of Trailer City at Portsmouth, Va., where 13,000 persons will soon make up the world's largest mobile community.

When the navy found it was impossible to recruit workers for the Norfolk navy yard because of housing shortages, the Federal Public Housing Authority was requested to supply accommodations quickly. The huge trailer project is the FPHA's answer to this request.

Nothing approaching this feat has ever been seen in housing. Through the combined efforts of manufacturers, government officials, contractors and local workers, 100 mobile homes a day were transported to the site and placed on foundation blocks, ready for occupancy. Since all the units were completed and furnished at mid-western factories, it was a matter of a few minutes for four men to emplace them and connect electric lines.

The successful completion of this project, which is expected to be fully occupied about July 15, is the high-point of a revolutionary change in housing techniques, motivated by war necessity.

Deliver Complete Unit.

Completely reversing the centuries-old method of transporting parts or sections of houses to the site and then assembling them, the trailer coach industry has applied assembly-line methods to home-construction and delivers complete units, including essential furnishings.

Just as mass production techniques have changed automobile manufacture from small-scale output at high prices to million-unit capacity at low cost, this new construction method for homes brings speed, quantity and economy into housing at a time when all these factors are imperative for the war effort.

In manufacture, this method saves 90 per cent on manpower. The mobile houses require less than one-third the ordinary amount of critical materials, permitting much greater volume from a limited stockpile. The average trailer coach, furnished and installed, costs about

All other needs of this city, larger than St. Augustine, Fla., are being provided by the FPHA. Equipped playgrounds dot the 290-acre site, and two schools have been erected for the children. A non-denominational church will be available to all residents. Four community and recreation buildings will provide facilities for stage shows, motion pictures, games, meetings and dinner parties.

Four large play areas, each large enough for a full-sized baseball field, will be available for adults, and seven stores will occupy a large commercial building, eliminating the need for traveling into the city to shop.

Each trailer has a plot at least 26 by 46 feet. Drainage has made the soil fertile, and a Victory garden usually appears outside each unit a few days after the family moves in. Some build small picket fences around their gardens, adding the final touch of suburban atmosphere.

All trailers when delivered were standard olive drab, but because camouflage is not important at this site they are being repainted various hues, to suit the taste of the occupants.

FPHA rentals on these furnished homes range from \$6 to \$9 a week, far lower than prevailing rates for

This little girl even finds room for her dollie in one of the 3,300 trailers of the settlement near Portsmouth, Va. Whole families can comfortably occupy one of the new units. Playgrounds, schools and recreation centers have been built to accommodate the residents.

time occupations, the trailers will find wheels again and serve vagabondage or house migratory workers, and the ground that had been host to a thriving city will once more be an open field—no worse for wear. For Portsmouth there will be no bad effects, no 'ghost' slums, no regrets.

In this project also is seen the forerunner of a vast field for trailers in post-war Europe. With millions of persons returning to ravaged cities, communities like Trailer City will pop up to house them until permanent quarters can be constructed, he predicts. If American manufacturers can get sufficient materials in time, it is not unlikely that they will provide units for hundreds of towns as big as Portsmouth's to dot the European topography.

See New Trailer Use.

Peacetime uses for trailers will also show the effects of their wartime use. Large groups of migratory construction workers, moving from one reconstruction job to another, will use trailers so they can move their homes with them. Seasonal farm workers will do the same thing. Lighter and more powerful automobiles will make road travel more popular with salesmen and professional men, and trailer homes will permit them to keep their families together while they travel.

An upsurge in travel interest following wartime repression will enhance the normal market for trailers, too, and thousands of families who are finding these mobile homes satisfactory during the war will decide to retain this type of living.

The trailers that were moved into Portsmouth are tributes to the manufacturers' ingenuity, for they are as sturdy and comfortable as pre-war models despite sharp curtailments in available materials.

The chief shortages—rubber for tires and steel for under-carriages—are not serious because the units are placed on foundation blocks and are immobilized for the duration of the war, unless they are to be moved to another site after their first assignment is filled.

However, shortages of such basic materials as masonite, plywood and stainless steel have necessitated substitutions. The Portsmouth trailers have less than 275 pounds of steel, only three pounds of copper, and use homesite in place of masonite.

The experimentation required by these substitutions will pay real dividends in the future, experts predict.

"We've learned better ways to do things," these experts say. "We now can save weight, add space and increase comfort without increasing cost. After a year or two, when we get a supply of the new light metals and plastics we'll produce trailers that will be luxurious and practical—and at a small cost."

Meanwhile, the Portsmouth project is doing a big war job. Incoming workers pour into the project every day, bringing their families into a new type of living experience. Once in, they plan to stay.

"This kind of life," explains one worker after five days in his trailer, "is as much fun as camping and a lot more comfortable."

Washington, D. C.

SUBMARINE ANTIDOTE

A history making event took place recently in the long war against the submarine. Official tests were made of the helicopter, which, despite opposition of the navy, has been urged by officials of the army and War Shipping administration for anti-submarine patrol.

Within a few hours after the publication of a Merry-Go-Round story on this subject, a group of officials from Washington, including highly interested and highly placed officials of the British admiralty, British shipping mission, and the RAF, stood in amazement on the deck of a tanker offshore while a little airplane with a crazy rotary wing on top landed and took off from a deck space not more than twice the size of the plane itself.

It was a Sikorsky helicopter, piloted by a boyish colonel who reminded everybody of Charles Lindbergh in his younger days—H. F. Gregory, from Wright Field, Dayton, Ohio, who knows more about helicopters than anybody else in the air force.

Gregory made 24 landings on the tanker during the two days of trials. He operated under all conceivable conditions—when the tanker was riding at anchor, when she was running at 15½ knots, when she was headed into the wind, and when she was running with the wind.

The War Shipping administration, which supplied the tanker, had offered to remove the mast, to provide a safer landing space. But inventor Sikorsky scorned that as "too easy." Accordingly, his plane was set down by Colonel Gregory in the space between the mast and the deck house, with only a 14-foot clearance on either side.

Far-Seeing 'Eyes.'

To the British and American shipping experts whose ships are going to the bottom every day, the significance of this feat was inescapable. They firmly believe the helicopter can be used to supplement the escort vessels for the greater protection of merchant ships in convoy.

It is too light to carry much striking power of its own, except a few rockets, but it can fly out ahead of the convoy, hover over the sea, spot the wolf pack, and report by radio to the escort vessels. This saves movement of the escort vessels, which in present practice have to maneuver constantly around the merchant ships, with heavy consumption of fuel oil.

Moreover, the helicopter, without firing a shot, brings alarm to the prowling submarine and causes the U-boat to dive.

Earlier acceptance of the helicopter was prevented by the navy's bureau of aeronautics, which contends that the machine is defenseless against the guns of a submarine. The defenders reply that the plane can dart about so crazily that it is too evasive to be easily hit. Moreover, helicopters can be built for \$15,000 each, and the loss of a few would not be serious, compared with the loss of escort vessels.

In any case, the matter has gone beyond the stage of argument. The War Shipping administration is determined to have helicopters, and if the navy won't come along, WSA will make a deal with the coast guard to train pilots, and another deal with the war department to place the planes on its ships.

ARMY AND COAL MINES

John L. Lewis would have got the surprise of his life if he could have had a dictaphone recording of the conversation of Secretary of War Stimson and Gen. B. B. Somervell regarding the use of troops in taking over the coal mines.

Lewis had expressed public apprehension that the army had a plan to seize the coal mines in case of a strike. Undoubtedly subordinate army officers did have such a plan in mind.

But when Secretary Stimson sat down with Secretary Ickes, plus General Somervell and other army officers, the army expressed vigorous opinions to the contrary. General Somervell, accused by some of wanting the army to take over all civilian activities, made this remark:

"The last thing we want is an issue of the army against the people."

Secretary Stimson also expressed relief that Secretary Ickes, known as a staunch defender of civil liberty, had been selected by the President to handle the coal crisis. He offered Ickes every co-operation but expressed the hope that he would not have to use troops.

CAPITOL CHAFF

¶ Freshman Representative Charles La Follette is the only Republican congressman who supported the President's foreign policies in the last campaign. La Follette also has a liberal law record.

¶ Radio Operator R. W. Dunn, who first received the coded message of an armistice November 11, 1918, is eager to serve again. He has enrolled as a junior radio operator in Pan American Airways Seattle school, preparing for Alaska service.

Allied Food Conference Envisions World Council

International Group Would Be Empowered to Oversee Production, Distribution of 'Bread And Beef' to Feed Society of Nations.

By BAUKHAGE

News Analyst and Commentator.

WNU Service, Union Trust Building
Washington, D. C.

Back in the summer of 1940, I sat in a chair under a whispering tree and looked out over a wide and barbed lawn. The mountains were about us. We were resting in a nest carved out of the wilderness and equipped with all the luxuries that a pampered human could demand. Lovely, indolent women in sports dresses sat at tables under colored umbrellas. Handsome, indolent youths in blazers lolled beside them. Negro servants padded about with tall, cooling and expensive drinks.

I call it a "nest." I belonged there just like a cuckoo but I enjoyed it. It was all right. It helped circulate the money (I was a guest at a bankers' convention). But I thought back. Six months before I had ridden in an army transport plane over shuddering Europe. I looked about and saw the easy, harmless but useless life about me, made possible by the easy harvesting of America's riches.

I sighed (a little enviously) and said to myself: "This can't last."

It is a strange coincidence that today, at this very same spot, representatives of the United Nations are gathering to try to write the prescription for the third freedom—freedom from want.

This gathering isn't concerned with summer resorts de luxe although it meets at one. It is concerned with the proposition: We must raise the standard of living all over the globe so that the underfed can produce enough of their handiwork to exchange it for enough to eat—something they just never had before.

It is just too big for me to grasp, but what's a heaven for, asks Browning, if our reach doesn't exceed our grasp?

World Council

This plan envisions an international council at the head of a system of administrative bodies among which would be an agricultural council, supported by an agricultural bank (all this international) which would direct groups studying and applying nutrition standards, directing the supply of products, storing surpluses, shifting crops to balance supply and demand, maintaining ever-normal storehouses of non-perishable crops, adjusting processing of perishable crops, developing new markets, taking care of relief in devastated or stricken areas, advising and assisting the poorer population groups to increase their efficiency and consumption.

In other words, these people who have spent hours and months and devoted arduous labor to working out this idea are trying to furnish the plan for economic machinery to hold up the hands of the political effort of a league of nations, new style—the bone and sinew, the bread and beef to feed a society of nations joined together under one political umbrella of world co-operation.

Such an idea is laughed out of court in advance by the folk who talk of crazy dreamers, impractical long-hairs and the like. Maybe it is impossible. But a lot of people are saying: "Well, for heaven's sake, let's try it, let's try anything—nothing can cost more in blood, sweat and dollars than war."

The United States proved a lot of things were possible under the sharp lash of war which would have been sneered into oblivion if they had been blueprinted before Pearl Harbor.

Take an egg, for example. Nothing up our sleeves. Just an egg.

"Before the war," says Frank Wilson of the department of commerce, "when Biddy, the hen, laid an egg in Cole county, Missouri, her subsequent cackle of satisfaction was based on the anticipation that that egg might get as far as Sedalia, St. Louis or, on rare occasions, New York."

Then Hitler dreamed up a world war and somebody dreamed up a thing called lend-lease. Today, Biddy's product goes around the world.

Dehydration

Scientists invented dehydration and the process, as far as eggs are concerned, is only a year and a half old. Before the war, only 20 firms dried eggs to any extent and most of those dried albumen only. Today, according to Mr. Wilson, 130 egg-drying

plants, big ones, mostly scattered through the Middle West, are drying eggs. Wilson predicts that by the war is over, 35 per cent of America's three billion dozens of eggs be treated for processing annually.

And so the fragile egg, formerly shipped only short distances, travel anywhere. How great an American market for dehydrated eggs will be depends on to what extent the consumer takes to the undoubtedly world consumption increase because of the extended lease sampling and the of shipment.

You may not be able to do your quart of milk from the Wisconsin milk shed to the Hottentot's porch but you can get your milk or dehydrated eggs there. You can adjust things so the Hottentot can produce enough to trade what you have to sell. This applies to many other products. At present if everybody could buy them, all shirts made in peacetime would produce a shirt and a half per cent.

It's the old story right down the line—we can invent the machine, make anything. We are always hind in our inventions to improve human lot. It's no harder to take more imagination. You lead a horse to water but you make him drink, they say. The lem with humans is different. You got the hungry man and the table the food, but so far you have been able to fix things so you lead him to it.

Russ-Jap Friendship— And American Ships

On May 7, Washington had its first official explanation of the bombings of the Jap-held Aleutian island of Kiska. It said: "The States air forces have established military positions, including an airfield on Amchitka and have been occupying of this island since early."

The same day, the Associated Press sent out a dispatch: "February 16 (delayed)" I say, "I'll say it was delayed." It began this way: "Despite series of eight Japanese bombing raids, this American airbase of few minutes flight from Kiska went into operation today."

I quote all this to show what highly confidential war we are waging. By the time this sees perhaps while I'm writing these lines—Kiska may be in American hands after a land invasion. It is admitted is the only way we can oust the enemy from this island.

If the Japs have gone by the time you read this, there will be a lot of at least partial regret in quarters. The reason is this: As the Japs are on an island like Kiska (or Guadalcanal) more Japs try to reach them, to bring supplies and keep them alive. While that goes on, the Americans have a chance to keep their wounds open. Japs themselves expendable. They are cheap. Sun god has a lot of them and generous in spending them. But hasn't so many ships or so many supplies? So killing Japs does both the Mikado and us as sinking his ships.

That is one reason for the return of the last Jap toes on any of the stolen, far-flung bases which are source of at least partial regret. There is another reason. Day and day out, from Vancouver, Seattle, secret ships, loaded supplies for our Russian ally, been calmly sailing away past Jap-held Kiska and Attu, under Japanese guns in the narrow water that lead to Vladivostok.

Now that was a little matter proved by Russia and Japan hate and fear each other privately but officially are "friendly nations." The question arises now: When if we trounce the little men of the stronghold they have dug their fingernails in the rocky Kiska and Kiska, will they be as willing to let us keep on shipping supplies to Russia?

Perhaps it doesn't matter. That time, which may be now, situation may have changed. Interesting thing is that the situation does change and thanks to the sorship, nobody knows it until knowledge ceases to be aid and fort to the enemy.

But it's tough on a newsman.

BRIEFS... by Baukhage

Victory gardeners planning to cultivate plots away from their homes will be eligible for extra rations of gasoline this summer, if they can show need for extra mileage, the OPA has announced.

In 1918, American war expenditures were only 18½ billion dollars—in 1943, they will exceed 100 billion dollars.

A German seamstress was sentenced to six months imprisonment when she answered her pay in meat and demanded instead of meat and dairy products instead of meat according to a Nazi press release received by the Office of War Information. When the girl was refused, report said, she left saying she had enough customers who would comply with such demands.

A total of 3,300 trailers dot 290 acres near Portsmouth, Va. Here, 13,000 workers in the Norfolk navy yard will make their home for the duration. Each trailer has a plot at least 26 by 46 feet adequately drained, and Victory gardens already have been set out.

60 per cent as much as the low-priced demountable house. Further important savings are made in manpower at the site, since four men can have a trailer ready in a few minutes, while even a demountable house requires several hours. Since war housing is needed in labor-scarce areas, this has made trailers even more popular.

Employment in the Norfolk Navy Yard, which is to be served by the Portsmouth trailer community, is due to increase about 40 per cent in the next few months. The speedy availability of the mobile homes will make it possible for the navy to recruit workers long before it could have if it had to wait for other types of living units. The effect on the naval shipping program will be important to the early completion of the war.

Trailers Accommodate Families.

Of the 3,300 units in Trailer City, 2,640 are standard trailers, normally housing two to four persons. The other 660 are expansible mobile homes, which are transported like trailers but have wings that are opened at the site to form extra rooms. With a few quick movements these expansibles form four-room homes, comfortably accommodating families of six.

This proportion of two sizes provides ample quarters for large families as well as smaller ones.

sub-standard quarters in the city. Electricity is provided at cost.

Although Trailer City at Portsmouth is the high-point of the FPFA use of trailers, it is expected to be followed soon by similar projects in other severely congested centers. The government already owns more than 35,000 units, situated in nearly 200 parks throughout the country.

Portsmouth Enthusiastic.

Portsmouth is enthusiastic about its infant addition, for the housing shortage has been its greatest headache since the emergency began. But even more than the speed of its completion, the project's effect on the city after the war is appreciated. Residents are glad that when the need subsides this emergency "subdivision" will be moved en masse, leaving only the vacant field it mushroomed from, instead of a "ghost" community.

George F. Miles, president of the Trailer Coach Manufacturers association, whose members supplied the mobile units for the project, sums up this aspect:

"This city's birth is spectacular, its contribution to the war effort will be noteworthy, and its fate when the war ends will make a dramatic sequel to the whole tale. For unless post-war needs exceed expectations, the whole community is likely to disappear even faster than it came. The workers will move on to peace-

Portable Laundries and Washrooms Form Part of Trailer City's Modern Facilities

Complete mobility of part of Portsmouth, Virginia's, Trailer City is assured by the use of portable laundry and toilet units. If the trailers in this section should be moved to another site, these utility units could move along and be ready for use as soon as the trailers were re-occupied.

As used in scores of government-operated trailer parks, these utility units are transported like regular trailers, but have extensions that

open out to form extra rooms when they are placed on their foundation blocks. The design is similar to the expansible mobile houses, which form four-room homes when opened, and are made by the same manufacturer.

Besides the expansible trailer and the utility units, the design of the expansible unit is being used in many other ways. Duplex mobile houses, with center partitions separating two family-size accommoda-

tions, have been installed at the Willow Run bomber plant near Detroit. By attaching several of the units at the expansible sides, complete mobile hospitals, auditoriums, nurseries, churches, theaters and other community structures have been formed.

This flexibility completes the plan for complete mobility of entire communities which began with the formation of trailer towns.

KLEMM REFORMED CHURCH
Calvin Grosshuesch, Pastor

Ascension Day, Thursday, June 3
10 00 a m Morning Service.

Sunday:
10 00 a m Worship
11 00 a m Sunday school.
7.30 p m Young Peoples Bible Class

Monday:
8 30 p m Adult Bible Class.
The Bible School will continue for two more weeks.

Klemme Hen Lays Freak Egg
Mrs Fred Nagel brought an egg to The Times office Tuesday morning which she got from Mrs Daisy Lorenz

The egg was a freak laid by a leghorn hen and was in the shape of a small curved gourd, round and tapered at both ends and came out of a hole in the egg.

JUST BETWEEN US CALVES

We'll Do Well on
SECURITY CALF FOOD

It's a low-protein feed that your baby calves need the first 6 weeks. We recommend New Improved Security Calf Food in place of whole milk. This food gives baby calves a good start and it costs about one-fifth as much as whole milk. You make more money selling your milk than feeding it to calves, and Uncle Sam WANTS IT.

SAVE ON CALF MEAL

After 6 weeks when calves need a change in feed, mix Security Calf Food with your grains and SAVE the cost of commercial meals. Calves prefer freshly mixed meal and thrive on it. Come in for a pail!

KLEMM COOPERATIVE CREAMERY COMPANY

NO MORE . . .

Sunday Dinners

• **FOR THE DURATION**

In order to conserve on food supplies, here after we will not serve Sunday Dinners.

Sunday Closing Hours

Our cafe will also be closed Sunday afternoons from 1 00 to 1 30 o'clock

We will appreciate your co-operation and thank you . . .

Quandt's CAFE

JUNE IS DAIRY MONTH

A GOOD TIME TO MAKE PLANS TO . . .

Repair and Improve Your Dairy Barn

• **WITH THE VICTORY PROGRAM** calling for more production of DAIRY PRODUCTS, resulting in higher prices for Milk and Cream, it will pay you to have your DAIRY BARNs in good shape before fall or next winter.

• **AND RIGHT NOW** while we still have Lumber, Cement, Roofing Materials and other Supplies on hand, is a good time to make your plans and order what you may need. You may not be able to get it later on.

• **ESTIMATES FURNISHED FREE!**

• **NOW IS A GOOD TIME TO DO YOUR OUTDOOR PAINTING**

Use our DE VOE 2-COAT SYSTEM. We have the right kind of paint for your house and farm buildings. Good paint applied now will last for the duration and give your buildings the protection they must have.

Northern Lumber Co.
Keith Albertson, Manager Klemme, Iowa

Mr. and Mrs. Carol Larson have been doing a lot of remodeling in the living quarters of their service station west of town. They have enlarged their living room and relocated the bed-room. The new arrangement of the rooms adds to both the attractiveness and comfort of their home.

Mr. and Mrs. J. A. Trumbell of Mason City came Monday for a visit at the Summer Trumbell home.

Mr. and Mrs. Emil Patet drove to Des Moines Thursday for a visit at the home of Mrs. Leonard Sampson. Her son, Sgt. Paul Sampson and wife of North Carolina were home for a short furlough.

Mr. and Mrs. P. W. "Happy" Johnson and children, Barbara, Peter and Nancy, of Humboldt, came Sunday to attend the Memorial Day services and to enjoy their annual picnic with the Ben Coobs and family, and Mr. and Mrs. Paul Grange of Mason City. For several years these three families have held a picnic together on Memorial Day.

Mr. and Mrs. John Baumgartner of Rock Falls came Saturday evening and visited until Sunday evening with Mr. and Mrs. John Day. Mr. Baumgartner conducted a barber shop in Klemme for a number of years. He then advertised his shop as being the "Only left-handed, two-chair barber shop in Iowa." He runs a barber shop now at Rock Falls.

Mrs. A. H. Dulmes, of Brigham, Utah, returned to Grundy Center Saturday afternoon, after visiting with old Klemme friends since last week Tuesday. Several parties and dinners were given in honor of Mrs. Dulmes during the week. She expects to visit with relatives in Iowa, Illinois and Wisconsin before returning to Brigham in about four weeks, where her husband, Capt. Dulmes is stationed at an army hospital. Their son, Dick, may spend the summer with his grandmother, Mrs. Mutch at Grundy Center.

MRS. P. M. WILSON HOSTESS TO U-DELT-EM CLUB

The U-Delt-Em Bridge Club held their last party of the season last Thursday at the home of Mrs. P. M. Wilson.

For the coming year Mrs. W. F. Missman was chosen as president, and Mrs. P. M. Wilson, secretary. The club will meet again next fall.

High scores Thursday were won by Mrs. Geo. Lawhorn, first; Mrs. Fred J. Arnold, second and Mrs. R. A. Jorgenson, third.

Mrs. A. H. Dulmes, of Brigham, Utah, a former club member here, was a guest.

During May, June and July buttermakers must set aside 50 percent of their make for governmental agencies. Previously is as 30 percent.

Local Happenings

Klemme and Vicinity

DRS. COLBY & HAYDEN, DENTISTS, FOREST CITY, IOWA. OFFICE PHONE 374, RES. 189.

R. A. Jorgenson was at Webster City on business Thursday.

Mrs. Arthur Kudje and daughters Jacqueline and Patricia, were Mason City visitors Saturday.

The Boy Scouts of the Winnebago Area are sponsoring a program over KGLO each Saturday morning at 10 35.

Mr. and Mrs. Frank G. King of Palos Park, Illinois, spent the week end in Klemme visiting at the L. V. Perkins home.

Mrs. Louis V. Perkins has been at Fort Dodge for nearly two weeks helping care for her father who is seriously ill.

Dean Merkel, who has been assisting at the Times office for the past year, is now working for Edmund Josten on the farm.

Mr. and Mrs. Karl Krause of Garner took in the Memorial Day Program here and visited with old Klemme friends Sunday.

Mr. and Mrs. John Etchen and daughter, Betty, of Des Moines, spent Saturday and Sunday visiting in Klemme.

Robert Hanson and family of near Kanawha, attended the Memorial Day services and visited with Klemme friends Sunday.

Mr. and Mrs. Lyle Liebendorfer of Mason City were dinner guests Sunday at the R. A. Jorgenson home.

Mr. and Mrs. P. M. Wilson drove to Clarion Sunday afternoon and visited at the home of Mr. and Mrs. Henry, sister of Mrs. Wilson.

Mr. and Mrs. Levi Klotzbach and family spent Memorial Day visiting at the Leslie Smock home at Kanawha.

Ruth, daughter of Fred Bell, is making a good recovery from her recent appendix operation and will be brought home this week.

Mrs. Carl Wille and Julia Bell spent a few days at Mason City last week to be with Ruth Bell who was a patient at Mercy hospital.

Mr. and Mrs. Ferdinand Lemke and son of near Meservey, were visiting with Klemme friends Friday afternoon.

Don't forget the canning and freezing demonstration to be given at the Klemme school Monday afternoon, June 14. You are invited.

Mrs. Elmer Schaefer returned to her home Tuesday after having been at the Hampton hospital for the past week.

Rev. and Mrs. Floyd Klotzbach of Fort Wayne, Indiana, arrived in Klemme this Wednesday morning for a visit at the parental, Levi Klotzbach home.

Mrs. R. A. Jorgenson went to Forest City this Wednesday morning to assist her brother-in-law and sister, Mr. and Mrs. Lyle Liebendorfer move to another house in Forest City.

Garland Brinkman, who has completed one year of college work at Iowa State Teachers College at Cedar Falls is home for the summer vacation.

Miss Ellen Kilgore, who has been at Las Vegas, Nevada for several months is now at Dry Lake, Nevada. Miss Kilgore is employed by the Union Pacific Railroad.

Rev. and Mrs. Fred Griewe and daughter, Dorothy, who teaches at Wyoming, returned to their home after spending a few days the past week visiting in Klemme.

Mr. and Mrs. Cyrus Griewe and son, Larry of Sibley, who visited in Klemme with relatives the past week, left Friday for a visit at Ardale, Iowa.

Dinner guests at the home of Mr. and Mrs. Emil Patet on Memorial Day were Mr. and Mrs. W. C. A. Gast and Mr. and Mrs. Kenneth Schuldt of Liberty township.

Save your silk and nylon hoes. They may save a life.

After visiting with her brother, Pfc. Luther Schmidt at Camp Swift, Texas, Miss Marie Schmidt is now on a trip through the east and will visit in New Jersey.

Miss Jacqueline Kudje, after a short visit at home, has returned to Iowa State Teachers College at Cedar Falls to take the summer course.

Miss Virgie Harcoop, who taught in the Klemme grade schools, has accepted a position to teach in the Belmond grade school beginning next fall.

Mr. and Mrs. Brower of Sheffield were dinner guests at the home of Mr. and Mrs. Harvey Barz Sunday. Mr. Brower is a brother of Mrs. Barz.

Corp. Wayne Buseman left Sunday night for his camp at Los Angeles, California, after visiting for a week with his parents, Mr. and Mrs. George Buseman and other relatives in this community.

Mr. and Mrs. A. D. Gimer of Renwick were in Klemme on business Friday afternoon. Mr. Gimer, former buttermaker here, is the operator and owner of a creamery at Renwick.

Harold Jost, of Toledo, Ohio, son of Henry F. Jost of Klemme, is now in the U. S. Army. Harold was inducted into the army at Camp Perry, Ohio, and is now located at an army camp in North Carolina.

Mrs. Dick Ebeling of Marion, South Dakota, spent the week end and Memorial day visiting with her son, Ben Coobs, and her daughters, Mrs. W. F. Pavey and Mrs. Verner Lewis.

Mrs. Louise Wistey of Clear Lake and son, Edwin of the U. S. Navy, were guests at the Ed Jacobs home on Memorial Day. Edwin left on Monday night for his station after a month's furlough.

Mrs. E. F. Jacobs and son, Elwyn and Mrs. Louise Wistey took Edwin Wistey to Ames early Tuesday morning where he took a train for the west coast where he will board his ship after being home on a furlough.

Mr. and Mrs. C. C. Kilgore have rented Grandma Wm. Smith's residence on the east side of the Park which was tenanted by Mr. and Mrs. E. G. Gregory this past school year. The Kilgores will move about the middle of the month.

Mr. and Mrs. Leo Esbeck and small son of Andrew, Iowa, came Monday night to make their home in Klemme. Mr. Esbeck is the new superintendent of schools here. The family is living in the John Etchen house near the school.

Mr. and Mrs. C. A. Larsen and Charles Fritzel returned Friday from Kansas City, Missouri, where they spent the past week on business. Otto Lemke assisted at the locker plant during Mr. Fritzel's absence.

Dinner guests at the W. C. Keraus home on Memorial Day were Mrs. Rosie Mitchell of Swea City; Mr. and Mrs. Verle Keraus and son of Garner; Mrs. Antonio Keraus; Mr. and Mrs. C. G. Waterman and Mrs. Lyle Wilcox.

Sgt. Asa R. Arnold, son of Mr. and Mrs. F. A. Arnold, who has been stationed at Camp Adair, Oregon for several months, has been transferred to Salt Lake City, Utah for special schooling and training. Sgt. Arnold arrived at his new post Friday.

Mr. and Mrs. W. F. Pavey, accompanied by Mrs. Dick Ebeling of Marion, South Dakota, Mrs. John Clements and Mrs. Verner Lewis drove to McGregor Monday for a visit with relatives and friends for the day. Mrs. Ebeling remained at McGregor for a longer visit.

Mrs. John Day has a beautiful tulip bed at her home which attracted a lot of attention and admiration of passers-by on Memorial Day. The tulips are planted in a semi-circle and the variety of color is gorgeous. They seemed to be at their height of beauty on Memorial Day.

When you have company or take a trip, that's news. Phone 12.

NO GAS WILL BE ISSUED FOR VACATION TRIPS

Iowa ration boards have been instructed not to issue special rations of gasoline for persons desiring vacation trips. The Des Moines district OPA legal department plans to keep an eagle eye, also, on visitors at resort spots during the summer to see that car drivers have not exceeded their 90 miles allotment for pleasure driving. B and C ration card holders are especially warned not to use their cars for pleasure trips.

NEWS ITEM CORRECTED

Several weeks ago The Times received a news dispatch under a Des Moines dateline telling of the death of an infant, the parents of whom were Mr. and Mrs. Norman Sampson. The item so far was correct, but we associated the news item with Norman "Bud" Sampson, a former Klemme youth.

We have just learned that the former Klemme youth, "Bud", is not married and that at present he is serving with the U. S. Forces in the Pacific.

The identical names, and the fact that both live in Des Moines, was the cause of the error.

THANK YOU!

I wish to take this means to thank all of my friends and relatives who sent me letters, cards, flowers, and visited me while I was in the hospital. It was all greatly appreciated. Ruth Bell.

FOR AIR RAIDS ONLY

Investigation of a storm sewer in Gladbrook proved the undoing of "Molly," a dog owned by Fracile Hall. About forty feet from the point of entrance Molly got stuck and was unable to extricate herself. An hour's work of two men removing bricks finally brought rescue.

Mr. and Mrs. Otto Schlawn and Mrs. Henry Boland and Mrs. Roger Schlawn left today morning for Plymouth to attend the graduation of Otto Schroer and to attend the wedding of a relative Sunday evening. Mrs. Schlawn returned home Tuesday. Mrs. Schlawn stayed with Mrs. Ma Schlawn while Mr. and Otto Schlawn were away.

Week Ira Overholt purchas-
ed four acre tract of land from
Rosendahl. The tract lies
west and extends east from the
Kluckhohn home to the east
boundary of Klemme. Mr. Ov-
erholt plans to build a house on his
newly acquired property as soon as
the land is over and building ma-
terials are available.

Our Men In The Service

CHARLES BOCK IN WEST
COAST ARMY CAMP

Camp Stoneman, Calif.
May 30, 1943

Dear Ray

This is the Old Private himself
in deep concentration I had a very
interesting trip, and wish you could
have been along

We stopped at Omaha, Cheyenne
and Ogden, Utah. We didn't get to
go through Salt Lake City, but I
would have liked to. We also stop-
ped at Sacramento, then Oakland.
They really have some swell train
terminals at these stops.

It was all new to me, you know.
We took a ferry over to Frisco and
went out to Camp Mason, where
they sent us out here. We're about
52 miles from Oakland, that is,
northeast. The closest town is
Pittsburg and we are very close to
the "big pond".

Coming back from Frisco we
crossed the Golden Gate. By the
way, I also saw Alcatraz.

I imagine the old town is still
the same, but after what I saw,
these corn-fed boys from Iowa have
a state to be proud of. We've got
them all beat!

Good-bye Ray until next time.
Your former printer's devil,
"Chuck"

Here's Charlie's address:

Pvt Charles W. Bock,
Co. C., 306th Q. M. Bn.,
Camp Stoneman, California

MR. AND MRS. TOM ROTH'S OPENING CAFE HERE SATURDAY

Mr and Mrs Tom Roths an-
nounce that they are opening a cafe
in Klemme and will have their open-
ing date Saturday of this week.
They have rented the Gibbs
building formerly occupied by the
Speer Cafe.

The place is being made ready
and Mr and Mrs. Roths expect to
serve regular meals, short orders,
and lunches and will also carry a
stock of soft drinks, ice cream, to-
bacco, etc.

They expect to have the cafe
open for business Thursday morn-
ing of this week.

Mrs. Roths will be in charge of
the business as Mr Roths will con-
tinue with his trucking business.

NAMES WANTED FOR HANCOCK COUNTY HONOR ROLL OF MEN IN THE SERVICE

The committee in charge of the
county honor roll of service men
which is being arranged in Garner,
requests that relatives who wish
names of men placed on the honor
roll—that is, men who are not
registered with the county selective
service board—contact Emil C.
Elling at Garner so that those names
may be included. Relatives may
write, call or see Mr. Elling.

The committee gets names of
registrants from the board at Britt
and does not need to be contacted
about those men.

LABOR SAVING HAY TOOLS CAN BE MADE

Plans for labor and time saving
hay tools have arrived at the Coun-
ty office of Extension Director Paul
Henderson. These plans and the
suggestions on their use may be ob-
tained by writing or calling at the
office. They may be made with the
use of 2nd hand materials. Welders
and blacksmiths are also urged to
obtain these plans so they will be
in a position to serve the farmers
asking them for further informa-
tion.

Putting up hay with the least
number of man hours is the idea
back of these plans.

USE OF STATE PARKS FOR ORGANIZED GROUPS INCREASES

A Group Of Campfire Girls In One Of Iowa's State Parks

Iowa's State Parks, popular in the past for organized group
outings, will be much more so during this season, according to
G. L. Ziemer, Chief of the Division of Lands and Waters for the
State Conservation Commission. Boy and Girl Scouts, Camp-
fire Girls, 4-H Clubs and dozens of other juvenile organizations
are making arrangements with the conservation officers in charge
of the various areas for use of the park facilities. This year res-
ervations are far greater than on the same date a year ago. Mr.
Ziemer attributes the heavy increase to rationing and war ac-
tivities. Many families accustomed to summer vacations out-
side the state are "grounded" by gas and tire rationing and are en-
couraging group camping by the youngsters as a substitute. Other
parents are busy with war work and are happy to entrust their
children to competent leaders for vacations and healthy relaxa-
tion in the wholesome environment of the state parks.

Virgil Cook Lost Sight Of Eye In Accident On Farm

KLEMMME FARMER BADLY IN- JURED WHEN GRINDING WHEEL BREAKS

Virgil Cook, prominent farmer
living southeast of Klemme, was
severely injured Thursday while
sharpening cultivator shovels on a
power grinding wheel at his farm.
While working over the grinder the
wheel broke loose and shattered
and flying pieces of the emery hit
Mr. Cook in the face. His right
eye was put out and his nose and
head badly cut.

Lewis Stahl, who was at the
Cook farm rushed Mr. Cook to the
Mercy hospital where his injuries
were treated. As the result of the
accident Mr. Cook lost his right
eye and his left eye was also in-
jured but it is hoped that he will
retain his sight in that eye.

DINNER GIVEN HONORING EVERT BARZ, U. S. N.

Seventy-three relatives gathered
at the Klemme Community Hall
Sunday noon and had a basket din-
ner in honor of Evert Barz, who
was home on a furlough from sub-
marine service on the east coast.

Those who attended were Mr.
and Mrs. George Born; Mr. and
Mrs. George Thiemann and Stella;
Fred Neuhring and family; Earl
Neuhring and family; Mr. and Mrs.
Emil Barz and Max of Waterloo;
Mrs. Lena Schroeder; Mr. and Mrs.
Will Barz and daughter, Mrs. H. G.
Voetberg of Garner; Mr. and Mrs.
Fred Barz; Mrs. Clara Barz, Avis
and Allan; Rev. Grosshuesch and
family; Harvey Barz and family;
Marvin Barz and family; Walter
Rosendahl and family; Eugene
Greiman and family; Ronald Barz
and family of Garner; Mrs. Esther
Barz and sons; Grandma Wille and
Mr. and Mrs. Evert Barz and chil-
dren.

CENTRAL STATES ELECTRIC CO. MAKES RURAL HOOK-UPS

The Garner office of the Central
States Electric Company announ-
ced today in cooperation with the
War effort they will make a limited
number of rural connections to
their lines, suggesting that anyone
interested to immediately get in
touch with their Garner office.

Limitation on material in their
stocks will naturally govern the
number of connections that can be
made.

MRS. E. J. ARNOLD HEADS AUXILIARY UNIT HERE

American Legion Auxiliary Elected Officers At Last Meeting

At their meeting last Tuesday
evening the ladies of the American
Legion Auxiliary Unit named Mrs.
E. J. Arnold as President for the
coming year and Mrs. J. A. Cham-
bers as Vice-President.

Other officers elected were as
follows:

Sec-Treas., Martha Bredbenner;
Serg-at-Arms, Betty Ward; Chap-
lain, Mrs. Ben Coobs; Historian,
Mrs. Lester Stille.

Mrs. E. J. Arnold succeeds Mrs.
Lester Stille who was head of the
Auxiliary the past year.

County Meeting June 11

The Auxiliary will hold a coun-
ty meeting at Britt on Friday af-
ternoon, June 11th. All who de-
sire to attend should meet at the
Thada Store at 1:30 p. m.

KLEMMME FISHERMAN TAKES RECORD SIZE CATFISH AT CLEAR LAKE

Leonard Swanson, one of Klem-
me's foremost fishermen, set up a
target for the boys to "shoot at"
when he hooked and landed a 23½
pound channel catfish at Clear
Lake Sunday. The fish was 36 in-
ches long and about seven inches
wide across the head.

With Swanson was his wife and
Keith Albertson. The big fish was
caught while still fishing in the
channel near the sandbar and was
caught on a dead minnow.

Swanson's 23½ pound catfish is
the largest fish to be taken out of
the lake this season and is thought
to be the largest catfish ever taken
out of Clear Lake.

To further demonstrate his abili-
ty as a fisherman, Leonard also
hooked a four pound northern and
a four pound walleye the same day!
Mrs. Swanson and Mr. Albertson
had a perfect record: no strikes, no
fish!

The big fish was frozen and put
in Larsen's Locker and will be the
main dish for a big dinner later.

THE LAST DAY!

Don't forget . . . midnight June
10 is the deadline for getting your
application cards in the mail for
your War Ration Book No. 3.

Renew Drivers Licenses Here June 17 And June 28

JACK FINEGAN TO SPEAK AT KLEMMME JUNE 14

Dr Jack Finegan, head of the
Religious Education at Iowa State
College, Ames, Iowa, will be the
guest dinner speaker at the June
meeting of the Hancock County
Ministerial Association at the
Klemme Methodist Church on Mon-
day, June 14th.

Dr. Finegan has been a success-
ful pastor for several years. He
then assumed the duties of his pres-
ent position at the State College.
The County Ministerial Association
began the custom last year of hav-
ing some outstanding speaker or ar-
tist of some fame to be its guest
at the last spring meeting. All of
the ministers of all denominations
of the county are expected to par-
ticipate in this program as well as
the regular meetings throughout
the year. Any others who are in-
terested in hearing Dr. Finegan
may come, provided a ticket is pur-
chased in advance. Tickets may be
had from Rev. Herschel E. Harvey,
Klemme. Rev. Harvey is the presi-
dent of the association.

The women of the local Society
of Christian Service will serve the
dinner in the church parlors, start-
ing at 7:30 p. m.

The address will be illustrated by
pictures which Dr. Finegan took
himself on his trip around the
world. His address will deal very
largely with international prob-
lems, and help us to better under-
stand our neighbors around the
world.

BOB GISEL OPENING HARD- WARE STORE AT VENTURA

Bob Gisel, who has conducted a
hardware business at Andrew, Ia.,
for the past seventeen years, is
moving his stock and fixtures to
Ventura where he will open up a
store in a couple of weeks.

Mr. Gisel is well known in Klem-
me as the Gisel family have often
visited at the E. F. Jacobs home.

Ventura has been without a
hardware store for the past nine or
ten months.

Mr and Mrs Gisel and their son
who is a sophomore in high school
are moving to Ventura as soon as
they can find a home to live in.

ALL DRIVERS LICENSES WILL BE RENEWED FOR 3 YEARS

Renew Licenses At Community Hall On Either Date Here

Thursday, June 17th and Mon-
day, June 28th are the two dates
set for renewal of drivers licenses
for the Klemme district. On those
dates an official will be at the
Klemme Community Hall all day.
Bring your old license which
will be renewed for 3 years for 75
cents by the official.

Need Not Appear In Person

You need not appear in person.
Any member of your family or a
friend can bring in your old license
and get it renewed. One member
of the family can renew for all of
the others in the family. But you
must bring the old license to be re-
newed, as new licenses are not is-
sued.

In case you lost your license, or
if your name has been changed be-
cause of marriage, then it will be
necessary for you to make applica-
tion at the court house in Garner.

At Goodell June 24th

Drivers licenses may be renewed
at the Community Hall at Goodell
on Thursday, June 24th.

BRINKMAN WILL RE-OPEN ETCHEN SHOP HERE

Martin Brinkman this week an-
nounces that he will re-open the
Etchen blacksmith and repair shop
and will be open for business Mon-
day morning, June 14th.

Mr. Brinkman is spending this
week getting the shop in shape and
installing equipment.

Read his announcement in this
issue of The Times.

THANK YOU!

I wish to take this means of
thanking my many old friends in
and around Klemme for the many
cards sent me during my illness.
I also appreciated very much the
calls, birthday cards and presents
which I received. Thank you!

Mrs. A. Kirkwood,
844 6th Str., S. W.,
Mason City, Iowa.

FISHERMEN WATCH GAS MILEAGE

Fisherman Takes to Bicycle Transportation

The devotees of Izaak Walton will fish whether or no, and
in spite of transportation difficulties and high water in many of
the streams, Decoration Day saw almost the usual number of
fishermen engaged in their sport. As during the spring pheas-
ant season, there was little evidence of abuse of gas rationing,
most drivers keeping well within their legitimate driving range.
The effect of gas rationing was noticeable in that there was a
very wide dispersal of anglers, and many fishermen had good
luck in small streams, gravel pits, and other miscellaneous wat-
ers near home that have been long neglected in favor of more
distant fishing waters. To date there have been no reports of
horse and buggy fishing parties; however, bicycles, motorcycles,
and "shanks' ponies" were commonly used to reach the streams.

BASS AND CRAPPIE SEASON OPENS JUNE 15

June 15 lifts the ban on all species of fish in Iowa. The
season opens that date on largemouth, smallmouth, warmouth,
rock, and calico bass, also on crappies, sunfish, and bluegills.
This group includes the nesting fish, and the opening of the sea-
son on them is delayed to prevent their being fished off their
nests, which are usually in shallow water. They are vicious
fighters during the nesting period and often will strike at any
object or animal that approaches the nesting sites.

HOUSEHOLD MEMOS

by Lynn Chambers

Last Word in Deliciousness . . . Chicken Chowder!
(See Recipe Below)

Get Your Protein!

There's no reason why you should be getting your necessary protein into your daily menus, or why meat alternates, i.e.—foods that use alternately with meat—become a dull or difficult

task. Here's your opportunity to show your family what a really smart homemaker you are—for you can keep up their admiration for you by serving an endless variety of good egg and chicken dishes, and fish in all its guises. These foods are protein-rich and with a little ingenuity you can make a star performer out of them.

Chicken comes beautifully to the fore for it's a good, complete protein and the supply is good, especially at the present time. Use chicken wisely, however, a little bit combined with other foods can make a meal or more out of one chicken. Here's an example:

***Chicken Chowder.**
(Serves 6)
1 cup cooked, diced chicken
2 cups salt pork, finely diced,
or
2 tablespoons chicken fat
1/2 cup onion, finely
chopped
1/2 cups potatoes, diced
1/2 cup celery, diced
1/2 cups chicken stock
No. 2 can kernel corn
1/2 can evaporated milk
1/2 teaspoon paprika
1/2 teaspoon ginger
1/2 teaspoon salt
1/2 teaspoon pepper
2 tablespoons chopped parsley
Cook salt pork in sauce pan over
heat until lightly browned. Add
chicken and onion,
and cook until
onion is soft,
not browned.
Add potatoes, cel-
ery and chicken.
Simmer until vegetables are
tender. Add corn, milk, and season-
ing. Heat thoroughly, stirring occa-
sionally. Season to taste with ad-
ditional salt and pepper, if desired.
Serve very hot with crackers, hard
rolls or toast.

Make good use of crisp, cool vege-
tables to go into a salad with the
chicken Chowder to round out the
meal.

***Chef's Salad.**
(Serves 6)
1 head lettuce
1/2 tomatoes, cut in quarters
1/2 spring onions, cut fine

Lynn Says:

The Score Card: Consumers
are doing a lot in stamping out the
illegal sale of meat by making
sure that all meat they buy comes
from a carcass which carries the
necessary stamps—the permit
number of the slaughterer and a
grade stamp.
Ceiling prices are in effect in
many areas for meat. They are
posted by the butcher near meat
counters and you can consult
them when buying your meat.
Changes have come about on
the bread situation. No more
double or triple wrapping is al-
lowing for bread and rolls. No
more leftover bread or rolls can
be returned to the baker, nor can
there be any fancy racks for dis-
playing bread.
Retail bakers are limited to 15
varieties of bread and nine va-
rieties of rolls in one week. Many
of these measures are designed to
keep bread prices down.
Although outwardly, bread
trimmings have been stripped,
the insides are better. All white
bread must now be enriched.
Each loaf of white bread must
contain not less than three parts
per more than four parts of milk
glids to 100 parts of flour.

Are you having difficulties planning
meals with points? Stretching your meals?
Lynn Chambers can give you help if you
write her, enclosing a stamped, self-ad-
dressed envelope for your reply, in care of
dressed envelope for your reply, in care of
her at Western Newspaper Union, 210
South Desplaines Street, Chicago, Illinois.
Released by Western Newspaper Union.

SPECIAL ARTICLES
BY THE LEADING
WAR CORRESPONDENTS

Inside Story Of Toulon

By J. C. Fernand-Laurent

(WNU Feature—Through special arrangement
with Collier's Weekly)

It was nothing but German stupid-
ity that lost Hitler the French fleet
last November, and the arms and
munitions at the great naval base
of Toulon. I know the story, because
I was in Toulon.

Admiral De Laborde, the French
commander, had received no recent
instructions from Vichy. The only
orders in his possession were those
dating from the armistice, com-
manding him to resist all aggression
from whatever source, and to sabo-
tage the fleet rather than surrender
it.

These orders never had been
countermanded. Preparations for
sabotage had been made. On the
morning of November 27, Vichy,
in the name of Marshal Petain and as
ordered from Berlin, tried to rescind
this order by telephone from Vichy
to Toulon.

The new instructions authorized
surrender of the fleet to the Ger-
mans. But the telephone was not
functioning.

Why not? The truth is simple.

Germans Cut Wires to Isolate.

The German commanders at Tou-
lon, having completed encirclement
of the place and not wishing to be
disturbed in carrying out their in-
tentions, cut every telephone wire
on the night of the 26th, and jammed
all radio transmission in order to
isolate the naval base from the rest
of France—including Vichy. It is
for this reason alone that Vichy's
orders to surrender the fleet never
arrived—until too late to save the
ships for Germany.

Here was Justice: self-adminis-
tered!

Many accounts have been pub-
lished concerning what happened at
Toulon and why it happened. Most
of the accounts have contained mis-
takes. This article, I believe, is the
first true story of the heroic end of
the major part of the French navy.

On November 27 I was near Tou-
lon at the home of a member of our
underground movement. We were
awakened a little before seven in the
morning by the crash of explosions.

Germans Filter In At Night.

During the night, the German
troops had filtered through the sleep-
ing city. They encountered no one.
The French sailors were aboard
their ships, the infantry and the
Senegalese were in the arsenal, the
forts and the casemates. The Ger-
mans hesitated, losing precious time.

After a while, two columns formed,
one heading toward the arsenal, the
other toward the docks. Soon the
Nazis were throwing themselves into
every boat they could find, crowding
upon pontoons they had brought with
them. Suddenly a gun boomed from
the flagship.

Gun Signal Booms.

It was the signal—the order to
sabotage all ships, to destroy port
installations, to spike the guns of the
coastal batteries. Aboard the 70 ves-
sels moored or anchored in the har-
bor, commanders were at their
posts. They gave the pre-arranged
orders. Soon the old dock, the wa-
ter front, the harbor and the road-
stead—the anchorage where France's
proud ships had lived—were no more
than cemeteries.

Fresh explosions came from the
arsenal. Machines and workshops in
the factories were being destroyed.
To the south, flames and clouds of
smoke from burning ammunition
dumps rose high. All around the
base, from the Saron to Cape Brun,
there were new explosions. Mor-
tars, huge rifles, shells in vast quan-
tity—all were destroyed. France's
most powerful naval base, the work
of 20 years, was a mass of smoking
wreckage.

Blind with rage, the Germans
stormed the arsenal, killed the sen-
tinels and forced open the heavy
gates. They were too late. There
was hand-to-hand fighting in the
workshops between Nazi soldiers and
French workers, many of whom
were killed or wounded.

In their rage the invaders then
turned against the cadet school, sur-
rounded the youngsters and by
weight of numbers manacled them,
thrust them into trucks and rushed
them to a concentration camp. Sev-
eral times along the route, crowds
tried to free the lads.

First reports after the tragedy
said that crews had gone down with
their ships. This was not so. The
truth was simpler but no less fine:
Officers and sailors, to a man, hav-
ing done their work of destruction,
remained at their posts to the
last moment, and then in perfect or-
der abandoned their ships and
reached shore.

A number of both officers and men
were explosion victims; some others
were drowned.

When the crews got ashore, they
met heavy German forces, and most
of them were taken prisoner.

BLITZ THEN AND NOW
The blitzkrieg was a wondrous feat,
A tactic which makes progress fleet;
The Nazis made it quite a fad . . .
But how they wish they never had!

The blitzkrieg set a dizzy pace
For any so-called Master Race;
Herr Hitler thought it up when hot—
But how he wishes he had NOT!

The blitzkrieg was such ghoulish fun
When it was dished out by the Hun;
He gave it everything he could . . .
But now it does not look so good!

The blitzkrieg was a thing devised
To keep the whole world terrorized;
It was the gem of Hitler Haus,
But now the word for it is "Raus!"

The blitzkrieg, what a master
thought!
Some lessons to those Poles it
taught;
(It taught those Netherlanders,
too—)
But that was when the thing was
new!

The blitz was one swell Nazi scheme;
They loved to hear the victims
scream;
But when it's done by Nazi foes,
Ach, Gott, such low and dirty blows!

The blitzkrieg, how it battered
France!
The slaughter made Der Fuehrer
dance;
But, turned about, it's something
else . . .
Der Fuehrer's fervor for it melts!

The blitz applied to helpless
Greeks—
It made plump Goering laugh for
weeks!
It made his tummy shake and how!
But that is not what's shaking now!

A blitz put on an English town—
The Nazis do that stuff up brown;
That's war at new artistic heights
They thought . . . but not these days
and nights!

A farmer blasted at his crops—
This struck the Nazi code as tops;
A kindergarten stained with gore
Seemed legal . . . but not any more!

Civilians, helpless, cut to bits—
This gave the Nazis laughing fits;
They think their blitz was quite a
stunt—
But only when they're out in front!

From Warsaw through to Coventry
The Nazis staged the blitz with glee;
It fattened Adolf's pride and
purse . . .
But, ah, how different IN
REVERSE!

HARRY HOPKINS AND THE VICTORY GARDEN

Harry Hopkins has planted a Vic-
tory Garden and the newspapers and
newsreels are carrying pictures of
Harry looking down on the plot as
if a little worried that the vegetables
might come up without any gov-
ernment assistance.

Harry's whole expression as he
stands there looking down on his
garden plot seems to say, "I know
those little seeds used to come
through in the old days, but this is
a new era. They'll have to get
help."

We can imagine Mr. and Mrs. Hop-
kins out there planting. "Do you
think the ground has been plowed
enough, Harry?" asks Mrs. Hopkins.
"I suppose the Republicans would
claim it's soft enough, but I have
my doubts," replies Harry.

"What about putting in soybeans?"
Mrs. Hopkins asks.

"I don't care much for soybeans,"
Harry admits. "They're too closely
associated with industrialism. You
can do wonderful things with a soy-
bean without any party backing.
It's too reminiscent of the old or-
der."

"How about some lettuce?"
"Lettuce prospers pretty freely
without much help, too."

"What do you think of setting out
some cabbage heads?"

"Don't ask me for an opinion on
cabbage heads now. Wait until I
see the Republican slate."

Do you like peas?"
"I don't know what our party
would do without 'em. Look at all
the peas we depend on . . . WPB . . .
OPA . . . FPC . . . PWA . . . every-
thing like that."

"I suppose we'd better plant some
string beans."

"Yes, if only on account of the
President's hold the string order."

"He said hold the line, not the
string."

"Oh, yes! My mistake."

Well, anyhow, the garden gets
planted and then Mr. Hopkins calls
some secretaries and says, "Take
some letters about our activities in
this garden."

"You don't need letters to get a
garden to grow," says Mrs. Hop-
kins.

"Nonsense," insists Harry. "This
has got to follow the regular chan-
nels . . . There must be a state-
ment on preplanting and postplant-
ing plans . . . There must be de-
finite objectives . . . and the usual
blueprints."

PATTERNS

So Feminine.

EVERYTHING'S there—a young
two-piece with simple moulded
lines, feminine frilly trimming and
expensive looking details.

Barbara Bell Pattern No 1782-B, de-
signed for sizes 10, 12, 14, 16, 18 and 20.
Corresponding bust measurements 28, 30,
32, 34, 36 and 38. Size 12 (30) requires,
with short or 3/4 sleeves, 3 3/4 yards 39-inch ma-
terial. 3/4 yard contrast for collar. 1 1/4
yards machine made ruffling.

Spring Posies.

HOW colorful, young and be-
coming is this princess dress
with brilliant, wool-embroidered
posies blooming at neck and hem
line.

Barbara Bell Pattern No 1770-B is de-
signed for sizes 10, 12, 14, 16, 18 and 20.
Corresponding bust measurements 28, 30,
32, 34, 36 and 38. Size 12 (30) requires,
with short or 3/4 sleeves, 4 1/2 yards 35 or
39-inch material. 4 yards ric-rac to trim;
1/2 hank blue and 1/2 hank red wool for
embroidery.

Fish Hooks on Liferrafts

Fishing kits containing dehydrat-
ed pork rinds, a knife that will
float, hooks and rigs, a dip net,
cotton gloves and instructions
printed on waterproof paper, are
now part of the equipment of life-
boats and rafts.

Short of Milk?

... save it this way!

Ink Spots
And Spatters

By Jergie

SAVE THAT TIN

Two tin cans out of every three
that could be salvaged are being
thrown away in America today.
Collections of tin cans have in-
creased considerably since the pro-
gram went into effect last spring.
from a modest 1,000 tons of tin
cans during the first month of the
campaign to 20,000 tons in April,
but present collections are only a
third of conservatively estimated
potential. Salvaged tin cans are
needed to supplement the nation's
supply of critical war materials . .
tin, copper and steel.

MYSTERY FOOD SERVED TO BUSINESS MEN

There was a great deal of mys-
tery connected with the "feed" at
the Community Hall Tuesday night
which was attended by quite a big
crowd of business men.

There was coffee, bread, butter,
potatoes and . . . the mysterious
meat.

The boys looked a bit sheepish
as they bit into the rare morsels
before them and no doubt some of
the boys yet don't know what they
got themselves into.

To enlighten the uninitiated we
might say that the delicious and
mysterious meat is referred to in
polite society as "Rocky Mountain
Oysters."

A bit more variety and swanki-
ness could have been added if the
menu had it also contained a few
chitterlings to add variety.

GOLFERS ARE GETTING FISHING FEVER

With good catches being brought
home from the lake, even some of
our confirmed golfers are begin-
ning to "see the light," and are now
swinging over to join the ranks of
Klemme nimrods.

Klemme fishermen scored a big
win the other day when Art Kud-
je, a dyed in the wool, die-hard
golfing enthusiast was seen sneak-
ing into Jacobs Hardware the other
morning and come out with an arm-
ful of fishing tackle! Art has come
to his senses and realizes that he
can't eat golf balls.

And, Doc Missman, Pete Wilson
and C G Waterman are beginning
to ask questions about fishing. The
boys are really skipping. Maybe
they are running low on red ration
stamps and can use a few fish to
tide them over.

CHANGED FLAG RULES AFFECT ALL CITIZENS

A change in observances of re-
spect for the flag has recently been
made. These changes also affect
the procedure for all citizens to
follow.

No longer is the right hand ex-
tended by civilians in reciting the
pledge of allegiance. Section 7 of
Law 623 recently passed by Con-
gress, reads, "That the pledge of
allegiance to the flag,

'I pledge allegiance to the
flag of the United States of
America and to the Republic
for which it stands, one nation
indivisible, with liberty and
justice for all.'

be rendered by standing with the
right hand over the heart . . ."

When the flag is hoisted or low-
ered or when it passes in parade
or review, all persons should face
the flag, stand at attention and sal-
ute.

For civilians the salute con-
sists of placing the right hand
over the heart. Men should re-
move their hats.

When the national anthem is be-
ing played, those present should
stand and face toward the music.
If the flag is displayed at the same
time, everyone should face it and
salute.

BETTER IOWA

GARDENS

VICTORY GARDENS
Keep after those weeds in the
Victory Garden!

This is beet greens time. Where
the beets are too thick in the row,
thin them leaving plants about 2 or
3 inches apart. The pulled beets
should not be discarded but cooked
for greens. Use both roots and
leaves, but be sure to wash very
thoroughly to remove all grit and
sand.

Carrots and parsnips should also
be thinned in the row so they may
develop well shaped roots.

After your spring onions are all
used, it's a good idea to make an-
other planting of beets or carrots
in this area.

Where tomato plants are making
a rather poor growth or where the
leaves are light green due to being
set back by cold wet weather in
late May, side dress each plant with
a small handful of Victory Garden
fertilizer. This fertilizer contains 3
parts of nitrogen, 8 parts of phos-
phorus, and 7 parts of potash per
100 and should stimulate growth
and production. Apply this fertiliz-
er in a trench about 1 to 2 inches
from the stem. Cover with soil and
if the soil is dry, water.

Another reminder about staking
your tomatoes: Staking tomatoes
keeps the fruit off the ground, pre-
venting rotting in wet weather. It
is not difficult to learn to train and
stake tomatoes, and it pays particu-
larly well in small gardens where
space is limited. Use stakes about
6 feet long, driving them in the
ground 1 1/2 to 2 feet. Put one stake
about 3 inches from the base of the
plant. Train three or four stems to
the stake. Pinch out any shoots
that start in between the stem and
leaf, leaving the end bud. As the
stems grow tie them to the stake
about every 6 to 12 inches. Use
strips of old rags and tie loosely

When the new shoots on black
raspberry plants get about 25 to 30
inches high, cut out 4 to 6 inches
of their tips. This will check length
growth and force out a number of
side branches. Go over the patch
several times as these shoots do not
all reach the proper height at the
same time. This is one of the im-
portant prunings of the black rasp-
berry. Do not do this with red
raspberries, however

Watch your cabbage plants for
the first signs of worms. This year
we must use lead arsenate or paris
green to control these pests. These
insecticides are poisonous to hu-
mans, too, so control the cabbage
insects and you won't have much
trouble after the heads have form-
ed and it's dangerous to apply an
arsenical.

LATE-SOWN LAWNS WILL NEED MORE ATTENTION

Late spring and early summer
sowings of grass seed will require
careful attention to make success-
ful lawns. L. C. Grove, Iowa State
College horticulturist, assures those
trying to improve their lawns that
it is much better to plant seed on a
thin area or bare spot in midsum-
mer than to leave it wide open for
the invasion of troublesome weeds,
but more weeding and careful wat-
ering will be necessary to over-
come the disadvantage of unfavor-
able weather.

Prices of dairy cows are higher
during this war than at the same
stage of the first World War.

Fly Time!

It's time for flies and mosquitoes to begin making life miserable for you and your family, so get ready for the "invasion" at once. A trip to our Lumber Yard will solve the problem, as we carry a large line of the following:

- SCREEN DOORS
- SCREEN WINDOWS
- COMBINATION SCREEN and STORM DOORS
- SCREENS . . . made to order
- GERM-A-RID Barn Spray
- DE VOES SCREEN PAINT
- DE VOES HOUSE PAINT

We have the materials you need for repairing. See us for your needs.

HERE'S A GOOD TIP!

Now is a good time to place your order with us for STORM WINDOWS for next winter. You will be glad when winter comes if you ordered them now!

Northern Lumber Co.

Albertson, Manager Klemme, Iowa

ing For a Day

It's Dad's Day

June 20th

THE REAL MEANING of Father's Day is recognition, appreciation and honor . . . to him who pays and pays, and often sacrifices personal desires to carry on.

WITHIN RECENT DAYS many thousands of fathers (mothers, too) throughout the land have accomplished their goal in witnessing the graduation of a son or daughter. NO DOUBT MANY retrenchments were made by parents in order that Mary and John could complete their course.

DAD TOOK PRIDE IN THIS too, and had satisfaction of knowing that he had been able to complete his course in providing.

IN LATER YEARS it will be better understood what sacrifices might have been made. REMEMBER . . . SUNDAY, JUNE 20th is Father's Day . . . you're fortunate if you still have him with you.

Carson Clothing Co.

FOREST CITY, IOWA

KLEMMER LOCALS

Miss Thelma Chambers, accompanied by Miss Irene Schaal of Galva, and Mrs. Lawrence Schroeder of Kanawha, left Tuesday for Washington, D. C. and New York City. The young ladies will secure jobs there for the summer and also plan to do some sight-seeing before returning to Iowa to resume their teaching in the fall.

Mr and Mrs Otto Schlawn went to Fort Dodge Monday for a visit with their daughter, Mrs. Herbert Cole, who was a patient at a hospital there recovering from an appendix operation.

Carpenters from the Northern Lumber Co. Tuesday rebuilt the stairway leading from the office to the shop at the Klemme Times. In order to install a new press the stairway had to be made wider.

Wm Stille was taken to the Mercy hospital at Mason City Thursday as he was very ill with an infection. Mr Stille had the misfortune to cut his foot with an axe while splitting wood about a week ago and he was taken to Garner to have a physician treat the wound which later developed infection. Mr Stille was in a critical condition at the hospital for several days. At this writing he is reported to be somewhat improved.

Ben Reemstma of Garner was in Klemme on business Tuesday forenoon.

The Iowa fruit prospects are for a smaller apple crop than last year, no peaches, a good grape crop; a good strawberry crop, poor raspberry crop in general.

Farm Machinery Preparedness Tips

A BLUE TAG FOR EVERY FARM MACHINE
Timely Information Prepared By Iowa State College Specialist

Three closely related mechanisms must be considered when repairing the grain binder and getting it in shape for this summer's harvest. These mechanisms are the elevator, the binding head and the cutter bar.

Most of the canvas or elevator trouble can be traced to one of the following difficulties. Elevator frames out of square, loose roller shaft or gudgeons, badly worn roller shaft bearings and unequalized canvas strap tension.

The troubles which arise from short pieces of straw wrapping on the platform and lower elevator rolls can be overcome by running the outer end of the platform slightly lower than the end nearest the elevators or the inner platform end. Proper handling of the reel also will aid in the case of handling the unbound straw and also will materially improve the bundle form.

Several common troubles are caused by improper operation or adjustment of the various clutch parts. Sometimes the faces of the dog and dog stop arm become worn at an angle. Thus when the dog comes around and strikes the stop arm it slips past all-wing the clutch to engage and make a small bundle.

In most cases this can be remedied by filing the faces of the stop arm and the dog so they are square with each other and cannot slip past until properly tripped.

The tying head includes the twine holder, knotted bills, the knife and tier wheel with the knotted bill and twine holder pins. Most of the "missed" or loose bundle trouble originates here. The needle and the twine guide loops must be in good condition and aligned, or loose bundles will result.

The cutter bar can be put in condition by following the same general procedure as in overhauling a mower cutter bar. The two important details are to have the knife register properly and to maintain the proper clearance between the knife and ledger plates so a smooth shearing cut will result.

Check over your binder now for worn or broken parts and come in and order your repairs at once.

Klemme Iowa

MRS. SCHAEFFER TELLS OF LIFE AS A WAAC

Newark, N. J. June 2, 1943.

Dear Friends:

I have intended writing you a letter for quite awhile I thought perhaps you'd like to know just what I've been doing since I joined the WAACS. I have been in service something over 2 months now, beginning active duty exactly two years to the day Doc began active service, and I wouldn't trade my war job with anyone.

First I was at the Receiving Center at Fort Des Moines for several days receiving the usual Army immunization, being issued G. I. clothing and learning something of what was expected of me as a member of the Women's Army Auxiliary Corps. Next I was put in a Basic Company to receive an intensive four weeks training, consisting of fine military schooling, drill and physical training. We also got a taste of K. P. and extra detail duty, etc. "Good mass discipline" says my army officer husband. I belonged to a fine company. Our officers had exceptional ability and as a result of their leadership and the cooperation of the girls, Company 9 won Battalion Inspection the first week, Regimental Inspection the third week, and carried off the honors of the parade for Colonel Hobby, our last week.

The last week of basic we were all more or less excited about further orders. No one was more surprised than I was when I received orders to go to Radio Television School in Newark. A girl from Knoxville received the same assignment and is one of my roommates here.

When we arrived in Newark we were met by an officer who took us to the St. Frances Hotel and assigned us rooms so that we could make ourselves "at home." Our school is several blocks from the Hotel and we march in platoons back and forth, morning, noon and night.

To be able to attend this school is a wonderful opportunity for all of us. We are not only being trained to release men for combat duty so that the war will end sooner, but there will be many jobs for women in radio after the war. In fact, not long ago in the Des Moines Sunday Register you may have read an article on the possibilities of radio. These possibilities are infinite according to radio men.

During the week outside of the school hours we spend our spare time studying and doing daily tasks such as washing, ironing, shining shoes, etc. At the end of the week we have a test and then we are all ready for a bit of recreation. Many of us go to New York each weekend as there is so much to see in the city.

So far I have included the following in my tours: the Empire State Building, Grant's Tomb, Staten Island, Central and Riverside Parks, and of course, a few of the swanky stores like Saks (just like a woman!).

One Sunday I attended Dr. Harry Emerson Fosdick's church. I used to listen to his Vesper Hour on the radio and so it was wonderful to hear him speak and to meet him after the service. I went with a group and a guide through the church and if I had the space I could tell you many interesting things about the church and the interior. I have gone to a Radio City Music Hall performance and to see three plays: Ethel Barrymore in "The Corn is Green," Clarence Day in "Life With Father and Claudia." Last Saturday night several of us were given tickets to the Lucky Strike Hit Parade. That was another real treat. However, the biggest thrill for me (and remember I'm a Republican) was to hear Mrs. Roosevelt speak at the Women's Military Services Club. She had one of the kindest faces I've ever seen and does not look at all like the pictures one sees of her. We had the privilege of speaking to her and shaking hands with her.

I could go on and on like this for pages and pages but if I do you would be wishing I'd quit and I wouldn't blame you.

Please remember that although my letters are few and far between I often think of you all in Klemme and pray that the time of being reunited may not be far off for all of us.

Sincerely,
Florence W. Schaeffer.

Mrs. Schaeffer's address is:
Cpl. F. W. Schaeffer, A-702432, Group 2 W
1244 Service Unit, U. R. T. I.,
96 Washington Street,
Newark, 2, New Jersey.

KLEMMER REFORMED CHURCH

Calvin Grosshuesch, Pastor

Pentecost Sunday:
10.00 a. m. Morning Worship.
Holy Communion
Offering for Benevolences
11.00 a. m. Sunday school.
7.30 p. m. Young Peoples Bible Class.

The Bible School will continue one more week, closing with a picnic on Friday, June 18th.

Amish families don't worry about rationing. They have not applied for ration books and scorn the use of automobiles in favor of the horse and buggy. Their beehives provide honey for sweetening and they even raise their own spices and sage.

Strawberries will retain more of their ascorbic acid if the hulls are left on after picking. Oxygen in the air destroys most of the ascorbic acid in the berries that are bruised, cut or hulled.

Muffins made from enriched flour, milk and egg are gems of good nutrition. They carry valuable protein, iron, calcium, B-vitamins and iron to the table in a delicious and economical manner.

Poultrymen figure that it takes about 6 pounds of feed to produce a dozen eggs. Feed represents about 60 per cent of the total cost of egg production, including labor, overhead, interest and the like. Producing quality eggs and keeping them up to quality until they reach the consumer gives highest returns.

Wheat is rather heavy feed for calves and should be mixed with oats or corn for best results. The calves soon get tired of wheat when it is fed as the only grain.

Livestock and machinery are the two greatest causes of accidents on the farm. Animals are living things and need to be considered as such. Calmness, kindness, patience and thoughtfulness, and learning how to handle and manage these animals will prevent accidents.

Use of a tractor-mounted stacker is probably the fastest way known of putting up loose hay. Only about three-quarters of a man hour per ton is required to pick up hay from the windrow and put it into the stack. This is a lower labor requirement than for any other method of handling hay.

The best weed control chemicals on the market are sodium chlorate and atricide. One or two sprayings of these chemicals will do more for eradicating weeds than 10 or 12 sprayings with crankcase oil or other types of fuel oil.

CANNING CALENDARS AND INFORMATION READY

Anyone wishing food preservation calendars and information may obtain them at the Farm Bureau Office in Garner.

These calendars include points on canning of vegetables and also fruits and give the processing time for the hot water bath and for the pressure cooker. Leaflets are also available on the canning of beef, pork and chicken.

Material on the drying and brining of vegetables and fruits is now being printed and will be available by the first of July. Drying and brining of foods will be used by many this year to add variety to menus as well as make it possible to help preserve every bit of food that is produced in the gardens and orchards.

All indications point toward a steady hog market for the next few weeks, economists at Iowa State College say. They expect some daily variations in prices because of volume in marketing, but no major price change appears likely.

Milk Takes Important Place in Nation's War Diet; Dairy Industry Breaks All Production Records to Meet Needs

By E. M. HARMON

Released by Western Newspaper Union.

In a time when milk has become more important as a dietary factor than ever before, the U. S. dairy industry has taken a front rank in the war effort by smashing all records for production. During the first four months of this year, 37,157,000,000 pounds of milk were produced, 212,000,000 pounds over last year's mark for the same period.

That is enough increased production in quarts of milk to make a row of milk bottles from San Francisco to Boston by way of Chicago and back through New York City, Washington, D. C., and St. Louis to the Carlsbad Caverns in New Mexico.

In other words, more than 26,000,000 dairy cows on American farms are greatly exceeding last year's record-breaking production. With the single exception of April of this year milk production each month has been higher every month than for the corresponding month of the previous year since January, 1940. In January, 1943, production was 47,000,000 pounds over January of last year and 1,246,000,000 pounds over the average for January in the years of 1935 to 1939. In February, 1943, these 26,000,000 cows produced 53,000,000 pounds more milk than in February of 1942, and in March production exceeded that of March last year by 133,000,000 pounds. Due largely to the lateness of the season this year April production is 60,000,000 pounds below last year but is still 1,317,000,000 pounds above the average for the years 1935 to 1939.

Hard Work Does Job.

But don't get the impression that these record-breaking yields are being easily accomplished. Labor and equipment shortages are making what is always hard work even more difficult. On the one and a quarter million dairy farms of the nation these producers, their wives, daughters and small children are toiling long hours to take the places of the big brothers and hired hands who have gone to war. On more than 3,000,000 other farms, where a few cows are kept as a sideline, equal efforts are being made.

Always important to health and well-being of the nation, milk and its products become doubly so during the war emergency. The master menus of the army call for fresh fluid milk every day and for butter at every meal. They call for frequent servings of cheese, ice cream and other dairy products. Field rations are made up very largely of milk in concentrated forms.

Executives and managers of factories and offices are coming to realize the part that diet plays in efficiency of workers and to insist on

a greater utilization of milk and its products. In many cases by simply installing a mid-meal milk service, accident rates have been reduced as much as 30 per cent and the amount of work per employee materially increased.

The nutrition program of the National Dairy Council is of fundamental importance in developing this national health consciousness. Born of research discoveries which pointed to the place of dairy products in correcting some of the nutritional deficiencies of the first World War, this program is now in its 25th year. For nearly a quarter of a century the Dairy Council has spearheaded a nutrition education program in the schools and among the more than 3,000,000 doctors, nurses, dentists, dietitians, teachers and other opinion-forming leaders who largely determine the food habits of the nation. It is fitting that the results of these efforts should come to their maximum fruition during this emergency period when such information is so much needed to achieve war efficiency.

That the lessons on the value of dairy products to human health are being learned is shown by the fact that total consumption of all dairy products in milk equivalent rose from 806 pounds per person in 1935 to 1939 to 825 pounds per person per year in 1941 and from that to 854 pounds per person in 1942. Consumption of fluid milk and cream per capita rose from 328 pounds in 1935-

INCREASED DAIRY PRODUCTS FOR OUR ARMY		
Comparison of Daily Garrison Ration—World Wars I and II.*		
	World War I	World War II
Fresh milk	8 oz.	8 oz.
Evaporated milk	1/2 oz.	1 oz.
Butter	1/2 oz.	2 oz.
Cheese	1/4 oz.	1/4 oz.

*Ice cream is a favorite with men in the armed forces in World War II. It is served on the average twice weekly at regular meals and eaten in large quantities in canteens—in far larger amounts than in World War I.

39 to 381 pounds in 1942. Cheese consumption increased from 5.5 pounds to 6.4 pounds and ice cream consumption from a little over 7 quarts to 13 quarts per capita during that same period. Consumption of milk in most other forms increased.

This growing appreciation of the food values of milk and its products has resulted in a realization by government that fighting forces must have adequate quantities of dairy products. It has caused milk and its products to be given No. 1 place among the protective foods. It is even made necessary the furnishing of vast quantities of dairy products to our Allies.

All of this adds up to the greatest opportunity and the greatest challenge that has ever come to the dairy industry. It means that the greatest contribution the skilled dairy farmer or dairy plant worker can make is to stay right on the production line, feeding soldiers and war workers. Without foods of the right kind, army efficiency goes down and the war workers' efficiency declines.

To feed these fighting forces and our Allies the government requires dairy plants to "set aside" 30 per cent of all the butter made each month. That will be approximately 535,000,000 pounds of butter a year.

Almost 11,250,000,000 pounds of milk are required to make that much butter, or more than 30,000,000 pounds of milk a day. Stated differently, the milk that is required every day to make butter for government needs would fill a train of 37,500-pound capacity tank cars, 5.3 miles long.

But that is only a part of the government needs for lend lease and for the army. Fifty per cent of all the American cheddar cheese is being called for by the government for wartime needs. It is anticipated that this will amount to about 375,000,000 pounds of cheese this year. Another 4,000,000,000 pounds of milk are needed to make this cheese. That is 11,000,000 pounds of milk a day. If we were to take an average farm from the one and a quarter million dairy farms of the United States and ask that they produce enough milk to meet the government's cheese needs for the war emergency for one day, it would take that farm 120 years to do so.

U. S. to Increase Purchases.

During the period of heavy production beginning May 1, the government is requiring that the amount of butter to be set aside for lend lease and the fighting forces be increased from 30 to 50 per cent. Likewise, the cheddar cheese required for these purposes is increased from 50 per cent to 70 per cent. However, it is assumed that this is done to get the bulk of the government needs while supplies are the largest and thus leave fairly uniform amounts for civilians throughout the year. It is not anticipated that the total governmental needs will exceed 30 per cent of the butter and 50 per cent of the cheddar cheese for the entire year.

Evaporated milk is being called for by the armed forces to the extent of 20,000,000 cases a year. That calls for 2,000,000,000 more pounds.

In addition fresh fluid milk is on the army master menus every day, and ice cream is served from 8 to 12 times a month. Milk is also served frequently in cocoa and various other forms.

Of defatted milk powder there is practically no limit to the needs of the government, both for the fighting forces and for lend lease. Manufacturers are required to sell 90 per cent of all their "spray process" milk powder to the government. Many of them dispose of all of it in that way. Altogether about 611,000,000 pounds of defatted milk powder was made last year from about 7 1/2 billion pounds of skim milk. Probably another 2,000,000,000 pounds of defatted milk powder could be made if the price were high enough to encourage diverting it from livestock feed and if milk drying machinery could be made available.

In spite of every effort along the production line it will not be possible to provide civilians with all of the dairy products they want. Ice cream production has been reduced to 65 per cent of that made last year, in order to make the additional milk solids available for our fighting forces. That means there will only be 8.5 quarts per civilian this year as compared with 13 quarts last year. After the necessary butter has been set aside for army and lend lease needs there will only be about 12 pounds each for civilians this year compared with 17 pounds in former years. Taking out the army requirements for cheddar cheese, civilians will probably have to reduce their cheese consumption from 6.5 pounds last year to less than 5 pounds this year.

These curtailments represent a distinct sacrifice on the part of consumers.

Washington Picture Postcards:

The visual poetry of the Lincoln Memorial that warms your spirit and finds a home among your memories . . . Modern Federal buildings displaying their best architectural manners, overlooking slum areas bruised by poverty . . . Cherry trees wearing dainty blossoms . . . Firing squads of reporters shooting sassy queries at public officials during press conferences . . . Homeless rumors racing from place to place about town . . . The sun wrapping its beauties around the long stone finger of the Washington Monument . . . Lobbyists greeting those who can do them favors as though they meant it.

The majestic atmosphere of the Supreme Court edifice where people converse in soft whispers for fear of scratching the varnished silence . . . Nervous fingers of typewriter keys drumming out details of the Government's business . . . Pretty gals who came to the capital for glamour and excitement, hemmed in by hard work during the day and surrounded by loneliness at night.

Legislators who crossed swords during public debate, ping-ponging friendly words in cloakrooms . . . The Capitol Dome whitewashed with moonlight, the star among the city's sights . . . Swanky old mansions reeking of history, now serving as ordinary boarding houses for government workers.

Nerve centers of war agencies sprinkled with lights all night, because war is a 24-hour job . . . Human pell-melling through hotel lobbies . . . The well-manicured tussels among social leaders to get important guests . . . The Library of Congress drenched with culture, while people in buildings around it are sweating to protect everything it stands for.

The best-dressed men in town—Hoover's G-men. They are also the hardest punchers and the straightest shooters . . . Uppity embassy parties which provide a showcase for good manners and stale gossip . . . A soldier and a girl holding hands on a park bench, while a few blocks away decisions are made that will affect their whole future . . . Tots calmly strolling into schools to learn history, as it is being made all around them.

Alleged secrets being hushed about from place to place. Most of them are slices of bunk that start from nowhere and end in the same place . . . The exclamation point excitement around war agencies, where decisions are made that affect Americans everywhere today, and history tomorrow . . . Horn-blowing motorists in traffic jams giving your nerves a toothache.

Tails of parked cars growing at every public building . . . Movie theaters, jukebox joints, saloons, dancehalls, giving the entertainment sector a whiff of Broadway's atmosphere. But all gayety simmers down to a whisper at midnight . . . Uppity salons where intellectuals gather to twiddle their opinions and juggle yawns . . . The many thriving palmists, astrologers and other members of the crystal-ball brigade.

Crowds waiting for tables in eateries, waiting in the clogged traffic, waiting for interviews, waiting for rooms. While natives of the Capital City wait for the war to end so that they can fit themselves into normal lives again . . . Politicos, treated like pleasant thoughts when they had power, being ignored like a cigarette butt as soon as they lose their jobs.

The sign: "Washington, The City Bureaucratic" . . . Twilight's velvety glow coating the city with its natural cosmetics, which most people are too busy to notice . . . The out-of-tune symphony of sounds that starts in the morning, snowballs into an avalanche by mid-day, begins to evaporate as evening piles shadows in corners and buries itself in the silence of midnight . . . The unbuttoned atmosphere of week-ends, when humans get a chance to catch their breath.

Trains coughing out mobs arriving in town, and gobbling those about to leave . . . Small patches on the seat of government eager to grab publicity (spotlight crazy) and impress constituents back home . . . Empty chairs in the House and Senate, because legislators do most of their work in committee rooms—when they're not doing things they shouldn't be doing.

Falls with his wind-blown coiffure romping along the White House lawn—the most famous dog since Rint-Tin-Tin . . . Biggies at private parties, still nibbling on public debates between mouthfuls of food . . . The hardest worker in town—the President . . . The sour grapevine system of public servants who are always ready to pass the buck or give an excuse, instead of trying to rectify their mistakes . . . The many historical sights all over the place, making the city itself a dramatic museum.

Washington, D. C.

MEETING WITH THE PRESIDENT

Certain senators who have been working backstage for a streamlined "war cabinet" got some interesting ammunition when they cross-examined one of the President's close associates at a closed-door committee meeting.

They learned that cabinet meetings, except for an increase in the number of participants, still are being conducted on an informal, crack-barrel basis, with no plan or system.

The weekly meetings are conducted without an agenda. Cabinet officers and agency heads never know what will be discussed from week to week, frequently come unprepared for policy questions that affect them.

Senators who have been digging into the matter feel that the White House secretariat should contact department and agency heads several days before a cabinet meeting to learn what problems they want to discuss with the President. On the basis of this, as well as matters the President himself intends to bring up, an advance memorandum could be prepared and distributed before the meeting.

Besides regular cabinet officers, there are usually a dozen other top government officials at White House sessions, including Harry Hopkins, Manpower Chief Paul McNutt, WPB Chief Donald Nelson, Farm Czar Chester Davis, Economic Stabilizer James Byrnes, Admiral William D. Leahy.

Time was when disputes between departments and agencies were ironed out at a cabinet meeting, but not now. Even disputes affecting major military and domestic policies are passed over. Favorite tricks of department heads, who have a ticklish matter on their minds, is to wait until the meeting is finished, then pass a note to the President stating their particular problem, with a request for a private audience.

FOUR GERMANS WATCH U. S. A.

There are four Germans who know the United States better than any others. Where they are now reveals what importance Hitler attaches to the United States and its influence on the neutral countries. For all four Germans are located in key neutral capitals where they can watch Americans and keep their ears open for news of U. S. diplomatic and military maneuvers, and counteract American influence.

Here are the four German experts on the U. S. A.

Franz von Papen, German military attaché in Washington during the last war when he engineered plans to blow up the Welland canal and brain-trusted various other sabotage.

Hans Heinrich Dieckhoff, ex-ambassador to Washington and one of the most skillful to be stationed here in years.

Hans Thomsen, counselor and charge d'affaires of the German embassy after Dieckhoff left Washington.

Kurt Sell, correspondent of the official German News Agency DNB, long stationed in Washington where he was generally popular. Unofficially he acted frequently for the German Embassy.

In Europe these four are now stationed as follows: Von Papen in Turkey; Dieckhoff in Spain; Thomsen in Sweden; and Sell in Portugal.

These are countries which, if they moved their neutral position one way or the other, might decide the fate of the war.

DEFEAT IN BURMA

Recent events in Burma unfortunately have pretty much punctured the one-time world-beating reputation of Gen. Sir Archibald P. Wavell, supreme commander in the India-Burma theater.

The Japs are reported to have only about 50,000 men in Burma. How many the British have in the entire India area is a military secret but it can't be less than a million. However, there is one factor mitigating the otherwise dismal fiasco of General Wavell—most of his army is Indian.

Indian troops have fought well in other wars, but not in this one. Generalissimo Chiang Kai-shek, vitally interested in reopening the Burma road, recently has hinted at the reason.

Would it not be better, he tactfully suggested, to settle India's political problems rather than lose China? In other words, Indian troops with no independence to look forward to, are not going to fight their best.

CAPITAL CHAFF

Generals Giraud and DeGaulle are going to unite on at least one thing—an ultimatum to Admiral Robert of Martinique that he resign.

WPB's Ex Vice Chairman Ferd Eberstadt says: "Before I came to Washington my crowd in Long Island hated Ickes, and I was provincial enough to agree with them. But I have found that he is one of the best executives in Washington and one of the few who always keeps his word. When he promises to do a thing, he does it."

MEDICATED POWDER FOR FAMILY USE. Soothes itchy skin. Treats rashes with medicine. Formerly Mento Heat Powder. Diaper rash, heat rash.

Languages in India. More than 200 languages spoken in India.

I SAID GOOD-BYE TO CONSTIPATION. Harsh, medicinal laxatives only gripped me—and never really stopped my constipation. It always came back. Then I found out why I just wasn't taking on enough "bulk"-forming foods. So I started eating KELLOGG'S ALL-BRAN regularly and drinking plenty of water. And—I "Joined the Regulars!"

That's because KELLOGG'S ALL-BRAN gets at the cause of constipation like mine and corrects it—by helping to form a soft, bulky mass in the intestines.

If your trouble is what mine was, why not try KELLOGG'S ALL-BRAN? It's made by Kellogg's in Battle Creek and tastes swell.

YOU WOMEN WHO SUFFER FROM HOT FLASHES. If you suffer from hot flashes, nervousness, irritability, sleeplessness, distress of "irregular" times—due to the "menopausal" period—try the "middle-age" period of a woman's life—try Lydia E. Pinkham's Vegetable Compound—the best-known medicine you can buy today that made especially for women.

Pinkham's Compound has helped thousands upon thousands of women to relieve such annoying symptoms. Follow label directions. Get Doan's today. Use with confidence. At all drug stores.

WNU—N

Kidneys Must Work Well. For You To Feel Well. 24 hours every day, 7 days a week, never stopping. The kidneys waste matter from the blood. If more people were aware of how the kidneys must constantly remove waste matter, excess acids and poisons from the blood, they would be better understanding of why the whole system is upset when kidneys fail to function properly.

Burning, scanty or too frequent urination sometimes warns that something is wrong. You may suffer from backache, headaches, dizziness, nervousness, getting up at night, swelling of the feet, etc. Doan's "Pink Pills" are a medicine recommended by the country over. Doan's stimulates the action of the kidneys and helps them flush out poisons and waste from the blood. They contain nothing harsh. Get Doan's today. Use with confidence. At all drug stores.

DOAN'S PILL

Large Herd of Reindeer in Alaska to Supply Meat

Ten thousand reindeer are to contribute a million and a half pounds of meat to Uncle Sam's dining tables.

Reindeer breeding in Alaska has been so successful that on Nunivak island a herd of 200, released at the close of World War I, now is a hundred times as large. Since Nunivak can pasture only 10,000 animals, the surplus will be butchered at roundup time next fall. Military and civilian menus from Alaska to Flori-

da will include this venison.

This is the second time in half a century that reindeer have helped out in a food shortage, says the National Geographic society. By 1891, whalers had depleted the walrus, seal, and whale, the main source of food and clothing in the Arctic.

The government stepped in to avert a famine. Sixteen reindeer were imported from Siberia to Teller on Seward peninsula—Alaska's

westernmost point. Laplanders were brought over from northern Scandinavia to instruct natives in the care of the animals. Thus a major Arctic industry was born.

Today, to some 15,000 Aleut, Eskimo, and Indian natives of Alaska, reindeer are important as a source of food and clothing. The sinews are used as thread; adult hides become sleeping bags; fawn skins, parkas and underwear. The antlers show up as knife handles.

Monday, June 14th is Flag Day.

Mrs. Ben Coobs and Peggy, Mrs. H. D. Ramsay, Mrs. W. F. Pavey and Mrs. Ebeling were Mason City visitors Monday afternoon.

Mr. and Mrs. Evert Barz and children were supper guests at the Raymond Barz home Friday evening.

Mr. and Mrs. Sumner Trumbell and granddaughter Rose Marie West. were at Hampton on business Tuesday afternoon.

Mr. and Mrs. Raymond Barz entertained the following to dinner Sunday: Edwin Thieman and family; Mrs. Ed Blanchard; Harold Rockew and family; Mr. and Mrs. Raymond Wille; Mr. and Mrs. Curtis Waddingham, Ewalt Jahnke and family, and Mr. and Mrs. Morris Murray of Britt.

Garland, son of Mr. and Mrs. Martin Brinkman, will leave Saturday morning for Ft. Des Moines and from there will be sent to the state of Rhode Island to begin service in the U S Sea Bees. Garland is a graduate of Klemme high and the past year attended Iowa State Teachers College.

Mrs. R. W. Elder and Mrs. John Waddingham were at Hampton on business Monday. On their way home they stopped at Meservey for a visit with Mrs. Ernest Yahnke of Vernon Center, Minn. Mrs. Yahnke was helping care for her father, Mr. Prehapp, who was critically ill. Mr. Prehapp died Monday at Meservey.

Seadromes across the Atlantic, first visualized by the American Weekly 14 years ago. Read how these floating steel islands for use as trans-Atlantic stepping stones now well on the road to reality, as told in The American Weekly, the magazine distributed with next week's Sunday Chicago Herald-American.

Wesley Patterson, former Klemme athletic director, was in town Tuesday afternoon "Pat" has been helping his father on their farm near Bancroft since school closed. He has passed his physical examination and will soon leave for induction into the army. Mrs. Patterson and baby daughter will live at Missouri Valley for the duration.

Local Happenings

Klemme and Vicinity

DRS. COLBY & HAYDEN, DENTISTS, FOREST CITY, IOWA. OFFICE PHONE 374, RES. 189.

Mr. and Mrs. J. C. Thomas were at Mason City on business Thursday afternoon.

Orville Maben and young son of Garner were in Klemme on business Monday morning.

Mrs. C. J. Papousek and son, Charles, of Belmont, spent Sunday visiting at the Ed Jacobs home.

Mrs. Antonio Keraus was a dinner guest at the C. G. Waterman home Sunday.

The Methodist Bible School will hold their annual picnic in the park this week Friday noon.

Mr. and Mrs. Ed. Buntentbach were visiting in Des Moines Sunday.

Mr. and Mrs. Donald Speer left Saturday for Oakland, California, where Mr. Speer expects to find employment in war work.

The Klemme Food Market last week refinished their meat processing room in white enamel paint and it looks very attractive.

Rosemary West of Des Moines came Sunday for a visit of a few weeks with her grandparents, Mr. and Mrs. Sumner Trumbell.

Mr. and Mrs. Emil Patet were at Mason City last Thursday where they visited with a cousin who was a patient at a hospital there.

R. A. Jorgenson as at Webster City Friday where he purchased an automatic printing press to be installed in the Times plant.

Jack Etchen improved the appearance of his residence property last week by reshingling his garage with some gay colored shingles.

Mr. and Mrs. C. C. Kilgore expect to move into Grandma Smith's house on the east side of the Park about the middle of the month.

Mumps seem to strike at adults as well as children this spring. Last week Mrs. Glenn Bridges and Gerald Koerner fell victims to the mumps.

Lloyd Lau, Ed. Becker and R. A. Jorgenson went to Webster City Saturday and trucked a printing press to Klemme that will soon be installed in The Times plant.

Mr. and Mrs. Bert Mathews and Grandma Smith of Clear Lake were visitors at the John Day home Sunday. Mrs. Smith remained for a couple of weeks visit.

Duane Ridder of Seattle, Washington, arrived last week to spend a few days at the Mrs. C. A. Arnold home before entering service in the army.

Mrs. Gerald Koerner and son, Terry, spent several days of last week visiting with Mrs. Koerner's parents, Mr. and Mrs. Rule at Dow City, Iowa.

Despite all of the rain the past week, corn fields are looking good. It is keeping the farmers busy between showers to get the corn cultivated, but they are getting the job done.

Ben V. Greiman, who lives north of Klemme on Highway 69, has recently improved the appearance of his farm by having his large barn and other buildings treated to a new coat of paint.

Donald, Leon and Doris Merkel, children of Mr. and Mrs. Ben Merkel of Clinton, are visiting for a few weeks with their grandmother, Mrs. Peter Mekrel and other relatives in this community.

Mrs. C. F. Keraus has gone to her cottage at Ventura Heights for a few weeks, or until after July 4. Phyllis Klotzbach was assisting her with cleaning at the cottage Tuesday.

Verner B. Priebe, of Klemme, had a load of steers to the Chicago Market Monday which averaged 988 pounds and they brought \$15.25. These cattle were consigned to the Quinn Commission Company and were sold by John E. Quinn, head of the firm. Mr. Priebe's father and uncles have been shippers to Mr. Quinn for nearly 45 years.

Mr. and Mrs. Lyle Liebendorfer of Forest City spent Sunday visiting at the R. A. Jorgenson home.

Mr. and Mrs. Levi Klotzbach and Phyllis; and Rev. and Mrs. Floyd Klotzbach of Fort Wayne, Indiana, were dinner guests at the home of Mr. and Mrs. Leslie Smock at Kanawha Thursday.

H. Lau Sons improved their implement store Monday by having carpenters remove the prism glass above the plate glass front and close it up with wood. The glass was working loose and there was danger of it falling out.

Pvt. Eddie Epps of Washington, came last week with his wife from Des Moines and spent a few days visiting at the parental Herman Paul home. Pvt. and Mrs. Epps and their two children also visited with relatives in Des Moines.

Mr. and Mrs. A. G. Koerner received a letter Thursday from their son, Sgt. Kermit Koerner stating that he was now in North Africa. It was the first letter that had received from him since he left the States several weeks ago.

Mr. and Mrs. Herb Bailey of Belmont, spent Thursday in this community. Mr. Bailey as looking after his farm near Klemme while Mrs. Bailey spent the day visiting with Mrs. C. A. Larsen. Mr. and Mrs. Bailey were supper guests at the Larsen home.

Mr. and Mrs. C. G. Waterman and daughter, Mrs. Lyle Wilcox left early Tuesday morning for Little Rock, Arkansas where they will visit with Lt. Wilcox. They made the trip to Arkansas in the Wilcox car and Mrs. Wilcox will remain with her husband while Mr. and Mrs. Waterman expect to return home via train the latter part of the week.

Mrs. Dick Ebeling returned from McGregor last Thursday and visited for a few more days in this community before returning to her home in Marian, South Dakota. Mrs. Ebeling had been visiting at Klemme and McGregor since before Memorial Day.

Mr. and Mrs. John Etchen and daughter, Betty, of Des Moines, spent Monday and Tuesday visiting in Klemme. Mr. Etchen, who is employed at the Ordnance Plant at Ankeny, says he expects to return to Klemme in the early fall to re-open his garage to the trade.

Mr. and Mrs. Mitchell Bock were dinner guests Sunday at the home of Mr. and Mrs. Wm. Bessman, parents of Mrs. Bock, at Dows. Miss Elsie Dubberke, of Hubbard, cousin of Mrs. Bock, accompanied the Bock's home for a visit of two weeks.

Seaman Evert Barz came home last Thursday morning to spend a ten day furlough visiting with his wife and children and other relatives in the community. Mr. Barz is in the sub-marine service on the east coast. He had not been well for a few weeks and was home at this time on "sick leave" to recuperate.

Driving along the highway south of Klemme the other day we noticed that Mr. and Mrs. Fred Etchen had recently had their house re-shingled. The Etchen farm always appears neat and clean. Another feature of the Etchen farm is the nice orchard the Etchens maintain and they have a large variety of different fruits.

The rhubarb grown at Mrs. C. A. Arnold's farm would easily provide shade for an elephant's ear. Rev. H. E. Harvey brought in a couple of stalks of rhubarb from Mrs. Arnold's farm Saturday. One leaf measured 33 inches across, while the other measured 35 inches across. The edible part of the stalk measured 17 inches long. And the big leaves really looked like elephant ears . . . except we have never seen a green elephant!

Don't forget the canning and freezing demonstration to be held at the school house next Monday afternoon at two o'clock. Everyone invited to attend.

Rev. and Mrs. Floyd Klotzbach who spent the past week in Klemme visiting at the parental Klotzbach home, left Saturday for Chicago where they will be for Rev. Klotzbach is an assistant pastor there and part of his work is broadcasting for a tabernacle.

Mr. and Mrs. Albert Klotzbach turned last week from California where they visited with their Harold Wicks who is an aviator cadet at Gardner Flying Field, Taft, California. Miss Loren and Edward Jr. Buntentbach accompanied them to California and remained for a longer visit.

Don't Be Fooled

Don't be fooled into thinking you can use the same oil forever just because you are driving as much or as fast these days.

Lots of short trips added together take more oil than a few longer ones with the same total mileage.

Choking the motor for frequent starting will dilute the oil with gas which has less chance to burn out on shorter, slower trips.

Fill Up With WHITE ROSE GASOLINE

. . . and use our high quality PENNFIELD MOTOR OIL. You'll get satisfaction, plus in every mile of carefree driving when you get your car serviced by us.

Lorraine Buntenbach A June Bride In California

WED JUNE 5 TO CADET
OLD WICKS AT
BARKFIELD

Married At Presbyterian
Personage By Dr. Lund

Lorraine Buntenbach, the
daughter of Mr. and Mrs.
C. Buntenbach of Klemme,
was married to Harold Wicks,
son of Mr. and Mrs. Albert
Wicks, near Klemme, was united
in marriage at the Presbyterian
church at Bakersfield, California,
Saturday afternoon, June 5,
at 3 o'clock, with Dr. H. E.
Thorsen, a friend of
the couple, acting as officiating
pastor. The bride wore a street-length
green with a red flowered
and accessories to match.
The ceremony was held at the
Padra at Bakersfield.
Wicks graduated from the
high school in the spring
of 1942. During her high school
years she was prominent in school
activities, including band and or-
chestra, glee club and was one of
the leaders in athletics. In her
senior year she was chosen by the
students of the high school as their
Queen for 1942.

DIAMOND WAR BONDS

There will be American justice for
the savages of Tokio but our trial
punishment of Tojo and his
minions will cost blood, sweat, toil
tears and money. You can sup-
port the money by upping your war
savings plan. Figure it out yourself
how much does it cost you to
live each month? How much money is coming in from
members of your family? Put
extra money into war bonds,
every penny of it. Let 10 per cent
only the starting point for figur-
ing your allotment.

SURPRISE PARTY HELD FOR YOUNG COUPLE

A surprise party was held Friday
night in honor of Mr. and Mrs.
Dale Schlei, who were married re-
cently. The party was held at the
Schlei farm home south and west
of Klemme and those present were:
Mr. and Mrs. Awald Josten and
family, Mr. and Mrs. August Jes-
sen; Mr. and Mrs. Howard Baack,
Mr. and Mrs. Don Neuberger and
son, Donald, Mrs. Bertha Schlei and
Gerald Barz.

The evening was spent in play-
ing cards and later a nice lunch,
which had been brought by the
self-invited guests, was served.

CYCLONE VIEWED BY KLEMMME RESIDENTS TUESDAY EVE

A cyclone which formed north of
Klemme early Tuesday evening was
seen by quite a few Klemme resi-
dents.

The cloud was plainly seen as it
began to roll and form into a fun-
nel shaped cyclone and began to
rotate and dipped toward the earth
several times. However, the twist-
er must have remained high as we
have no reports of damage done.

ENTERTAINED AT BRIDGE PARTY TUESDAY

Mrs. Edna Thada entertained a
group of ladies at two tables of
bridge at her home Tuesday after-
noon. High score was won by Mrs.
P. M. Wilson and second high by
Mrs. Verle Keraus of Garner.
Lunch was served after the play-
ing.

EXAMS WILL BE HELD AT GARNER

When soil is fairly dry, posts
should be sunk about ten times
their diameter. This would mean
the holes should be about 2 1/2 feet
for a 3-inch post, for example.

Good Program Enjoyed When Farm Group Met

ELL TOWNSHIP FARM BUREAU HELD MEETING JUNE 10

The Ell Township Farm Bureau
meeting was held June 10 in dis-
trict number 3 school house with
Orville Steward, township chair-
man, presiding.

An interesting and instructive
program was given under the di-
rection of Mrs. Fred Greiman, the
township chairman of the Home
Project work. Mrs. Edmond Jes-
sen, music chairman, led in group
singing. Mrs. E. J. Schneider,
health chairman, and Mrs. Clarence
Greiman, school chairman, report-
ed the high lights of the work in
those departments. Another phase
of the years work, adequate school
lunches, was depicted by a clever
little playlet, entitled "Raw Car-
rots" and presented by Mrs. L. F.
Weaver, Mrs. W. J. Anderson, Mrs.
Harold Quintus, Mrs. Orville Stew-
art, Mrs. Alvin Goll and Mrs. Clark
Lackore.

Songs were sung by Virginia
Quintus, Shirley Greiman, Sheryl
Goll, Keran Goll, accompanied by
Marjorie Goll and Gloria Goll.

Loren Aary from Boone, the dis-
trict Farm Bureau organization di-
rector was present and gave a short
talk.

Future canning demonstration
dates and the 4-H Achievement
Show date, August 23 and 24 were
announced by Hazel Grimes, Coun-
ty Extension Home Economist.

FRANCIS JOHNSON SPOKE AT DISTRICT F. B. MEETING IN GARNER

Francis Johnson, president of the
Iowa Farm Bureau Federation, was
the principle speaker at the second
district Farm Bureau meeting held
in Garner Thursday. Mr. Johnson
discussed the reasons for and a-
gainst setting up a Farm Bureau
life insurance program.

Other speakers, included O. W.
Beeler, Field Director of the I. F. B.,
E. C. Campbell, Service Com-
pany Manager, Loren Aary, District
Fieldman, Pat Van Wert, Chair-
man of Research Committee of In-
viting Directors, and Mrs. C. C. In-
man, District Farm Bureau Com-
mittee woman.

The meeting was in charge of H.
F. Lubkeman, member of the Ex-
ecutive Board from the second dis-
trict.

Forty five farmers and farm wo-
men, eight Extension Directors, sev-
en Home Economists and a number
of the I. F. B. F. representatives at-
tended.

Counties represented were Kos-
suth, Winnebago, Floyd, Mitchell,
Butler, Franklin, Wright, Humboldt
and Hancock.

ARNOLD AND HARTWICK RE-UNION HELD HERE LAST WEDNESDAY

The Arnold - Hartwick re-union
was held last Wednesday at the
home of Mr. and Mrs. Louis Griffen
west of Klemme. On account of
the rain that day, the usual picnic
dinner was served in the house.

Fifty-four people were present,
and those from a distance who at-
tended were: Theodore Hartwick of
McGregor; Ray Lange and family,
and Rev. Wessels and family from
Burt.

LIBERTY BOYS 4-H CLUB MET AT BREDLOW HOME

Fourteen Liberty 4-H boys and
their leader met at the home of
Ronald and LeRoy Bredlow Thurs-
day evening, June 10. Leon Griffen
lead a discussion on hemp produc-
tion and Joey Kern discussed care
of tractor tires. The 1943 4-H show
and record books were discussed
by County Extension Director Paul
Henderson. The boys are planning
their annual picnic for Sunday,
June 27.

Figure It Out Yourself. How can
you effectively join in saving all the
little children of the world from hu-
man slavery, death and injury from
the Nazis and Japanese? Put more
and more of your pay into war
bonds every payday. Your savings
will go to war in the form of war
equipment and other munitions. How
much more should you put into war
bonds? The only ones who can
answer that are—you and your fam-
ily. It's up to you to decide just
how much more you'll do to win the
war.

If you were fighting in the Solo-
mons or in Africa or forcing a land-
ing in Europe you'd like to feel that
the folks at home were back of you
—all the way—you'd be proud of
your family and your friends if you
knew they were buying war bonds
not at 10 per cent or 15 per cent,
but with every cent beyond that
which they need for necessities.

U. S. Treasury Department

Clarice Nelson, Britt, Elected President Of 4-H Girls

TO PROMOTE SALE OF WAR BONDS AND STAMPS IN HANCOCK COUNTY

At a joint meeting of Mrs. W. S.
Pritchard, Garner, county chairman
of the Women's Division of the War
Savings staff, Clark Armstrong of
Britt, county chairman of the War
Savings staff and Walt Edelin of
Garner, chairman of the retailers
committee, plans were made for
taking part in the national program
for promoting the sale of bonds and
stamps in Hancock county during
the month of June.

Because the women and retailers
are accustomed to working togeth-
er, the women have been asked to
make a survey during this month
to see that stamps and bonds are
sold wherever merchandise is sold.

Mrs. Pritchard announces that
supplies will be mailed to town
chairmen in plenty of time so that
this survey may be made in Han-
cock county during the week of
June 21-26.

The women's work for the month
of June is to make this survey of
the sale of bonds and stamps and
then in July to offer their assist-
ance in the actual sale of bonds
and stamps.

LARGE CROWD ATTENDED CANNING AND FREEZING DEMONSTRATION HERE

Sixty-three ladies attended the
home canning and freezing demon-
stration conducted at the Klemme
high school Monday afternoon in
charge of Miss Hazel Grimes, the
Home Demonstration Director for
Hancock County.

Miss Grimes was highly pleased
with the large number of women
who attended the demonstration in
Klemme and said it was the larg-
est number so far to attend the
demonstrations in the county.

The women received valuable
information on latest developments
in preservation of foods by both
the canning and freezing methods.

MINISTERIAL MEETING HELD HERE MONDAY

The Hancock County Ministerial
Association met in Klemme Mon-
day evening at the Methodist
Church where a banquet was serv-
ed at 7:30 o'clock to more than 50
guests.

The dining room was beauti-
fully decorated under the able su-
pervision of Miss Novella Bredben-
ner who used red, white and blue as
the color scheme. The Misses Ruth
and Faye Neuberger, Evelyn Arn-
old and Novella Bredbenner were
the waitresses.

Dr. Jack Finegan, head of the
Religious Education at Iowa State
College, Ames, was the principal
speaker.

Wedding Stationery printed and
engraved at The Times Office.

4-H GIRLS PLAN SUMMER WORK AT RALLY DAY

The part 4-H girls are playing to
win the war on the home front was
depicted June 8 at Garner when
Hancock County 4-H girls held
their annual Rally Day "Four H
Builds for Victory," was the theme
of the special Victory Revue. A
series of episodes illustrated free-
dom of thought and speech as ex-
pressed in 4-H discussions and citi-
zenship program, conservation of
clothing, materials and equipment,
victory gardening, food preserva-
tion and participation in bond and
scrap drives.

Rally Day traditionally marks
the beginning of the 4-H summer
program. It offers an opportunity
for 4-H girls and their friends to
see what they have done, to look
at plans for the coming year and
to receive inspiration and enthusi-
asm for their summer work. This
year's program was especially di-
rected toward mobilizing the forces
of rural young people for the war
effort.

Election of new county officers
was part of the Rally Day pro-
gram. Clarice Nelson, Britt, is the
president, Jeroldene Goll, Garner,
is vice-president; Helen Formanek,
Garner, secretary-treasurer; Mar-
jorie Greiman, Garner, historian.

Mrs. Wille Presents Awards
Mrs. Winifred Jones, state club
specialist, gave an inspirational
talk to the group. Mrs. C. J. Wille
the County Chairman, presented a-
wards to the Concord Chums, Av-
ery Sunbeams, Madison Live Wires
and the Liberty Busy Bees. The
above clubs completed their pro-
jects for the past year and met the
standard requirements.

Certificates of award were pre-
sented to three girls who have now
reached the maximum 4-H club
age, Doris Fox, Loraine Bredlow,
and Marjorie Taylor.

Victory project signs were given
to club girls who are participating
in a victory garden project, poultry
project or food preservation pro-
ject.

Club leaders and committee
members were honored with cor-
sages presented by the 4-H girls. A
citation from the Extension Service
of Iowa State College was read and
presented to each.

FARM LABOR RECRUITS NEEDED IN COUNTY

The County Extension office is
still needing recruits for farm la-
bor, especially during haying and
harvest. Give your registration to
one of the town block leaders or
the U. S. Employment Service rep-
resentative in your town. The rep-
resentatives are: H. H. Mullin at
Britt; Garvel Riswold, Corwith; A.
R. Janssen, Crystal Lake; Paul
Henderson, Garner; Ira Langlitz,
Goodell; Oliver H. Schnebly, Hay-
field; Emmett Sheets, Hutchins;
L. E. Faber, Kanawha; Walter Lem-
ke, Klemme, Ray Valley, Woden.

Payroll Savings Buys Comfort For Your Fighting Relatives

Not all of your payroll sav-
ings and other War Bond pur-
chases are used for tanks,
planes and gunpowder. A part
of your investment goes for the
comfort of your father, brother,
son or friend.

Put your war bond buying
through your payroll savings
plan on a family basis to do the
most effective job in providing
for the care and safety of your
men in the armed forces. Fig-
ure it out for yourself how much
beyond 10 per cent of the ag-
gregate income of your family
you can put into war bonds
above the cost of the necessities
of life.

Remember a single \$18.75
war bond will buy for a fighting
soldier on the front: Two cot-
ton undershirts at 44 cents; two
pairs of cotton shorts at 76
cents; two pairs of cotton socks
at 34 cents; one pair of shoes
at \$4.31; a cotton khaki shirt
at \$4.64; pair twill trousers at

\$4.16; one web waist belt at 23
cents; two cotton neckties at 44
cents; 2 khaki caps at \$1.26
and one twill jacket at \$2.16.
Total \$18.74.

An \$18.75 war bond should
make a marine comfortable for
the night with a 23-pound mat-
tress at \$4.20; two blankets at
\$13.54; a pillow at 56 cents and
two pillow cases at 30 cents.
Total \$18.60.

Or he could be provided with
a rubber poncho at \$4.77; a hel-
met with its lining and other
items of its assembly at \$5.62;
a rifle cartridge belt at \$2.15;
a marine corps pack consisting
of haversack, knapsack and
suspenders at \$5.10; a canteen
and its cover at \$1.05. Total
\$18.69.

Those of you who worry about
the comfort of your boy in serv-
ice can help insure his comfort
by buying war bonds. And 10
years from now you'll take back
\$25 for every \$18.75 you put in.

SNAPPY FACT ABOUT RUBBER

Improper brake adjustment is a rubber-waster. Have your brakes checked regularly. One wheel "takes hold" before the others, its rubber carries the full brunt of stopping the car, with resulting excessive rubber wear.

In their search for rubber substitutes, scientists are now producing a turpentine derivative discovered about fifty years ago. The list of rubber "sources" is growing almost daily.

It is expected that the 1940 harvest of crude rubber in the United States will reach 600 tons, all guayule. Normally this country consumes about 600,000 tons of rubber a year.

In war or peace

FIRST IN RUBBER

HOUSEHOLD MEMOS... by Lynn Chambers

Strawberry Jam... It's the Berries!
(See Recipe Below)

Get in the Jam!

Right little berries pushing their way out of the greenery surrounding them makes you think of jam jelly time, and rightfully so, for it is the time to start putting up the berries!

Strawberries are usually the first to arrive on the canning scene, followed very shortly by the other berries like raspberries, cherries, and then the fruits. Don't wait until the berries you are canning are too ripe, for those do not make the best jams and jellies.

To insure success in jelly making, use a commercial pectin. There's no need to waste on jelly that doesn't set, and no time to spend re-cooking. The recipes I'm giving this year are for smaller quantities of jam and jelly for most of us do not have too much sugar to spare in canning.

You'll like this standard recipe which can be used for making several different kinds of jelly:

***Strawberry Jelly**
Red Raspberry Jelly
Blackberry Jelly
Boysenberry Jelly
Dewberry Jelly
Loganberry Jelly
Youngberry Jelly

Makes 11 glasses, 6 fluid ounces each

4 cups juice
1 1/2 cups sugar

1 bottle fruit pectin

To prepare juice, crush or grind thoroughly about 3 quarts of fully ripe berries. Place in jelly bag or cloth and squeeze out juice. (If berries lack tartness, substitute 1/4 cup lemon juice for 1/4 cup prepared juice.) Measure sugar and juice into large saucepan and mix.

Bring to a boil over the hottest fire and add bottled fruit pectin at once, stirring constantly. Then bring to a full rolling boil and boil hard for 1/2 minute. Remove from fire, skim, pour quickly into glasses and paraffin at once.

Do you like the new combination jellies? You may use the above recipe, preparing the required 4 cups of juice from 3 quarts of berries including 2 or more of the berries listed above

***Ripe Sour Cherry and Red Raspberry Jam.**

(Makes 8 glasses, 6 fluid ounces each)

3 1/2 cups prepared fruit
4 1/2 cups sugar
1 box powdered fruit pectin

To prepare fruit, crush completely or grind the berries. Cut fine or grind the fresh pineapple or use already canned fruit. Combine fruits. Measure sugar and fruit into large kettle, mixing well. Bring to a full, rolling boil over high heat. Stir constantly during boiling. Boil hard 1 minute. Remove from heat and stir in pectin. Stir and skim by turns for just 5 minutes to cool slightly to prevent floating fruit. Pour quickly and paraffin or seal at once.

You have often heard it said that perfect jelly or jam can be obtained even without the use of a commercial pectin. But, to make good jelly, the fruit must contain both pectin and acid in the right quantity to form a firm jelly—be it for jelly or jam. Strawberries contain acid but usually lack sufficient pectin. That's why pectin of the commercial variety is added when making jelly or jam, or, as in this next recipe, lemon juice is added:

Strawberry-Lemon Jam.

4 cups washed, hulled strawberries
5 cups sugar
1/2 cup lemon juice

Combine sugar and berries, letting stand a few minutes, stirring occasionally. Do not crush fruit. Bring to a boil and boil 10 minutes, stirring constantly. Add lemon juice and cook 2 minutes longer. Pour into sterilized glasses and seal at once with paraffin.

Are you having difficulties planning meals with points? Stretching your meals? Lynn Chambers can give you help if you write her, enclosing a stamped, self-addressed envelope for your reply, in care of Western Newspaper Union, 210 South Des Plaines Street, Chicago, Illinois.

Released by Western Newspaper Union.

Lynn Says:

Jelly-Making: Don't be too ambitious. You'll have more success and be less tired out if you can only make small quantities of fruit at a time and "do it right."

Unless you have all your neighbors and cousins and family helping you on canning, and have to tackle the job alone, do not try to put up bushels of produce.

Have a day for jelly-making and jam-making just as you set aside a day for washing and ironing. Make it a rule not to have housecleaning or any other big job on the same day for you'll be too tired to concentrate as you should on canning.

Select your jars and examine them for cracks or imperfections the day before you do your canning. Get them all washed, too, so sterilizing is the only big job you have left when actual jelly-making day comes up.

In getting strawberries ready for canning or jelly, wash them before hulling. They won't drink up as much water that way.

WAR ON ALL FRONTS
A SERIES OF SPECIAL ARTICLES BY THE LEADING WAR CORRESPONDENTS

Guerrilla Girl In Serbia

By Ruth Mitchell

(WNU Feature—Through special arrangement with The American Magazine.)

During my 3 1/2 years in the Balkans, I came to know that part of the world as no American woman has before.

The Italian occupation of Albania drove me out of that country into Yugoslavia. There I met the Serbs. I liked their way of living and their principles. And because I found them most perfectly expressed in a Serbian organization of guerrilla fighters called the Chetniks, I eventually joined them and became, myself, a Chetnik.

But not at once. There were many months of adventurous travel, during which I was often hounded by Axis agents and accused of being a spy. I witnessed the growing menace of domination by greedy, swaggering, war-mad Nazis and Fascists. I became involved in the struggle of the Serbs to maintain their freedom.

Joins Chetniks.

So it was that I found myself one day in the presence of that old Chetnik leader, Voivoda Perchanatz. It was March 3, 1941, in Belgrade, where I had been living for nearly a year. I had come to join the Chetniks.

Some months before, my name had been entered in the big, well-worn book of candidates, sponsored by a noted member of the organization. I had been trained in the code of Chetnik fighting and taught how to use dagger and revolver. Now I was ready. I stood before the venerable leader, with my right hand on the crossed dagger and pistol, repeating after him the oath:

"Do Smrti za Srbiju—tako mi bog pomogao." It means, "Till death for Serbia, by the help of God."

Name Crossed Out When Joining.

That was all. Then Perchanatz took the big, old book and solemnly drew a line through my name. "Your life," he said, "is no longer your own. It is given to Serbia."

This is the only organization in the world, I think, in which your name is not put down, but crossed out when you join. You must regard yourself as good as dead. How proud I was that day! There are many women Chetniks, but I was the only woman of foreign birth and nationality ever to be admitted.

I was a Chetnik! And through my mind went the great marching song of Serbia: "Ready, now ready, Chetnik brothers, mighty the coming battle, and on our glorious victory will rise the sun of Liberty!"

Since I was to do intelligence work, my joining was to be kept secret at that time. Many of the leading men of Serbia—politicians, judges, professors—are Chetniks, their membership a dead secret. I was given the customary poison, which I sewed in the collar of my coat, where it could be chewed if my hands were bound.

Serbs Were Stunned.

Soon after I became a Chetnik, events in the Balkans moved to a swift climax. Bulgaria joined the Nazis, and on the morning of March 25 the news was flashed: "Yugoslavia has signed the Axis pact." The Serbs were stunned at the incredible sell-out of their government.

In Belgrade there was a death-like calm for two days. No Serb showed his face on the streets, but behind closed doors a momentous determination was gathering.

It broke on March 27. On that fateful day, for the first time a small nation of Europe declared war on Germany before it was itself attacked. Little Serbia had decided to battle the monster. And from that day onward, and because of that decision, everything went wrong for Germany.

It was the Serbs, whom Germany expected to brush off like a troublesome mosquito, who spoiled her aim, destroyed her timing. I believe their courageous action saved the British empire and—yes—America, from slavery to Europe, as once before, in 1389, the Serbs' heroic stand saved Europe from slavery to Asia.

The Nazis had intended to attack Russia in March—my information told me March 16. Hitler had expected to have Yugoslavia in hand and thoroughly "co-ordinated" by then. Instead, he had to fight.

He had to detach an army intended for Russia and send it down into the Balkans to secure his rear—an army of not less than half a million troops. It took him three months to do what he had expected would be done by routine penetration and terrorization, in no time at all.

There can be no question that if Germany had had those three spring months in which to concentrate her full force on Russia, she would have taken Moscow and that life stream of the Soviet, the Volga, and Russia would have been out of the war—a serious situation for the Allies.

IF WE GET CLOTHES RATIONING

("Mr. Nelson warned that the rationing of clothing might be necessary in this country."—News item.)

OPA Chairman—Mr. Twitchell, you know the charges. It is alleged you were seen going around in a new pair of pants. Inspector Binkle, will you state the facts in this case?

Inspector—Well, the office got a tip that Twitchell was going around in new pants.

Chairman—What color?

Inspector—Gray.

Chairman—Did your informant say where he got these pants?

Inspector—Yes, sir, in a black market.

Mr. Twitchell—You have your facts twisted. They were black pants and I got them in a gray market.

Chairman—Proceed!

Inspector—Well, after getting the tip I started to trail Twitchell. But for the first week every time I saw him he was wearing an old brown pair, with a green coat.

Chairman—Did you determine if the coat was a black market coat?

Inspector—No; there were two other agents on that end of it.

Chairman—Proceed. What happened next?

Inspector—Well, finally, on a Sunday morning I saw Twitchell walking in the park and he had on the pants in question. I closed in on him at once and took him to headquarters for a grilling.

Chairman—Did he give any trouble?

Inspector—On the way down he tried to take his pants off and throw them away, thus destroying the evidence.

Mr. Twitchell—That's a lie. I did not take them off to throw away. I suddenly found I had them on backwards and was correcting the error.

Chairman—Do you mean to tell me a man could go around with his pants on hindside-front and not notice it?

Mr. Twitchell—In these topsyturvy days it's easy.

Chairman (to inspector)—What kind of a pants card did he have, an "A," "B" or "C"?

Inspector—He only was entitled to an "A" card.

Chairman—An "A" card only permits short pants.

Inspector—Twitchell was using a "B" card at the time.

Chairman—How did he get it?

Inspector—On a claim he needed supplemental pants.

Chairman (sternly to Twitchell)—Why did you need supplemental trousers? Were they business or pleasure pants?

Mr. Twitchell—Business. And the business is tough on pants.

Chairman—What business are you in?

Mr. Twitchell—I'm a paper-hanger.

Chairman—Why don't you wear overalls?

Mr. Twitchell—I tried a pair but I shivered so much I got the wall paper on all crooked.

Chairman—What caused the shivering?

Mr. Twitchell—They had been frozen for the duration!

THAT SUMMER VACATION

The summer vacation this year, if any, will be a problem. The shorter the distance the better, Washington announces, even by train. To get anywhere by automobile you will have to be the discoverer of a new fuel.

So what it amounts to is the Rationed Vacation.

There's a ceiling on beach romances, mountain fun, marshmallow roasts, moonlight canoeing and hotel porch gossip. With everything frozen except red ants.

But there will be no kicking. War is war, and the public will realize that it is lucky not to have to get a book of coupons and select its summer outings by the point system.

Up to the time when you have to study a point chart to see how deep a sunburn you are entitled to, or consult your ration board to determine whether it will take red or blue coupons to take a swim, all will be well.

No matter how limited your vacation may be in 1943, just bear in mind that you don't have to register for it.

And remember, too, that while you are spending your two weeks in a hammock in your own backyard no neighbor is getting four weeks at a swank resort through the black market.

Mr. Eastman, the transportation boss, urges the public to do as little vacationing as possible, and especially to avoid starting or returning on week ends.

He will have to do a little extra harping on this point. The American public has become so accustomed to leaving on Saturday that it has become a habit. Mr. Eastman should get a few good slogans at once. Something like:

"Do your patriotic part with a Thursday start!"

PATTERNS SEWING CIRCLE

Fun Ahead

GRAND wardrobe for youngsters who get into everything. The smock for looks... the over-all and playsuit for fun.

Barbara Bell Pattern No. 1628-B designed for sizes 1, 2, 3, 4 and 5 years. Size 2 overall requires 1 1/4 yards 35-inch material, smock 1 1/2 yards, playsuit 3/4 yard.

ASK ME ANOTHER?

A General Quiz

The Questions

1. The right of the state to take property for public use is called what?

2. What is another name for the gladiolus?

3. Whose motto was: "Better to live a day as a lion than 100 years as a sheep?"

4. What was the first of President Wilson's 14 points?

5. For what country did John Paul Jones serve as a rear admiral after the Revolutionary war?

6. Where is bilge water found?

7. What name is given to a company whose main business is the owning of stocks or securities of other companies?

The Answers

1. Eminent domain.

2. Sword lily.

3. Mussolini.

4. Open covenants openly arrived at.

5. Russia.

6. At the bottom of boats.

7. Holding company.

If you were to say the first bugle call of the day in the Army is "Reveille"—you'd be wrong. It's "First Call." But you probably know what cigarette gets first call with Army men—it's Camel. And Camel is the favorite with men in all branches of the service—Navy, Marines, Coast Guard, too. (Based on actual sales records from service men's stores.) And though there are Post Office restrictions on packages to overseas Army men, you can still send Camels to soldiers in the U. S., and to men in the Navy, Marines, and Coast Guard wherever they are. —Adv.

Training War Dogs

This is the first war in which our army has trained dogs for war work. During World War I the army borrowed war-trained dogs from the Allies, but did not train any of its own dogs.

YOU CAN'T BUY ASPIRIN

that can do more for you than St. Joseph Aspirin. Why pay more? World's largest seller at 10c. Demand St. Joseph Aspirin.

Use of Sugar

Sugar has been in general use for only about 350 years.

amendments thereto.

This being the 3rd day of June, 1934, a date heretofore set for a letting on the surfacing of certain Hancock County Roads with gravel and crushed rock, the hour for said letting having arrived, the Board being fully advised, the chairman proceeded to open all bids on file and find the bid of the Paul Construction Company of Fort Dodge, Iowa, to be the lowest and best bid therefor.

IT IS THEREFORE RESOLVED, by the Board of Supervisors of Hancock County, Iowa, that the bid of the Paul Construction Company in the sum of Eighteen Thousand Six Hundred and Fifty Dollars (\$18,650.00) be accepted as the lowest and best bid for the surfacing of certain Hancock County, Iowa, roads as set out in the report of the Engineer and Auditor, and that the Paul Construction Company, is hereby awarded a contract for such surfacing and chairman F. J. Schoun is hereby authorized to execute said contract in behalf of Hancock County, Iowa, as by law directed.

The foregoing resolution was offered and read by Penn Eckels, who moved its adoption, was seconded by Supervisor Chambers, whereupon the Chairman placed the motion for adoption and upon roll call all members were present and all voted aye.

IT IS RESOLVED that the claims hereinafter set out be allowed in amounts designated thereon and that the Auditor be and he is hereby authorized to draw warrants on the several funds of Hancock County, Iowa, in payment of such claims in amounts set opposite each claim all as by law provided.

ATTEST: FRED C. MISSAL, Chairman County Auditor

REGULAR JUNE MEETING

Garner Iowa June 7 1934

The Hancock County Iowa, Board of Supervisors met in session on above date with F. J. Schoun, Penn Eckels and John Chambers, present.

The minutes of the last meeting were read and approved as read.

Supervisor Chambers is appointed a committee to investigate and cause repairs to be made in D. D. No. 34.

On motion and second automobile policy No. 503946 H is approved.

On motion and second application and bonds for permits to sell cigarettes filed by the Garner Gun Club O. L. Logan and Walter Ray Arnow are approved and the County Auditor is hereby directed to issue permits as by law directed.

On motion and second applications and bonds for Class B Beer permits of Walter Ray Arnow and Garner Gun Club are approved and permits are hereby ordered issued as by law directed.

Supervisor Schoun is appointed a committee to investigate and cause repairs to be made in D. D. No. 3 and 4, lateral No. 8.

On motion and second the bond of the Paul Construction Company of Fort Dodge, Iowa, is approved.

On motion and second the Board adjourned to June 11, 1934 at 9 o'clock a.m.

ATTEST: FRED C. MISSAL, Chairman County Auditor

A SOLO FLIGHT

An experimental rubber balloon measuring ten feet in length and two feet in diameter and appearing weather beaten, was found on the Hugo Rauch farm three miles south of Fert Atkinson. It was marked with a curious grouping of letters, apparently code, and had the additional words "Parox" and "Cambridge, Mass." It is not the usual type of experimental balloon released by the weather bureau. Residents of the vicinity are wondering what was the purpose of the experiment.

What You Buy With WAR BONDS

Prevents the "Bends"

Before our fighting pilots take to the air for stratosphere flying they must be "sued-up." To do this the pilot just before he takes off pedals a stationary motor driven bicycle to reduce the amount of nitrogen in his blood. Otherwise gas bubbles would collect in his blood stream.

The stationary bicycle is an expensive piece of equipment, but the vast quantities of this and other materials of war make it imperative for all of us to keep our fighting men well supplied by greater and greater purchases of War Bonds.

U. S. Treasury Department

What You Buy With WAR BONDS

Pig Boat

At sea on a submarine isn't exactly the "life of Riley." In the Battle of the Atlantic, or on the great stretches of the Pacific these sailors know the hazards of their work.

One of the spots aboard these "Pig Boats" that all crew members enjoy is the galley, or kitchen. Space limitations prevent an elaborate setup, but cooks aboard these vessels are justly proud of the meals they prepare for their crews. Your increased purchase of War Bonds helps make submarine life as pleasant as possible.

U. S. Treasury Department

Ground shelled corn added to grass silage at the rate of 100 lbs. of corn to a ton of forage will make the silage keep better and improve its palatability.

Haying Time Here Again

Good equipment will help you speed up the work and make the job easier during haying time.

● HAY RACKS. You need a good Hay Rack and is the place to get one. Tell us what you need we will build you one... any size and any style. Our prices are very reasonable on Hay Racks.

● A REAL HAY STACK COVER THAT YOU CAN AFFORD TO BUY!

One of the cheapest and best hay stack covers you can buy is one of our SISAL KRAFT COVERS. Get one or two as they are always handy around the farm.

We also sell and service the well-known NYE TRACK and CARRIERS. Come here for your new equipment and your hay track and carrier repairs.

● ARE YOU READY FOR THE ANNUAL "BLITZKREIG" OF FLIES?

FLIES are beginning to bother, so why not get gallons of our GERMA-RID Fly Spray for your cows. Your cows will do better if you rid your barn of the flies.

Bring us your Screen Doors and Windows for and re-screening. If you need new screens we can make them in our own shop, any size. Why not have us combine Screen and Storm Door?

Northern Lumber Co

Keith Albertson, Manager

Klemme

NOTICE TO

Owners Of Homestead

APPLICATION FOR HOMESTEAD TAX CREDIT MUST BE ON FILE BY JULY 1, 1934 AS NO CREDIT CAN BE GRANTED AFTER THAT DATE

Owners claiming credit must have their DEED CONTRACT recorded in the office of the County Recorder before the final date for filing.

Contracts must show at least a 10 percent payment of the purchase price.

If you have not made application with your assessor or County Auditor, do so by July 1st.

● TO ALL EX-SERVICE MEN

July 1st is Tax Exemption Deadline.

Soldier's Exemptions for 1942 and 1934 must be filed by July 1, 1934.

The Ex-service man's Honorable Discharge must be recorded in the office of the County Recorder in the county in which he claims exemption.

If you have not filed with your assessor or county auditor for your 1942 and 1943 exemptions, do so now.

Published by order of the Board of Supervisors.

Fred C. Missal

COUNTY AUDITOR

No End to Wonders! Dehydration Packs Tasteful Dinner Into Vest Pocket; Field Crops Are Source of Plastics

*Drying Removes Water and Air From Produce While Retaining Nutritional Values;
Milk Now Turned Into Kitchen Curtains; Cull Potatoes Into Fuel Alcohol.*

American agriculture will emerge from the war with a new pattern of crop production that will not only give us everything we eat and wear, but provide much of the raw materials used in industry.

During World War I, the emphasis was on the production of cereal crops. Today, although cereals are essentially necessary, heavier emphasis is being placed on dairy products, meats, vegetables, eggs and oils. If the present trend continues, American milk goals in the reconstruction period will be double our present output of 122 billion pounds a year. The nation's farms will be permanently producing more meat and eggs, more vegetables and more oil-yielding crops such as soybeans.

Two developments are credited with adding impetus to the new farm production trend. Both have been spurred by scientific research and the necessity of meeting wartime problems. One is dehydration, or the dry preservation of food. The other is chemurgy, or the science of transforming farm crops into industrial products.

Dehydration is not new. In fact, it is as ancient as the sun that has been drying the water out of things for ages. But to the old dehydration processes have been added new techniques that have so revolutionized its future possibilities, that some economists predict that food dehydration plants may become as common in agricultural areas as canneries and condenseries are today. An idle dream, you say? Not so idle, perhaps, when it is considered that there are more than 200 dehydration plants in the United States today, compared with only five in 1940.

J. B. Wyckoff, of the Agricultural Marketing administration recently estimated that the United States will dehydrate vegetables at the rate of 350 to 400 million pounds in 1943 as compared with 100 million pounds in 1942. Yet last year's totals were seven times the 1940 volume.

"To meet the 1943-44 dehydrated food requirements as presently known," he added, "will require every third egg, and one out of every 12 pounds of whole milk produced. Requirements for dehydrated meat, practically non-existent a year ago, will be approximately 60 million pounds in 1943."

Dehydration Saves Shipping.

The remarkable impetus given dehydration grew out of a shortage of shipping space, cans and containers, to meet lend-lease demands and the food requirements of our fighting Allies. One ship loaded with dehydrated food can carry upward of 10 times as much food as a ship loaded with bulk food.

Improvements in dehydration technique have followed two major trends. One has been to compress the food into an incredibly small space. The other has been to preserve the food's palatability and nutritional value.

Many foods normally average 90 per cent water. Dehydration as originally practiced meant removing most of the water. Now the food is not only dehydrated but "de-bulked" as well, by having the air pressed out of it. The result is food compressed into blocks or briquettes. Thus it is possible to have a vest-pocket serving of meat, carrots, cabbage, milk and eggs that would provide all the elements of a hearty meal and yet take up no more shipping room than a package of cigarettes.

Typical food volume reductions as a result of dehydration and com-

The scientist teams up with the farmer in ushering in new era of agricultural production.

pression are: sauer kraut, 90 per cent; cabbage, 80 per cent; potatoes, 75 per cent; onion, beets and carrots, 65 per cent; egg powder, 50 per cent; hamburger, 50 per cent; dehydrated soups, 50 per cent. One pound of potato bricks yields 24 helpings. A five-gallon container of dried tomatoes swells to a quarter of a ton when water is added.

Dehydrated Foods Flavorful.

As contrasted with their crude predecessors of World War I, today's dehydrated foods are flavorful. Dunked and cooked in water, these foods emerge with almost no sacrifice of flavor and with practically no loss of proteins, carbohydrates, and minerals. They suffer no greater loss of vitamins than when occurs when fresh vegetables stand for a time in a store.

Hence it is no surprise that American soldiers can relish scrambled eggs made from a dehydrated powder. Or that Englishmen eat and like meat loaves and stews that crossed the Atlantic as tiny shreds of dried meat. Thus milk, butter, citrus juices, as well as potatoes, peas, spinach and a host of other food products are being successfully dehydrated.

The extent to which dehydration has already caught hold with the civilian population here in America is indicated by the fact that housewives are buying dehydrated soups at the rate of 100 million packages a year.

If dehydration offers challenging possibilities for future farm markets, then chemurgy, its industrial coun-

terpart, offers even more interesting opportunities as a contributor to future farm prosperity.

Already the products of 40 million acres of American farm land are going into our industrial plants. And this is but the beginning. Already chemical engineers have come to think of all America as an industrial farm and of farm products as the raw materials for factories.

Perhaps the classic example of chemurgy's effort to turn farm crops into vitally needed industrial products lies in the field of synthetic rubber. It took the world a century to raise the production of crude rubber to a billion tons a year. The United States now expects to develop a like capacity for synthetic rubber—much of it is made from corn and other farm products—within the next year and a half.

The chemurgic scientist busy among his test tubes performs such miracles as turning milk into kitchen curtains; corn into a tinfoil substitute; sunflowers into paper; sorghum into insulating board; barley and sweet potatoes into ethyl alcohol.

Furfural made from oat hulls is now being used in oil refining and in the processing of wood resin. Anti-freeze fluids and fuel alcohol come from cull potatoes. Glycerol from animal fats is being used in the production of dynamite for war purposes. Then there is Zein, a protein product of corn starch which lends itself to the manufacture of yarn, buttons, wall-paper coating and quick-drying ink.

Soybean Source of Plastics.

In the field of plastics, gluten, a residue of corn, is being effectively used, as is casein, a by-product of milk. But perhaps the biggest contribution to plastics is being made by soybeans. Thanks to soybeans, the automobile of the future may be grown from the soil. Already, gear shift handles, steering wheels, window frames, distributors and a considerable variety of other parts are made of soybeans. The basic molding material for numerous plastics is a soybean compound. Thus radio cabinets and plumbing fixtures in postwar America may be merely a mold of soybean cakes.

Yes, farms can be made the source of our future prosperity. Scientists and industrialists can get farm materials from which to make new commodities and promote increased factory production from which prosperity springs.

In this era of definitely new agricultural development, one factor will loom big in determining success or failure. That factor is productivity of the soil. For the extent to which our farms can continue to yield crops for the new dehydration industry, for chemurgic utilization into industrial products or to help feed the world in the critical postwar period, will depend on the fertility of the soil that produces those crops.

Vincent Sauchelli, agricultural research expert of Baltimore, Md., in an address before a Farm Chemurgic conference once said: "Chemurgy can succeed only on farm land where plant foods are returned to the soil in the form of commercial fertilizer at a rate which at least balances the amount removed each year by growing crops and livestock."

"One of the significant steps forward," he added, "is that which helps the farmer learn more about his particular soil and its plant food needs. State agricultural experiment stations are prepared to assist farmers not only in soil tests to determine the proper fertilizer analyses for various crops, but also inform them on the placement to insure best results."

The importance of Mr. Sauchelli's observations is evident when it is considered that after the war America will be faced with the greatest soil rehabilitation job in its history. This is because vast wartime farm production demands are draining fertility resources on an unprecedented scale and because fertilizer applications at present cannot balance the depletion rate.

"Growing crops to win the war is, of course, the farmers' No. 1 job," said a statement of the Middle West Soil Improvement Committee. "A heavy draft on the farmer's 'savings account' of plant food elements is a relatively small contribution to victory, if proper steps are made to repay the borrowed soil wealth when the war is over."

Corn from the field is manufactured into a substitute for tinfoil, a quick-drying printing ink or a wallpaper coating under the transforming magic of Chemurgy. Or thanks to the new science of Dehydration it is compressed to only a fraction of its weight and shipped overseas to feed our armed forces.

Volcanic Forces of Pressure and Steam Originate Deep in the Earth

In most cases the mighty forces that start and continue volcanic eruption—the squeezing force of gravity and the explosive forces of steam and other gases—originate deep in the earth, probably many miles down. The melted rock or lava that is an essential part of most eruptions, also starts from these great depths. It is pushed up the pipe of the volcano to the crater, where it flows out or is exploded out. When an eruption has run its

course, the lava in the pipe cools and solidifies. If it completely seals up the pipe with a plug of rock, the volcano becomes dormant or extinct. If the pipe is choked down to very small proportions, so that a trickle of lava and hot gases rise to keep a little cauldron of molten rock bubbling in the crater, the volcano remains slightly active.

All the bombs in existence dropped on the top of the cold, solid plug of a dormant volcano could not

wake the sleeping forces far below. In the case of a slightly active volcano, even the explosion of the biggest bombs would do little more than splash lava about the crater.

Bombs have been used advantageously in controlling one kind of volcanic phenomena. On the slopes of Mauna Loa on the island of Hawaii, lava streams that threatened to flow into villages and even into the city of Hilo, have been turned aside by bomb explosions.

Washington Digest

Army's Greatest Hazard? It's Question of Morale

Armed Services Do Everything Possible to
Protect Mental Health of Servicemen;
Parents Advised to Cooperate.

By BAUKHAGE

News Analyst and Commentator.

WNU Service, Union Trust Building,
Washington, D. C.

What's the greatest hazard your boy must meet when he joins the army? Not the weapon of the enemy. We know only a very tiny percentage of those who don the uniform succumb to that.

It's the mental hazard. Take it from a man who met it and who, since, has read the alarming figures which show the war's (any war's) mental casualties.

And to meet that mental hazard you need just one thing—mental health.

Let me quote a few words on the subject of morale from one of the books which the army and the navy and the wise ones in other professions say is a wonderful protection for the mental health of the boy who joins the army.

That book is paper bound. It costs 35 cents. It is called "Our Armed Forces." It has a lot of pictures in it and a lot of sound sense. It is printed by the presses of the Infantry Journal, 1115 17th street, Washington, D. C. It is not sold for profit.

And here is what it says on the subject of morale. (As I say on the air, "I'm quoting"):

"Morale is an important quality of citizenship in the crises of peace, when the internal security of the nation is threatened. It is even more important in war, when the very existence of the nation hangs in the balance. It is, therefore, an objective of army and navy leadership to build a high degree of morale in the soldier and sailor."

About Habits

"The state of mind we call morale has its roots in long-established habits of thinking and acting. A student seated alone in his room, bent seriously over his books, may be tackling his studies with a high degree of morale. He believes what he is doing is worth while. He is determined to overcome whatever difficulties the subject matter offers. He works with a self urge. He gives up the picture show and the ball game if doing so is necessary for success. He has confidence in his ability to acquire the knowledge and skill he is seeking. In the undertaking of hundreds of similar duties in the ordinary routine of living is created the intangible virtue called morale. The young man who enters the armed services may therefore bring with him the basis for the morale upon which his success as a soldier and the ultimate victory of our nation so greatly depend."

"While morale has its roots in the character of the individual and his past experience, it may be greatly strengthened by association and close co-operation with others who are engaged in the same enterprise. Morale is contagious. It is a quality easily transmitted from one person to another. The serviceman receives his uniform. It is the symbol of his dedication. With it he becomes part of the great tradition. Behind him into history is a long line of those who have been so dedicated. The men who walked barefoot in the snow at Valley Forge. The Green Mountain boys with Ethan Allen, thundering at the gates of Ticonderoga. Calm men in the gun turrets at Manila Bay. Marines at Guadalcanal. Chateau Thierry. Tripoli. Helmed fliers of a torpedo squadron at Midway. Through the procession of heroes, still bright as it recedes into distant time, has been handed down the great tradition."

Environment

Now when Johnny Doughboy joins up, he changes his habits of life as much as Christopher Columbus would have to change his if he came back and took a job managing a big, modern corporation, or riding herd on a bunch of long-horns or bossing a section gang. It would be tough for Chris to adapt himself to his environment. If he couldn't manage it, he would probably go haywire and blow his top. The dinosaur and some of his fellow prehistorics who couldn't adjust themselves to their environment retired permanently to positions in museums. Man, some men that is, adjusted. They took the ice age, the floods and the famine in their stride and here they are oh-ing and ah-ing at the dead

mastodons who weren't as smart as "fitting in"—that's all morale is, "fitting in," getting on when you, who have sat down to your meals three times a day as regularly as the clock, miss the chow wagon; you who have had a kind and solicitous mother or teacher looking after your private troubles are suddenly faced with sharing the troubles of your squad or company or squadron.

Now, how are you going to adjust yourself to this sudden change?

In the first place, you have to understand why everything seems topsy-turvy. Why you, a free-born American citizen, who did as he pleased when and how it pleased him, suddenly have to get up by a bugle, keep step, salute, eat, sleep, drink, walk, run, crawl when somebody else says so.

The first thing you have to realize is the purpose ahead. The next thing is why other people whom you never see insist on achieving that purpose the way they do, regardless of your convenience or your date at the post office.

Your Own Orders

"Your government controls the armed forces." That means that the men your folks elected, just the way it was planned by the makers of America, are really the ones who are telling you what to do. Which means, if you follow through, that you yourself and your folks are telling you.

I chose that phrase because it heads chapter two in this book "Our Armed Forces" I'm talking about. You had better read it.

The next chapter is called "Your Army." And you had better read that too because it tells you something of what to expect. I won't go any further and really I ought to have been talking all this time to parents, too, for they, of all people, ought to know what the boy is up against. What it is all about. One of the great tragedies of being a soldier is the way the folks back home don't understand it at all. They think their job is to feel sorry for you; they don't understand what an extra stripe really means, they can't get you when you talk about home and the things you want to fear about and they write and tell you how noble you are. You don't feel noble. You want to know if the barn has been painted or if your girl has been around lately. You would, though, like them to have some faint idea about this not-altogether unpleasant job of being a soldier. That's why it would be a good thing if your folks would read this book.

Broadcaster's Diary

As I came to work this morning—a little late and right in the midst of the crowds of war workers surging down to their offices, I was suddenly struck with the fact that this change in Washington which I have become used to is typical of other changes that are going to take place all over America.

I was walking down 16th street. That sounds prosaic but it used to be a street of beautiful mansions, many of them historic. It sweeps out of the Maryland countryside, down a hill and up another crest from which you can look down, through a vista of ancient trees to the blur at the end which is the White House with the statue of General Jackson on his rearing horse silhouetted against it.

This morning, as I say, the workers were swarming out of the houses—they are boarding houses now—to work. I glanced up as I passed one sedate old home, the wistaria still decorously draped over the doorway up whose curving drive once the carriage and later the limousine swept to meet milady descending.

I peeped, indecorously, through the beautiful leaded windows of the dining room. It was filled with little tables, the cloths stained with precious but too hurriedly imbibed morning coffee.

I thought a moment. How will Delaware avenue and Locust street and High street look after the war? Those neatly cropped lawns, even an iron deer or two if they haven't gone into the scrap collection campaign?

Sic transit gloria—but perhaps the past glory will be replaced by something more glorious. We can hope.

BRIEFS... by Baukhage

In Washington there is a share-the-taxicab system. The driver takes as many people as he can going in the same direction. It used to be called the "pick-up" system. The name changed but not the practice. It's still a great date-maker.

The Victory gardeners who have suffered from "infiltration" call the jack rabbits "jap rabbits."

A black market potato truck was photographed by a news photographer in front of a fire house in Washington. Spud-leggers fear nothing.

In the District of Columbia, it's illegal to take a drink of liquor sitting up. Some people who take it sitting down can't stand up afterward anyhow.

Washington MERRY-GO-ROUND

Washington, D. C.

MORE CANNED GOODS
Housewives who will get to thank the senate's Truman committee. No one announced it officially but it was due to their probing the army recently released 30 million cases of canned fruits and vegetables for civilian use.

The Truman committee had revealed the fact that huge quantities of canned goods were hoarded or unwisely used by army, when fresh vegetables were easily available. Especially revealing was the cross-examination of Gen. E. B. Gregory, the army quartermaster general, by Sen. Brewster of Maine.

"Why does the army feed canned grapefruit to its troops in winter?" asked Brewster, "when grapefruit growing fresh all over Florida?"

"Because the men are too busy preparing fresh grapefruit," was Gen. Gregory's frank reply.

He also admitted that green tables and fruits were readily available to army camps during a part of the year, but that army commissaries purchased canned goods because it was easier to prepare fresh vegetables.

The Truman committee also said that as a result of this hoarding the packers and canners were in a quandary and expected to curtail production. They knew the army had overpurchased, could never use its vast stores of canned goods, the canners figured the army was dumping this back on the market thereby causing an oversupply at the wrong time. That was 30 million cases were turned to civilian use by the army to ease the market while there was a civilian shortage.

WHITE COLLAR MINERS

While the War Labor board John L. Lewis over a barrel asking a \$2-a-day wage increase organized coal miners, a branch of the government, the bureau of Internal Revenue, various salary increases for union supervisory employees in mines.

The matter was kept hushed secret-loving Internal Revenue bureaucrats, but here are the facts.

A special Internal Revenue branch, known as the Salary Stabilization unit, functions in the field like the War Labor board in the wage field, to keep earnings below inflationary levels. The new unit must approve all salary boosts for business executives and collar workers.

While everything the War Labor board does is open to public scrutiny, Internal Revenue's Salary Stabilization unit operates strictly behind closed doors and doesn't answer to anybody.

Recently, it leaked out, however, that bituminous coal mine operators, in a move to block unionization of mine "sub-bosses," requested government permission to increase salaries of all supervisory employees, including mine superintendents, managers, foremen, bosses, etc. That white-collar increase amounted to an average \$2 a day—just the increase the miners asked for.

GRAIN FROM CANADA

Food Boss Chester Davis has been looking for a good transportation man to solve that problem in wheat from Canada.

Commodity Credit corporation bought 7½ million bushels of Canadian wheat, but not a bushel moved. Meantime, dairy and try farmers in the Northwest are running low on feed grains.

Great Lakes steamers got a month late, on account of ice thaw. They are loaded down ore for the steel mills, have no room for grain. Rail movement only alternative.

Grain stocks in the U. S. are the heaviest in history, but so is the assumption of grain. Record animal production is eating up stocks so fast that foreign must be moved. This is when farmers would welcome of that much abused Argentine and wheat.

Behind this excitement grain supplies is one big mark which few people outside government realize, namely, feeding of occupied territories.

If and when invasion comes, civilians on the invasion front, whether in France, the Low Countries, or the Balkans, will be fed from the American basket. Quickest way to get to starving people is in the grain.

MERRY-GO-ROUND

FDR has no love for the duchess of Windsor, saw them when they conferred Churchill... The only time ill ever was booted on the commons was when he was famous speech in the winter defending Edward's right to Wally and remain king of... Only a handful of laboring up from the Bahamas in the U. S. A., so this was excuse to see Churchill, to get back to London.

e Clothes for Youngsters Made of Men's Cast-Off Shirts

By CHERIE NICHOLAS

When dad's or brother's shirts are "all gone" at the collar, don't deposit them in the future dust rags. These are a patriotic duty to convert a piece of fabric that can be used for active wear. You'll be able to transform these shirts into rompers, dresses, sun-suits, and pinafores for the young of the family just by getting at the family sewing machine and starting to stitch away.

Shirts, as a rule, are made of sturdy broadcloth and madras in stripes, line checks and interesting weaves that make perfect for children's clothes. After you plan to convert the shirt to a romper or a sunsuit and for your young daughter, here are the general steps to remember:

Remove the collar and yoke. The buttons and buttonholes may be able to use them for the back closing on dress or the front closing on shirt. Be sure to launder pieces and press flat to make placing, pinning and cutting more accurate. Fold the shirt down the center and pin the fronts and sleeves so the fabric design and grain all come the same way. It doesn't matter if the garment you make, the shirt is to lay out the pattern on the fabric.

Pattern carefully to the shirt, then pink all the fabric with the pinker attachment on the sewing machine kit. This is the more involved part of making French seams, because the fabric has a pinked edge. When using a pattern for buttons and buttonholes on the front or back, place it so that the center line of the shirt and buttonhole markings fall on the center line of the shirt. Add buttonholes on the shirt. Add buttonhole attachment. Remember, too, that girls' clothes are right to left, boys' from right to left. Just the opposite is the garment has a back opening. It is important to mark the notches on the fabric precisely points of joining. The last step is stitching.

Colorful cotton prints is the message for play suits. Strikingly gay red cotton all over with print motifs and white bows is used in the picture. As for the full skirt being designed for midriff exposure, giving sun rays.

Glamorize each costume with such clever trimming tricks as lattice work effects and medallions which you can stitch up in practically no time by using the unerring little handcraft attachment to your sewing machine with which rickrack braid (rickrack is lavished on dresses and pinafores this season) is attached in unique and ornamental ways. Cutout monograms to adorn tiny pockets can be made of scraps of material and are jiffy-stitched with the aid of the zig-zag attachment. If you would like to dramatize your daughter's writing ability have her write her name on the collar of her dress, then with the one-thread embroiderer you can follow her lettering with a signature stitch.

A man's worn shirt of beige-striped madras was used to make the enchanting little sunsuit and sunbonnet for the two-year-old miss seated so gleefully centered in the picture. In the one-piece dress to the right there's a Peter Pan simplicity that's very practical. It's made from a man's pin-stripe shirt. The cost to remake was about ten cents for navy blue binding stitched on quickly with the binder attachment to enhance the edge of collar, sleeves and pockets. Pinafores as seen in the little sketches are the big news in little folk's fashion circles. Men's striped shirts make unusually attractive pinafores for children when you use the stripes vertically for the garment and horizontally for pockets, waistline band and pleated edging. Add to this the professional details of applique hearts (see sketch lower left corner) that can be applied quickly with the zigzag attachment and you have a pinafore that looks brand new and expensive.

By dropping in at a local sewing center even a completely uninitiated beginner can learn to stitch up a variety of attractive outfits from closet castoffs. In just a few afternoons via wartime budget lessons you can master all the modern sewing short-cuts as well as shirt-reviver tricks.

Released by Western Newspaper Union.

Patchwork Fashions

A new craze in the fashion world is that of patchwork blouses, hats, pinafores and a whole list of novelties made of pieces of calicoes, ginghams and so on that are patched together. It is said that a thriving business is being done at the remnant counters for the idea is one that is appealing to young enthusiasts that delight in following fads.

Picture if you will slacks that are cuffed with little swatches of bright calico or chambray or gingham that have been patched together exactly as grandma worked her quilt schemes. Top these knee-length slacks with a blouse made of the same patchwork. You can make entire aprons of this patchwork or add pockets to your plain chambray play dress. Fact is "anything goes" in this new patchwork stampede.

New Skirt Type

Designers are turning time and talent to creating versatile skirt fashions to wear with the exquisite lingerie blouses so fashionable this summer. A charming new style to be found in the stores suggests the dirndl trend. Being made of silk jersey it carries grace itself accented with such cunning details as little ruffles of the jersey outlining huge bow-tied pockets with a matching ruffle encircling the skirt but placed a full eight inches above the hemline. You'll love this skirt, it goes so effectively with any type blouse and it is to be had in delectable monotones.

Star Dust

By VIRGINIA VALE

Released by Western Newspaper Union.

AN ENTIRE apartment house, in sections, was constructed for Columbia's "The More the Merrier" (Jean Arthur, Joel McCrea and Charles Coburn starring), which is certainly the most amusing picture of the year so far. The rooftop was laid out across the floor of an entire sound stage, the four room apartment that's the scene of most of the action occupied another, the building front and a block of similar structures occupied another—the latter being the scene of the love scene which is likely to go down in movie history as one of the most delightful ever made.

The way James Cagney mauls his women on the screen is a Hollywood legend; actually, he has struck women only four times, never bruised one. But in "Johnny Come Lately" he's beat up by a girl, Marjorie Lord. She slapped him, hit him on the jaw, pounded his chest. He suffered no ill effects. But Marjorie sprained a wrist.

There's not a woman featured in "Bataan"—but the wives of the all-star cast include Barbara Stanwyck, Joan Crawford, Lucille Ball and Jennifer Jones, soon to make her appearance in the lead of "The Song

JENNIFER JONES

of Bernadette." Her husband is Robert Walker, screen newcomer, who an enthusiastic press agent tells us has "the wistful appeal of Jimmy Stewart, plus a dash of Gary Cooper."

Now that we all have to read maps, to keep up with the war, Walt Disney's set to help us; in "Victory Through Air Power" he has introduced an entire sequence to acquaint audiences with the fundamentals of cartography and map-reading.

Freddie Bartholomew's last act before reporting for service in the army air corps was to say good-bye to Miles Mander, who gave him his start in pictures. Freddie dropped in on the set of "Five Graves to Cairo," where Mander, formerly a director-writer-actor in English pictures, was playing the part of a British officer.

Till recently Dick Stark, announcer on "Abie's Irish Rose," would fight anybody who called him "Baby-face." Now he's changed his tune—Paramount likes that baby face, and has signed him to replace Alan Ladd in gangster roles lined up for Ladd before he joined the army.

When a quizmaster makes a mistake listeners burn up the wires telling him so. On a recent "Take a Card" program Wally Butterworth said that hot dogs are made of pork; he's been snowed under by wires, letters and phone calls telling him an assortment of meats is used.

Brian Donlevy lost half his mustache during the final day's shooting for "America" at a steel plant; imitated the workers in throwing his arms across his face after flipping a shovelful of ferro-manganese into a furnace, but took his arm down too soon.

Paulette Goddard predicts that Sonny Tufts, who appears opposite her in "So Proudly We Hail," will become a big star. A year ago he was trying to get extra parts on the air, but radio producers wouldn't listen. Recently she told Charles Martin of the CBS Playhouse that she'd bet him a pound of steak he'd be offering Sonny \$1,500 an appearance after the picture's released.

Both radio and movies took a hand in the build-up of Jack Carson. Producer Vick Knight announced his engagement as star of an air series; then Mark Hellinger said he'd get star billing in "The Widow Wouldn't Weep," first meant for Jack Benny.

ODDS AND ENDS—Martha Raye dropped in on the "Let's Face It" set to tell Bob Hope what he'd better take along on his overseas trip. She hopes to go back herself soon. Jack Benny's been signed to star in "The Horn Blows at Midnight," the scenes of which are laid in Heaven and New York. They've changed the title of "The Pentacle" to "Conflict," much easier to understand—but "Five Graves to Cairo" is still a puzzle, since it doesn't mean what it seems to. Stage 29 on the Metro lot, where Gregory Ratoff is directing "Russia," has been christened "Ratoffgrad" by the members of the company.

Promise:
You will be missed . . . but not when hope is small
And I revolt against the tricks of fate,
You will be missed . . . but not when I recall
The awesome shutting of a quiet gate,
Not when the winds come racing down the sky
And there is chill and famine in the air . . .
Not when the heart is desolate and dry . . .
Not when the eyes are mirrors of despair . . .

You will be missed when life is at its best
When every rose has opened to the sun,
You will be missed when I no longer quest . . .
With all goals made and every victory won;
For this is love . . . to share the least delight
And bear alone the terror and the night!
—P. S.

Britishers in Tunisia are splitting their sides over this one. One of the Tommies there lost his bayonet, and rather than face the consequences of admitting the misdemeanor, carved out an excellent imitation of the missing weapon. For weeks he went about his duties with the fake concealed in his scabbard, safe from censure so long as his handiwork went undetected. When the inevitable order came to "Fix Bayonets," however, he was undone. He simply stood there, his scabbard untouched.

The sergeant demanded an explanation. "It's a promise I made my father," said the Tommy. "As he lay on his death-bed I told him I would never bear a bayonet on the anniversary of his death."

"That's the damndest fish story I ever heard!" the sergeant thundered. "Lemme see that bayonet!"
"For breaking a solemn promise," said the Tommy as he slowly drew forth the bayonet, "—may the Lord turn it to wood!"

An MGM writer decided he wanted to get into the Army. "I'm serious," he told pals. "I want to be one of the best soldiers."

And this is what happened at the induction center. He remarked that the place was crowded and that it was so stuffy. The psychiatrist heard him and marked down "Claustrophobia."

"Oh, please," said the scrivener, "don't do that, I'm just over-anxious."

The man wrote: "Nervous."
"Oh, look now," said the lad. "I'm not nervous. I was drinking last night."

The man wrote: "Alcoholic."

"But I don't drink much," he interrupted, "I'm all keyed up. To be awake I took benzedrine."

The man wrote: "Drug addict."
The poor guy is back at MGM.

When Larry Lesueur, the CBS correspondent, visited a soldiers' hospital in Moscow, he chatted with a wounded man who the doctors said wouldn't be able to fight again. Lesueur asked the soldier what he planned to do and was told that he intended to go back to the front. "You can't," said Lesueur, "—there are plenty of men to take your place."

"You don't understand," was the Russian's reply. "No one can take another's place in a fight."

A reader requests the origin of the word "racket." It was underworld-ese for "party." In the old days in New York on the lower East Side when mobsters ran a dance or affair for a pal in a jam—they sold tickets to it.

"We're gonna have a racket Friday night," they'd say. Often small-time gangsters would employ that theme to get ready money, with no thought of holding the event. Such cheats were called "racketeers." And when a stranger was being checked, they'd ask: "What's his racket?"

Some of us were gabbing about pungent drama criticism. A Broadway vet recalled Woolcott's slap at a second-rate musical. "The plot," he wrote, "hasn't a leg to stand on and there are chorus girls to match."

Pvt. M. Wilk of "This Is the Army," tells of the bloke who brought his troubles to The Good Will Hour. "Mr. Anthony," he began, "my best friend ran away with my wife. They've been gone a month —and, Mr. Anthony—I miss him!"

Sights You Don't See From a Bus: The elderly lady, who peddles posies on Broadway, wearing the four blue star button as proudly as MacArthur wears his four stars. . . . The steady customer at the Hickory House who brings his own potatoes. . . . The midtowners studying a sign painter near the Follies stage entrance, with all those shapely ankles chafing nearby! . . . The West 48th Street block between 5th and 6th where you can buy almost anything—from a hand grenade to a home in the country wholesale.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

By HAROLD L. LUNDQUIST, D. D.
Of The Moody Bible Institute of Chicago.
(Released by Western Newspaper Union)

Lesson for June 20

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education, used by permission.

JOHN DESCRIBES TRUE CHRISTIANS

LESSON TEXT—I John 2:1-6; 3:13-18; 4:15-17

GOLDEN TEXT—But if we walk in the light, as he is in the light, we have fellowship one with another, and the blood of Jesus Christ his Son cleanseth us from all sin.—I John 1:7.

Religion and life go together. To hold the tenets of Christian truth in one's head and not to have them move the heart is to deny the very faith one professes. Yet this is the danger which faces the believer—a temptation before which many have fallen. The result is that much of "what passes for Christianity in these days is very thin stuff, very remote from the original" (Shoemaker).

John was not content with such a weak imitation, and in his writings he set up the true standard of a forgiven and transformed life, living itself out in love and sacrificial service. If we have forgotten what God meant us to be in Christ, or are members of a church which has strayed from the true and living way, this lesson affords an opportunity for repentance and works meet thereunto.

The true Christian life must have I. Sin Forgiven and Life Transformed (I John 2:1-6).

Not only at the beginning of the Christian life is sin dealt with and put away, but day by day—yes, moment by moment—we have the cleansing power of the blood of our Divine Advocate.

This is of the utmost importance, for God can only use clean channels for the outgoing of His power and grace to the world. We know our own weakness and the defiling presence of the world. But unlike the unregenerate man, we do not submit and go down; we turn to Christ for forgiveness and cleansing.

The transformation of life which thus comes to the believer is shown in obedience to the commandments of God. In the early church there were those who said that if they only believed in Christ as Saviour it made no difference how they lived—and they have their followers in our day.

Be sure of this, the essential thing in Christian profession is not how you talk about Christ, but how you walk in obedience to His commandments.

Real Christianity will cause us to be

II. Hated by the World and Loved by the Brethren (I John 3:13-18).

The world, that is, unregenerate mankind, hates a genuine Christian no matter how kind and loving he may be. Why? "Because the Christian believer gives the non-believer an uncomfortable sense of inferiority. The presence of high Christian ideals in marked contrast to his own selfish policies arouses his anger and resentment" (Douglass).

The presence of a clean, godly life in a community makes every sinner look that much blacker, and the world, the flesh, and the devil will do everything possible to break down and destroy such a testimony. We, as Christians, should not be surprised that the world hates us. In fact, we should be troubled if it does not hate us, for if our Christianity really means anything, it is distasteful to a God-hating world. Beware if sinners find nothing in your life which distresses them and convicts them of sin.

In the midst of enmity the Christian is not afraid, for he is

III. Indwelt by God and Unafraid in the World (I John 4:15-17).

A sincere confession of Christ as Saviour brings a man into that close relationship to God which is expressed in the words, "God abideth in him, and he in God" (v. 15).

The full depth of meaning of these words is obviously beyond our limited understanding, but we accept the fact by faith and rejoice in it. We recognize that it means that we are brought by our faith in Christ, into the very center of God's love. Christ, the well-beloved Son, who stands in that blessed place, draws us into the circle and there we stand in Him.

God's love showed itself in the giving of His Son as the Redeemer of the world. It was and is unselfish and sacrificial devotion to the eternal welfare of those who merited only judgment. We do not love until we reflect that quality in our lives.

Such love casts out fear. Fellowship is impossible in an atmosphere of fear, but love rules it out. In Christ we realize that God first loved us, and then our hearts go out in warm devotion to Him.

Not only does the Christian no longer fear the day of judgment, but he is unafraid in the present evil world. This is not because of his own strength or ability, but because through faith in Christ he is "in God," and "as He is, so are we in this world" (v. 17). No more perfect or blessed ground of assurance could possibly be provided. Let us recognize our position in Him, and be strong and unafraid.

THINGS for You TO MAKE

NOW, aren't you glad you saved those tiny scraps of muslin, prints and plain colors? Just see what an exciting array of gay panholders can be fashioned from these bits of material. Whether you prefer the vegetables, fruit motifs, flower faces, sunbonnet babies or pieced designs, your scrap bag can surely supply the "makings"—and those odds and ends of floss will do the rest.

You may indulge your preference in stitch, too, for embroidery, applique and piecing are all employed here. Hot iron transfer 29542, 15 cents, brings motifs for this entire group of panholders. Send your order to:

PERFECT GROOMING MOROLINE HAIR TONIC (25¢)

Valuable Property
National honor is national property of the highest value.—James Monroe.

Gas on Stomach

Relieved in 5 minutes or double money back.
When excess stomach acid causes painful, suffocating gas, sour stomach and heartburn, doctors usually prescribe the fastest-acting medicines known for symptomatic relief—drugs like those in Bellamy's Tablets. No laxative. Bellamy's brings comfort in a fifty or double your money back on return of bottle to us, 25¢ at all druggists.

Millions have used— PAZO for PILES Simple Relieves pain and soreness

There's good reason why PAZO ointment has been used by so many millions of sufferers from simple Piles. First, PAZO ointment soothes inflamed areas—relieves pain and itching. Second, PAZO ointment lubricates hardened, dried parts—helps prevent cracking and soreness. Third, PAZO ointment tends to reduce swelling and check bleeding. Fourth, it's easy to use. PAZO ointment's perforated Pile Pipe makes application simple, thorough. Your doctor can tell you about PAZO ointment.

Get PAZO Today! At Drugstores!

BEAT THE HEAT

Heat rash irritated skin thrills to the touch of Mexsana, formerly Mexican Heat Powder. For soothing help, get Mexsana.

Open Fellow

The man who has no secrets from his wife either has no secrets or no wife.—Gilbert Wells.

DRY CRACKED LIPS

Surprising how quickly the dryness is relieved and healing begins, after using medicated, soothing, time-tested, RESINOL.

To relieve distress of MONTHLY Female Weakness

WHICH MAKES YOU CRANKY, NERVOUS!
Lydia E. Pinkham's Vegetable Compound has helped thousands to relieve periodic pain, headache, nervousness, blue feelings—due to functional monthly disturbances. This is due to its soothing effect on one of woman's most important organs.

Taken regularly—Pinkham's Compound helps build up resistance against such annoying symptoms. Follow label directions. Worth trying!

That Nagging Backache

May Warn of Disordered Kidney Action
Modern life with its hurry and worry, irregular habits, improper eating and drinking—its risk of exposure and infection—throws heavy strain on the work of the kidneys. They are apt to become overtaxed and fail to filter excess acid and other impurities from the life-giving blood.

You may suffer nagging backache, headache, dizziness, getting up nights, leg pains, swelling—feel constantly tired, nervous, all worn out. Other signs of kidney or bladder disorder are sometimes burning, scanty or too frequent urination.

Try Doan's Pills. Doan's help the kidneys to pass off harmful excess body waste. They have had more than half a century of public approval. Are recommended by grateful users everywhere. Ask your neighbor!

PAN-A-MIN
COSTS LESS
THAN 1¢
PER BIRD
PER MONTH

• For a very little cost, you can add DR. HESS POULTRY PAN-A-MIN to your poultry ration. These tonics pep up the appetite. Hens eat more feed—better feed intake usually means better egg production. (We get as many as 23 more eggs per bird per year from our Pan-a-min hens.)

Pan-a-min also supplies minerals that are essential to good egg production and are often lacking in the grain.

Pan-a-min is a two-job product that we believe ought to be in every poultry ration. If you don't agree with us after you've tried Pan-a-min, we'll be glad to refund your money.

June is National Dairy Month.
Send in your news. Thanks!

Wilbur Carr of Garner was in Klemme on business Monday.

A book of handy gummed labels for a dime. Times office.

Mr. and Mrs. Dale Schlei visited Sunday evening at the parental Axel Juhl home.

Martin "Slim" Brinkman re-opened the blacksmith and repair shop in the Etchen building, Monday.

Mr. and Mrs. Verle Keraus and son of Garner, were guests at the Ed Buntensch home Sunday.

A book of gummed labels mailing, canning labels, etc. 10c at The Times office.

Dr. and Mrs. R. N. Reuber, of Mason City, were visiting in Klemme Sunday.

Mrs. Eddie Epps of Des Moines, spent Sunday visiting at the parental Herman Paul home

Rev J T Snyder of Storm Lake, preached at the Methodist and Liberty churches Sunday.

Mr and Mrs. P. M. Wilson were visiting at Algona Sunday afternoon.

The Dorcas Society of the Methodist Church meets Thursday afternoon of this week.

Mr. and Mrs. Charles Hirth and Mr. Louis Hirth of Ackley, spent Sunday visiting at the John Newberger home.

Mrs. John Neuberger and daughters Ruth and Faye, and Marie Neuberger were at Mason City Monday.

Mrs. Margaret McClernon from Ottawa, Illinois, is spending her vacation in Klemme visiting at the home of Mrs. Bertha Schlei.

Mr and Mrs. Will Kraus of Garner were dinner guests Sunday at the home of Mr. and Mrs. Emil Blmer.

Mr and Mrs. Lewis Henschen and son, Co. Engineer Wm. Henschen of Garner, visited with Mrs. Ernest Henschen Sunday afternoon.

Mr and Mrs Jim Carothers, of Garner, spent Sunday visiting with their son-in-law and daughter, Mr. and Mrs Bert Jones and family

Miss Irene Harms returned Friday from Eldora where she visited with relatives and friends for several days last week

Miss Harriet Gibbs of Mason City spent the week end visiting with her parents, Mr. and Mrs. Harry R. Gibbs and family east of Klemme.

Miss Collen Gram, who has been visiting at Ventura, returned to her home at Cedar Falls Sunday. Mr. and Mrs. Richard Ulrich and Jim Palen took her to her home.

Mr. and Mrs. Henry Boland, accompanied by Rev. and Mrs. Orville Schroer, went to Fort Dodge Friday for a visit with Mrs. Herbert Cole, who is a patient in a hospital there.

Joan Bacon, of Buffalo Center, visited with her grandparents, Mr. and Mrs. Arthur Wellemeyer from Thursday until Sunday, when they took her back to her home.

Rev. J. T. Snyder of Storm Lake and Rev. and Mrs. H. E. Harvey and children were dinner guests at the home of Mr. and Mrs. J. I. Overholt, Sunday.

The residences of Mr. and Mrs. Ed. Buntensch and Mrs. Edna Thada were landscaped by a Mason City firm last week. It is a nice improvement to their property.

Mrs. E. H. Patet went to Hayfield last Wednesday evening to assist in caring for Mr. John Lackore, who had suffered a stroke. Mr. Lackore died later.

Mr. and Mrs. Donald Bacon and children, Joan and Charles of Buffalo Center spent last Thursday visiting at the parental Art Wellemeyer home.

Herman Paul drove to Des Moines Sunday afternoon and Monday took a physical examination for service in the Sea Bees, which he passed. However, there is "a fly in the ointment," as Mr. Paul had to present a certificate of birth before he could be sworn in. Now he will have to secure a birth certificate before he can go further. This may necessitate a trip to St. Louis, Missouri, his birth place in order to secure necessary affidavits.

Mr. and Mrs. C. G. Waterman returned Sunday morning from Little Rock, Arkansas, where they accompanied their daughter, Mrs. Lyle Wilcox in her car which she had purchased here and was taking south to her husband, Lt. Wilcox. The Watermans said it was very hot and sultry at Little Rock; that cotton and rice crops looked good. They left Klemme last week Monday morning and arrived at their destination Tuesday night.

Mr and Mrs. Howard Baack and children were guests at a three-course dinner served at the Will Schubert home at Mason City Sunday. It was the first meeting of the entire family in two and one-half years. Others present were Cpl. Herbert Schubert of Douglas, Arizona; Mrs. Herbert Schubert and Roland, of Britt; Ewald Schubert of Albany, Cal.; Lucille Yegge of Garner; Mr. and Mrs. Walter Schubert and Norma Schubert of Omaha, Nebraska; Wilbert and Lena Schubert and Juanita Wetter of Mason City, Iowa.

Tech 5 John Clements of Camp Beaumont, La., arrived in Klemme this Wednesday morning on a fifteen day furlough which he will spend visiting with his wife here and with his mother at Estherville.

Drivers License Renewals

DRIVERS LICENSE renewals may be secured the following places on the dates given below:

GARNER: Daily until further notice at the Court House

KLEMM: June 17 and 28 at Community Hall.

GOODELL: June 24 at the Community Hall.

CORWITH: June 18 and 29 at the bank.

WODEN: June 26 at the bank.

KANAWHA: June 19 and 30 at O. E. Johnson drug store

CRYSTAL LAKE: June 25 at the bank.

THE FEE IS 75c FOR THREE YEARS. License expire July 1. One member of the family may apply for all members of the family and must bring with him the license of each person for whom he is applying. Any one who has lost his driver's license must apply at Garner for a duplicate.

L. M. Brower,
SHERIFF OF HANCOCK COUNTY, IOWA

To The "Generals" On The Farm

—V—

In spite of long hours and shortage of help, you dairy farmers are doing a double duty for Uncle Sam . . . One: helping to keep the boys on the fighting front well-fed and physically fit. Two: feeding the millions of War Workers so they can keep turning out tanks and guns and planes.

There is no more important work than yours going on anywhere, and we want you to know how much YOUR war efforts are appreciated by each one of us here at this hardware store.

E. F. Jacobs
Quality And Service Since 1919

Official Service Flags at Office. \$1.00 each.

Don't Be Fooled

Don't be fooled into thinking you can use the same oil forever just because you are driving as much or as fast these days.

Lots of short trips added together take more oil than a few longer ones with the same total mileage

Choking the motor for frequent starting will dilute oil with gas which has no chance to burn out carbon shorter, slower trips.

Fill Up With
WHITE ROSE GASOLINE

. . . and use our high quality **PENNFIELD MOTOR OIL**. You'll get satisfaction in every mile of carefree driving when you get your serviced by us.

Hancock County Farmers Help Solve Own Labor Problems

Some Hancock County farmers are doing a bang-up job of solving their labor problems by getting together with one or two neighbors when making hay or shocking grain. This observation is made by Paul Henderson, County Extension Director. Many others can get experienced help in this same manner.

Town boys are helping on farms. Some are doing odd jobs so the farmer can devote more time to his field work. Others are gradually working into the heavier jobs on the farm.

Labor saving devices such as hay rakes, manure loaders and short cuts in doing chores are also in evidence these days on some farms. If you, as a farmer, can help a neighbor for a day or two, or even a week, be sure to notify one of the following labor representatives: H. H. Mullin, Britt; Garvel Ris- dale, Corwith; A. R. Janssen, Cry- Lake; Ira Langlitz, Goodell; O. Schnebly, Hayfield; L. E. Faber, Kanawha; Emmett Sheets, Hutch- son; Walter Lemke, Klemme; Ray W. Woden.

They may have a farmer listed who needs your help. These are not gratuitous jobs, and they are very important ways to get the maximum out of our time and machin-

FORMER KLEMMME YOUTH NOW A MINISTER

Earl Josten, of West Des Moines, son of Mr. John Josten, Klemme, recently been appointed by the Des Moines Methodist Conference to serve as pastor of the Jordan-ville charge near Des Moines.

For most of the past year, Mr. Josten has been preaching at the West Des Moines charge 40 miles northeast of Des Moines for Rev. Josten who enlisted as a Chaplain in the army.

Rev. Earl Josten, who is a graduate of Morningside College, Sioux Falls, has held a preacher's license since 1922. Since graduating from Morningside he has been teaching in high schools and specialized in music and is noted as a director of the church choir.

Rev. and Mrs. Josten and their son reside at West Des Moines where Josten has been teaching for the past several years.

The main form of farm family savings in 1942 by those keeping bank accounts was buying bonds.

Our Men In The Service

OTHO KERAUS IN NORTH AFRICAN BATTLES

Mr and Mrs W C Keraus received a letter from their son, Otho who is with the U S Army in Africa.

Otho's letter did not carry much information but he stated he had been in the hospital. He stated he was going swimming in the Mediterranean, so if he had been wounded in battle it evidently was not so serious. Otho has been overseas for about a year and a half now.

GARLAND BRINKMAN LIKES THE SEA BEES FINE

Mr and Mrs Martin Brinkman received a letter from their son, Garland, who recently enlisted in the Navy Sea Bees and is taking his "boot" training at Camp Perry, Virginia.

Garland said that even K P duty was fun and that he got a big kick out of doing his own laundry work. Garland's address follows: Garland Brinkman, A S, Area D, 9 Plat 3713, Camp Perry, Va.

"BILL" LEMKE BEGINS PILOT TRAINING MONDAY

Mr and Mrs. Wm H Lemke of Liberty township received a letter from their son, Bill, stating that he would begin pilot training Monday. So far Bill has been taking the usual ground school work and military discipline and laws preparatory to flight training. His address is as follows: A-S William W Lemke, Sqdn 12, Flight A, S A A A B, Santa Anna, California.

PVT HAROLD JOST AT WINSTON SALEM, N C

Harold Jost, former Klemme boy and son of Mr Henry Jost, was recently inducted into the U S Army and is now located in North Carolina. Harold's address follows: Pvt H R Jost, 34854997, Hdq. F C C Sec A-1, Winston Salem, North Carolina.

WISTEY HOME FROM THE ALEUTIAN ISLANDS

Clarence Wistey, son of Mrs. Louis Wistey of Clear Lake, and a brother of Mrs Ed Jacobs of Klemme, is home on a thirty day furlough from service in Alaska and the Aleutian Islands. Wistey is with the Navy Sea Bees and was in the vicinity of Attu and Kiska Islands during the recent action.

GOODSELL YOUTH ENLISTED IN NAVY V-7

Owen Conwell, Jr, son of Mr. and Mrs. Owen Conwell of Goodsell, has received notice from the government that he is to report for active duty July 1 at Saint Ambrose college at Davenport. He enlisted in the Navy V-7 last November.

CAPT F C BYRNES GETS PROMOTION AT DAYTON

Mr. and Mrs J. I Overholt received the information that their son-in-law, Capt F. C Byrnes, of the Wright Air Field at Dayton, O., has been raised in rank from Captain to Major. Major and Mrs. Byrnes visited in Klemme several weeks ago. Before their marriage Mrs. Byrnes was Miss Ethel Overholt.

Feeding margins for all kinds of livestock, except feeding cattle, were greater in 1942 than in any of the 5 previous years.

Birthday Anniversaries

MRS. SARAH VAN BUSKIRK HONORED ON BIRTHDAY

Fifty-three relatives gathered at the home of Mr and Mrs Paul Van Buskirk northeast of Klemme Sunday to honor Mrs Sarah Van Buskirk on her 70th birthday anniversary.

The guests brought well filled baskets of food and a bountiful dinner was served at noon.

Mrs Van Buskirk received some beautiful gifts as well as a nice purse of money.

Among those present were Mrs. Van Buskirk, Virgil and R. L. Montgomery of Belmond; John Glaman of Jewell, Mr and Mrs. Walter Glaman and Calvin Glaman of Lake Crystal, Minn.; Sime and Edith Van Buskirk of Vernon Center, Minn.; Mrs Milton Legar and Wilbur, Mrs. Eneereth Smith and daughters of Blairsburg, Mr. and Mrs Laverne Olson and Patty, Mr. Allen Myklestad and Roger, Miss Mabel Lee of Des Moines.

Mr and Mrs Lloyd Van Buskirk and family, Mr and Mrs Dan Fjetland and family, Mr and Mrs. Harney H-pkey and Sharon of Goodell, Mr and Mrs. Leon Gilpin and family of Meservey, Mr and Mrs Paul Van Buskirk, Victor Mikesh and Jack Crosby of Klemme.

Mr and Mrs Lars Myklestad of Ventura were afternoon callers. In the late afternoon the many guests left for their homes after wishing Mrs Van Buskirk many happy returns of the day.

What You Buy With WAR BONDS 5 Ocean Navy

When Pearl Harbor burst upon us our great expanse of territory was protected by a one ocean navy of about 350 first line ships with an addition of an approximate number building.

Now we are in a five ocean war and we are required not only to pay for the building of enough ships of the line but also for hundreds of Liberty ships and auxiliary craft. The amount of money you invested in War Bonds when we had a one ocean navy was all right then, it isn't enough now. Buy more and more War Bonds.

More Hancock Countians Called Into Service

MRS. ROBERTS, BRITT, G. O. P. PRESIDENT

Iowa Republican Women Name Publisher's Wife

Delegates to the biennial meeting of the Iowa Council of Republican Women at Des Moines last Thursday elected Mrs R. R. Roberts of Britt, president, succeeding Mrs. P A Lanson of Fort Madison.

Among other officers elected were the following north Iowans: Mrs J. O E. Johnson, Northwood, second vice-president, Mrs W. S Pritchard, Garner, auditor, and Mrs C D Moody, Nora Springs, sergeant-at-arms.

Mrs Roberts is the wife of Ray Roberts, editor of the Britt News-Tribune.

TWO DIVORCES GRANTED BY JUDGE BOYNTON

Judge Tom Boynton granted two divorces in district court at Garner.

In the Martha Geilenfeldt case against Arthur Geilenfeldt, plaintiff petitioned for separate maintenance last November, and the defendant filed a cross-petition for a divorce, both parties charging cruel and inhuman treatment. Plaintiff withdrew her petition and the case was heard on the defendant's cross-petition.

No alimony was ordered paid. Defendant is to pay costs of the case and care and custody of the two minor children was awarded to the plaintiff until further orders of the court. Property settlement was agreed upon by both parties.

The couple was married April 2, 1918, and have four children.

* * *

Rescila Tanner was awarded a divorce from Albert Tanner. She was granted care and custody of the couple's four minor children. Plaintiff and defendant reached an agreement on property division and defendant will pay plaintiff's attorney's fees of \$50 and court costs of \$11.30.

The couple was married on December 14, 1914, and had nine children. Plaintiff charged cruel and inhuman treatment.

INFORMATION ON FUEL OIL AND GASOLINE

Fuel oil applications are being sent out to all persons receiving fuel oil last year. These applications must be filled in by the applicant and returned to the Rationing Board at Garner as soon as possible.

Gasoline

The application for renewal of A. Books will soon be at all filling stations and garages. The applicant must fill out one of the forms and send it to the Rationing Board at Garner. Be sure to enclose the Tire Inspection Record with the application.

War Price & Rationing Board

JUNE SELECTEES NAMED BY DRAFT BOARD

The June draft contingent was announced by the Hancock County selective service board. Those entering the army reported at Camp Dodge, while others have gone to various navy and marine stations.

The men and the services they have entered are as follows:

Joseph C Keough, Garner, navy; Merle D Nail, Corwith, army air corps. Carlisle W. Woodbury, Corwith, navy; Kasper G. Graff, Garner, navy; Paul B. Zurbruggen, Garner, army; Harold B. Jacobsen, of Britt, army; Gregg F. Arnold, Garner, marines; Archie L. McCormick, Britt, army; Maynard E. Taylor, Hayfield, army.

Glenn A. Pearce, Britt, army; Glenn E. Chally, Crystal Lake, army; Joe G. Weiss, Britt, army; Henry A. Brunsen, Woden, army; Gordon E. Upmeyer, Garner, navy.

Duane E. Ridder, Klemme, army; Lynn Q. Knoll, Kanawha, army; James A. Trulson, Britt, army air corps; Elmer E. Thompson, Britt, army; Garland L. Brinkman, Klemme, navy; Nickoly C. Vaage, Hantontown, army.

Thomas A. Gourley, Britt, navy; John Keough, Britt, army; Floyd E. Charbonneau, Britt, navy; Oscar J. Olson, Britt, army; Billy D. Pigman, Britt, army; Donald O. Anderson, Kanawha, navy.

Transfers from other draft boards include the following: Wesley K. Boller, Goodell, army; and LeRoy G. Love, Britt, navy.

SEVERAL FARMS CHANGED OWNERS NEAR GOODSELL

Several farms changed hands in the Goodsell community last week.

Low Wesenberg purchased the farm east of Goodsell tenanted by Tim Gerdes.

Cal Thomas sold his 120 acre farm west of Goodsell. George Heginger of Belmond purchased the 80 acres with the buildings, and the 40 acre tract was sold to Clarence Hildebrand of Belmond.

John Chapman of Belmond purchased the Mchus and Lamsvers farm one-half mile west of Goodell at \$115 per acre. The Chapmans will move on the farm March 1st.

Arthur Chelsvig of Goodell purchased the McCorkle farm, six miles west of Goodell, which is tenanted by Harvey Severson.

Oliver Goodwin of Belmond purchased the Dave Finn property at Goodell which is located on the highway and had been tenanted by the Burnett family.

THANK YOU, FOLKS!

I want to take this means of saying "Thank You" for the letters, cards and flowers sent to me by friends while I was in the hospital. I also greatly appreciated the visitors who came to see me while I was ill. Wm. F. Stille.

RESCUING FISH FOR KLEMMME SPORTSMEN

The above is a scene of fish rescue work along the Mississippi River. During high waters fish quite often are left stranded in bayous and ponds along the river when the water again recedes. These fish are seined out and distributed in the streams and small rivers of the state and provide sportsmen with good fishing. Last year over two thousand large bullheads thus rescued were brought to the vicinity of Klemme and turned loose in the Iowa river.

ON THE HOME FRONT with RUTH WYETH SPEARS

MANY women who have learned to sew for the Red Cross are also sewing for themselves. They are thinking of sewing as a craft and taking pride in their work. Many who do not have space for a sewing room are planning efficient closets to house equipment. Here is a model sewing cupboard from my new book *Better Dress*

making. There have been many requests for dimensions and here they are.

The cupboard is six and one-half feet high; four feet wide and twenty inches deep. The dress form compartment is five feet six inches high and twenty-four inches wide. The ironing board compartment is four feet ten inches high and eight inches wide. This leaves ample space for shelves for the presser cushions shown at the top; the sleeve board; iron; water pan and sponge; stout slide-in boxes for findings; notions and patterns; and a lower shelf for fabrics. The construction throughout is of half inch plywood.

NOTE: If you are in need of closets and storage space you will find directions in BOOK 7 for a linen closet built into waste space. Also in BOOK 7 there are directions for making pockets to use every inch of space in your clothes closets. Booklets are 15 cents each. Send requests for booklets to:

HOUSEHOLD MEMOS

by Lynn Chambers

One Whole Chicken Can Be Made Into Two Meals

You're the clever homemaker who saves on chicken by using only half a chicken for roasting. You can have the stuffing, too, by mounding it under the chicken when you roast it in the pan to get all the wonderful flavor of the meat in it.

Most families are so reduced that few homemakers find it necessary to stew or roast a whole chicken for their meals. Instead, it's much smarter to use one half of the chicken for stewing, the other half for roasting, or perhaps in making numerous and delicious dishes using cut up chicken.

Chicken is a good source of protein and we can use it in place of meat dishes regularly. In addition it's a delicious food that combines well with many other types of food, and goes with most vegetables and fruits in the menu.

Consider, for example, many of the chicken salads which can be made up with fruits or vegetables, and for sandwich fillings. Then, too, you can serve chicken either warm or cold with many vegetables and fruits, as a good start on getting what you need of the seven basic food groups necessary to health.

You probably have your own way of stewing and roasting chicken, but instead of using one whole chicken for either of these methods, split it, use one half for stewing, the other for roasting.

Cut the fowl in half, lengthwise, and cook one half with several carrots, celery, parsley, onion, and seasonings in enough water to cover until tender. Make dumplings, if you like, to go with the stew.

For roast chicken, cook stewing then split in half lengthwise until tender. Mound 4 to 6 cups of well-seasoned dressing in bottom of shallow pan, well greased where dressing is placed. Arrange dressing to keep outline of chicken. Press cooked half of chicken cut side down over dressing. Brush chicken with melted fat. Bake uncovered in a hot oven (400 degrees) until chicken is nicely browned, about 1/2 hour.

A few leftover pieces of chicken either from the roast or from stewing can go into a salad. You'll like this combination with fruit:

Chicken and Fruit Salad Bowl.

(Serves 4 to 6)

- 1 cup diced chicken
- 1/2 teaspoon salt
- 1/2 cups seedless grapes
- 2 oranges, peeled and sectioned
- 1/2 cup blanched almonds
- French dressing

Add salt to chicken. Cover salad bowl with shredded lettuce. Arrange grapes over half of top, oranges over other half. Pass french dressing.

Still another way of stretching your meat, or chicken, if there is absolutely enough to go around is to serve it with potato salad. You may like it hot or you may like it cold. Here's one that's hot:

Lynn Says:

The Score Card: Ceiling prices have been announced on many rationed foods, and it's a good idea to consult the lists when you go shopping. It will help you in buying and budgeting.

Most of the times we're concerned with buying foods in season, but it's more important to buy in season now when you're preparing to put up foods for the fall and winter.

In case you don't have your own garden, you might be of help in picking vegetables and fruits to some farmer who does not have enough help. If you are canning, this is a splendid way of getting fresh produce.

Those of you city dwellers who can neither have your own Victory garden or help pick produce should get to the market early to get as fresh produce as possible.

Lynn Chambers' Point-Saving Menus

- *Roast Half of Chicken
- Bread Stuffing
- Fresh Asparagus
- Parsleyed Potatoes
- Lettuce-Watercress Salad
- Strawberry Shortcake
- Iced Drink
- *Recipe Given

Hot Potato Salad.

(Serves 6)

- 6 potatoes, diced
- 3 slices bacon
- 1 teaspoon salt
- 1/4 teaspoon pepper
- 3 tablespoons chopped parsley
- 3 tablespoons chopped onion
- 6 tablespoons bacon fat
- 3 tablespoons vinegar

Cook potatoes in jackets until tender. Peel and dice. Cook bacon over low flame until crisp. Remove from pan and break into small pieces and add to hot potato cubes. Add seasoning, parsley and onion. Combine fat and vinegar. Pour over potato mixture and serve hot.

There are still a number of unrationed foods which may fill in nice gaps in menu-making. For example, cottage cheese is an excellent source of both calcium and protein, and you'll enjoy using it in this salad with summer greens.

Cottage Cheese Salad.

(Serves 4 to 5)

- 2 cups cottage cheese
 - 1/4 cup sour cream
 - 1/4 cup chopped chives
 - 1 cucumber diced
 - 1 tablespoon chopped watercress
 - 1 1/2 teaspoons salt
 - 1/2 teaspoon pepper
 - 2 hard-cooked eggs, chopped
- Mix cottage cheese and sour cream lightly with a fork. Add vegetables and diced eggs, and season with salt and pepper. Serve in mounds, garnished with watercress or lettuce and tomato wedges.

Here's the way to stew chicken and bring out all its delicious flavor. Simmer gently until tender in seasoned water with onion, carrot, parsley and salt.

Cottage Cheese Salad Mold.

(Serves 8 to 10)

- 3 cups cottage cheese
- 1 cup crushed pineapple, drained
- 5 tablespoons mayonnaise
- 1 teaspoon salt
- 1/4 teaspoon mustard
- Dash of cayenne
- 2 tablespoons lemon juice
- 1 1/2 tablespoons unflavored gelatin
- 1 cup pineapple juice

Mix cheese, pineapple and mayonnaise. Mix salt, mustard, cayenne and lemon juice; add to cheese and mix lightly. Soften gelatin in pineapple juice and dissolve over hot water. Stir carefully into the cheese mixture. Turn into mold and chill until firm.

A cool, delectable dessert that does not consume points and takes it easy on the sugar is this:

Frozen Apricot Shortcake.

(Serves 6)

- 1 cup dried apricots
- 2 1/2 cups water
- 1/2 cup sugar
- 1/4 teaspoon salt
- 1 teaspoon unflavored gelatin
- 1 tablespoon cold water
- 1 teaspoon vanilla
- 1 egg, beaten
- 1 cup heavy cream, whipped
- Sponge cake

Cook apricots until tender, about 25 minutes. Add 1/2 of sugar and salt. Heat to boiling, remove from heat and beat to a mush. Soften gelatin in water and add to apricots. Cool. Add remaining 1/2 cup sugar and vanilla to beaten egg and beat until thick. Fold in whipped cream. Arrange layer of sponge cake cut about 1/4 inch thick on bottom of refrigerator tray. Spread with apricots and cover with whipped mixture. Freeze. Cut in squares and serve cream side up.

Are you having difficulties planning meals with points? Stretching your meats? Lynn Chambers can give you help if you write her, enclosing a stamped, self-addressed envelope for your reply, in care of Western Newspaper Union, 210 her at Western Newspaper Union, 210 South Desplaines Street, Chicago, Illinois. Released by Western Newspaper Union.

Miracle on Farm Front To Meet New Food Goal

Conservation Farming Proving to Be Godsend

Total war requires total production. This is as true of essential crops as it is of armaments, and the miraculous achievements of factories are being matched by miraculous production on the farms of America to meet greater food goals.

The big objective of World War I was, as today, to win the war, and all efforts were toward increased food production on American farms. However, the methods being used today differ from the methods used then, because farmers have learned a bitter lesson. They helped win the last war, but many lost their farms and their livelihood in the aftermath.

From earliest days there has been a mistaken idea that increased production meant a natural increase in soil ruined. There were a few progressive farmers who raised their voices early for action against soil erosion but their attempts were futile. As long as there appeared to be that inexhaustible supply of new land just beyond the western horizon, men preferred to leave the ruined land behind them, and to exploit new frontiers.

World War I created a sudden and abnormal demand for more food, with the emphasis on wheat. Agriculture's answer was increased food production through increased acreage. Wheat alone jumped from 47 to 74 million acres during and immediately following the war era. The increased acreage resulted from a big "plow-up" of land which in

Keep Machinery Going

Shirley Perry hammers out the prongs of a manure spreader while Gail Daily tightens the bolt on a wheel. These girls are taking a farm course so they can do their bit on the food line while many a farm hand is doing his bit at the front.

turn brought about the big "blow-up" from the dust bowl about 10 years ago.

When the black fog of dust winged its way across the sky and darkened eastern cities as far as the Atlantic seaboard, America realized that something drastically wrong had happened to its agriculture. Then the time was ripe, although late in the battle against soil erosion, for conservation farming to get its start. Adapting and improving the techniques of the early soil erosion pioneers, the work of the Soil Conservation service and the AAA has proved a Godsend to the United Nations in the present crisis. Because land is the farmer's chief business asset and because land is indispensable to the national welfare, the national farm program includes conservation as one of its objectives.

Curculio Threatens 1943 Peach Crop

Peaches are in grave danger of being destroyed by the curculio, if prompt and decisive control measures are not taken, says Dr. Clyde F. Smith, associate entomologist of the state experiment station at North Carolina State college.

He reports that about ten times as many beetles are being found this year as compared with 1942 and that growers will have more wormy peaches at harvest time unless they use every possible means of controlling the curculio.

Dr. Smith makes four suggestions for controlling the beetles and he says that all four methods should be used. First, collect and destroy as many adult curculios as possible by jarring the trees. Second, follow a proper spray program. Third, pick up and destroy all drops. Fourth, cultivate under the spread of the trees, as soon as wormy peaches cease to drop.

Farm Notes

When young pigs are old enough they should be pastured on clean ground—pastures which have been freed of worms and disease organisms by plowing.

Most farms have more than one type of soil which, with a rearrangement of field boundaries, could grow hay or pasture crops more efficiently than they do at present.

PATTERNS SEWING CIRCLE

8371
1-6 yrs.

Real Charmer.

PANTIES to match—as if Miss Sweetie-Pie wouldn't take the cake in pinafore and open crown bonnet alone!

Pattern No. 8371 is in sizes 1, 2, 3, 4, 5 and 6 years. Size 2 pinafore and bonnet take 1 3/4 yards 35-inch material, panties, 3/4 yard. 3 yards ric-rac.

Long Trousers Adopted During French Revolution

Wartime services of many kinds undertaken by women account for the fact that there are more wearing trousers today than ever before.

It was during a period of great national stress that men adopted the fashion of wearing long trousers.

Before the days of the French Revolution well-dressed men favored knee breeches, while the poorer people wore blue linen pantaloons. When the French monarchy fell, anyone whose dress suggested that he might be an aristocrat went in danger of his life. Consequently, men of all classes began to wear long trousers.

England did not take kindly to the fashion when it was introduced to that country by the prince regent. Even the duke of Wellington was refused admission to a reception in London because he was wearing long trousers.

ASK ME ? ANOTHER ?

A quiz with answers offering information on various subjects

The Questions

1. What is a dactylogram?
2. Who wrote: "The old order changed, yielding place to new"?
3. What two cities are the terminals of the Lincoln highway?
4. A pentad represents how many years?
5. What is a pseudonym? An autonym?
6. Why was William H. Harrison nicknamed "Tippecanoe"?
7. PT boats are known as the navy's deadliest vessels. Where did they get the name?
8. Of what substance is glass principally made?

The Answers

1. A fingerprint record.
2. Alfred Tennyson.
3. New York and San Francisco.
4. Five years.
5. Pseudonym is an assumed name; autonym is a person's real name.
6. Because of his defeat of the Indians near the Tippecanoe river.
7. From "patrol torpedo" boats.
8. Sand.

Roster of Specialists

TASTY, NO-SUGAR ALL-BRAN MUFFINS ARE EASILY MADE!

Serve your family these delicious muffins soon! Their tempting texture and flavor come from crisp, delicious KELLOGG'S ALL-BRAN. Here's the recipe in a wartime version, using no sugar. Try ALL-BRAN Muffins for breakfast tomorrow!

Kellogg's All-Bran Muffins

- 2 tablespoons shortening
- 1/4 cup corn syrup
- 1 egg
- 1 cup Kellogg's All-Bran
- 1/4 cup milk
- 1 cup flour
- 1/2 teaspoon salt
- 2 1/2 teaspoons baking powder

Cream shortening and corn syrup thoroughly, add egg and beat well. Stir in All-Bran and milk, let soak until most of moisture is taken up. Sift flour with salt and baking powder; add to first mixture and stir only until flour disappears. Fill greased muffin pans two-thirds full and bake in moderately hot oven (400° F.) about 30 minutes. Yield: 8 large muffins, 3 inches in diameter, or 12 small muffins, 2 1/4 inches in diameter.

HANCOCK COUNTY MUST BUY
MORE BONDS
Hancock County folks must buy more bonds this year or we will fall short of the quota. To date the county has pledged is 84 per cent of the quota but the towns have exceeded the quota but the township is short. However, if last year's record is a barometer, we will buy more than last year's bonds in the fall. The county's share of their crops is \$44,930.15 against the quota of \$20,600.00. The county's quota is \$1,306,600.00. The amount \$991,947.50 has been pledged to date. The township's in the county is the only one that is up to date. The township's was \$91,300.00 and the county's is \$92,061.50.

ELL, with a quota of \$84,000.00, has subscribed \$72,675.00. Liberty with a quota of \$86,400.00 has subscribed \$74,200.00. Avery with a quota of \$73,300.00 has subscribed \$52,677.50 and Concord with a quota of \$87,700.00 has raised \$59,416.25. Klemme's quota was \$21,500.00. The people here subscribed a total of \$26,322.50. Hayfield is the only town in the county that fell short and that by a small amount. All other towns in the county are well over the top.

LOTS OF TWINS AT THE WM LEMKE FARM

You may think you are seeing double at the Wm Lemke farm in Liberty township but you are not. Chances are that you are gazing at a pair of twins. Lemke's cattle seem to go in for mass production and in the past five or six years there have been ten pairs of twin calves born at the farm. Most recent addition to the nice herd of Brown Swiss cattle at the Lemke farm was a pair of Brown Swiss heifer calves born Monday. Mrs Lemke states that the latest double feature is the best of the ten pairs, as the latest twins are real beauties! The largest number of twins to arrive were four pairs in one year.

CLAMPING DOWN ON GAS RATION VIOLATORS

This writer interviewed one of our county rationing board officials the other day and he informed us that the authorities were really going to clamp down on gas ration violators in cooperation with a nation-wide drive to curb unnecessary speeding and misuse of gasoline. Already violators are being picked up in the county on violations. Fines are imposed and gas ration books are taken away from the violators. Second offenders will be dealt with severely and they may lose not only their gas ration books but may be forced to put their car in storage for the duration. Better watch your step and obey the rules of driving.

IT'S A HARD LIFE IF YOU DON'T WEAKEN

Ole Ramsay and Art Kudjc, both

ardent golfing fans, decided to try out their luck at fishing and may-be put the golf clubs away for the duration. They spent an evening at Clear Lake and the only bites they got were mosquito bites. No luck! They decided fishing was not in their bag of tricks, so they took up golfing again and went to the Forest City course to play their favorite game of cow-pasture billiards. But, they fared not much better on the course than they did fishing at the Lake and the best did could do was lose five valuable golf balls! We advise them to take up croquet or knitting for the duration.

Late cabbage plants should be set out in the garden immediately. Late varieties such as Wisconsin All-Seasons are excellent to store for winter use. Cucumbers may be planted up to the last of June.

After peas, spinach and other quick maturing vegetables have been harvested, keep that area in production. The first of the plantings in summer gardens should begin July 1.

Most families are planning to store considerable surplus products from their gardens this fall. The family of four members will require from 2 to 3 bushels of carrots and 1 to 2 bushels of beets. Carrots and beets should be planted the first week in July in Northern Iowa and the second week in July in Southern Iowa. Use the seed you saved from your spring garden for the summer plantings. Spring planted beets and carrots should be used while they are young and tender and before hot weather sets in.

All vegetable seed should be conserved to avoid waste. Many gardeners bought much more seed of some vegetables than they needed. Excess seed should be stored carefully in airtight containers such as glass jars. Seeds stay fresh longer if stored in a cool, dry place. Most vegetable seeds handled in this way may be used in planting next year's garden.

Use of the Victory Garden fertilizer will be helpful in producing better vegetables. Two small handfuls may be dissolved in a gallon of water and used at the base of tomatoes and other plants. The soil should be moist before the application. The fertilizer may be applied dry by giving a light sprinkling along each side of the row and scratching it into the soil. Keep several inches from the stem of the plant. Any fertilizer accidentally applied to the leaves must be washed off to avoid burning.

It is wise to give tomatoes some form of support in home gardens, particularly in wet years. Various sorts of trellises can be devised as supports. Tomatoes should not be pruned unless a few early fruits are desired for table use. Pruned tomatoes do not produce nearly as many fruits as vines allowed to grow naturally. Some gardeners believe that staked and pruned tomatoes, since they can be planted one-half the distance apart of unstaked ones, will yield as much fruit. Experiments prove that this supposition is not true.

It is not wise to work in the beans as long as moisture is on the foliage. Disease is spread very easily, wait until the leaves are dry.

KLEMME REFORMED CHURCH Calvin Grosshuesch, Pastor

HANCOCK COUNTY D. H. I. A. HAS BRANCH AT KANAWHA

A unit has been added to the Hancock County Dairy Improvement Association at Kanawha. Arthur Nelson has been hired to test ten or twelve herds around Kanawha. If a tester can be secured for the county association all of the reports will be from one association. The officers elected Tuesday evening were: Clarence Trenary, as president; Floyd Friedow, as vice-president and Claude Huling, secretary-treasurer. Arthur Nelson has just returned from Ames where he received instruction and training from Iowa State College Extension dairymen.

ELECTRIC COMPANY
GARNER, IOWA

Folks, meet Bud. He's American. He's tough. That shiner on his left eye—the one calling for about forty points worth of porterhouse—to him is just an invitation to get tougher.

But there's nothing mean about Bud. A favorite with everybody in his block, he fights only when somebody starts pushing him around. He's tough in spirit and fiber. That's typically American. A shiner was hung on our national left eye late in 1941—and just look what our boys are doing about it now because they're tough. Fitted by planning and training they're mastering the toughest job in the world!

Planning and training fitted American railroads for war. They have that spirit and fiber, too. That's why they are able to handle the toughest transportation job in history. They need a lot more equipment, but the fighting fronts have first call, so the railroads—being American—buckle down and make the best possible use of what they have.

Planning, however, must go on. And a financial backlog must be accumulated for carrying out those plans when Victory has been won. That's when ROCK ISLAND'S Program of Planned Progress will resume its forward march; will meet the increased transportation demands of peacetime tomorrow—and provide jobs for thousands of American boys as they step out of uniform.

As yesterday—and today—so tomorrow ROCK ISLAND'S sole purpose is to provide the finest in transportation.

WEEKLY NEWS ANALYSIS

French Unity Speeds Victory Plans; Mediterranean Under Heavy Attack by Allied Naval and Air Concentrations; Chinese Crush Jap Yangtze Offensive

(EDITOR'S NOTE: When opinions are expressed in these columns they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)
Released by Western Newspaper Union

Gen. Henry H. Arnold, chief of the U. S. army air force, delivers a diploma to his son, Cadet William Bruce Arnold, a member of the 1943 graduating class at the United States Military academy at West Point.

FRENCH UNITY:

Worth Waiting for

Although General Giraud and General DeGaulle at first could not agree any better at close range in Algiers than they had at long range between Africa and London, Allied leaders were confident that factional gulfs would be hurdled and long-hoped-for French unity would be consummated.

This optimistic view was justified when a "French committee of national liberation," headed jointly by Generals De Gaulle and Giraud, was formally established to "pursue the war at the side of the Allies until total victory over the enemy powers."

Comprising a seven-man group which eventually will be expanded to nine, the new liberation committee will direct the French war effort until France is freed and able to elect its own government. In addition to the co-presidents, Giraud and De Gaulle, the committee includes Gen. Alphonse George and Jean Monnet, named by Giraud, Rene Massigli and Andre Philip, appointed by De Gaulle, and Gen. Georges Catroux, designated by both presidents.

That the new committee meant business was immediately apparent by personnel replacements that eliminated French-African officials with former Vichy ties.

COAL:

WLB Sustained

When President Roosevelt, acting as commander-in-chief, tersely ordered the 500,000 striking mine workers back to work after a 30-day truce had been ended by another walkout, he had left the next move squarely up to mine union chief John L. Lewis.

In his brief statement the President did not consider the possibility that his order might be ignored. But measures of a stern and effective nature were open to him and the force of public opinion was marshaled overwhelmingly behind him—in the event of continued mine work stoppage.

The President's order had completely supported the War Labor board which Mr. Lewis and his United Mine Workers had defied, setting forth plainly that "Just as soon as the miners return to work, the disposition of the dispute . . . will forthwith proceed under the jurisdiction of the War Labor board."

ARGENTINA:

Neutrality at Stake?

While close censorship had veiled early reports of the "military movement" in Argentina, observers were confident that it concerned the course of the nation's future international policy—whether the government would pursue its trend of benevolent neutrality toward the Axis, or would follow the rest of South America in breaking with the Axis.

The military reaction gained added significance, coming as it did on the eve of the Conservative party's national convention preceding the Presidential elections. For this convention had been scheduled to proclaim Senate President Robustiano Patron Costas as its candidate. Costas had been endorsed by "neutrality-minded" President Ramon Castillo.

RUSSIA:

Nazis Try Air

The question, "Where is the German air force?" received at least a partial answer when Moscow announced that 500 Nazi planes had raided the important Russian position of Kursk, 120 miles above Kharkov. The Soviet communique reported that 123 of the raiders had been shot down, as against a loss of 30 Red planes.

Termining the battle as one of the greatest air actions of the war, the Russians disclosed that the effectiveness of their anti-aircraft defenses caused the Germans to jettison their bombs, thus missing military objectives but causing civilian casualties.

Meanwhile, a German report announced further Russian offensives in the Kuban valley of the Caucasus. The Nazis said that five Red tank brigades and several infantry divisions had launched a new drive northeast of Novorossisk, last remaining German stronghold in the Caucasus.

The struggle in the Kuban valley, however, was but one phase of operations from the Caucasus to the Arctic sea that might well determine the war's outcome this summer.

PAY-AS-YOU-GO:

July 1 Deadline

After five months of congressional wrangling the pay-as-you-go income tax bill sped through the senate after passage by the house.

Meanwhile treasury officials had organized the machinery to start the collection-at-the-source system that will take 20 per cent above personal exemptions of each paycheck of 40,000,000 American workers beginning July 1.

Representing a compromise between Democrats and Republicans, the legislation promises an increase in individual income tax revenue to about \$16,000,000,000 in the new fiscal year beginning July 1. Under the bill's provisions, all of 1942 taxes of \$50 are forgiven and a reduction of 75 per cent on the remainder over \$50 is allowed.

AIR POWER:

U. S. Pounds Japs

On widely separated fronts from the Aleutians to Burma, the Japs felt the increasing force of Allied air power.

With the campaign for Attu now a matter of history, American airmen concentrated their attention on Kiska, the main Japanese base in the Aleutians. The navy department reported that planes continued to bomb and strafe the hard-pressed Jap positions.

In New Guinea Flying Fortress and Liberator bombers gave the key Jap air base located at WeWak, a series of heavy raids, dropping incendiaries and explosives on four fields which form part of the WeWak system of airdromes. The Japs retaliated by sending bombers to raid targets in the upper Lake-kamu river, 35 miles southwest of Allied-held Wau.

In Burma, American airmen struck at enemy supply lines between Burma and China, dropping 12,000 pounds of bombs on the important Shweli suspension bridge northeast of Mandalay and attacking railroad installations.

POSTWAR PLENTY:

Food Parley Pledge

Collaboration of 44 United Nations countries in building a post-war world of plenty was pledged by delegates attending the United Nations food conference in Hot Springs, Virginia.

The machinery for achieving this goal of plenty would be an international organization, the delegates indicated at the conference's closing sessions. This organization would take the form of a permanent world agricultural authority.

Agreement of the delegates to promote the creation of this international agency was hailed as the conference's most significant accomplishment. Undersecretary of Agriculture Paul H. Appleby, vice chairman of the United States delegation declared the conference had been "highly successful."

BEEF:

Point Values Upped

Dwindling supplies of beef were cited by the Office of Price Administration as the reason for a boost in ration point values.

Beef-eaters found that point values on steak cuts such as porterhouse, sirloin or T-bone were up three points. Roasts were up an average of two points, while the largest single increase was on dried beef, which zoomed four points, or from 12 to 16 points a pound.

Housewives were given consolation in the announcement that decreases in many cuts of veal, lamb and mutton, pork and variety meats would make it possible for them to substitute these items.

WAR BONDS:

Machinery Overhauled

Secretary of the Treasury Henry Morgenthau announced the merger of the victory fund committee and the war savings staff into a single organization to be called "the war finance committee."

The new group will handle all future war financing drives, Mr. Morgenthau said. The war finance committee will be set up on state lines and operate under state chairmen who will report directly to the treasury, he added.

Washington, D. C.

BRITISH-INDIA PROBLEM

It will probably be denied, but the inside fact is that U. S. Ambassador Bill Phillips came back from India with a blunt, in spots bitter, report against the British.

He felt that the United States should do something about the festering Indian political situation, that the Indian army and people could not be a force in the war until the question was cleaned up. Also he was straight-from-the-shoulder in his criticism of Field Marshal Wavell whom he feels is not suited for the job and should be removed.

Phillips not only gave this report to the President but he also had a conference with Winston Churchill. Ambassador Phillips' report is most significant, because he has been pro-British, served as minister to Canada, has been a consistent believer that our policy must go hand-in-hand with the British. Phillips is mild, not addicted to crusading, but a thorough, conscientious diplomat, reporting what he believes to be the facts.

Among other things, Phillips reported that mediation between different Indian factions and the British government was possible now; also desirable. He feels that if some such move is not undertaken now, he should not go back to India, nor should any other U. S. ambassador, since the presence of an American envoy would be taken as the stamp of U. S. approval for British policy.

What the President said to Churchill on the Indian problem is his secret. But it is known that Roosevelt has hoped for a year that the British would do something about India. However, he also feels very strongly that the United States should not interfere in Britain's colonial problems.

Meanwhile, the British, with an army large enough to handle any problem inside India, seem content merely to sit on the lid—despite American pleas that the Burma road must be reopened and despite the fact that Indian troops will not fight the Japs wholeheartedly unless they have a small investment in the Four Freedoms for which they are supposed to fight.

WOMAN WATCHES ARMY COOKS

Miss Mary I. Barber, Washington's first dollar-a-year woman, has now begun to bring long-needed thrift to army mess kitchens. If Miss Barber has her way, the army's 250,000 cooks will be persuaded to make soup out of the leftovers and cut down the quota for the garbage pails.

In fact, her save-left-overs idea has already gone so far that certain pig farmers near army camps are complaining that they don't get enough garbage these days.

Miss Barber was borrowed by the quartermaster corps from the Kellogg company at Battle Creek to teach tough mess sergeants, among other things, that a camp menu does not have to be arranged one week in advance, and stuck to religiously. If, for instance, a camp mess has several hundred chickens left over from Sunday dinner, they can be used on Monday, not thrown into the garbage pail.

Unfortunately, a lot of mess sergeants had been doing that, partly because the menu for Monday was already arranged. Also it is against the law for the army to sell food, nor can it be given away. It must be thrown away. This has been done in the past via garbage trucks to the highest bidding hog dealers.

Now, however, Miss Barber is helping to arrange master menus, which though they specify soup, do not name the variety. This gives the cook an option to make soup out of whatever his left-overs permit.

This all sounds simple to the average housewife, but believe it or not, it has not always been done by the army.

Another trick is to save all dripping fats from bacon or sausage, and use them in a cream sauce for cauliflower, or other vegetables.

WHITE HOUSE BLACK MARKET

The White House is having its troubles with the Black Market. The White House architect called up the Georgetown Electric company recently to buy No. 12 copper wire for rewiring a part of the Executive Mansion. But there was no copper wire to be had.

"Where can we get it?" the architect asked.

"Baltimore, on the Black Market—only it will cost you 20 cents a foot instead of seven cents."

"Well, we can't have anything to do with the Black Market," was the White House reply, and the architect went shopping elsewhere.

INDIAN MERRY-GO-ROUND

Imprisoned Mahatma Gandhi has asked the viceroy for permission to communicate with the Mohammedan leader in an effort to effect Indian unity, but the viceroy has refused.

Raj Gopal Charan, important Indian leader, has asked the viceroy for permission to see Gandhi in order to compose Indian differences. Again the viceroy has refused. Suspicion is that the British don't want Indian differences adjusted or

Late Afternoon:

A book of verse that said what we could not . . .

A sheaf of letters inked in young romance . . .

The wistful charm a two buck brownie shot . . .

A wilted flower from some forgotten dance.

These are the old, familiar souvenirs That lonely men have used to carry on,

Mementoes of the gay and fragrant years

Before the shadows lengthened on the lawn.

Thus I set out to make the sloping hill

That rises high above the teeming town,

Where dreams are dead and all the world goes still

As pilgrims watch the evening sun go down . . .

Not much, I know, to see a journey through But these are all I have and they must do.

—DON WAHN.

Things you prob'ly dudden know til now: That some years before the Declaration of Independence was signed a fellow named Appollos de Revoire changed his name to Paul Revere so that his neighbors and friends would better savvy it. It has been estimated that more than half the Smiths in the U. S. originally were Schmidts or Smeds. Many Johnsons were once Janssens. President Polk traced his name back to Pollock, while Herbert Hoover traced his to Huber.

General Pershing is the descendant of one Pershin, who changed his name from Pforsching. General Custer was the great-grandson of a man named Koester, and Admiral Dewey's ancestors were named Duce. Charlie Lindbergh's grandfather was born Mannson; and if you want to make something out of name-changing try changing the fact that America came from the name Amerigo.

Collier's runs what it believes is a scoop on the until recently hush-hush subject of Radar.

One columnist got into lots of hot water for simply mentioning the word.

Mechanix Illustrated ran a detailed technical story (complete with drawings and diagrams) of how this secret war weapon works—in its January, 1942, number. The title of the article was "Now Power Is Broadcast," and Thomas J. Naughton auth'd.

Shortly after, the Satevepost ran a piece on Radar describing it thoroughly. But all the while there was strict censorship in the United States. Censorship, despite the fact that when the Graf Spee was scuttled off the coast of S. America there was Radar equipment on the mas'. And it was Radar that caused the great casualties at Dieppe. The enemy had it all the time. But it was against the law over here to mention it.

To make faces redder—as early as 1932 the principles of Radar were written up at length in German scientific magazines.

Congressmen have been urging Americans to make sacrifices. And they have scolded John L. Lewis because he hasn't made any. But the news is that because the Senate dining room didn't have bean soup on the bill of fare (because of the food shortage) 25 Senators left their tables in a huff.

Can you imagine the cause celebre the Senate would make out of that if Mrs. Roosevelt or Mrs. Harry Hopkins did that?

The N. Y. Sun editorial page offered this fond farewell to Admiral Yamamoto who is said to have led the sneak attack on Pearl Harbor: ". . . A hard, tough graduate of a hard, tough school. Yamamoto was a fighting man, every inch of him. He knew his job thoroughly and did it well."

The inventor of one of our most highly rated airplane engines was lunched with a Congressman in Washington. The legislator asked him if he didn't consider it unfair that whenever we enjoyed a big victory in the air, the credit always went to the fliers who used his engines, instead of to him.

"Not at all," replied the inventor, "who ever heard the name of Paul Revere's horse?"

The decision of the Kremlin to disenfranchise the overseas Commy groups is just a bit embarrassing to the American comrades.

Kinda takes official recognition of them as nuisances.

Eddie Doherty, one of the better newspaper men, who is now writing the story of the Sullivan Boys (who died in battle), has his favorite news story lead. It was written, he says, by Jack Lawson for the old Chi. Record-Herald.

Mark Twain had passed on, and the obit notice was assigned to Lawson, who led off with: "Tom Sawyer and Huckleberry Finn are Orphans."

If the Nazi air force has a song it probably is: "Don't get around much any more."

Watch Your Kidneys

Help Them Cleanse the Body of Harmful Waste

Your kidneys are constantly cleansing your blood. If they fail, waste matter from the blood enters your system. This causes all kinds of ailments. Doan's Backache Kidney Pills are the best remedy for all kidney troubles. They are gentle, safe, and effective. They have a nation-wide reputation. They are recommended by the best doctors in the country over. Ask your neighbor.

DOAN'S PILL

HIGHLIGHTS . . . in the week's news

BONDS: The average American family should invest 25 cents of every dollar of income in war bonds, Secretary of the Treasury Morgenthau declared.

COAL: Stocks of all anthracite coal in Canada were ordered frozen according to an order issued by J. McG. Stewart, coal controller of the war munitions department.

DRAFT CROP: The draft called Sherman Jenkins' sons one at a time until it took all 12, the Clarksdale, Miss., farmer disclosed. The boys range in age from 19 to 39.

PRIVATES: Seventy-two oil industry executives donned fatigue outfits and spent a day living with soldiers at Fort Belvoir, Va., who are fighting a war powered by oil.

The World of Tomorrow—Action in the Air, in Construction and in Industry

Draw Plans to Lick Depression After War Is Won; Predict Demand for Goods Will Keep Nation Busy for Many Years

Chemurgy Provides Broad Uses for Many Farm Crops; Need for Building Will Be Great; Expansion in Aviation Transportation Is Foreseen.

By A. F. JEDLICKA

While the war rages and war production takes up the interest of the country, there doesn't seem to be time for anything else.

But as unsuspected as it might be, there is a great amount of study being made about solutions to the vast problems that will arise after the peace has been won.

Millions of soldiers and sailors will be returning from the far flung fronts; munitions and armament no longer will be needed in mass quantities, and millions of workers will have to be switched back to normal industry; and, pending the final disposition of lend-lease, and full development of our own domestic market, the huge production program of the farmer will have its complications.

With all these things bound to come up, it is obvious that any studies leading toward the formulation of plans to solve these problems, will be of service in averting any hardships and confusion that might grow from them. Memories of the economic disorganization that followed the last war, both in the cities and on the farms, still are live enough to spur the present planners, such as the department of agriculture, the U. S. Chamber of Commerce and the National Foreign Trade Council.

All told, more than 137 important government and private agencies are engaged in post-war economic studies. This number does not include many state and local groups. New discoveries and methods developed from war production; the tremendous demand for all kinds of consumers' goods upon which manufacture has been stopped, and the new crops and many uses for old staples that have been found—all of these things are on the asset side of a promising post-war prosperity.

Surely, we will suffer from no lack of labor; in fact, profitable employment of all of our labor will be the big problem. From present indications, we will be the most fortunate of all of the nations of the world, since most of our factories and equipment will emerge unscathed from the war. No matter what kind of a monetary system we adopt, our credit facilities should be limited by a need for money, and not by any scarcity of it.

As the president of the United States Chamber of Commerce so optimistically declared, we are facing new horizons, in which the guarantee of economic as well as political freedom will open vast productive fields.

Chemurgy Should Aid Farmer. Of all, the farmer stands to profit the most after the war as a result of the advancement of science. Chemurgy is the new miracle which has taken the old crops apart to discover their essential substance, and then applied the specific properties to the manufacture of many new products.

Chemurgy has been active in developing plastics. According to a survey, a composite 1942 automobile has more than 125 plastic parts, and airplanes have anywhere from scores to hundreds of plastic applications.

Plastics on the automobile include upholstery buttons, steering wheels, accelerator pedals and interlayers of laminated safety glass. Plastics in the airplane range from grease and oil resistant tubing to handles, cabs, sight gauges, lenses and radio antennae.

Besides chemurgic uses which have been found for the old crops, the scientist has gone into the fields to find useful properties in such former waste growth as cattails, milkweed and dandelions. These amazing discoveries have opened possibilities for putting formerly unproductive submarginal lands to good use.

The loss of many of our former sources of supply for medicinal herbs, vegetable oils and fibers has stimulated their cultivation in this country, where, indeed, they grew successfully many years ago before being produced in Asia at much less cost. Continuation of the growth here of belladonna, castor beans and hemp, for instance, is a question which eventually will fall completely within the political realm.

Expect Building Boom.

Next to agriculture, building holds the greatest immediate promise. In fact, much of our post-war planning seems to be revolving around the construction industry. As a part of it, the timber trade figures prominently on new mass-production processes for fabricating sections of buildings and shipping them to a site for assembly.

It has been estimated that the United States needs 900,000 new buildings every year—500,000 for new families, and the rest to replace old structures.

Considering the fact that practically all residential building has been stopped by the war, the construction industry will be faced with a gigantic job of meeting the accumulated demands when peace comes.

Because of circumstances arising from the war, the timber industry has received an important push that will stand it in good stead later. Since most shipyards, arms and munitions factories demanded all of the steel that was being produced, it was necessary to revert to the use of wood in constructing many new factories, etc.

Because the wood had to meet specifications in strength and safety, lumbermen developed processes for treating the timber against loads, decay and fire. As a result, wood is expected to be used in increasing quantities in ordinary building.

Besides the tremendous demand expected for private construction after the war, it is reported that the government has been studying plans for an extensive public works building program. Such a program, as old as Caesar, would take up any slack in employment, particularly in the passage from a war to a peace economy.

In connection with the anticipated post-war building activity, the American Institute of Architects, the American Planning and Civic Association and the Conference Committee on Urban Problems have been particularly concerned with the reconstruction of many of the run-down districts of the big cities. With recent years, many private corporations have been seeking charters from legislatures for rights to redevelop many slum areas with huge housing projects.

May Expand Air Travel. Of course, the tremendous expansion of aviation because of the war has led to the popular belief that the impetus it is receiving now will carry it into the post-war period as the biggest industrial development.

If we are to consider the opinion of many aviation executives themselves, the airplane will pay a prominent, but hardly a predominating role after the war. Costs of shipping freight by both train and boat still will remain much cheaper than air rates, and as a result the plane may be used on an increasing scale, but for special purposes. It should carry most of the mail.

It is in the field of transportation that the airplane promises to enjoy its greatest expansion. Already, there has been substantial talk about the creation of branch lines to hook up with main trunks, thus establishing direct connections with all points. Larger, more comfortable and faster planes should come out of the busy research laboratories now concentrating on production of the best bombing, transport and cargo airships in the world.

Automobile executives already have warned the people not to expect drastic revisions in models after the war. Cars of the immediate future will not be much different than those that were being manufactured at the time all of the plants shifted over completely to war production. The reason styles will not change much, automobile executives say, is because factories are stocked with tools for production along recent lines.

With money in their pockets, people will raise a clamor for many items whose manufacture has been discontinued because of the war. Wash machines, vacuum cleaners, refrigerators, stokers and oil burners, buggies, etc., all will be in demand, and if sufficient purchasing power is available, the problem will be one of production.

New Products.

Among the more colorful products predicted for the future, are gasoline for automobiles yielding 40 miles to the gallon, and nylon cord tires of unparalleled strength.

Eye dropper quantities of lead tetraethyl added to a gallon of gasoline will convert it into high-octane fuel necessary for airplanes. It is this new and more powerful fuel which heralds performances of 400 miles an hour for civilian transport planes, and promises 40 miles per gallon for automobiles after the war.

Due in large part to chemical products developed for use in processing and vulcanizing rubber, tires of the future are expected to possess longer life. Cords of rayon and nylon, along with special carbon blacks for increasing toughness and anti-oxidants for retarding the deterioration of rubber, are among the new developments.

So much for the U.S.A. Looking around us, we see numerous changes in the world, many of which are bound to have their economic effects after the war.

As an example, we need not go any further than South America. First of all, many of our good neighbors to the south are accumulating large amounts of dollar exchange, that is, American money, which will be spent or invested here or abroad when conditions permit.

Further, many of these countries have substantially reduced their debt to foreign countries.

Pollination Still Is Bees' Biggest Job The greatest contribution of honey bees to our wartime production is in pollination of agricultural crops for production of seed and food, though the importance of both honey and beeswax has also increased.

Domestic honeybees pollinate most of the wild insects are seldom numerous enough to accomplish this early spring job. In areas where most of the land is cultivated, and insects have few places left for

nesting and breeding, and the pollination of most other crop plants also depends on the domestic bees.

With the present urgent need for greater production of legume and other seeds, honey bees may have to be brought into the seed production for assurance of good producing areas for seed in well with crops. Beekeeping fits in well with crop production, as the fields of clover, alfalfa, and other crops furnish bees with food and with nectar for making honey.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

By HAROLD L. LUNDQUIST, D. D.
Of The Moody Bible Institute, Chicago.
(Released by Western Newspaper Union)

Lesson for July 4

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education, used by permission.

A PEOPLE IN DISTRESS

LESSON TEXT—Exodus 1:6-14, 2:23-25.
GOLDEN TEXT—They cried, and their cry came up unto God by reason of the bondage.—Exodus 2:23.

Today is Independence Day. Yet much of the world is in bondage, and the rest of it in a struggle to prevent freedom from perishing from the earth.

Our lesson too is about a nation in bondage, but we learn from it that there is a way to be free. Even so we declare the way of personal liberty which is open and free.

The Lord Jesus Christ opened it at Calvary's tree and anyone who is still the bond slave of Satan may make this a great and glorious Independence Day by now declaring his faith in the Deliverer of our souls.

We begin today a series of lessons in the book of Exodus which reveal the high and mighty hand of God working on behalf of His people.

The family of Jacob—or, as the Bible calls them, the children of Israel—prospered in Egypt particularly as long as Joseph and the rulers who remembered him were alive. But they soon learned one of life's bitter lessons, that—

I. Prosperity Is Not Always a Blessing (1:6-11).

The Hebrews were a peaceful, law-abiding people. They were God's chosen people, and as He blessed them they prospered, and thus innocently they brought upon themselves the hatred of the suspicious Egyptians.

Prosperity is never an unmixed blessing. We as a nation know that to be true. Not only does it lead to a certain softening of the sinews, but all too often it results in a weakening of the moral fiber, which makes man easy prey to the attack of the enemy of our souls.

Is it not strange, then, that we should—even in times of all-out warfare—be so eager to chase the dollar that we are willing to neglect our children, forget church, live unnatural lives, just that we may make more and more money?

The Egyptians had, humanly speaking, reason to fear this great nation which was growing up in their midst. The new rulers did not know Joseph and had forgotten the spirit in which he had brought his family into the land. The leaders of the Egyptians therefore made plans which appealed to their brilliant leaders as politic and wise. But they reckoned without God, and the burdens and afflictions they placed on the Israelites only served to bring further blessing.

So Israel learned a lesson which our present sorry world can profit by, that—

II. Persecution Is Not Always a Burden (vv. 12-14).

The people of Israel did not appreciate it, but the bitterness of their bondage was a blessing in disguise. Note that—

1. It Kept Them Separate as a People. Affliction often serves to keep God's people separated from the world. It is doing so today.

2. It Disciplined Them and Prepared Them for the Hardships of Their Wilderness Journey. We too do well to remember that "whom the Lord loveth he chasteneth," and that if we are properly "exercised" thereby, our sorrows may yield rich fruit in our lives.

3. It Threw Them Back upon God. Many are the saints of God who have found that the fiery trial, the burden so hard to understand, or some affliction of their body, has caused them to bring their burden to the Lord. We have traveled far on the road of faith when we have reached the place where we learn that "man's extremity is God's opportunity."

They had only one place to turn. They were hemmed in on every side, but, as ever, they found that the way up no man can close. They called on their God.

III. Prayer Always Brings Deliverance (2:23-25).

Does God really know when His people suffer? Does He really care? Yes, He does. "They cried," and "God heard," and "remembered." That's all we need to know. The groaning of His people had already stirred God's gracious and tender heart. But He waited to hear their cry before He answered. Such is the law of prayer. May we not forget it. Far too often we turn to everyone and everything else, and finally, in desperation, to God. Why not turn to Him first?

Does God hear and answer prayer? Yes, but remember that real prayer is the cry of faith coming from the heart of an obedient child. God may answer other prayers, but He always answers such a prayer.

His answer may not be in accord with our opinion of what it should be, for His wisdom is infinite. He knows better than we what the answer should be. Let us trust the Judge of all the earth to do right (Gen. 18:25).

RIGHT from your scrap-bag steps this footwear! Both sandals and scuffs are entirely of rags, soles and all, and make gay, inexpensive play shoes or bedroom slippers. Use up scraps in varied colors.

Lesson Frugal Manager Taught Stuck With Driver

The works manager of a certain railway company had a reputation for meanness.

The pet bee in his bonnet was oil and waste. He was always driving home the fact that if every employee was careful with oil and cotton waste, much money would be saved.

One day he was having a few words with a very new driver.

"Tell me," he ordered, "what would you do if you were driving one day, and saw an express thundering towards you on the same line?"

The novice thought hard. Then: "I'd grab the oilcan, I'd grab the waste—and I'd jump!"

Pattern 7504 contains instructions for making slippers in small, medium and large sizes. Illustration of stitches, list of materials needed.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

Hibernating Animals

When animals are in a state of hibernation they are only a step or two from death. Their heart beat is very slow, their body temperature falls way below normal, and their breathing is not perceptible by ordinary means. If you dig up a ground squirrel in hibernation, you can shake it, pinch it, drop it on the table, even stick it with pins, and it will remain as limp as though dead. Only fairly long exposure to warmth will revive the rodent.

In the Navy a floor is a "deck," doors are "bulkheads," downstairs is "below," and a cigarette is a "Camel." At least, Camel is the favorite cigarette among Navy men, as it is among men in the Army, Marines, and Coast Guard. (Based on actual sales records from service men's stores.) And a carton of Camels is a favorite gift. Though there are now Post Office restrictions on packages to overseas Army men, you can still send Camels to soldiers in the U. S., and to men in the Navy, Marines, and Coast Guard wherever they are.—Adv.

Airplanes Were Out
The Hague conference of 1899 ruled that no aircraft should be allowed to take part in war!

★ Kellogg's Corn Flakes, alone or with fruit, supplement the nutritive elements of milk—make a natural combination that helps you stretch your precious milk supply. You need less than a glassful per serving. Vitamins, minerals, proteins, food energy—in one dish!

CHANGE IN AVERY THEATRE
PROGRAM FOR NEXT WEEK

Mr. G. T. Kuhnner, manager of the Avery Theatre at Garner, calls the attention of his patrons to a change in program on Wednesday and Thursday, June 30 and July 1. Instead of playing "Three Hearts for Julia" on those dates, the picture to be shown is "Desperate Journey" starring Errol Flynn, Nancy Coleman and Iowa's own popular Ronald Reagan, former sports announcer on WHO.

Note the Avery program for the coming week published in this issue of The Times.

Carold
Says:

• KEEP YOUR CAR IN
CLASS A-1 SHAPE!

You may have to drive it another five years. Statistics prove that cars which have been greased and serviced regularly last longest. Greasing prevents wear and friction oil changes keep moving parts working properly. So have your car oiled and greased here regularly.

ERWIN LAU HOOKED AND
LANDED 15 POUND CARP

Erwin "Oofie" Lau stepped into the heavy-weight fishermen's class when he hooked and landed a fifteen pound carp at the Iowa river west of town Sunday morning. Lau was fishing near the Stille bridge at about eight o'clock when the big fish struck his bait. The carp was caught on a cane pole and a night crawler was the bait. The carp Lau caught weighed a trifle over 15 pounds and was 30 inches long. It is probably the biggest carp ever hooked and landed from the Iowa river in this vicinity.

Although the fish was large, it did not put up much fight and was easily landed.

KLEMME BUSINESS PLACES
WILL BE CLOSED JULY 5TH

At a recent meeting of the Klemme Civic Club, holiday closing dates for the balance of the year were set.

As Independence Day, July 4th, comes on Sunday this year, Klemme business places will observe the 5th of July as a holiday and all places of business will be closed on that date.

HELLO, FOLKS!

Mr. and Mrs. Stewart Hevlin are the parents of a seven pound baby girl born to them Wednesday morning, June 16, 1943. The new daughter has been named Geraldine Nancy.

Local Happenings

Klemme and Vicinity

DRS. COLBY & HAYDEN, DENTISTS, FOREST CITY, IOWA. OFFICE PHONE 374, RES. 189.

Herman Paul was at Mason City on business Monday afternoon.

Miss Arlene Buseman is employed at the Central Iowa Telephone office here now as operator.

Mr. and Mrs. Henry Lewis are having their house repainted this week.

Frances Cashman of Goodell was a business caller in Klemme Monday morning.

Herman Priebe has been on the sick list but was able to get around again the latter part of the week.

Mr. and Mrs. Tony Ahrenkeil of Goodell were Klemme visitors Saturday evening.

Herb Marshall and family visited Sunday evening at the home of Mr. and Mrs. Harvey Hubbard.

Art Kudje's sister and family of near Britt were dinner guests Sunday at the Kudje home.

Mr. and Mrs. John Clements were entertained to supper Monday evening at the Wm Langlitz home.

Mr. and Mrs. John Clements were supper guests Sunday evening at the Gerald Koerner home.

Miss Eunice Larsen left Monday morning for Chicago for a visit at the home of her brother-in-law and sister, Mr. and Mrs. Marvin Isvik.

Grandma Suckow went to Ventura Heights, last Wednesday for a visit with Mrs. Antonio Keraus at her cottage.

Mr. and Mrs. Carold Larson and children and Mr. and Mrs. Fred Kluckhohn were visiting at Storm Lake, Sunday.

Sumner Trumbell was at Belmond Thursday helping install a new pipe furnace at the Wright home.

Mary Griffen and Mrs. Tice were dinner guests at the home of Mr. and Mrs. E. J. Arnold Thursday.

Mr. A. J. Draper, of Simpson College, Indianola, was in Klemme Monday interviewing prospective students.

Rev. Calvin Grosshuesch presided at the Mission Festival at the Meservey Reformed Church last Thursday afternoon.

Mrs. Edward Rall left Monday night for Hanover, Illinois for a visit with her husband who is a painter there.

Mrs. Minnie Engstler of Garner, and Miss Margaret McCleron of Ottawa, Illinois are visiting with Mrs. Bertha Schlei this week.

The Schuldt house on the north side of the Park occupied by the Ole Ramsay family, is being reshingled.

The Post Office has been undergoing a decorating job the past week. The walls and ceiling have been repainted and the wood work washed and cleaned.

Mr. and Mrs. Ralph Elder called on Wm. Stille at a Mason City hospital one day last week. Mr. Stille is recovering from a severe case of infection.

Mr. and Mrs. C. G. Waterman and Mr. and Mrs. R. A. Jorgenson visited at the Lyle Liebendorfer home at Forest City Sunday evening.

Phyllis Kirkwood was a very disappointed little girl Friday when she became ill and could not take in the Reformed Bible school picnic.

Mrs. Lena Schroeder, Mrs. Clara Barz and daughter, Avis, and Miss Stella Thiemann left Friday for Wisconsin to attend a wedding and visit with relatives.

Tech. 5-c John Clements and wife left this Wednesday morning for Camp Beaumont, La. Mr. Clements has been enjoying a furlough which he spent visiting in Klemme and Estherville. Mr. and Mrs. Clements have stored their furniture in the rooms above the Lewis Produce Store.

Mrs. Louis Suckow of Forest City was visiting at the Herman Paul home Monday night. Mrs. Suckow is a beauty operator at Forest City. Mr. Suckow is in the Navy.

Mr. and Mrs. Robert Risser and son Bobbie, of Des Moines, spent Sunday visiting at the P. M. Wilson home. Bobbie remained here for a few days visit with his grandparents.

Mr. and Mrs. E. J. Schneider were dinner guests Sunday at the Cal Thomas farm home west of Goodell. Mr. and Mrs. Thomas have sold their farm and will move to Belmond in the spring.

Henry Helps, who has been ill a greater part of the time during the spring, is gradually getting stronger. Friday he was able to come up town as far as the filling station to spend a little time visiting.

Mr. and Mrs. C. G. Waterman, and Rev. and Mrs. H. E. Harvey and daughter, La Nelle, were visiting with Mrs. Antonio Keraus at her cottage at Ventura Heights on Thursday evening.

Mrs. Peter Merkel and grandson Lowell Ulrich returned home Monday morning from Des Moines where they had been visiting at the Walter Merkel home and with other relatives.

Mrs. James Schneider, who has been staying at the E. J. Arnold, and Mrs. C. A. Arnold homes since the death of her husband a few months ago, expects to go to Centerville, Iowa, where she will live with her sister, Mrs. Larson.

Mr. and Mrs. C. C. Kilgore moved their household goods Friday to the Grandma Smith residence on the east side of the park. They had been living in the Fred Becker residence in the southwest part of town.

Wm. F. Stille returned home on Sunday from the Mercy hospital at Mason City where he had been to receive treatment for an infection. Mr. Stille was in a serious condition but is now making a good recovery from his illness.

Sunday evening visitors at the home of Fred Bell and daughters were Mr. and Mrs. Carl Wille and daughter, Mr. and Mrs. Le Roy Johnson and children; Esther and Keith Anderson, Mr. and Mrs. G. A. Goll and daughter; and Mr. and Mrs. Art Haes and Dale.

A picnic dinner was held at the W. F. Pavay home Sunday in honor of Tech. John Clements and Mrs. Clements. Those present were Verner Lewis and family; Mr. and Mrs. Wayne Pavay and daughter; Mr. and Mrs. Ben Coobs and Peggy; Mr. and Mrs. Clements and Mr. and Mrs. Pavay.

Mr. and Mrs. Emil Patet were called to the Park Hospital at Mason City Tuesday afternoon to see Victor Waldek of Hayfield, who is critically ill.

Mrs. Edna Thada has had garage, which was built onto the side of her house last winter, painted to match her home. It is a nice improvement to her property.

Mr. and Mrs. Otto Schlawn went to Lohrville last Wednesday to assist their daughter, Mrs. Herbert Cole who had just returned home from the hospital at Ft. Dodge.

Rev. and Mrs. Calvin Grosshuesch attended the Mission Festival at the Hampton Evangelical and Reformed Church, Sunday afternoon.

Mrs. Rose Tanner, Bob and Frances and Verna Kalkwars, spent Sunday visiting at the home of Mr. and Mrs. Frank Smith at Estherville.

A family picnic dinner was held at the rural home of Mr. and Mrs. Wm. Neuberger, Sunday. Those present were Mr. and Mrs. John Neuberger, Ruth and Faye; John Neuberger, Jr. and family; Merlin Neuberger and family; Walter Blumer and family; Mr. and Mrs. Raymond Wille, and Mr. John Christians and family.

C. A. Larsen has improved appearance of his locker building by having another year an blind installed to match the one on the office.

Ed. Jacobs and Leo Esbeck at Mason City on business Monday. E. F. Jacobs and family and Mrs. Leo Esbeck and son, guests at the home of Mrs. L. Wistey at Clear Lake, Sunday.

Food

WILL WIN THE WAR!

That's why the dairy farmers of America are being honored this month for their patriotic war efforts.

We are proud to join with millions of other Americans in this nationwide recognition of the important contribution to Victory being made by the farmers of this country. Yes, "food will win the war and write the peace."

Quandt's

CAFE

CONRAD QUANDT, PROP.

YOU CAN TAKE THE WORD
OF A SUCCESSFUL

HOG RAISER

FARMERS everywhere are happy because they have found a way to stop COLD, DAMP FLOORS in their Hog Houses by installing...

ZONOLITE
Insulating Concrete

August Sindt, Lake Park, Iowa Farmer Says:

"ZONOLITE INSULATING CONCRETE makes great floor for a hog house. My experience is this:

"When pouring the floor, the workmen ran out of ZONOLITE with about 10 square feet of area to finish so they poured a regular gravel concrete slab in this corner. During the coldest days this winter, the 10 square feet of gravel concrete was cold and damp, while the ZONOLITE concrete was WARM and DRY.

"ZONOLITE Insulating Concrete Makes the Best Hog House Floor I've Ever Seen."

YOU, Too, can have a warm, dry floor in your old house by pouring a slab of ZONOLITE Insulating Concrete right over your present floor. If you are planning a new building, don't fail to put in this warm, sanitary and easy to clean ZONOLITE Concrete floor.

Mueller Won High Honor S. B. Creameries Contest

THE CREAMERY MANAGER
WON SILVER MEDAL
HIGH SCORE BUTTER

Creamery Close To Top In
Best Conducted By Iowa
State Brand Creameries

Mueller, manager of the
Co-Operative Creamery
was one of the top win-
ners in the annual Iowa State
Creameries, Inc., Butter-
Efficiency Contest held at
City at their annual meet-
ing Thursday.

Butter made at the Klemme
Creamery was judged to be the
best in the state and Mueller
was awarded a Silver Medal for
his high quality by taking high honors
with a score of 98.49.

In High Ten In 1940

Getting high honors is getting
a habit with Mr. Mueller, as
he was one of the high ten
in the high bracket was
close and Mr. Mueller only
lost 0.69 points of tying with
place winner, Mr. Fred L.
son of Belmond, who scored
points.

Being congratulated on his
fortune, Mr. Mueller modestly
said, "Yes, I am really pleas-
ed. I also want to share honors
with the farmers around Klemme
who are co-operating with us in
making our creamery with high
quality, sweet cream. Without a
quality cream we cannot make
a quality product."

Klemme Butter Goes To War

Klemme Creamery is a
member of the Iowa State Brand
Creameries, Inc., and butter made
is sold through the organiza-
tion. A large percentage of the
butter is packed by the organiza-
tion for our Allies on a lend-lease
basis and directly to our arm-
ies. In this way the Klemme
Creamery is manufacturing for
government and farmer patrons
local creamery are playing
a part in supplying our armed
forces and our Allies with the fin-
est butter in the world.

RETAINED IN HONOR OF A. H. DULMES

A J Kudje Monday after-
noon entertained a group of ladies
in honor of Mrs. A. H. Dulmes of
Utah, who was here for
a visit.
Dance was played at two tables
by Mrs. P. M. Wilson winning
first and Mrs. C. G. Water-
house second high. Refreshments
served by the hostess.

What You Buy With WAR BONDS

Mosquito Bar

Among the casualties returning to
the United States from the Solomon
Islands are men who have lost their
hearts to injury, not from shock,
but from attack by insects upon
who have been without mos-
quito protection.

You'll never know how many lives
a mosquito bar has saved and you
probably never will know just how
good your purchases of War
Bonds have done, but you should
know that regular and increasing
purchases are necessary.
U. S. Treasury Department

Our Men In The Service

MILTON PAUL TELLS OF NORTH AFRICA

In a letter received by his par-
ents, Mr. and Mrs. Herman Paul,
their son Milton tells of some of
his North African experiences.

The letter dated May 18 says
"It's all over in North Africa now."
Milton says they landed in North
Africa last November and started
the drive toward Tunis in January.
In his letter he mentioned such
places as the Kasserine Pass, Pont
du Fahs, Mateur, Tunis, Ferryville,
Bizerte and other prominent battle
fronts.

Milton is well and happy and
apparently came through the battle
without a scratch.

P. F. C. "BILL" ZABILKA IN AIR CORPS TECHNICAL TRAINING IN COLORADO

Greeley, Colo., June 22 P. F. C.
William W. Zabilka, age 19, of
Sanborn, Iowa, son of Rev. and Mrs.
Wm. Zabilka, has arrived on the
Sanborn, Ia., son of Rev. and Mrs.
of Education where he has been
assigned to the Training Detach-
ment of the U. S. Army Air Forces
Technical Training Command.

Before he entered the Army Air
Forces P. F. C. Zabilka was a stu-
dent at Cornell College, at Verna,
Iowa. He attended the Klemme
High School and graduated
from the Sanborn High School.
At both schools he starred in bas-
ketball and was prominent in mus-
ic. He was active in college sports
and music.

For eight weeks while stationed
at Greeley, P. F. C. Zabilka will
undergo intensive clerical training
which will fit him for further duties
with the Army Air Forces.

At the conclusion of his training
here, P. F. C. Zabilka will receive
a diploma presented by the com-
manding officer of the detachment.
He will also receive a certificate
from the President of Colorado
State College of Education. The col-
lege has announced that it will ac-
cept for full college credit the
work done by Army Air Forces
Technical Training Command train-
ees while they are stationed here.

PVT BARKEMA MOVES TO INDIANA ARMY CAMP

Hilko Barkema of near Thorn-
ton, formerly of near Klemme,
has received word that his son,
Pvt. Orval Barkema has moved
from Camp Haan, California, to
Camp Otter Bury, Indiana.

His new address now is:
Pvt. Orval E. Barkema, 37440073
Battery B, 535 Bn (AAA),
Auto Mtns. "Mbl"
Camp Otter Bury, Indiana

MARVIN STOKESBARY NOW WORKING ON PLANES

Dear Jergie:
Well here I am now at Norfolk,
Virginia. I am stationed at the Na-
val Air Station in the Advanced
Base Aviation Training Unit. We
are training for advanced base
work here and will be here for 3
months and then transfer to an ad-
vanced base.

I like this base fine. We work on
"live" planes here that really have
to go out and take it. Some are car-
go, some fighters and a few trans-
fers. We are transferred around to
different hangars to work on differ-
ent planes and do various kinds
of work. Last week I worked on
of patrol planes and this week I am
in the metal shop. Probably in a

Farmers Cautioned By Experts To Get Binder Ready For Field

week or so I'll be on land planes.

I ran across one of the Love boys
from Garner. It was good to see
someone from back there. He is the
first one I've seen here. It's been
three or four years since I had seen
him, so we had quite a visit talk-
ing over old times as we were to-
gether in the ninth grade in Gar-
ner.

Now that you have my address
again I'll certainly appreciate get-
ting the Klemme Times. I've sure
missed getting the paper.

Sincerely,

Marvin Stokesbary AM 3-c
A B A T U, Hut No. H-9,
Breezy Point Branch,

LT RAY A JORGENSEN NOW AT DODGE CITY, KANS

First Lt Ray A. Jorgensen, Jr.,
who has been at Del Rio, Texas for
the past ten weeks receiving special
training and also instructing on
B-26 bombers, has been transferred
by the War Department to Dodge
City, Kansas.

At Dodge City Lt Jorgensen
will instruct pilots in flying the
Army's B-26 bomber.

Lt Jorgensen has been at Lub-
bock, Texas for the past year in-
structing pilots at the advanced
twin-engine army flying school.

His new assignment comes as a
nice promotion.

MAILING BOOK NO. 3

Three Iowa penal institutions
are assisting the Des Moines district
OPA in mailing out War Ration
Book No. 3 to all consumers in the
state. Inmates at Ft. Madison,
Anamosa and Eldora are doing the
job of mailing the first million books
under the direction of OPA of-
ficials. Assistant supervisors were
hired locally in each of the three
localities. OPA officials estimate
that at least 600,000 Iowans re-
ceived their books direct from the
Chicago mailing center, leaving ap-
proximately two million to be dis-
tributed through the Iowa setup.
Consumers who do not receive a
new ration book by Aug. 1 are asked
to notify their local ration boards
of the omission.

KLEMMME STORES WILL CLOSE MONDAY, JULY 5TH

Because July Fourth comes this
year on Sunday, Klemme business
places will observe the legal holi-
day on Monday, July 5th and will
be closed from Saturday night un-
til Tuesday morning.

Do your shopping in Klemme on
the week end and Saturday for
your supplies for over Sunday and
Monday.

NOT TOO LATE TO REPAIR BINDERS

Check On Canvases, Rollers, Ele- vators, Bearings And The Tying Mechanism

Farmers who failed to repair
their binders last winter still have
an opportunity to avoid break-
downs during the coming small
grain harvest. A thorough check-
up prior to the start of actual work
usually will eliminate many pos-
sible sources of trouble, say exten-
sion agricultural engineers at Iowa
State College.

Broken or cracked slats on the
canvases should be replaced. Even
though the replacements are new,
check the length, since slats that
are too long will bind or break
and may cause canvases to slip.
In putting on new slats, place the riv-
et burr on the side of the slat far-
thest from the canvas and place
the head of the on the roller side.
Elevator Trouble

Canvas or elevator trouble usu-
ally can be traced to such causes
as elevator frames out of square,
a loose roller shaft or gudgeons,
badly worn roller shaft boxings,
and unbalanced canvas strap ten-
sion. The diagonal distances across
the elevator frame should be the
same and may easily be checked
with a straight section of narrow
board. These distances may be ad-
justed by the tie rods which run to
the main frame, or in the upper el-
evator by the attachment of the el-
evator frame to the goose-neck frame
at the back.

Look for worn bearings at the
ends of rollers and for loose roller
shafts and loose pins through the
roller shafts. Loose roller shafts
may be remedied by centering the
shaft in the hole and filling the
enlarged hole around the roller
shaft with babbitt. In adjusting
elevator frames, avoid binding the
ends of the rollers; they must turn
freely.

Tying Mechanism

The eye of the needle in the ty-
ing mechanism contains a hard
spool or insert to keep the twine
from wearing a deep groove quick-
ly. In time this part becomes gro-
oved; it may be replaced or turned
part way around so that wear
will come on a new area.

Detailed instructions, complete
with illustrations to make the job
of checking the grain binder easier,
are contained in Extension Circular
209, which is available through
county extension offices.

Iowa farmers may have their
soils tested at no charge by send-
ing their samples to Room No. 16,
Agricultural Hall, Iowa State Col-
lege, Ames, Iowa.

Family Re-unions And Picnics Held Sunday

LAU RE-UNION HELD IN THREE SECTIONS THIS YEAR

Seventy Persons Held Picnic In Klemme Park Sunday

The Sixth Annual Christian Lau
Re-union and picnic dinner was
held Sunday, June 27, 1943 in the
Klemme Park with seventy persons
present.

At the Re-union held last year
Clayton County was chosen as the
meeting place for 1943, but due to
gas rationing, etc., it was decided
this year to meet in three groups
one in Clayton County, one in Min-
nesota, and the other group here.

The August Lau, Henry Lau,
Will Lau and Mrs. Dora Greiman
families were represented in Klem-
me. They came from around here
and the nearby towns of Garner,
Clear Lake, Mason City and Bel-
mond.

After the picnic dinner the after-
noon was spent in visiting. Since
the meeting last year Martin Lau,
Sr. has passed away. He was one of
the five Lau brothers. Two sisters,
Mrs. Dora Greiman of near Klem-
me and Mrs. Lena Reusch of South
Haven, Michigan, survive.

On June 27, 1865, Christian Lau
returned home from the Civil War
and for that reason the re-unions
are held on June 27th in his honor.

After 78 years there are twenty
of Christian Lau's great grandsons
serving their country. Fourteen are
direct descendants and the others
are through marriage into the fam-
ily.

BEIER-SCHLEI RE-UNION WAS HELD SUNDAY

The Beier-Schlei re-union was
held at the Liberty Methodist
Church on Sunday, June 26th.

This was the 5th annual gather-
ing and twenty-six people were
present, as follows:

Mr. and Mrs. Edwin Josten and
Marcelle; Rev. and Mrs. H. E. Har-
vey and Elwood; Mr. and Mrs.
Frank Ward; Mr. and Mrs. E. R.
Schlei of Fenton; Mrs. Ida Rdeier
and son Walter of Leland; Mr. and
Mrs. Ben Ridder and Elwyn.

Rose Schaefer; Mr. and Mrs. Ed
Weisbrod and Ethel Aileen and Al-
fred Schlei of Fenton; Mr. and
Mrs. Emil Beier; Mr. and Mrs. Wil-
bur Haefner, Gloria and Margaret.

The afternoon was spent in visit-
ing.

CANNING DEMONSTRATIONS

The fifteen canning and freezing
demonstrations scheduled for Han-
cock County have been given. If
there are groups in town or in the
country who have not been reached
and who wish to have demonstra-
tions, they should contact Miss
Hazel Grimes at the Farm Bureau
office in Garner in regard to plans.

What You Buy With WAR BONDS

Torpedo Junction

"Awash amidship!"
"Sparks," the radio operator, has
sent his final message from another
U-boat victim. The lifeboats are
pulling away from the doomed ves-
sel as millions of dollars' worth of
food, supplies and munitions settle
to the ocean bottom in another al-
lied catastrophe in the Battle of
the Atlantic.

Millions of dollars' worth of ma-
terial that was paid for by the dol-
lars we saved and invested in War
Bonds. Thousands of man hours
have been lost.

We can have but one answer:
work harder, save more and invest
more frequently in War Bonds.

U. S. Treasury Department

JANSSEN-WILLE RE-UNION HELD HERE SUNDAY

Seventy-nine Present At Gathering At Community Hall Here

The Janssen-Wille family picnic
dinner and re-union was held at
the Klemme Community Hall Sun-
day, June 27th with eighty-nine
people present.

After the dinner a short program
and business meeting was held. Mr.
Hilko Janssen was elected presi-
dent; Mr. C. J. Wille, vice presi-
dent and Mrs. Mable Lauen, secre-
tary. It was voted to hold the re-
union next year at Belmond in the
town park.

The following people were pres-
ent Sunday: Mrs. Gretchen Schla-
win; Mr. and Mrs. Werner Schla-
win and La Vohn; Mr. and Mrs. F.
H. Greiman and Burtis; Mr. and
Mrs. Hicko Janssen, Ardis, Flody;
Mr. and Mrs. Vern Janssen and
family; Mr. and Mrs. Carl Wille,
Arlene and Lillian; Mr. and Mrs.
Raymond Wille; Mr. and Mrs. Mit-
chell Bock.

Mrs. Naska Bock; Mr. and Mrs.
Arthur Schlawn; Mr. and Mrs. Si-
mon Fisher and Dale; Mr. and Mrs.
Wm. Prellipp; Mr. and Mrs. John
Lauen, Richard and Larry; Mr. and
Mrs. Wayne Waddingham, Janice
and Dorothy; Mr. and Mrs. Daniel
Pals; Miss Elvira Unerferth.

Mr. and Mrs. Marvin Wessels
and family; Mr. and Mrs. John
Henn and family; Mr. and Mrs.
Marvin Prellipp and Marvena; Mr.
Louie Janssen and Glenn; Mr. and
Mrs. Harwood Avery and family;
Mr. Fred Bell, Julia and Ruth; Mr.
and Mrs. C. J. Wille, Aarin, Glenn,
Adala and Darwin.

Mrs. Ed. Blanchet; Mr. and Mrs.
Harold Reckow, Irene and Merlin;
Mr. and Mrs. Kenneth Greiman and
Danny; Mrs. P. H. Thiel; Mr. and
Mrs. Gerhard Mayers; and Mr. and
Mrs. Leo McClure and family.

Ink Spots And Spatters

By Jergle

KNEE-HIGH CORN BY THE FOURTH

During the cool, wet weather a couple of weeks ago, North Iowa farmers were worrying about the prospects for a good corn crop.

The past week has changed the picture entirely. With plenty of moisture combined with hot days, and especially the nights, North Iowa corn shooting skyward at a rapid pace, and knee-high corn by the Fourth will be general in North Iowa.

In fact, the corn is growing so fast that you can see the stalks get taller as you watch for a few minutes. That rumbling noise you have heard the past few hot nights was the corn growing in North Iowa.

Last year the corn grew remarkably fast around Klemme. A field of popcorn near town was growing so fast that it reached maturity in less than a week. The ears formed rapidly and one extra hot day the corn began to pop right in the field. A herd of cattle grazing in the pasture along side of the field thought it was an Iowa snow storm and it was so realistic that they froze to death although the temperature was 110 degrees in the shade.

KLEMMER MAN HAS UNIQUE SPARE-TIME HOBBY

Almost any early morning or in the evening you will see Louis Perkins down on "all-fours" out in his garden digging and scratching away in the dirt.

Mr. Perkins' hobby is raising gladioli. He has them by the thousands. Monday he had planted twenty-eight rows, one hundred feet long and still had around 10,000 more bulbs to set out.

Mr. Perkins goes into the gladioli hobby in a big way and sends his bulbs all over the United States and it is not uncommon for him to sell from 5,000 to 15,000 bulbs to fill one order.

Lovers of flowers are anxious for the time to come when his vast bed of "glads" will be in bloom.

Mr. Perkins has won many cups, trophies and ribbons on his flowers and has a collection of prizes he can well feel proud of.

Another Klemme business man who also raises "glads" as a hobby is Ed Thompson. Ed's flower garden already boasts of well over a thousand gladioli bulbs which he has set out this spring.

With two such fine flower gardens Klemme may become the gladioli center of the world if the hobby keeps spreading out.

NO ALARM CLOCKS NEEDED BY THIS LADY

We inquired of Mrs. C. C. Kilgore how she liked living in their new location across from the park and she replied that it was really a nice location but that the family alarm clock was no longer needed as there were so many birds in the park that they awakened the Kilgore household early every morning with their singing.

GRAPEFRUIT TREES GROW IN KLEMMER

Miss Novella Bredbenner planted some seed from a grapefruit nearly two years ago and the plant is now about a foot high. It had one blossom and the tiny grapefruit be-

gan to form and then withered. Mrs. Kilgore also has a grapefruit tree which is a couple of feet tall but has never blossomed or had any fruit.

Miss Bredbenner said the grapefruit blossom was very fragrant.

The New Deal has put a "ceiling" on everything else. We wish Roosevelt would put a ceiling on the high temperatures we have had the past week.

WATCHING LAKE RESORTS

District OPA investigators will be assigned weekly to check up on motorists who visit Iowa lake resorts, according to Donald D. Holdoegel, chief counsel. B and C gasoline ration card holders who are found to be more than 45 miles from their ration jurisdiction will be asked to furnish an explanation to their local ration boards. The program is part of the OPA's nation wide drive to eliminate illegal pleasure driving of occupational gasoline ration allotments. Holdoegel also said peace officers of the state were furnishing excellent cooperation in the drive to hold all drivers to a 35 miles an hour maximum.

STATE FARM BUREAU WOMEN'S CONFERENCE

Hancock County was represented at the annual Farm Bureau Women's Conference held at Hotel Kirkwood in Des Moines on June 27, 28, and 29 by Mrs. Harold Oxley, county chairman of the Garfield township Home Project work and Miss Hazel Grimes, county extension home economist.

More than 200 farm women attended the discussions and program presented by outstanding farm leaders.

BUNTENBACH BUYS FARM NEAR KLEMMER AT \$140

E. C. Buntenschach recently purchased a 240-acre farm east of Klemme at \$140 per acre from the Metropolitan Life Insurance Company. The farm is located just across the road from his other farm and is tenanted by L. R. Hanson.

The farm is well improved and in a high state of cultivation.

Cashman Buys Farm Here Francis Cashman of Goodell recently purchased a quarter section farm east of town, known as the old Joe Johnson farm, now tenanted by the Peck family.

Hancock County Board Proceedings

Garner, Iowa June 21, 1943. The Hancock County Iowa Board of Supervisors met in session on above date with P. J. Schoun, Penn Eckels and John Chambers present.

The minutes of the last meeting were read and approved as read. Supervisor Eckels is appointed a committee to investigate and cause repairs to be made in DD No. 46-3, and DD No. 1 and 2, lateral No. 22.

Supervisor Schoun is appointed a committee to investigate and cause repairs to be made in DD No. 102. The appointment by Sheriff L. M. Brown of Walter Reed, Charles J. Krimm and Ward R. Smiley as special deputy sheriffs for Civilian Defense about compensation is approved.

On motion and second the application of board of Catholic Delinquent Lodge, Camp in Iowa for a class B Beer permit approved and permit is hereby granted.

On motion and second the application of Frank Palada for a class C Beer permit are approved and permit is hereby ordered granted.

On motion and second the application of hands of Frank Palada and Elsie M. Pringle for a Cigarette license are approved and permits are hereby granted.

This being the 21st day of June 1943 a date heretofore set for a public sale of SW 1-4 NW 1-4, of section 33 Township 97, Range 25, West of the 5th P. M. in accordance with Chapter 232 Code of Iowa, 1939, and amendments thereto. The hour for said sale having arrived the Hancock County Iowa Board of Supervisors proceeded to sell the hereinbefore described real estate at public auction as by law directed, and

WHEREAS, the bid of Carl Sonerholm in the sum of Three Thousand Eight Hundred and Sixty Dollars (\$3,860) is the best bid therefor and has paid a \$500.00 down payment.

BE IT THEREFORE RESOLVED by the Board of Supervisors of Hancock County Iowa acting for and in behalf of the Permanent School Fund of Iowa that Hancock County enter into a contract with Carl Sonerholm for the purchase of the SW 1-4 NW 1-4 of Section 33 Township 97, Range 25, West of the 5th P. M. in accordance with Chapter 232 Code of Iowa, 1939, and amendments thereto. Hancock County Iowa to provide proper evidence of marketable title to said real estate.

The foregoing resolution was offered and read by Supervisor Chambers who moved its adoption, was seconded by Supervisor Eckels whereupon the chairman placed the motion of its adoption and upon roll call the vote thereon is P. J. Schoun, Penn Eckels and John Chambers Aye. Nays none.

On motion and second the Board adjourned to July 2, at 9 o'clock. A. M. ATTEST

FRED C. MISSAL, County Auditor F. J. SCHOUN, Chairman

The demand is large for pure-bred beef cattle now.

Scotch scones made with enriched flour and served with tart, pink rhubarb sauce make a combination that is a real tonic. A glass of milk added to the duo makes a good breakfast or supper.

Around Iowa

SILK AND NYLON

Iowa's collection of silk and nylon stockings from Jan. 1 to May 15 totals 49,564 pounds. This places the state in tenth place in the nation for salvage of this vital war material. On April 1, Iowa was only in twelfth place, climbing to tenth when April and the first half of May collections were reported.

LEGIONAIRES AT HOME

New headquarters of the Waters Post of American Legion at Waukon is the old county jail. The sheriff's quarters will be used for the recreation rooms and the old cell block will be used for lodge rooms.

SUB SINKER

The ship on which Robert O. Schaeffer of West Bend has served in the present war is credited with the sinking of six enemy submarines. Schaeffer, whose service record is five years in the Navy, is a fireman, first class.

ATTACKED!

Tama residents were systematically attacked by an owl at evening. Mrs. Ida Fife, E. E. Ehret, Miss Mildred Mulligan and Mrs. Paul Maher were among the victims. Mr. Maher obtained a permit to shoot the attacker but before he could get a lucky shot in, he also was attacked. The bird disappeared in a tree but Mr. Maher saw it later on a high limb, and that was the end of that bird. Another owl was discovered later and was shot by Mr. Maher.

FOR BETTER PRODUCTION

A cow on the Einer Jacobsen farm near Harlan is doing her best to better the higher production efforts of the present. The cow gave birth to a calf about three months ago. Last week she gave birth to another calf.

FALLS IN WELL.

"Buddie," a dog belonging to A. J. Clark, Ackworth, fell into a well containing several feet of water on the Dick Craig farm. The dog's barking attracted Mr. Clark who rescued the animal.

YEAR OF UNCERTAINTY

The past year of uncertainty for Myron Bartlett of Waverly is now beginning to look very encouraging. A year ago his leg was cut by a mowing machine so that only a small front portion was left uninjured. Both leg bones were cut through. Last week, Myron took his first step without crutches.

Points on the mower to check and adjust are: 1. Cutter bar, broken or dull sections on ledger plate, proper clearance of clips and alignment of cutter bar; 2. bearings--for needed replacements, adjustments and to make certain of good lubrication; 3. gears--for proper mesh and lubrication.

Rolled or hulled oats are very good feed for young pigs on pasture until they reach 40 to 50 lbs.

Some garden vegetables such as tomatoes, egg plants and peppers can be mulched to save labor in controlling weeds and lessening the loss of fruits that ripen on the ground.

Withdrawal of poultry from storage and mites. For lice, dust wettable sulfur in the feathers, around the vent and under each wing. If the weather is warm, Black Leaf 40 or nicotine sulfate may be painted on the roosts just before the birds go to roost and the fumes will kill the lice. Either treatment should be repeated 2 weeks later.

To rid laying hens of mites, clean out all cracks and corners. Spray the house with a mixture of para-affin and creosote, or paint with old oil.

Hogs are being marketed at weights 10 to 15 pounds heavier than at this time a year ago.

A few slices of bacon will do double duty and serve many if chopped, crisp bacon is added to a favorite muffin batter. They're delicious for breakfast or supper.

We want your news. Phone 12.

H. C. A. EXTENSION PROGRAM PLANNING COMMITTEE MEETING HELD

Two meetings of this committee have been held. An appraisal of the important rural problems facing rural families now and in past war days is being made. Around these problems will be built an educational county extension program in which the interest of all members of the family are included. Special committees are being given specific problem assignments which they will study and will then be worked into the county extension program which will include the following groups: Home Project, 4-H Clubs and Rural Young People as well as the other adult farm groups.

The members of the committee are: Henry Stoltenberg, chairman, Curtis Greiman, Walter Kahl, Mrs. Aaron Stromer, Mrs. H. J. Johnson, and Mrs. L. F. Weaver.

More farm families are carrying larger cash reserves than normal. Herein lies a danger, economists at Iowa State College warn. Past experience indicates that unusually large cash surpluses soon bring over-optimism and speculation. This is true of rural and city people alike.

July 4th Picnics

When you are planning that July 4th picnic, just remember that we can help you by supplying:

- FRESH BUNS
- MILK-MAID BREAD
- COOKIES
- ROLLS, ETC.

BETTER IOWA

GARDENS

Success with summer gardens
depends in part upon sowing the
seed at the correct time That time
depends on how long it takes cer-
tain vegetables to mature. Vegeta-
bles that take a long time to ma-
ture must be the first to be planted
in the summer garden They must
be planted early enough to mature
shortly before the average date of
the first killing frost

Carrots, beets, sweet corn (early
variety) and bush snap beans are
the kinds of vegetables that may
be planted in the summer garden
Plant the first week in July in the
north half of the state and the sec-
ond week in July in the south half

The present garden area may be
used for the summer garden If the
garden was planned correctly early
last spring, all quick-maturing veg-
etables were planted together in a
section of the garden area This
means we can have the summer
garden crop together in the same
area It is decidedly more practical
than mixing all-season crops with
short-season crops

Pea vines and other crops that
are finished should be removed
from the garden to prepare the
ground for making the first plant-
ing Town and city gardeners in
particular should make special ef-
forts to conserve all healthy plant
materials removed from the garden
by placing in compost heaps The
material will decompose faster if
the plant refuse is covered with a
thin layer of soil each time fresh
plants are added The decomposed
material will make good fertilizer
to apply on the garden next year.

Some early vegetables will not
be ready to be removed from the
garden by the beginning of July
Early potatoes, for example, will
have to remain temporarily Later
plantings can be made, however
as soon as the potatoes are remov-
ed

Seed should be planted one-half
to three-fourth inch deeper than for
spring planting It is necessary to
place the seed down where it is a
little cooler and where there is
likely to be a little more moisture
Small seed, of course, is not cover-
ed as much as large seed.

Small seed in particular has a
difficult time breaking through the
soil crust in summer gardens
Further help to success in germi-
nation may be had by sowing
seed a little thicker than in the
spring Step on the soil to firm soil
close around the seed Cover light-
ly with grass clippings or straw
In addition, narrow boards may be
used if desired Some gardeners
raise the boards about an inch by
testing the boards on blocks. Boards
must be removed as soon as
seedlings break through

Mr and Mrs Herman Gast re-
turned last week from Decatur
Illinois where they visited with A-C
Loren C Gast and wife. Loren is
in the air corps and at the present
time is attending James Millikin
University They said Loren was
getting along fine with his work
and both Loren and his wife like
it at Decatur They said to "greet
the folks back home"

ler N W Permits Roths Cafe
Application of Thada's Store for Ci-
garette Permit not granted.
Renewal of Cigarette B Beer Permit
granted to C Quandt
Bonds of A J Kudde as Clerk, and
George Buseman as Marshall approv-
ed.
Meeting adjourned A J KUDJE, Clerk

Cultivation using sweeps and
disk hillers has been found prefer-
able to that using shovels, under
most condition. Sweep cuts over-
lap and insure that all weeds in
the space between rows will be
uprooted or sheared off without
deep cultivation which injures
roots of the corn plant.

Flies of all types will be less
troublesome this summer if you de-
stroy their breeding places now.
Clean up manure every 2 or 3 days
and empty all garbage cans fre-
quently and keep the cans tightly
covered; use fly traps, and be sure
window screens fit tightly and do
not have breaks. Fly-sprays will
help cut down flies in both house
and barn.

THREE THINGS TO NOTE IN TESTING SEPARATOR

Three factors should be checked
on cream separators to see that
they are working correctly Each
separator should be in good me-
chanical condition, fastened firmly
to a level foundation, and turned
at an even speed at the rate recom-
mended by the manufacturer.

A. W. Rudnick, Iowa State Coll-
ege dairy industry specialist, says
that Iowa dairy farmers are taking
still further precautions to make
sure that every possible amount of
milk and cream can reach market
fit for human consumption. Milk
should be separated while it is still
warm, but warm water should be
run through the bowl before start-
ing the milk The milk flow should
not be started until the bowl is up
to speed The separator bowl should
be washed each time after it has
been used.

Rudnick suggests that dairymen
check the operation of their separa-
tors by having a skimmilk sample
tested at their creamery about once
a month. If the Babcock test shows
over .02 percent butterfat in the
skimmilk, the separator is not
working correctly and butterfat is
being wasted This trouble should
be corrected as soon as possible.

Hens lay eggs with soft shells
usually only if there is a lack of
mineral in the ration A ration for
laying hens should carry little over
2 percent calcium and a very small
amount of manganese sulphate It
also should contain fish liver oil,
seed oil and activate sterol to sup-
ply Vitamin D, which is essential
to egg production

Electric fences have proved to be
quite satisfactory in controlling
sows and small pigs. One wire will
have to be low enough to control
the small pigs, with another placed
it about two-thirds the height of
the sows Weeds and grass must be
kept away from the wire

Red top is a good grass to hold
the soil in ditches and on ditch
banks. It is also one of the best
grasses from the standpoint of sod
formation. It will continue to grow
in poorly-drained soil and will also
stand considerable flooding

The army needs your discarded
ilk and nylon resc. Don't throw
them away.

age has been unusually heavy.

Examine laying hens now for

HELLO, FOLKS!

Mr. and Mrs Herman Meintz of
near Klemme are the proud parents
of a baby boy born to them at the
Belmond hospital on Friday, June
25th, 1943.

Up to May 31, Iowa this year has
shipped 50 carloads of processed
tin cans to the detinning plant, the
salvage division reports. Yet this
represents only approximately 12
per cent of the available tin cans
in the homes, restaurants, hotels,
and other institutions.

WEEKLY NEWS ANALYSIS

Chinese Army Steps Up Anti-Jap Drive; Pantelleria Victory Prepares Way for Allied Sweep of Entire Mediterranean; Farm Implement Output Will Be Doubled

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)
Released by Western Newspaper Union.

France officially repaid some of its debt to America when Gen. Henri Giraud (right) invested United Nations Commander-in-Chief Dwight Eisenhower with the grand cross of the Legion of Honor at a ceremony in Algiers.

MEDITERRANEAN: Pantelleria First Step

The Allied assault to reduce Italy's island buffer defenses preparatory to mainland operations had continued to give the Mediterranean area star billing over other theaters of war.

The capture of the island fortress of Pantelleria was significant not only because it was the first effective Allied milestone since the African victory, but it consolidated United Nations' control over east-west shipping in the Mediterranean as well. Moreover, by breaking through Italy's outer wall it paved the way for a cleanup of the more important islands of Sicily and Sardinia and for operations on the continent.

The steady and methodically violent destruction of Pantelleria's defenses was regarded as a forerunner of what other Axis Mediterranean bases would have to suffer. Day after day Allied bombers had plumed disaster on beleaguered Pantelleria while naval units had blasted its forts with deadly big guns in softening up operations.

In the meantime British dispatches crediting Spanish sources reported that Marshal Erwin Rommel was speeding the completion of defenses along the French Mediterranean coast. These reports set forth that Rommel had been named commander of the so-called Mittelmeer wall.

IMPLEMENTS: Output Doubled

Relief for farmers harassed by a shortage of machinery will be forthcoming as a result of WPB Chairman Donald M. Nelson's announcement that the production of farm implements for the year beginning July 1 will be doubled and the entire "concentration" program imposed on the industry last year will be scrapped.

Mr. Nelson's announcement said that allotments of steel and other materials will be sufficient to boost farm equipment production to 80 per cent of the 1940 level, compared with a current rate of 40 per cent and a quota of only 20 per cent that was in effect early this year.

Meanwhile farm equipment manufacturers were authorized by the War Production board to place orders for materials for the new program.

ARGENTINA: Axis Radio Curbed

Action of the new Argentine government in cancelling radio facilities which enabled Axis embassies or nationals to transmit code messages to their capitals was regarded as a step in the direction of bettering Argentina's relations with its South American neighbors as well as the United States.

The government said it took this step in compliance with the resolution adopted at Rio de Janeiro, Brazil, by American foreign ministers against Axis espionage in January, 1942. While the order cancelled radio code facilities for all nations, it struck at the Axis powers since they have no cable connections with Argentina, whereas the Allies are linked directly to Argentina by cable.

WAR PROFITS: 'Recapture' Scanned

Whether the year-old renegotiation law by which the government recaptures "excessive war profits" from industry would be retained or eliminated was a matter that would be largely determined by the public hearings which the house naval committee had ordered.

As the committee applied close scrutiny into the operations of the law, witnesses representing big and little industry described its effect on war production. Government officials credit the contract renegotiation statute with saving the nation thus far in excess of three billion dollars.

Decision to undertake the investigation came with two measures pending before the house ways and means committee. One was to repeal the statute altogether and the other was to limit its use to contracts above \$500,000 rather than the present \$100,000 limitation.

RUSSIA: Aerial Prelude

Air forays had continued to be the prelude to general 1943 land offensives on the Russian front as the lull that began with spring thaws still had persisted.

From one end of the line to the other reports indicated increasingly vigorous air battles as Nazi and Soviet planes fought it out for supremacy. Activity was reported especially pronounced in the Don river valley and northward in the vicinity of Leningrad. Russian communiques indicated that the vicinity of Rostov had become a cemetery for downed Nazi Heinkel and Junkers planes. The Reds reported likewise that in a German raid on the Volkhov front 60 miles southeast of Leningrad, 24 planes were shot down.

Meanwhile the Russians continued their attacks on eastern German airdromes. In one foray the Reds reported destroying 160 German planes compared to a loss of 26 Russian aircraft.

ANTI-STRIKE: Penalties Promised

As the house had undertaken consideration of the compromise anti-strike bill, its sponsors declared that it would keep war plants and mines running uninterrupted by walkouts "if anything can."

Composing differences in bills previously passed by both house and senate, the revised measure was aimed particularly at the coal wage dispute. It authorized the government to seize strike-bound mines or plants, outlawed strikes in these facilities and imposed a 30-day "cooling off" period before walkouts could be called in privately operated war industries.

Penalties ranging from civil damage suits to a year's imprisonment and \$5,000 fine could be imposed on those who fail to carry out the measure's regulations in labor disputes or who instigate or conspire with others to aid a strike in a government-operated plant.

RIGHT HAND: Baruch for Byrnes

Official and unofficial Washington was cheered by the news that James F. Byrnes, war mobilization director, had drafted Bernard L. Baruch to serve as his right-hand man.

Mr. Baruch, chairman of the War Industries board in the first World war and long an informal consultant of President Roosevelt, will serve Mr. Byrnes in an advisory capacity and will have a "more formal connection with the government" than when he headed the President's special rubber-investigating committee.

The key role which Baruch's mobilization of national resources played in winning the last war, plus his respect and popularity among members of congress were cited by observers as reasons for his choice by Mr. Byrnes. The fact that the two will be working together was viewed as a harbinger of closer cooperation between the government's legislative and executive branches and more thorough-going efficiency in the home front effort.

FOOD: U. S. to Ship 25%

At least 25 per cent of American food production this year will have to be shipped abroad, Roy F. Hendrickson, food distribution director of the War Food administration, disclosed, adding that the proportion may have to be still greater.

Hendrickson told the war council of the American Retail federation that "as we move into Italy and Greece, France, Norway and the rest of Europe we must give those half-starved people the strength to be actively on our side."

The food distribution chief declared that the personnel of America's military forces eats an average of about 5 1/2 pounds of food daily, whereas civilians average between three and four pounds.

WHEAT LOANS: WFA Grants \$1.22

Loans to eligible farmers on 1943-grown wheat at rates averaging nationally \$1.22 per bushel at the farm were announced by the War Food administration.

Under a similar loan program in 1942, loans averaged \$1.14 at the farm. Eligible for loans will be farmers who complied with the 1943 AAA farm program relating to wheat and war crops. Loan rates vary according to grade, quality and location of storage.

Japan Is Satisfied

By Clark Lee

(WNU Feature—Through special arrangement with Collier's Weekly)

Having accomplished every one of her major objectives, Japan is satisfied that she has won the war in the Pacific. All that remains, as she sees it, is to complete the unsailable wall of land, sea and air defenses she is building around her huge, rich new empire—a wall behind which she can grow fat and strong as she welds her "liberated peoples" together for the coming war of extinction against the white race.

All she needs is time—just a little more time, please.

Some public leaders in America have stressed the great historic menace that faces us in the Pacific. Few, however, have dared to state the whole startling truth. The truth is that Japan has already won her war.

With the exception of Midway island, and despite her defeats in the Solomons and New Guinea, Japan has captured every important objective she set out to take.

All She Needs.

Japan has seized all the territory and all the resources she needs. Japan now rules 300,000,000 people.

We have not yet started in earnest to fight our war—the war to retake the great areas Japan has captured.

That will be a new war, and because Japan will not be caught unprepared, it will be incredibly more costly than the lightning campaigns by which Hirohito's army and navy took over the great wealth and territory the United Nations had left virtually undefended in the Far East.

Unless we start to fight Japan soon, with every weapon at our command, and unless we keep China in the war on our side, we may find this second war impossible to win.

Japan, embarked on a deliberate program of world conquest, sees this struggle as a racial war which may last a century, and in which, backed by the limitless manpower and resources of the Orient, she will win the final victory.

All that Japan needs to make her the world's greatest power is time—time to exploit and develop her new empire and to unite the people of Asia under her leadership.

Until today, Japan has had that time. Japan is under no real military pressure from the United States. Behind a solid network of defenses which we have not yet begun to penetrate, Japan is using her time wisely and efficiently to achieve her immediate objective—the military, economic and political consolidation of the Orient.

Having underestimated Japan's skill, preparedness and determination before the war, we should not make the same mistake again in assessing her ability to carry out her present program.

Japan today is highly vulnerable to air attack. Most of her heavy industry is still concentrated in four areas located along a 400-mile strip of coast extending south and west from Tokyo. More than 30,000,000 people live and work in the great seaport cities of Tokyo, Yokohama, Nagoya, Kobe, Osaka, Shimonoseki and Moji. If these cities were heavily bombed now, Japan would be severely crippled.

Six months from today, however, that may no longer be the case. For Japan is becoming a continental power, through a program of dispersal of heavy industry.

Japan's fundamental aim is to scatter key industries over so wide an area that many thousands of airplanes would be needed to inflict vital damage.

With the seizure of Tientsin, Shanghai, Hong Kong, Manila and Singapore, Japan came into possession of tremendous American and British industrial facilities.

The economic resources of the conquered territories are being exploited under a plan which Japan has been perfecting for the past decade—a master plan for control of labor, transportation, shipping, public works, agriculture, finance, industry and all other functions of captured areas.

From the Philippines, Japan is getting chrome and copper. Malaya is contributing tin and rubber. Coal is coming from the Selangor mines. The Sumatra oil fields are producing great amounts of petroleum.

In Borneo the Japanese report finding large supplies of mercury and cannabar. From the Andaman islands come lumber and fish. French Indo-China gives rice and coal. Java contributes rubber, quinine and petroleum. In Shansi province of North China is all the iron ore that Japan can ever use. Coal is found nearby.

Washington, D. C.

CHURCHILL'S TIP

One significant phase of Winston Churchill's conversations here has just leaked out. He volunteered some valuable advice on the makeup of the U. S. delegation to the peace conference.

Talking to a closed-door session of the senate and house foreign relations committees, he was reminded that if Woodrow Wilson had given more thought to the makeup of the U. S. delegation, his efforts to enroll the United States in a League of Nations might not have been such a failure.

Churchill at first tactfully sidestepped comment, explaining he didn't want to stick his nose in American affairs. However, he finally observed with a grin that he knew a little about politics himself and probably could offer one suggestion. "What is it?" chorused several of the politicians.

"Appoint a delegation that is strictly bi-partisan," Churchill replied, "half Democrat and half Republican."

If the President named such a commission of outstanding leaders of both parties, the prime minister added, his chances of winning congressional approval of a treaty among the Allied powers would be greatly enhanced.

LEARNING JAP LANGUAGE

Officer Candidate schools have a reputation for being tough, but the Naval Intelligence Japanese Language school at Boulder, Colo., sets a new record. Hand-picked candidates from colleges and graduate schools pore over Japanese "Kanji" (word pictures) 16 hours a day, 6 days a week, for 14 months.

These 800 students are given intimate high pressure instruction in classes of only five men each. The faculty consists of 150 Japanese-Americans, former professional and business men, recruited from the East and West coast Japanese colonies.

The course is intensive, and the students are given no job except the principal one of learning the difficult Japanese language. Unlike other officer candidates, they have no guard duty, KP, or night bivouacs. Their job is to learn Japanese, learn it quickly, and learn it well.

SENATOR GLASS

Much-loved 85-year-old Senator Carter Glass of Virginia is expected by friends to drop out of the senate before many months. He has served as Woodrow Wilson's secretary of the treasury, 23 faithful years in the senate and 17 years in the house.

Virginia politicians close to Governor Darden are passing out the tip that when Glass retires, Darden will appoint as the senator's successor, not 55-year-old Congressman Cliff Woodrum, the most outstanding congressman from Virginia, but 73-year-old Congressman Tom Burch.

WHO OWNS THE FARMS?

Most people have the idea that Washington postwar planners are thinking only of the people in foreign countries. But that isn't the case. They are also thinking of how the land of America can be returned to the people of America.

Real fact is that much of the big land holdings in the U. S. A. are in the hands of insurance companies and absentee landlords, as strikingly brought out by latest AAA conservation and parity payments.

In four of the country's biggest farming states, largest payments were made not to individual farmers but to life insurance companies. Here are the actual payments, each one being the highest payment in that state:

Ohio—Union Central Life Insurance company, Cincinnati, \$49,153; Wisconsin—Northwestern Mutual Life Insurance company, Milwaukee, \$47,517; Iowa—Equitable Life Insurance company, Des Moines, \$33,418; Missouri—General American Life Insurance company, St. Louis, \$52,170.

In Mississippi, the largest payment went to an absentee landlord, the British owners of Delta and Pine Land company, Scott, Miss. The property is managed by a former AAA official, Oscar Johnston. The payment was \$50,141.

Highest payment in Illinois went to the First Trust Joint Stock Land bank, Chicago, \$29,152. Highest in Nebraska went to the Federal Land Bank of Omaha, \$77,605, while the same thing was true in Minnesota, where the largest payment, \$75,761, went to the Federal Land Bank of St. Paul. The land banks hold a lot of property as a result of mortgage foreclosures in the lean years.

Largest payments in the four largest agricultural states of the north-east also went to insurance companies.

New York—Metropolitan Life Insurance company, New York city, \$101,863. Incidentally, this was the largest payment made in the entire country. Connecticut—Connecticut General Life Insurance company, Hartford, \$48,437. Pennsylvania—Provident Mutual Life Insurance company, Philadelphia, \$13,022. New Jersey—Mutual Benefit Life Insurance company of Newark, received payment of \$82,126.

Simple Cross Stitch For Kitchen Towels

Pattern 2984 contains a transfer of six motifs averaging 3 1/2 by 1 1/2 inches. Includes instructions for stitching, color materials required.

Due to an unusually large demand for this pattern, the current war conditions, shipping time is required in filling orders. A few of the most popular patterns are being sent out to you.

Sewing Circle Needlecraft Box 82 Eighth Ave. New York, N. Y. Enclose 15 cents (plus one cent cover cost of mailing) for Pattern No. Name Address

BEAT THE HEAT

Sprinkle your bath irritated skin with Mozzana, formerly can Heat Powder, burn as it soothes.

Wide Hair

Not only may some have the human head grow to times wider than others, but hairs of some races as have been found to be 20 wider than those of others.

Acid Indigestion

Relieved in 5 minutes or double money. When excess stomach acid causes painful, burning, sour stomach and heartburn, take the fastest-acting medicine for symptomatic relief—antacids like the tablets. No laxative. Heat and bring on fifty or double your money back on return to us. 25c at all drug stores.

ADVICE NEW MOTHER

Don't compel your baby to take medicine through a hard, dry nipple. Refuse to take a sufficient quantity of food may be traceable to this effort. The Faultless No. 10 Nipple of highest quality translucent rubber is soft, pliable and resilient. Provides for effortless feeding. Triple-foamed. Slips on bottle easily and firmly. HIGHLIGHTS . . . in the week's news

LEADERS: Hawaii leads the nation in per capita war bond purchases, Secretary of the Treasury Morgenthau reported on the basis of statistical compilations.

PROMOTION: President Roosevelt nominated Rear Adm. Thomas C. Kinkaid, commander of joint military operations in the Attu campaign, to be a vice admiral.

AUSTRALIA: Prime Minister John Curtin said the fight to hold the Japanese in the Southwest Pacific had been won and that Australia is safe from invasion.

DRAFT PRELUDE: Jan Valtin, author of "Out of the Night," is now I-A in the draft, his publishers announced. He had been held for illegal entry into this country.

The Indian of Today, Like His Forefathers, Proves He's 'First-Class Fighting Man'

Than 11,000 Red Men, Most of Them Volunteers, Are Fighting for Their Native Land as Soldiers, Sailors and Marines.

By ELMO SCOTT WATSON

Released by Western Newspaper Union

A recent announcement by the War Department that Maj. Clarence L. Tinker Jr. of the United States army air force was in action in North Africa was a tragic coincidence, in that year ago the War Department announced that his father, Maj. Clarence L. Tinker, commander of the army air forces in Hawaii, was missing in action. He had led a flight of army fighters to attack the Japanese fleet east of Wake island and he was killed in the Battle of Midway.

Interesting, too, is the fact that the Tinkers, father and son, were North American Indians, at the time of his father's death. General Tinker was "the greatest Indian in the present war." But when they are outstanding members of the "fighting red men" of the modern version, they are no longer of an estimated 11,000 in the armed forces of the United States and most of them didn't wait to be drafted but enlisted voluntarily.

By itself, that number does not seem large. But in proportion to the total number of "native Americans" in the United States today, it is a more imposing record. A proportion of white men who have voluntarily enlisted to serve in the army of nearly four million men in addition to the 100,000 who are in the army today.

Recently, an interesting situation regarding the enrollment of the Uncle Sam's service arose when the Selective Service act was passed into federal law. New York city one autumn in 1941 marched five brilliantly dressed Indians to watch a white parade for their rights according to white man's rules. They were descendants of the warriors who fought back in 1784, made a treaty with the United States by which the young and struggling federal government recognized the Indian Confederacy as a sovereign and independent nation.

Unconquered Nation. The case came into court to maintain the legal means their identity as Indians of that confederacy which, independent, unconquered nation was subject only to its own laws and not to the congress of the United States. On the record the court case appears to be a habeas corpus for one Eldreth Green, a 21-year-old Indian, who had been in military service the previous year. Young Green had no objection to entering the service as a matter of fact a number of fellow-tribesmen had already voluntarily enlisted—but he was used as a test case to see if the right of the United States government to conscript the Indian of an "independent, unconquered nation."

Counsel for the Indians argued that the Iroquois Confederacy was treated as a foreign nation in 1924 when a law was passed conferring United States citizenship on Indians. No such law, he argued, could apply to members of the Six Nations without their consent. The law was unconstitutional before members of the Onondaga, Seneca, Mohawk, and Tuscarora tribes could be numbered among the "citizens."

There was a time when the name of Geronimo was a name of hatred and terror in the great Southwest, for this Apache leader blazed a trail of death and destruction through New Mexico and Arizona. Run to earth at last in 1886 by soldiers under the command of Gen. Nelson A. Miles, the "Apache Devil" was held as a prisoner of war in Florida, Alabama and finally at Fort Sill, Okla., until his death in 1911. Thirty years later, Homer Yahnozhah, a Mescalero Apache and a direct descendant of Geronimo, was one of the heroes who fought at Bataan and Corregidor.

Out in Nevada a county and a city perpetuate the name and fame of Winnemucca, great chief of the Piutes, who in his day was a "first-class fighting man." Today that fighting tradition is carried on by his great-great-grandson, Stanley Winnemucca, who is a "Fighting Marine." Although more Indians have gone into the army than into the marines or the navy, there is at least one who holds high rank in our sea forces. He is Francis J. Mee, a Chippewa, born in Detroit Lakes, Minn., a commander in the navy.

The 'Model American Soldier.'

zons" who might be drafted under the Selective Service act. The case was taken under advisement by the judges who heard the arguments. That was late in October, 1941. Then came Pearl Harbor. After that fateful day, nothing more was heard of the case. The tribesmen of the Six Nations may have regarded themselves as members of an "independent, unconquered nation" living within the United States but they were Americans first, as well as "First Americans."

In that respect they were like the majority of the red men who had not waited for Pearl Harbor to join up to fight for their country. Even before the Japs' attack on Hawaii it was estimated that one out of every ten eligible Indians between the ages of 21 and 35 were already serving in the armed forces.

Descendants of Noted Chiefs. Among them were descendants of many famous Indian leaders whose names have come down in history because he was a patriot who rallied his warriors to defend their lands against the encroachments of the white men. One of the greatest of these was Tecumseh of the Shawnee.

KIUTUS TECUMSEH

nees, who tried to organize a confederacy of all the Indian tribes in the Ohio valley in the early 1800s but whose plans were upset when his brother, the Prophet, launched his surprise attack upon the soldiers of Gen. William Henry Harrison and was badly defeated at the Battle of Tippecanoe in 1811.

One of the first of the "fighting red men" of today who attempted to enlist in Uncle Sam's armed forces was Kiutus Tecumseh, a descendant of the great Shawnee leader. He was rejected for military service, however, because he was partially disabled by wounds he received while serving aboard a navy sub chaser during World War I.

There was a time when the name of Geronimo was a name of hatred and terror in the great Southwest, for this Apache leader blazed a trail of death and destruction through New Mexico and Arizona. Run to earth at last in 1886 by soldiers under the command of Gen. Nelson A. Miles, the "Apache Devil" was held as a prisoner of war in Florida, Alabama and finally at Fort Sill, Okla., until his death in 1911. Thirty years later, Homer Yahnozhah, a Mescalero Apache and a direct descendant of Geronimo, was one of the heroes who fought at Bataan and Corregidor.

Out in Nevada a county and a city perpetuate the name and fame of Winnemucca, great chief of the Piutes, who in his day was a "first-class fighting man." Today that fighting tradition is carried on by his great-great-grandson, Stanley Winnemucca, who is a "Fighting Marine." Although more Indians have gone into the army than into the marines or the navy, there is at least one who holds high rank in our sea forces. He is Francis J. Mee, a Chippewa, born in Detroit Lakes, Minn., a commander in the navy.

The 'Model American Soldier.'

If the Indians in World War II follow the precedent of those who fought in World War I, then some of our greatest heroes of the present

MAJOR GENERAL CLARENCE L. TINKER

ent conflict may be copper-skinned soldiers, sailors or marines. For more than 17,000 Indians heard the call to arms in 1917 and among them was Odus N. Leader, a Choctaw, who was foreman of a cattle ranch in Oklahoma. It is an ironical fact that, soon after we declared war on Germany, this "First American" was the victim of rumors that he was a German spy! To prove his loyalty, he gave up his business and enlisted. He saw action at Cantigny, at Soissons, at St. Mihiel and in the Argonne. He was twice wounded and gassed and when the French government sought a "model American soldier," of whom an oil painting was to be made to hang on the walls of the French federal building, where types of all the Allied races were to be represented, Sergt Odus N. Leader was chosen for that honor!

Other Indians who received the Croix de Guerre included Sergt. James M. Gordon, a Chippewa, who braved shell fire to rescue a wounded French officer, Chester Armstrong Fourbear, a Sioux, cited for his bravery as a messenger at Bellecourt, John M. Harper, a Ute; Marty Beaver, a Creek; Bert Hayman, a Seneca-Modoc; Gus Gertez, a Pueblo bugler; Joseph Oglohombi, a Choctaw, and Corp Nicholas E. Brown, another Choctaw, who was killed in action and received the award posthumously.

Winners of DSC and Croix de Guerre. Among those who received the Distinguished Service Cross of their own United States, as well as the Croix de Guerre of France, were Joe Schenderleon, a Crow and Navajo; A-Ta, a Hopi; and Thomas D. Saunders, a scion of the most formidable fighters the United States army ever encountered in the days of the old frontier—the Cheyennes. Here is his record, as given in General Orders of the Second Division:

"Corporal Thomas D. Saunders, Company A, Second engineers, while a member of the first wave cutting platoon, made his way forward in advance of the unit until he was in line with and in company with Private Wilkerson, Company B, Second engineers, were the first soldiers to enter Jaulny, then infested with snipers, and swept with wicked machine gunfire, being occupied by rearward detachments of the enemy. They alone captured 63 German prisoners after searching the caves of a hospital with persistence and courage. This at Jaulny, France, on September 12, 1918.

"Corporal Thomas D. Saunders, Company A, Second engineers; at St. Etienne-a-Armes, on October 8, 1918, he bravely conducted a patrol under heavy fire. During the night, he made a reconnaissance close to the enemy, of the position which his section was to occupy in the front, and returning, conducted it to that position."

SGT. ODUS N. LEADER

ciated by the white man. I am glad to represent the Indians of the United States in placing on the grave of this noble unknown warrior this coup stick and war bonnet, every eagle feather of which represents a deed of valor by my race. I hope that the Great Spirit will grant that these noble warriors have not given up their lives in vain and that there will be peace to all men hereafter. This is the Indian's hope and prayer."

JOHN'S COUNSEL TO CHRISTIANS

LESSON TEXT—II John 4-11; III John 5-12

GOLDEN TEXT—Beloved, I pray that in all things thou mayest prosper and be in health, even as thy soul prospereth.—III John 2.

Christians need guidance, especially in their home and church relationships. The apostle John, under the inspiration of the Holy Spirit, wrote the two personal letters known to us as II and III John. They abound in sound spiritual, practical advice. Note that these two words belong together, for what is truly spiritual cannot help but be tremendously practical and perfect for the direction of thought and life.

In these letters five admirable lessons are taught. Let us give heed to them. They are appropriate to our day.

I. Set an Example Before Your Children (II John 4-6).

We may not like to admit it, but our children are largely what we make them by their training—or lack of it—in the home. Parents have the grave and at the same time precious responsibility of being what they want their children to be. We set the mold of their thinking and acting, not only about material things, but mentally and spiritually, which is far more important.

Above all we must teach them by precept and example to love God supremely, and to walk after His commandments. Father, mother, have you done your duty? Are your children "walking in truth" (v. 4)?

II. Be on Guard Against False Teachers (II John 7-11).

We are not to countenance false teaching even by entertaining such teachers, or having close fellowship with them. To create the impression before the world and the Church that they are "not so bad," by appearing as their friends, is to partake of their evil works (v. 11). This is a serious matter, and one which is a problem in the Church today.

Such teachers may easily be recognized. They are aptly described by Dr. Douglass: "In all ages the Church has been plagued by those who want to substitute something for pure Christian faith, or to embroider it with bright ideas of their own conceiving. Such people may try to strip religion of its supernatural aspect and reduce it to a merely rationalistic system. They may seek to slyly loosen the moral standards of the Church because their own lives are deficient when measured by such standards. They may try to minimize the teaching of the cross because it stands for sacrifice." Watch against them, and stand against their destructive teaching.

III. Be Diligent in Putting Forward True Teachers (III John 5-8).

The door which should be closed against false teachers should be opened wide to those who are faithful teachers of the truth.

This refers primarily to the hospitality of the home, and reminds us of a grace which has been all but forgotten in these days of small apartments.

Whether we are able to open our homes to God's servants or not, we can show a Christian spirit of genuine hospitality in helping to bring them forward (v. 6) in their work. This may be done by gifts of money, by kindness shown in time of need, by a real interest in their work, by recommending them to others who wish to hear the truth.

Do everything possible, then, to hinder the false teacher, and be just as diligent to put forward the ministry of the true man of God.

IV. Do Not Trust Proud, Self-Seeking Leaders (III John 9-11).

A man may be orthodox, and intensely loyal to the denomination, and at the same time be a wicked man whose example is to be shunned. No word is said against the teaching of Diotrephes. He was not condemned for being careless about the affairs of the church, or unfaithful in his attendance and devotion to its interest as he saw them.

The sun of Diotrephes was pride, a desire to be the boss of the church, "No. 1 man" in its affairs. Lacking the true spirituality which always results in humility, he opposed the apostle. Not only did he refuse to receive him, but used pressure on others who were willing to be hospitable.

V. Emulate the Life of the Man of Good Report (III John 12).

A good man! No words of praise could possibly surpass such a testimony. The world is full of brilliant, skilled, wealthy and prominent people, but there is an appalling dearth of good men and women.

How refreshing to meet, and how delightful to know, such a man—a woman. Like Demetrius, they have not only the witness of the Church, and of the truth, but also of "all men." But last week we said the world hates real Christians. It does, but it also respects them, and is forced to bear witness to their reality and goodness.

Professed fellowship with God in Christ which does not result in goodness of life may well be scrutinized.

HOUSEHOLD MEMOS... by Lynn Chambers

Serve Perfect Little Cakes for Garden Party (See Recipe Below)

Keep Cool!

Foods that don't cook the cook and leave a lot of K.P. after the party is over are two golden rules for summer entertaining. If you are baking anything, try baking in cool morning hours, and if there's a warm dish to be served, make it something that doesn't require more than 15 minutes of cooking.

If your table decorations and settings are cool appearing and the food carries this out further, then you will have done a lot toward making your guests comfortable. Refreshments may be simple, in fact, they should be, for then guests and hostess alike can enjoy themselves. Here's a lovely salad that's the last word in coolness and smoothness, thereby filling the order for perfect summer refreshment:

*Orange Ring Salad. (Serves 8)
1 tablespoon gelatin
½ cup cold water
½ cup boiling water
1½ cups orange juice
Juice of one lemon
1 tablespoon chopped mint
½ cup sugar
1½ pounds white grapes, skinned and seeded
2 cups shredded lettuce
2 packages cream cheese
1 cup sour cream dressing
Soak gelatin in cold water 5 minutes. Add boiling water, lemon and orange juice, sugar and chopped mint. Stir until cool. Mash and form cheese into balls the size of large marbles. Pour a little of jelly into bottom of a mold and place balls at intervals while pouring on thickened jelly. Place in refrigerator and chill until firm. Unmold and fill center with grapes mixed with lettuce and dressing. Surround mold with peeled orange sections. Serve with crackers.

Sour Cream Dressing.
½ cup french dressing
1 teaspoon sugar
1 cup sour cream
Mix ingredients well and chill thoroughly.
A lovely combination of citrus fruit juices are included in this salad guaranteed to keep you cool:
Orange Ice Salad. (Serves 6)
2 cups orange juice
½ cup lemon juice
½ grapefruit
1 slice canned pineapple
1 large orange
½ cup sugar
½ cup water
Grated rind of 1 small orange
Cook sugar, water and grated rind together for 5 minutes after coming to a boil. Strain and cool. Add to lemon and orange juice and freeze. Pack into a ring mold. Freeze until firm, then unmold on lettuce. In the center place a bowl filled with mayonnaise, and garnish around outer edge with sections of orange, grapefruit and pineapple.

Fruit Freeze.
1 fresh ripe pineapple
2 lemons
1 quart cold water
Fruit syrup to taste
Pare pineapple, remove eyes and core. Run pieces of pineapple through food chopper, add water, lemon and syrup to taste. Chill and fill glasses to within a third of the top and add a scoop of raspberry ice.

Sandwiches using unrationed food for fillings are always a grand way to take care of the refreshment problem:

*Hostess Sandwiches.
½ pound mincemeat, packaged
½ cup water
3 ounces cream cheese
Whole wheat bread
Mix mincemeat and water and cook until all moisture is absorbed. Cool. Cover thin slice of buttered whole wheat bread with cheese, softened with cream and slightly salted, then with mincemeat and another slice of bread covered with cream cheese. Cut in strips or fancy shapes and decorate, if desired with candied fruit.

*Cheese Sandwich Filling.
1 package cream cheese
6 chopped olives
3 pieces finely chopped parsley
3 strips cooked bacon, chopped fine
1 tablespoon horseradish
1 tablespoon mayonnaise
Mix all ingredients together, add salt and pepper to taste, and spread on buttered bread.

Are you having difficulties planning meals with points? Stretching your meats? Lynn Chambers can give you help if you write her, enclosing a stamped, self-addressed envelope for your reply, in care of her at Western Newspaper Union, 210 South Desplaines Street, Chicago, Illinois. Released by Western Newspaper Union.

Lynn Says:
Salad Pointers: Have all salad ingredients as cold as possible. Chill salad bowl and salad plates to assure absolute coolness to salads.
To skin tomatoes: Hold tomato on fork over flame and turn slowly for about 1 minute. Slip off skins.
To flute cucumber. Peel, lengthwise, and run prongs of fork through lengthwise, then slice cucumber thinly.
To sieve egg yolks or whites: This is pretty for garnishing. Separate yolks or whites from hard-cooked eggs, place in a small sieve, and rub through with wooden spoon on salads to be garnished.
To decorate lettuce: Dip edges in paprika.

To skin tomatoes: Hold tomato on fork over flame and turn slowly for about 1 minute. Slip off skins.

TISTS, FOREST CITY, IOWA. OF-
FICE PHONE 374, RES. 189. tc

Clifford Adair was at Mason
City on business Monday.

Rev. H. E. Harvey, Elwood and
La Nelle were dinner guests at the
Ira Overholt home Thursday noon.

Ira Overholt and R. A. Jorgenson
were at Mason City on busi-
ness Thursday afternoon.

Leo Esbeck has been assisting
with work at the Jacobs Hardware
Store the past week.

Mrs. Ed. Buntinbach and Mrs.
Lloyd Lau were Mason City visi-
tors Monday afternoon.

Little Larry Carrier of Straw-
berry Point, Iowa, is visiting with
Graydon Barz at the Harvey Barz
home this week.

Mr. and Mrs. Wayne Pavey and
daughter Carol Ann were visiting
at the parental Woodhouse home at
Plymouth, Sunday afternoon.

Miss Novella Bredbenner is at-
tending the Methodist Recreational
School which is in progress at the
Methodist Camp at Clear Lake this
week.

Mr. and Mrs. Robt. Risser and
son Bobbie, returned to Des Moines
Sunday after visiting for several
days at the parental P. M. Wil-
son home.

Lt. and Mrs. Lyle Wilcox of
Camp Claiborne, La. and Mr. and
Mrs. C. G. Waterman were dinner
guests Monday noon at the home of
Mr. and Mrs. R. A. Jorgenson.

Mrs. R. W. Elder entertained the
executive board of the Methodist
WCS at her home Thursday after-
noon. Lunch was served after the
business meeting.

Mrs. Martha Dreier of Milwau-
kee, Wisconsin, is visiting at the
Mrs. Clara Barz home and with
other relatives and friends in this
community.

First Lt. Ray A. Jorgenson, Jr.,
of Del Rio, Texas, and his parents,
Mr. and Mrs. R. A. Jorgenson were
dinner guests Friday evening at
the Lyle Liebendorfer home at
Forest City.

Mrs. H. E. Harvey and Mrs. C. A.
Arnold were at Fort Dodge Thurs-
day where they attended the Lab-
oratory School of Religious Educa-
tion. Only two of such meetings
are being held in Iowa. The other
is at Ottumwa.

Quite a number of young people
enjoyed playing games at the H.
E. Harvey home Wednesday even-
ing. Rev. Harvey will have lawn
games for the young people every
Wednesday night during the sum-
mer.

Mrs. J. C. Thomas and Miss Irene
Harms went to Alden last Tuesday
for a visit with relatives. Miss
Harms stayed for a couple of weeks
visit with her grandfather, while
Mrs. Thomas returned home Wed-
nesday.

Ruth, daughter of Mr. and Mrs.
Walter Kimball, returned to Boone
Saturday after spending a week at
the Wesley Lau home visiting with
Marjorie Lau. Prior to that Mar-
jorie had spent a week visiting
with Ruth at Boone.

The Klemme Legion Auxiliary
will meet Tuesday evening, July 6
with Mr. and Mrs. Frank Shultz
and Mr. and Mrs. Verner Lewis in
charge of refreshments. The meet-
ing will be held at the Community
Hall.

Pvt. Donald Peterson of Camp
Roberts, California, spent the past
week visiting with his parents, Mr.
and Mrs. Charles Peterson near
Goodell. Besides Donald, the Pet-
ersons have two other boys in the
service. James is at Camp Shel-
by, Miss., and Edward is over-seas.

C. J. Wille, president of the
Klemme Co-Operative Creamery;
Carl Wille, director; Paul Mueller,
manager and Walter Lemke, book-
keeper, attended the annual meet-
ing of the Iowa State Brand Cream-
eries, Inc., held at Mason City last
Thursday. The Klemme creamery
is a member of the group which
makes up the organization.

Wallace Pavey went to Water-
loo Sunday to attend the funeral of
his aunt, Mrs. J. E. Ridenour.

Lucille, daughter of Mr. and
Mrs. Albert Priebe, had her tons-
ils removed at a Mason City hos-
pital Tuesday. She is making a
good recovery from the operation.

Capt. and Mrs. A. H. Dulmes and
son Dick of Brigham, Utah, came
Monday for a short visit with Klem-
me friends. Capt. Dulmes was en-
joying an eight day leave which he
spent visiting with relatives in Ill-
inois, Wisconsin and Iowa. Capt.
Dulmes is stationed in an army hos-
pital at Brigham.

Lt. and Mrs. Lyle Wilcox of
Camp Claiborne, Louisiana, arrived
in Klemme Sunday to spend a
short leave at the parental C. G.
Waterman home here and with re-
latives at Mason City and Minne-
apolis. Lt. Wilcox will return to
camp the last of the week, but Mrs.
Wilcox will remain in Klemme.

The WCS of the Methodist
Church will meet this Thursday af-
ternoon at the church. The lesson
Leader is Mrs. Chambers and Miss
Mary Swanson has the devotions.
Hostesses are Mrs. Clarence Lem-
ke, Mrs. Melvin Neuberger, Mrs.
Sumner Trumbell and Mrs. Harry
Gibbs.

First Lt. Fred Beier, who is sta-
tioned at Norfolk, Virginia, left
Sunday evening after a fifteen day
leave which he spent visiting the
Elmer Beier and Wilbur Haefner
homes in Liberty township. He al-
so visited with relatives at Bel-
trami and Minneapolis, Minn., be-
fore coming here.

Mr. and Mrs. Bud Muray of
Britt and Miss Avis Barz were din-
ner guests Sunday at the home of
Mr. and Mrs. Geo. Thiemann.

First Lt. Ray A. Jorgenson, Jr.,
of Del Rio, Texas, arrived early
Friday morning and visited until
Sunday evening when he left for
Dodge City, Kansas. Lt. Jorgenson
acted in the capacity of a military
escort for Mrs. Marion R. Messing-
ham and little daughter of Water-
loo, Iowa, whose husband, 2nd Lt.
Messingham was killed in a bomb-
er crash at Albany, Texas, Sunday
night. Lt. Jorgenson brought Mrs.
Messingham to Iowa in her car.

Have you paid your subscription?

Mr. and Mrs. Christ Riet

4 Reasons Why You Should Insulate Now!

—V—

1. UP TO 30% FUEL SAVINGS

In the insulated house, fuel isn't burned to melt snow
on the roof. In thousands of homes insulation has
paid for itself by lowering the cost of heating.

2. REDUCES DANGEROUS INDOOR DRAFTS

"Indoor drafts" during cold weather in uninsulated
homes are caused by the difference in temperature.
With even temperatures throughout the house, these
dangerous drafts are reduced.

3. HELPS CURE "HARD-TO-HEAT" ROOMS

Because insulation helps keep heat in, the whole house
heats more evenly. You don't have to roast the rest
of the house to make the upstairs and downstairs
rooms all comfortable.

4. UP TO 15 DEGREES COOLER IN THE HOTTEST WEATHER

Even in the hottest summer weather your home can
be 15 degrees cooler. During the day when the out-
side temperature rises, your home remains cooler in-
side. And at night you get more comfortable, refresh-
ing sleep.

• SEE US ABOUT INSULATING YOUR HOME

Thanks! To The Farmers

• WHO HAVE HELPED US MAINTAIN A HIGH
QUALITY PRODUCTION THE PAST YEAR

—V—

BECAUSE OF THE FINE CO-OPERATION given us by
by the Farmers in this Community the past year, our
Creamery received high honors at the Iowa State Brand
Creameries, Inc. at their Annual Meeting held at Mason
City last Thursday when our buttermaker and manager,
Paul Mueller, received a Silver Medal in the Buttermak-
ers' Efficiency Contest with a score of 98.69.

WITHOUT THE CO-OPERATION of our Farmer Friends
who supply us with high quality, sweet cream, it would be
impossible for us to manufacture a high quality butter, so
we want to SHARE HONORS will ALL OF YOU in re-
ceiving this award.

AND . . . OUR FARMER PATRONS are also doing a
FINE JOB IN THE WAR EFFORT . . . as a large percent-
age of KLEMME CREAMERY BUTTER is being made
for our Armed Forces and for Lend-Lease to our Allies.
Much of our Butter was shipped to Russia the past year
through the Iowa State Brand Creameries, Inc., of which
this Creamery is a member.

FARMERS, YOU HAVE BEEN VERY LOYAL to us
and have assisted us in keeping up our high quality butter
by providing us with fine quality cream, and we thank you
sincerely. Let's keep up this fine spirit of Co-Operation
and all work together to do our part in winning the war.

Weds Exchanged At Thornton Ceremony

AN UTT IS BRIDE OF SELLERS

Wed June 30th At Home of Brides' Parents, Thornton

Home of Mr. and Mrs. William of Thornton was the scene of a beautiful wedding ceremony on the 30th, when Marie Utt, the daughter of Mr. and Mrs. A. Utt became the bride of the Sellers, son of Mr. and Mrs. A. Sellers of Goodell, with the members of the immediate families present. The Rev. Cal. Schuesch of Klemme officiated at the double ring ceremony. The wedding was beautifully decorated with snapdragons and blue delphiniums. The wedding march "Swing Low, Sweet Cherry" was played as the bride and groom were escorted by Miss Mary Louise, only sister of the groom. The bride was attired in a long gown of satin dress with accessories and wore a circlet of pink roses and white carnations. Her jewelry consisted of a diamond necklace, a gift from the groom. The bridesmaid, Mrs. Evered, wore a blue dress with a tea-rose corsage.

Immediately following the ceremony a delicious lunch was served to the bride's mother. A two-tiered wedding cake served as the centerpiece at the table. The bride graduated from the High School with the class of 1942 and since then has been assisting her parents on the farm. She attended the Giodell School and since then has assisted her father until about a year ago when he was employed by Mr. Utt. The couple will make their home with the bride's parents and the groom is employed.

What You Buy With WAR BONDS

Flying Fortress is to America's fleet what heavy artillery is to the Army. This gigantic four-engine bomber, equipped with heavy armament, carries about three tons of bombs and reaches a speed of about 300 miles an hour.

These ships carry a crew of seven men, weigh about 22½ tons, and have a wing spread of 105 feet and a motor develops 1,000 horsepower. We need more of these "Flying Fortresses" to compete with the Axis air force. You can help by investing at least ten percent of your income in War Bonds every payday. Buy them from your bank, post office or other convenient issuing agent. U. S. Treasury Department

Our Men In The Service

SGT. ASA ARNOLD RETURNS TO OREGON

Sgt. Asa R. Arnold, son of Mr. and Mrs. F. A. Arnold, who has been stationed at an army camp near Salt Lake City, Utah for a few weeks, where he has been taking special training, has returned to Oregon where he is now stationed at Oregon State College at Corvallis is taking special training.

Sgt. Arnold is within ten miles of Camp Adair, where he was formerly located. His new address is as follows:

Sgt. Asa R. Arnold,
A S T U 3900,
Oregon State College,
Corvallis, Oregon U. S. Army

LOREN GAST BEGINS COURSE IN ARMY FLYING

A-C Loren Gast, son of Mr. and Mrs. Herman Gast of Liberty township has completed his pre-flight training and has started the actual job of flying. Loren's address is: A-C Loren C. Gast, Hdq. 78, Col. Trng Det., James Millikin University, Decatur, Illinois.

"BUD" SAMPSON WRITES FROM PACIFIC AREA

Dear Mr. Jorgenson:

* * * I spent sometime on the Fiji Islands but am now on another island. Had quite a time on Fiji. The natives are friendly, living in grass huts and all go barefoot. The police made quite a picture, bushy hair that sticks straight up six to eight inches, wear waist skirts like a woman and going barefoot.

The natives live in fillages and dislike to work. Most of them live on coconuts, bananas a few things they grow.

I am now at a different island. Things have been pretty tough here. The U. S. seems a long way off. There are very few natives here and no types of recreation. Give my regards to Buster the next time you write him.

Cpl. N. L. Sampson,
% PM San Francisco, Calif.

HANCOCK TIRE QUOTA IS BOOSTED FOR JULY

The Hancock county tire rationing board met at the courthouse on Thursday and applications for tires were reviewed. The July quota is up 33 over the June quota.

The July quota is 83 grade 1 and 123 grade 3 tires. The tube quota for passenger vehicles is up from 77 in June to 101 in July.

Tire and tube quotas in July for trucks, buses and farm implements are also increased. The new quotas are: truck tires 69, tubes 62, implement tires 70.

The July new car and bicycle quota for the county is six in each case.

FIRE DAMAGES FARM HOME WEST OF GOODELL

The Belmond fire department was called to the Kramer farm home three miles west of Goodell last Wednesday afternoon. Mrs. Kramer discovered a fire on the roof, which damaged the upper story of the house and water damaged the lower floor.

The farm is three miles west of Goodell and known as the Rathbun farm, now owned by Clarence Hilbrand of Belmond.

What You Buy With WAR BONDS Wags!

No quadruped of the K9 contingent used by the Marines, the Army or the Coast Guard is purchased. They're strictly volunteers for the duration, loaned by their masters and mistresses. These dogs are taught to hear and smell and see enemies where humans cannot. They are invaluable at night.

Several K9 training stations are maintained by various branches of our fighting services. You may not have a dog to send to war but you can send your money. Buy War Bonds. U. S. Treasury Department

BABY PICTURES

The Times has been notified that due to a shortage of critical materials the will be some delay in obtaining cuts of the Klemme children which were taken by a Des Moines photographer some weeks ago. However, just as soon as the cuts are received the pictures of these little folks will appear in this newspaper. Because of conditions beyond our control we are unable to give dates of publication.

MAY TREAT NOXIOUS WEEDS WITH CHEMICALS

Canada thistle, quack grass, and other noxious weeds are ready for treatment with chemicals now.

County Extension Director Paul Henderson says that the weeds should be treated during the blossom stage, when root reserves are lowest and the weed can be damaged most. The treatment with chemicals, such as Atlacide of sodium chlorate, is recommended only for small patches or places that are not readily accessible.

Mr. Henderson advises using 1 pound of the chemical to 1 gallon of water. The weeds should be well covered. A high pressure sprayer will do the job best. If the work is done during a cool day or evening, there will be minimum evaporation and the kill will be more nearly complete. Avoid spraying during or preceding a rain or during hot, dry periods.

Following treatment, the weed patch should not be disturbed by mowing or burning, since the action of the chemical apparently continues for some time after the tops die. One treatment seldom is enough for 100 percent kill, and as many as three applications may be required.

4-H GIRLS CLUB OFFICERS PLAN PICNIC, JULY 13

At a meeting of the girls 4-H county officers plans were made for a picnic and training school for all the officers of the local 4-H girls clubs. This will be held in the conference room of the Central States building in Britt from 10:30 to 4:00 o'clock on Tuesday, July 13. The picnic lunch will be eaten at the park.

Plans are also made to continue the 4-H News Letter under the direction of the county officers.

USE COPPER SPRAYS TO CONTROL POTATO BLIGHT

It's advisable to use copper spray on potatoes in Iowa gardens these days. Such sprays will control late blight, a serious disease that develops and spreads during such weather as Iowa has had recently.

Use a spray containing 4 pounds of copper sulphate and 4 pounds of hydrated lime in 50 gallons of water. E. L. Waldee, extension plant pathologist, recommends. The spray will control insects if 1½ pounds of calcium arsenate of lead or lead arsenate are added.

For small plots use a spray of 2 tablespoonsful of calcium arsenate or lead arsenate and 4 to 6 tablespoonsful of dry Bordeaux in one gallon of water. One gallon spray should cover 2 rows of potatoes 100 feet long.

A dust of 70 pounds hydrated lime and 20 pounds fixed copper, or mono-hydrated copper sulphate, and 10 pounds calcium arsenate will help control both late blight and insects.

DR. GEO. B. SENIOR TALKS TO 4-H GROUP

Doctor Geo. B. Senior, Assistant Federal Veterinarian from Mason City, discussed Bangs Disease and its control at a combined 4-H club meeting at the Klemme Community Hall on Thursday evening, July 1. County Extension Director Paul Henderson reports that many questions were asked by the groups in this important disease.

The Liberty, Ell and Avery 4-H groups were represented at this discussion. A number of the fathers also attended this meeting.

H. S. BOYS, GIRLS AND WOMEN NEEDED FOR DETASSELING HYBRID SEED CORN

Boys and girls of 10 years, or older, and women who are interested in a job to insure our seed corn supply for 1944 should sign up at one of the following places:

Britt: H. H. Mullin
Corwith: Garvel Riswold
Crystal Lake: A. R. Janssen
Garner: Co. Extension Office
Goodell: Ira Langlitz
Hayfield: Oliver H. Schnebly
Hutchins: Emmett Sheets
Kanawha: L. E. Faber
Klemme: Walter Lemke
Woden: Ray Valley.
These jobs pay well, and they really are important.

STATE PARK LOCATED IN HANCOCK COUNTY

Lookout Tower In Pilot Knob State Park

One of the most beautiful state parks in Iowa is Pilot Knob State Park located in the northeast part of Hancock County. On a clear day one can see a long distance from the Lookout Tower. The park is well improved with picnic grounds and ovens, shelter house and nature study trails, along which can be found a variety of plant-life.

The park is easily reached by taking paved highway U. S. 69 to Forest City, and then the gravelled road east.

Iowa has 86 parks and recreation areas and it is possible for any Iowa resident, regardless of where he lives, to reach at least one state-owned recreational area by driving not more than 45 miles from his home.

ROY SCHAEFER BEATS OLD RECORD FOR SHEEP SHEARING

Roy Schaefer finished his annual sheep shearing run last week and sheared approximately 2,600 sheep, which was the largest run he has had so far.

Roy, this year, was assisted by Mrs. Schaefer who bled and tied nearly 2,300 fleeces, besides catching the sheep for Roy. Mrs. Schaefer was ill with the mumps for a time and so did not handle as many sheep as her husband.

Fleeces usually average from 7 to 10 pounds, states Mr. Schaefer, and the heaviest fleece sheared by them this year weighed 23 lbs, which brought the owner over \$10.

LIGHTNING CAUSES DAMAGE AT JOHN LASS FARM HOME

Lightning which struck the John Lass farm home south of Klemme at 2:00 o'clock Saturday morning, caused some damage.

A large glass window was knocked out and broken, all of the electric light bulbs at the farm were burned out, telephone and radio badly damaged.

Mr. and Mrs. Lass said the noise was terrific and that sparks were flying everywhere but no fire was started.

Klemme, Ia., as 2nd Class Matter

SUBSCRIPTION RATES:
In Hancock and Adjoining
Counties per year in advance \$1.50
In Iowa, per year in advance \$2.00
Outside of Iowa, per year \$2.50

All orders for papers going to
the country and adjoining
counties should be discon-
tinued at least 10 days before
the date of publication. All
orders for papers going to
the city and suburbs should be
discontinued at least 5 days
before the date of publication.
If no order is received by the
publisher 10 days before the
date of publication, the paper
will be sent to the subscriber
at the rate of \$2.50 per year.

Keep making summer plantings
of vegetables as soon as small
sections of the garden have finished
producing a spring garden crop.

Gardeners in northern Iowa
should have planted their storage
carrots and beets by this time. Gar-
deners in southern Iowa should not
plant plantings of carrots and beets
later than July 15. It is best to
select a little thicker than
normal. Early varieties of bush
beans such as Stringless
Green Pod can be planted in early
July. Varieties of sweet corn
which can be planted at the same
time. Gardeners who have used the
method of making small successive
plantings of sweet corn, including
plantings in July will enjoy deli-
cious roasting ears over a period
of about 2 months.

It appears that 75 percent or
more of the gardens observed have
been over-crowded. Crowded
gardens usually produce less than
well-planted properly spaced. The
quality is also inferior. Consider-
able attention has been spaced 6
inches or less proper spacing is 12
inches between plants in the row
and not less than 36 inches between
rows. Consult Victory Garden Pam-
phlet No. 60 available at county
extension offices for thinning dis-
tances for all garden vegetables.

Gardeners who have too many
plants in their gardens get too old
to dig them out. Freezing should al-
low them to mature on the vine.
The matured peas can be harvested
and stored in jars for winter use.
There is no need for
to waste. Allow the se-
mature on the plants be har-

A good quantity of fresh veget-
ables and fruits should be stored
for winter use. This will de-
pend on the amount of canned gar-
den produce used. We may have
a wet weather next year. It is
advisable to build up a reserve
from our gardens, especially in
the fall.

Beetroot is too old to use when
the clusters are yellow.
Castor flower clusters with about
4 inch stems of the stems.

The object of spray outfits and
dusters is to kill the aphid. No more
of the valuable garden access-
ories are being made, so those who
don't have a garden sprayer or
duster will be forced to return to
the sprinkling can as a sprayer or
to the cheesecloth bag as a duster.

CELEBRATED BIRTHDAY JULY FOURTH

C. G. Waterman had a birthday
party on Sunday, July 4th.
The party was served at the Rev. H. E.
Harvey home with the following
guests: Mr. and Mrs. C. G. Water-
man, Mr. and Mrs. Harvey and El-
wood, Mr. and Mrs. Ira Overholt
and Mr. and Mrs. R. A. Jorgenson.
The meal was prepared on Rev.
Harvey's fireplace.

DEPUTY SHERIFFS ARE APPOINTED BY BROWER

Sheriff L. M. Brower Friday ap-
pointed T. W. Tompkins and Chas.
J. Kimble as special deputy sher-
iffs for Civilian Defense. The ap-
pointments were approved by the
Board of Supervisors.

War Plant Guards Being Aided by Clever Robots

Tiny robot sentries, many times
more efficient than men in storm,
fog and darkness, are now aiding
human guards along the miles of
high wire fences that enclose some
of the country's greatest war-pro-
duction plants.

Six months of tests under every
conceivable condition were said to
have proved the new sentry system
to be the most efficient yet devised,
with the robots "hearing" even the
whisper of a person, the snap of a
wire-cutter or the sound of a pick,
and relaying these warning sounds
instantly to the human watchman at
his post or to a central guard sta-
tion inside the plant.

Engineers said that the "acoustic
fence" apparatus, as it is called,
has the effect of multiplying by
many times the number of guards
on duty in adverse weather and at
night. During heavy fog, blackouts,
and night storms visibility is often
zero and guards would have to be
placed almost elbow to elbow to
provide absolute protection along
fences that often are 15 to 20 miles
long.

But the robot sentinels can keep
an alert 24-hour watch over every
foot of fence, regardless of weather,
enabling the human guardsmen to
hear what is going on for blocks
or even several miles along the
fence line, and to tell instantly the
location of any disturbance. Actual-
ly the fence itself serves as the ro-
bot's ears, capable even of over-
hearing voices speaking in whispers.

Celebrated Italian Tenor Lived in Two Centuries

Giovanni Battista Rubini was a
celebrated Italian tenor, born at Ro-
mano, near Bergamo, Italy, April
7, 1795. His father, a music pro-
fessor, was anxious that the boy
be a musician, and at the age of
eight young Giovanni sang in church
choirs and played the violin in an
orchestra. He continued concert
work, his first important concert
being at Naples, but his career prob-
ably dates from his first appearance
in Paris in 1825.

Between 1831 and 1843 he sang
either in England or Paris, and in
1843 he began a tour with Liszt
through Holland and Germany. After
they separated at Berlin, Rubini
went on to St. Petersburg where
the Emperor Nicholas made him
director of singing in the Russian
dominions and conferred on him the
rank of colonel. He retired in 1844
to a home he had purchased near
Romano and when he died there on
March 2, 1854, he left a great for-
tune accumulated from his operatic
career.

Police Shows Courtesy Pays
Police officials of Detroit, Mich.,
believe courtesy on the roads and
the absence of traffic cutting and
racing reduce accident rates sub-
stantially, so they are putting into
practice an idea that a ticket of re-
ward should be given courtesy driv-
ers—and by the same traffic "cops"
who ticket their erring ways.

During the few days the tickets
of reward have been issued, they
have been presented to a milkman
who stopped his truck to help a
confused, elderly lady from the
middle of the street; a driver who
helped push a stalled automobile to
the curb after it had stopped for a
red light; and two small boys who
got off their bicycles at busy inter-
sections and pushed them across the
street on the outside of pedestrian
traffic.

While the plan still is in its in-
fancy, the police department hopes
that a system may be developed for
keeping a record of courtesy cita-
tions, and that eventually windshield
stickers will be used to identify care-
ful and courteous drivers.

Decline in Castor Bean Growing

The castor bean plant, from which
we get castor oil, is not a legume, as
many suppose. Although the plant
grows wild and is cultivated in tropi-
cal and subtropical countries, it is
cultivated also in the warmer parts
of temperate zones. The plant has
been grown in this country for more
than a hundred years but became
an important commercial crop only
in certain sections of Oklahoma,
Kansas, Missouri, and Illinois in the
latter part of the 19th century, from
1860 to 1900. Since that time, how-
ever, the industry has declined and
practically has been abandoned in
this country. This decline has been
attributed chiefly to the reduction in
price caused by the importation of
large amounts of cheap castor bean
seed from other countries, especial-
ly from India, China and Brazil.

Pershing's Auto Number

Routine disclosure that Army
Registration No. 17-561 has been is-
sued to a light sedan assigned to
the 503rd Parachute battalion at Fort
Benning, Georgia, recalls that that
was the number of the car used by
Gen. John J. Pershing as commander
of the A.E.F. in France almost
a quarter of a century ago.

The big locomobile limousine
which he used in France is now in
the museum of the Holabird quarter-
master depot. After the World war
the car turned up in Washington in
1922. Two years later it was at
Holabird, then returned to Washing-
ton where it was used by the quar-
termaster corps. In 1927 it was
again returned to the Holabird de-
pot, where it stands in the museum.

For Highway Safety, Here Are '12 Commandments'

STATE COLLEGE, PA.—Ameri-
can automobile operators were pro-
vided today with "12 command-
ments" for blackout driving by
Amos E. Neyhart, administrative
head of the Institute of Public Safe-
ty at the Pennsylvania State college.

Neyhart claims that accident tolls
will mount during blackouts unless
drivers are extremely cautious.

In listing his 12 "do's and don'ts"
Neyhart placed first and foremost
the warning "stay home if you can."

His rules follow:

1. STAY HOME. Don't drive ex-
cept for absolute emergency if you
are home when a warning is sound-
ed.
2. MASK CAR LIGHTS. If you
are in areas where blackouts are
likely to occur, keep material for
temporary masks in your car.
3. DRIVE HOME. When air raid
warning sounds, stop your car at
right-hand curb, turn off lights
while putting on headlight masks,
and drive home immediately.
4. LOCK YOUR CAR. If no masks
are available, park your vehicle
off main traffic arteries, preferably
on private property. Turn out all
lights and lock car securely to pre-
vent possible use by saboteurs.
5. ADJUST EYES TO DARK. If
you must drive, wait from 15 to 30
seconds for your eyes to become
adjusted to darkness.
6. OPEN WINDSHIELD. Regard-
less of weather, open your wind-
shield if possible.
7. DRIVE SLOWLY AND WITH
ALERTNESS. Never drive more
than 15 miles per hour. Assume pe-
destrian doesn't see you.
8. USE YOUR HEAD. Prepare
for an emergency stop. Keep well
to the right of the road. Passing is
extremely hazardous in a blackout.
9. TAKE SPECIAL CARE AT
CROSSINGS AND TURNS. Practi-
cally stop at intersections. The
sides of your car are almost invis-
ible. You can increase visibility by
placing white adhesive tape on edge
of running board and on fenders.
10. ALLOW FOR BLACKOUT
HANDICAPS. Watch carefully for
traffic signs and signals.
11. NEVER BLOCK ROAD. Leave
extra space near fire hydrants and
park at least 25 feet from corners.
12. DIRECT LIGHT BEAMS
DOWNWARD. Masks should be con-
structed as directed by the Office
of Civilian Defense and should direct
your light beams downward. Avoid
leakage of lights.

Native lumber may be used ef-
fectively as building material if it
is indicated at less than half of
is allowed to dry properly. Cotton-
wood makes an excellent lumber
for many purposes; a period of a-
bout 60 days is needed for air-sea-
soning it. Soft maple should be
dried from 60 to 90 days, and hard
maple requires from 150 to 200
days.

Vaccination of horses against sle-
eping sickness insures against a
halt in work at a time when food
production is all important and is
also an effective means of prevent-
ing loss of animals. Wet weather,
which favors mosquitoes and other
carriers of the disease, usually
fosters an outbreak of the disease.

Eggs can be preserved for use
several months from now by stor-
ing them in water glass. It is es-
pecially important to immerse
them in the water glass while they
are still warm or within a few
hours of being laid.

Lowe Brothers
STANDARD
BARN PAINT

There's a four-way saving for you
in LOWE BROTHERS STANDARD
BARN PAINT:

1. It covers solidly more area per
gallon than "cheap" barn
paint, so less paint is needed.
 2. Protects your buildings longer,
by lasting longer.
 3. Spreads easier, saves labor.
 4. Holds its color—eliminates fre-
quent repainting.
- In addition, there's an extra saving
at this featured price.

Around Iowa

NON-RATIONED VACATION

Tom Richards and Walter Saur
of Elkader assembled pup tents,
blankets, frying pans and ration
books and started on a vacation
trip to Madison, Milwaukee and
Chicago. They planned to make
the entire trip by bicycle. Before
returning home they intend to see
a major league baseball game.

TURKEY DINNERS

Some people will not have to
wait until Thanksgiving for their
turkey dinner. V. H. Nichols of
Clear Lake recently shipped 2,000
turkeys to Chicago and New York.
Most of the birds were purchased
by the government.

NOT FUNNY

Many tons of hay in the Blencoe
community may be lost, unless the
one who took the cable from the
hay stacker owned by Ed. Frisk
returns the stolen article. Several
neighbors had already cut hay and
were waiting for Mr. Frisk to
stack it when the steel cable was
taken. A reward for return of the
cable was announced by Mr. Frisk.

IT ENDED WELL

The fun of picnickers of Pulpit
Rock Park in Decorah was dis-
turbed when Carrol Ann Petedson
was reported lost. The river was
also searched for the little girl, but
to no avail. Later, a visit to the
Peterson home in Decorah discov-
ered the girl, sound asleep. She had
tired of the picnic and had gone
home.

PREHISTORIC ELEPHANT

A 50,000 year-old jawbone of a
prehistoric elephant now is in the

possession of Dr. H. P. Field, De-
corah dentist. The bone weighs 40
pounds. It was found in Allamakee
county recently and is considered
by authorities to be one of the best
Iowa specimens ever found.

MILLION CHICKS

An estimate has been made there
are more than 1,000,000 chickens
being raised in Grundy County
this year. This is a per-farm av-
erage of 500 to 600. The average
for the county is up 25 percent this
year over last year.

NEW FEATURE

The Sheldon Sun, weekly news-
paper, is starting a new feature.
Pictures of "unseen babies" of ser-
vice men, photographed with their
mothers will be shown in the pap-
er. Later, a free copy of the pic-
ture will be mailed to the man in
service.

TOOL SLIPPED

Pete Willey of Guthrie Center
had some explaining to do when
he came from work showing a
black eye. His story was that a
screwdriver slipped and struck him
in the corner of the left eye.

EXCEEDS SPEED LIMIT

The winner of the annual 400-
mile racing pigeon event of Ameri-
can Racing Pigeon Union recent-
ly flew the distance from Denison
to Chicago averaging 50.5 miles per
hour. The winning bird left Denison
at 6:30 A. M. June 12, and arrived
in Chicago at 2:19:54 P. M. that
afternoon. The total time consumed
was 7.8 hours.

WANTS RETURN OF BARREL

The person who took gasoline
from the tractor belonging to
Ray Hooper of Gladbrook also took
a 50-gallon barrel of gas and fill-
ing can. Ray wouldn't mind the
loss quite so much if the "borrow-
er" would return the gas drum,
as it cannot be replaced.

EXPLODES

The explosion of an emery-
wheel caused Robert Smith of Le-
Mars to suffer a deep cut above
the right eye. Parts of the explod-

ing wheel were found
way.

THE THIRD ONE

The birth of Cheryl
made three "June
John Nash home

What You Buy With
WAR BONDS
Wigwag

Frequently the Navy, the Coast
Guard and the Signal Corps finds it
expedient to relay messages without
benefit of telephone, telegraph or
radio. That is when the semaphore
system is employed.

Like a single flag in the "Wig-
wag" system, the purchase of a
War Savings Stamp or Bond, in it-
self has an infinitesimal effect upon
the entire war effort, but when 130
million determined people set their
minds to make our War Bond drives
successful, the result is anything but
infinitesimal U. S. Treasury Department

Where weather conditions have
made normal seeded crops out of
the question, farmers will find it
necessary to turn to quick-matur-
ing feed crops. Of these, soybeans
probably offer the best possibili-
ties. Other crops that may be se-
eded relatively late are sudan grass,
sorghum, rape, millet and
buckwheat.

Gardeners who grow the best
vegetables are the ones that keep
in close touch with their gardens.
The habit of close inspection of
each kind of vegetable every day,
if possible, is a habit that is re-
warding

ROAD EAST OF KLEMMIE
IS BEING RE-BUILT

The county road running east
from Klemme to the Cerro Gordo
county line is undergoing construc-
tion and at this writing has nearly
all been rebuilt.
The road will be surfaced with
gravel later.

Meteorites Are Result
Of Planets Exploding

Our solar system had two addi-
tional planets until about 100,000,000
years ago. They exploded about that
time, scattering their material
through space, and the earth is now
collecting samples of what they
were made of in the form of meteor-
ites. The meteorites are the pieces
of stone or iron, or both together,
that reach the earth unconsumed
when a "shooting star" passes
through the atmosphere.

Dr. William D. Urry of the de-
partment of physical chemistry,
Massachusetts Institute of Technol-
ogy, informed the American Asso-
ciation for the Advancement of
Science at its recent summer meet-
ing that he had calculated the age
of 25 meteorites by measuring
their content of uranium and helium
and found that the ages ranged from
100,000,000 to 2,900,000,000 years,
with most of them over 1,000,000,000
years.

Using various astrophysical argu-
ments the conclusion is reached,
said Dr. Urry, that these meteorites
are the debris of two planets of our
own solar system that came to grief
within the last 100,000,000 years.

The asteroids, extremely small
planets, which number several thou-
sand and go round the sun in orbits
between those of Mars and Jupiter,
are believed to be the remains of a
former large planet. Some astron-
omers have sought to arrange the
asteroids into groups having com-
mon properties, and one believed he
detected three groups with some-
thing in common in the elements of
their orbits, indicating that there
originally may have been three
planets in this space.

Parasite Wasp Shows
It Knows a Thing or Two

Female insects of at least one
group can regulate the sex of their
offspring. Entomologists of the
United States department of agri-
culture find that a parasitic wasp
brought here from the Orient 15
years ago to help control the Jap-
anese beetle varies the treatment
of her eggs according to the size of
the host on which she lays them.
She withholds the sperms that in-
sure a female hatch from eggs de-
posited on the relatively small
worms—beetle larvae—that have
moulted only once to enter the stage
known as the second instar. Nearly
all the young wasps from these eggs
are males. The hatch from eggs
laid on the larger, third-instar lar-
vae, however, is preponderantly fe-
male.

To prove that the female wasp
(Tiphia popillivora) fixes the sex of
her progeny when she deposits her
eggs, the entomologists transferred
eggs laid on second-instar larvae to
third-instar larvae and those laid on
third-instar larvae to second-instar
larvae. Mostly males hatched out
on the third-instar hosts and mostly
females on the second-instar hosts.

War and Womens Clothing

What effect will the exigencies of
war have on the American woman's
wardrobe? For one thing, women
will undoubtedly wear simpler, more
tailored costumes, believes Mrs.
Louise Pinkney Sooy, University of
California associate professor of fine
arts and instructor in costume ap-
preciation for the University's Ex-
tension division. "Another result
that is already becoming apparent
is the simplification or the elimina-
tion of costume accessories. For
years we have dwelt upon the im-
portance of correctly matched, im-
peccable accessories for a costume.
Now suddenly, with the new sim-
plicity wrought by wartime activi-
ties and lack of materials, we find
that they can more or less readily
be dispensed with. No longer will
we insist upon the matching gloves,
bag, shoes, and hat, with severe at-
tention to detail."

Pots, Pans

A private at famed Kelly Field re-
cently learned that all generals don't
wear stars.

On orders from his first sergeant,
the dazed private walked into head-
quarters and proudly strode up to
the sergeant major.

"I am to report to General Mess
at once," he said with an embar-
rassed importance. The sergeant
major looked at the young man and
then with a smile in his eyes, hum-
bly told him he could find the "gen-
eral" in the main dining room of
the new barracks.

With even more dignity and proud-
ness, the private made his way to
the dining hall, only to see his castle
tumble into a litter of pots and pans.
He was to start a week's tour of
kitchen police, the dining hall and
kitchen being called "General
Mess."

Cotton Research

Botanists at the University of Tex-
as are engaged in a form of research
which may, they hope, result in vast
benefits to cotton growers. This de-
partment has over 20,000 cotton
plants, and an effort is being made,
through cross breeding, to produce
cotton with superior fiber and per-
haps resistant to root rot and other
diseases. They are also working
along lines which they hope will
result in finding a cotton which re-
quires a minimum of moisture. Sur-
veys of national textile mills have
been made and the type of machin-
ery used noted with a view of de-
vising improvements or new ma-
chines which will produce finer
goods at less cost.

The average annual wage of a
hired man, based on a 20-year av-
erage for July, has amounted to
the equivalent of the farm price of
600 pounds of hogs, or 550 pounds
of cattle, or 150 pounds of butter-
fat or 74 bushels of corn, according
to John A. Hopkins of the econ-
omies department at Iowa State
College.

WEEKLY NEWS ANALYSIS

Allies' Italo-Balkan Moves Factor In Baffling Axis on Invasion Plans; U. S. Moves to Solve Corn Shortage; Russ War Stepped Up on Orel Sector

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)
Released by Western Newspaper Union.

TELEFACT

NATIONAL INCOME AND WAR

MEDITERRANEAN:

Balkan Powder Keg

The summary closing and opening of the Turko-Syrian frontier within a 48-hour span by the Allied command had presaged new and important military moves, as the Mediterranean area from Italy to the Balkans had tensed for oncoming action.

Increasing evidence that the Axis' much-vaunted Balkans bastion might be a powder keg instead came in the form of reports from Ankara that Rumania had sounded out the Allies on armistice terms. From Ankara, too, came steadily mounting proof of Turkey's closer friendship with the United Nations. The appointment of Brig. Gen. Richard G. Tindell as American military attaché in Ankara and the dispatch of a contingent of Turkish fliers to America for special training were significant steps in this direction.

Reports from Axis sources had reflected increasing official bafflement over the Allies' next moves. After telling its listeners of "many landing craft concentrating from African coasts toward Pantelleria and the massing of a million troops for an Italian invasion," the Rome radio had broadcast a report that "large British forces were concentrating along the southern frontier of Turkey."

Observers for months had known that large numbers of Allied troops had been training in Syria. Lying in the eastern corner of the Mediterranean, Syria offered an effective base for operations against Crete, the Italian-held Dodecanese islands, Greece proper or other Axis points in the Balkans.

BUREAUCRATS:

Congress Compliments

The much-criticized home front government bureaus were given a friendly pat on the back and a virtual clean bill of health when the house appropriations committee approved appropriations of \$2,939,441,504 for 18 civilian war agencies, including the Office of Price Administration and the Office of War Information.

In making public its highly complimentary report on the work of these agencies, the committee admitted that mistakes had been made and will be made, but denounced those who criticize "without knowledge of the tremendous burdens thrown on agency heads and of the great strides made in putting the United States on a war footing."

"The type of criticism that serves only to create public distrust in the agencies is not helpful to the war effort," the committee's report said.

OIL PACT:

Navy Cancels Deal

The tempest over the navy department's contract with the Standard Oil Company of California for operation of the Elk Hills naval oil reserve subsided when Secretary Frank Knox announced cancellation of the agreement.

The decision to cancel followed a legal ruling by the department of justice that the proposed arrangement exceeded the authority granted by law, a navy announcement said. Norman H. Littell, assistant attorney general, testifying before the house public lands committee, said that a department report sent to the White House had concluded that the navy's agreement with the oil company was "illegal and invalid."

Colonel Knox declared that his own investigation of the agreement established that "no improprieties had been employed by either party to the negotiations."

CORN:

'42 Loans Called

First steps in a program to solve the increasingly serious corn supply situation came when the government formally called loans on 47,000,000 bushels of 1942 crop corn effective July 15. The government had previously used deliveries of grain through liquidation of 1938-41 loans to restore the operations of two closed-down processing plants.

The corn loan move was described as "only an immediate palliative, not the final answer to the problem," and it was stated that efforts to find a solution would continue.

The government's action came as the War Food Administration and Commodity Credit corporation received a request from the Corn Industries Research foundation for either complete lifting of federal price ceilings on grain or the imposition of ceilings on hogs. Meanwhile J. B. Hutson, director of the Commodity Credit corporation, said that 25 million bushels of privately owned corn in grain elevators would be seized for plants manufacturing by-products for war uses, unless "crops can be moved off farms."

RUSSIA:

Orel to Forefront

A stepping-up of land activities was reported on the Russian front, with especially heavy fighting reported in the Orel sector. Here, Russian troops defending a strategic newly won bridgehead were reported to have beaten off eight German counter-attacks.

It was reported that strong formations of Soviet planes had broken up German formations supporting Nazi tank and infantry units. The Germans, however, were reported bringing up reinforcements in an effort to forestall the possibility of Russian flanking movements against Orel, strategic Nazi-held base midway between Moscow and Kharkov. Heaviest fighting was reported in the vicinity of Mtsensk, 30 miles northeast of Orel.

Russian air forces continued their efforts to disrupt Nazi supply concentrations by striking at four railroad junctions over which German supplies and reinforcements must move for the Bryansk-Orel-Smolensk area. The junctions were Roslavl, Unecha, Vladislavka and Novozybkov.

PACIFIC:

13-to-1 Record

With all indications pointing toward major sea and land engagements looming in the Pacific, air activities still held the center of the war stage in this theater.

Most dramatic of all engagements was that fought out over the Solomons when American planes shot down 77 Jap aircraft over Guadalcanal while losing only six of their own. This 13-to-1 score turned in by American combat fliers in the Solomons who have heretofore included army, navy and marine pilots was regarded as the best ever recorded in a single air action anywhere.

But Allied planes were not idle elsewhere. Liberator bombers made their second heaviest raid of the war on Jap-held Kendari, on Celebes island, 850 miles northwest of Darwin, Australia, damaging airdromes and destroying planes parked on the ground.

In China, a military spokesman for Generalissimo Chiang Kai-shek charged that the Japanese again were employing poison gas in their operations in Suiyan province. Meanwhile Chiang's forces claimed new successes, including the recapture of strategic towns south of the Yangtze river.

TAXE

50 Billion Goal

Secretary Henry Morgenthau disclosed that the treasury would trim its request to congress for more new taxes down to \$12,000,000,000 instead of the \$16,000,000,000 originally planned. Nevertheless, this would be enough to raise the public's overall tax bill during the 1944 fiscal year to \$50,000,000,000.

Declaring that the Treasury's goal was to pay half the annual war costs "as we go," Mr. Morgenthau estimated that this goal is \$4,000,000,000 less than President Roosevelt's January budget objective.

Treasury recommendations for raising the additional revenues were slated for submission to congress before its proposed summer recess.

RATIONING:

Eight New Plans

Louis J. Kroeger, OPA rationing official, disclosed that eight new rationing programs are being prepared by the Office of Price Administration and may be instituted within the next year.

Mr. Kroeger told a house appropriations committee that two of the ration plans will be placed in force immediately, but that six others, including coal rationing, are contingent on directives from other government agencies. The two programs definitely scheduled cover cooking and heating stoves, and a new system of allotting foods to all types of institutional users, including hotels and restaurants, which will not affect consumers directly.

Except for coal, the other prospective rationed items were not listed, but Kroeger said they included goods for which the government officials see a definite possibility of shortages in the next fiscal year. Eggs, milk and other foods have been mentioned recently by government food experts as possible candidates for rationing.

RUSS-POLES:

Postwar Assurances

Assurances of Soviet aid in restoring a strong and independent Poland after the war were given by Premier Josef Stalin of Russia.

Stalin's promise was contained in a message sent to the first Congress of Polish patriots in Russia who told him that "we will not allow persons who strive to drive a wedge between the Polish people and the Soviet union to trouble the water."

Observers noted that the Polish government-in-exile had no part in the exchange of amenities between the two peoples. Russia recently broke off diplomatic relations with General Sikorski's group in London, because of charges by the Poles of Russ executions of Polish army officers and counter-charges by the Soviets of pro-Axis espionage by the Poles.

EUROPE:

Air Blitz Continues

Even as English King George V was inspecting the Allied armed forces in North Africa, air forces of the United Nations were preparing for the war's next decisive move by softening-up forays against Axis positions from western Europe to the Eastern Mediterranean.

In a single six-day offensive, British and American bombers hammered destruction on nine different major German cities. These included Cologne, Dusseldorf, Munster, Wilhelmshaven, Cuxhaven, Bremen, Bochum, Kiel and Oberhausen. Heaviest assault was reserved for Cologne, industrial capital of the Rhineland and the third largest city in the Reich.

In the Mediterranean, American and British bomber fleets swarmed over Sicily, attacking five major Italian air bases and maintaining a day-and-night marathon of disaster to the Axis. The Allied fliers attacking Sicily reported tough fighter opposition and strong anti-aircraft fire, contrasting sharply with the lack of Axis opposition over Pantelleria.

PAYROLLERS:

300,000 Cut Urged

Charging that the government payroll has more than tripled since the First World war and that the government could get along with 300,000 fewer employees, a joint congressional committee on reduction of nonessential federal expenditures recommended that the Civil Service commission act to eliminate unnecessary personnel.

"Wasteful personnel practices," a committee report said, should be prevented by a complete reorganization of personnel servicing and management functioning.

The beneficial effects of a merit system during the past two years, the committee charged, "have been impaired and federal funds have been wasted through the negligent attitude of personnel officers and operation officials."

WAR GOODS:

Allies Double Axis

How United Nations' war production is forging fast ahead of the Axis was told by WPB Chairman Donald Nelson.

The United Nations, he informed a house appropriations committee, are now producing \$125,000,000,000 worth of arms and war supplies a year—almost double the Axis rate of \$65,000,000,000. He said that American military production will reach a peak rate of \$90,000,000,000 a year in 1944.

AS BENITO SEES IT
("The war looks different to Italy than it did three years ago, the Rome commentator said.")—News item.)

How different the picture is!
How changed the war today!
The more I look at it I ask,
"How did it get that way?"
The difference is so complete
I wonder more and more,
As I survey it, can it be
The very same old war?

It seemed to me so very good—
Each prospect seemed to please
That day in nineteen-forty when
I said, "I'll take a piece."
Then it was bright and shiny-new
With all so very pink;
I thought I had a guarantee
The darned thing wouldn't shrink.

It looked like such a splendid war
If snapped up then and there!
There seemed to be no drawback
when
I said, "Cut me a share!" . . .
I didn't wait to have it wrapped
But took it on the fly—
And now I'm getting lots of time
To sit and wonder why.

It seemed to suit my tastes so well—
It looked a perfect fit,
But that was three long years ago—
Now take a look at IT!
It went to pieces at the seams
And stood no treatment rough;
The seat fell out of it at once,
It was such shoddy stuff!

No part as represented was;
Behold the awful wreck!
I guess I made an error when
I failed to double-check;
"The customer is always right,"
Ran Salesman Hitler's song . . .
But now I've seen an instance when
THE CUSTOMER WAS WRONG!

THE DOUBLE-TALK OF OFFICIALDOM

We are checking on this: Letter handed to new girl for filing in wrong cabinet.

Letter received and contents noted: We skimmed through the first paragraph.

Thanks for calling the matter to our attention: Where do you get the idea we have time to listen to such squawks?

Your interest is deeply appreciated: But not to the point where we could bother to read your letter carefully.

Follow this through: Take it out to lunch with you and don't bring it back.

Please look into this immediately: Fold this letter 12 ways, cut through with shears and make the parts into spitalballs.

Your views are correct in essence: And so are your old man's!

We respect your opinion: What are you trying to say anyhow?

Take this up with the proper department: File and forget.

Miss Griggs, see who handles this matter: Take this letter and snag it on the first spike.

"The company is planning a picture for its horror series which will include all the weird characters of its previous list. It will be called 'Chamber of Horrors' and will revive the monsters of Dracula, Frankenstein, The Mummy, The Mad Ghoul and The Wolf Man."—Hollywood news item.

Anything to help the kiddies get the right slant on life.

COMPLAINT

How splendid every morning would be if
There was no bleak necessity to shave;

(I sooner would be jumping off a cliff
Or meditate the comforts of a grave!)

The razor blades, too sharp or, often, dull,
They either cut you, else leave half your hair,

Or if you're lucky to look beautiful
One moment, soon another beard grows there!

What blight is this on humans, that we must
Forever scrape, while ever it comes back!

A thing unsown, unwished, yet, though we bust,
We get, and must combat as some wolf-pack!

The earth finds peace in winter—which is sound;
While we grow whiskers all the seasons round!

—Alfred Schenck.

There must be a pretty difficult traffic crisis in Washington when the north and southbound administrators meet the ones going east and west.

The army has developed a machine gun that will fit into a woman's handbag. Nothing has made so many husbands so nervous in years.

"Spain Would Humanize Bombings."—Headline.

Like its pals, Mussolini and Hitler, it finds they are pretty brutal when they cease to be one-sided.

R. Roelofs Jr. says that in Washington genius is defined as the infinite capacity to resign at the right time.

Washington, D. C.
NEW FAR EASTERN DRIVE
It now seems certain that we will concentrate on the Far East to a much greater degree than most people expected.

U. S. naval officials had been privately skeptical of British co-operation in the Far East and never expected Churchill to come through. However, he and Roosevelt both agreed that the time had arrived for vigorous operations to stop the Japs before they dug in so deeply on the Pacific islands that it would take years to dislodge them.

The British have now given definite commitments regarding certain operations. This is important. It so happens that the British do not promise easily. Our own top strategists are inclined to make promises quickly, but sometimes have to explain them away when conditions change and it is obvious they cannot be kept. But the British, though awfully hard to pin down, have absolutely kept their agreements when once made.

What these commitments are remain a military secret. However, certain moves which are known to all, including the Japs, should give Tokyo plenty to worry about. For it is no accident that Admiral Nimitz, commander in the Pacific, has been recalled for conferences; or that the insatiable Australian prime minister has now said he was satisfied; or that Attu was taken.

All these straws in the wind point to hitting Japan from many different directions—Alaska, Australia, Burma and the Central Pacific.

This offensive in the Far East may be one substitute for a second front in western Europe. It may not knock Hitler out of the war quite so soon, but it may make the two wars—in Europe and Asia—finish at more nearly the same time.

SAVING UNCLE SAM'S SHEKELS

Here is a simple suggestion which would save the government millions:

As the law stands, a man coming into the government cannot be hired for the figure of \$5,000 or \$6,000, but must get one or another of the fixed government ratings, such as \$4,600 or \$5,600 or \$6,500.

Many a man has come to Washington from the business world in the last few years, willing to work for \$5,000. But there is no government rating at that figure, so he is offered \$4,600, and if he won't take that, he must be paid \$5,600.

Likewise, if he is a \$7,000 man, willing to work for that figure but not for less, he must be given \$8,000.

Literally hundreds of men have come into the War-Production at salaries \$500 or \$1,000 more than they would have accepted, simply because the Reclassification Act of 1923 establishes the figures of \$4,600, \$5,600 and \$6,500 with no elasticity.

The same waste results in the field of promotion. To keep good men these days, government agencies are obliged to give promotions without waiting for the 2½ year period required by Civil Service.

So the agencies resort to evasion. They reclassify the employee by writing up a new job for him at a higher salary level. He might be satisfied with a \$500 raise, but reclassification means that he gets at least \$900 more, or even \$1,500 more.

A simple change in the law would save hundreds of dollars in thousands of cases.

AMERICAN TAXI-DRIVERS

Some political prognosticators say you can predict the outcome of U. S. elections by the reaction of taxi-drivers. However, the character of taxi-drivers may go even further and be an index of the general honesty and temperament of the American people.

OWI's Katherine C. Blackburn struck a hopping mad taxi-driver in New York the other day. He had just found \$1,200 in war savings stamps which somebody had left in his cab. When he traced the "fare" and returned the stamps, all he got was congratulations on his honesty and a 25-cent tip.

"I'll never be honest again!" he declared grimly.

This brought him and Miss Blackburn to the Ritz Carlton. She got out, paid her fare, and tripped into the hotel. While she was still in the lobby, somebody tapped her on the elbow.

"Excuse me, miss," said a voice, "but you left your furs in my taxi!"

On the average of once a day, somebody with a screw loose tries to see Secretary of State Hull. One such, called to explain to Hull his method of stopping torpedoes. He was stopped by a secretary.

COLLEGES AND CONGRESSMEN

Harvard, Yale and Princeton may be well represented in the state department, but when it comes to congress, a grab-bag selection of names turns up such colleges as John Carroll university (Congressman Michael A. Feighan of Ohio) . . . Baldwin Wallace college (Congressman Henderson H. Carson of Ohio) . . . Creighton university (Congressman Frank A. Barrett of Wyoming) . . . Marshall college (Congressman Hubert S. Ellis of West Virginia).

MANY an American of poor background can remember when all the floors in the home except the parlor were covered with woven rag rugs and carpets. Today there is something about the vigor, simplicity and economy of these colorful old-time floor coverings that fits our mood. A local weaver with a rug loom flourishing in many communities. The modern weaver has an assortment of colors in warp

filler that may be used with rugs that you have prepared in manner shown here. About and three quarter pounds of rags will be required for a square yard of carpet. Rugs may be either cotton or wool but use both in the same rug. Rags should be soft and clean. Hems or uneven finishes should be removed. Dye white rags the color you wish to predominate.

NOTE—It is possible to make a variety of floor coverings from ends of things on hand. Books of the series offered with these contain fascinating new designs for and braided rugs. In Book 7 a rug made from old felt hats and pennants. Books are 15 cents each. Order booklets direct from:

HIGHLIGHTS . . . in the week's news

SHIRTS: New York laundries indicated that the dirty shirt may become fashionable there when they announced they would not accept more than 5 shirts per family a week.

BATTLE COST: The conquest of Pantelleria cost the United Nations only 40 airmen, Maj. Gen. George E. Stratemeyer, chief of the U. S. air staff, reported.

TRANS-OCEAN: Munitions Minister C. D. Howe announced that a Canadian transatlantic air service will soon be started, carrying mail and official passengers overseas.

AMITY: Argentina desires to draw close to "the great republic of the United States" in every way possible, Gen. Edelmo J. Farrell, war minister, declared.

Prisoners of War Are Held in 17 States; Some Work on Farms and Public Projects

Defeated Men Happy About Hearty Food, Humane Treatment

Prisoners of war, principally from North Africa, are being shipped to the United States and held in camps, there to remain until peace returns. Some 688 men have arrived, of whom 22,110 are Germans, 14,000 Italians and 62 Japanese, up to the first week of June, the war department announces. They are confined in 21 camps, located in 17 states.

These former enemy soldiers are being treated according to the humane requirements of the Geneva convention, of which both Germany and Italy are signatories, as is the United States. Japan has never acceded to this agreement.

These men may be employed, in some regions. Another advantage of having these prisoners here is that their presence here helps their friends and relatives in their homelands anxious about their fate. This anxiety may help to bring about honorable treatment of American prisoners in Axis camps. On the other hand, the reports which prisoners write home about the good and decent living and working conditions here, should have a favorable propaganda value.

Germans are housed in these 11 camps. These are: Camp Breckinridge, Ky.; Camp Chaffee, Ark.; Camp Gruber, Tenn.; Camp Huntsville, Ala.; Hereford, Texas; Stringtown, Okla.; Roswell, N. M.; Stringtown, Okla.; Angel Island, Calif.; Camp Meade, Md.; and Fort Meade, Md. There are some Italians at Angel Island, Camp Meade, and Fort Meade are temporary establishments.

There are 10 camps for Italians. These are: Camp Atterbury, Ind.; Camp Carson, Colo.; Camp Clark, Mo.; Weingarten, Mo.; Crossville, Tenn. (separate from Germans); Florence, Ariz.; Fort Leonard Wood, Mo.; Ogden, Utah; Camp Phillips, Mo.; and Camp Wheeler, Ga. All are permanent. The 62 Japanese are confined at Camp McCoy, Wis. (See map.)

Room for 55,000 in Camps. The present capacity of these camps is stated as approximately 55,000. Present camps will be expanded, and new ones established as needed, the war department announced. Most prison camps are located within army camps.

The commanding officer of the installation is also the commanding officer of the prison establishment. Where the prison camp is within an army installation, the commanding officer of the prison is designated by the commanding general of the service command area.

The standard stockade at each of the prison camps is an enclosure with a double barbed wire fence, guard towers covering a narrow alley between fences. This stockade is divided into three compounds, containing hut shelters, mess hall, toilet facilities and other installations to provide for 1,000 men. Within their respective compounds, prisoners may circulate freely, but guarded gates restrict passage

German and Italian soldiers, herded into huge barbed-wire enclosures after surrender in Tunisia, lean on fence, weary and broken in spirit. Some appear to be crying. But the two grinning fellows (right) plainly show their joy that it's all over, as they anticipate transfer to Canada or the United States.

from one enclosure to another. Guards and administrative personnel are housed outside the stockade in nearby barracks and offices.

Will Work as Harvest Hands.

The office of the provost marshal general has found that many of the prisoners were tradesmen, including carpenters, stone masons, house painters, but the use to which their skills may be put is restricted.

Many others were farmers. Their use in farming will be confined to those operations which require a dozen or more men at one time, such as cotton picking and harvesting. Prisoners must be under guard at all times. Being soldiers, they cannot be placed in the custody of a civilian, and it is impracticable to send a guard out with small groups.

Other occupations which will employ large numbers of prisoners are road building, irrigation developments, dam construction and projects of a similar nature.

All of the enlisted prisoners, whether working or not, receive an allowance of 10 cents a day for the purchase of toilet goods or other articles from the stockade canteen. Their pay when working, 80 cents a day, is deposited in a credit account. The prisoner may withdraw, in the form of canteen coupons, one-half of each month's credit up to a maximum of \$10 per month.

When working for a state or private contractor, the rate of pay is decided upon in advance between the employer and the camp commander. The rate, however, may not be less than that of 80 cents a day paid when the work is done for the federal government.

Officer prisoners are not compelled to work. If they choose to work, they are paid the same basis as the enlisted man. Regardless of whether or not the officers work, under the Geneva convention they are paid in accordance with their grade and in line with specific arrangements between the enemy powers. This pay for German and Italian officer prisoners is the equivalent of \$20 per month for warrant officers and first and second lieutenants; \$30 for captains, and \$40 for those in the grade of major and above.

Sports and Reading Rooms.

Facilities for recreation are provided at all of the camps. Equipment supplied by the war department is supplemented in many cases by gifts from private organizations.

Because the prisoners naturally favor the sports of their own countries, standard army athletic equipment kits have not proved generally satisfactory.

National preferences and tastes are taken into account in planning the meals for the prisoners. These menus, covering meals for a month, are prepared in the office of the quartermaster general. Substitutions may be made from a list of foods indicated as approximately equivalent in food value to any item on the specified list. For instance, the Italians at Camp Atterbury, Ind., asked for more bread and spaghetti instead of their meat allowance. The camp now gets more flour and less meat. The menu for a typical day at that camp consists of spaghetti, pork, potatoes, cole slaw, canned pears, coffee and thick crusted Italian bread. It is mentioned that the men leave their plates clean.

The administration of each prison camp follows a well-established pattern. A typical prison camp, for example, housing 3,000 prisoners, requires the services of 506 officers and enlisted men of the United States army. This detachment is made up of three military police escort companies, 21 additional officers, and three attached officers. These companies usually are rotated, one being on actual guard, manning towers and gates, while another is in alert and another is engaged in tactical and other training exercises or in supervising and guarding work details.

The prisoners are organized into companies of 250 men each, with each company under an officer of the army of the United States. In turn, battalions are formed within the camp, all under the camp commander.

Although the company commander is assisted in administering his company by enlisted members of the army of the United States, including a first sergeant, a mess and supply sergeant, a clerk, an interpreter and cook, the prisoners themselves are permitted to organize and administer their own affairs as much as possible. From their own ranks they may choose leaders to serve as their spokesmen in making requests or complaints to the company or camp commander. Cooks, barbers, tailors, cobblers and other essential personnel also are chosen from among the prisoners.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

By HAROLD L. LUNDQUIST, D. D.
Of the Moody Bible Institute of Chicago.
(Released by Western Newspaper Union.)

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education, used by permission.

GOD CALLS A LEADER

LESSON TEXT—Exodus 3 1-12
GOLDEN TEXT—Come now therefore, and I will send thee unto Pharaoh, that thou mayest bring forth my people the children of Israel out of Egypt.—Exodus 3 10.

God calls men, commissions, and uses them to carry out His plans and purposes in the earth. What a great truth that is, and how it glorifies the destiny of man to know that it is divinely appointed.

As Joseph Parker effectively points out, the experience of Moses in Midian was a direct dealing with God, whereas we who may not be able to "see the fountain" must "be content to drink at the stream," but should always remember that the stream flows from that same fountain.

"Every man should put to himself the questions. What is my destiny? What does God mean me to be and to do in the world? . . . It is a most pitiable thing that a man should read of Moses being divinely called to a special work" and fail to realize "that God has a special work for every man to do." Let us be careful that we do not "so pervert and misinterpret circumstances as to press them into a justification of self-will," rather than recognize them as "destiny which is beckoning us to duty."

For our instruction and guidance we consider, then, the story of the call of this outstanding leader of Israel. It presents him as a true servant of God, one who was—

I. Personally Equipped.

While it is a blessed truth that God will use any man who surrenders himself to His control and guidance, no matter how limited that man's ability and training may be, it is also true that, other things being equal, the man with the best equipment will be the most useful servant.

God gave Moses a unique preparation. He was first of all a Hebrew, born among the people that he was to lead. He knew the luxury and all the cultural advantages of the Egyptian court (Acts 7:22), with the safeguard of training by his own mother as his nurse.

He observed at first hand the oppression of his people, and made a self-willed and impulsive effort to deal with the problem. The result was that he had a "postgraduate" course of instruction and discipline in the wilderness, where he spent forty years in the school of experience.

We have learned anew from our war experience that training for service is essential. If that is true in military matters and in secular life, it is doubly true in the service of Christ. He does graciously use even the humble and untrained worker, but no one who has a vision of service will be content to remain unprepared.

II. Spiritually Qualified.

Moses was a man who knew God. Had he been a worldly man he would only have been curious regarding the phenomenon of the burning bush. But note how alert and reverent he was and how immediately responsive to the instructions and the call of God.

Here God's future leader was made conscious of the infinite majesty and holiness of God, the need of reverence and godly fear, the purpose of the Eternal One to deliver His people, and the assurance that He would be with His servant. Such a spiritual experience made effective the excellent preparation which he already had for service.

All the training and preparation in the world is worse than useless in God's service apart from that spiritual qualification that comes from true regeneration and dedication to Him.

There is no more pathetic sight than a spiritually powerless church worker going through the motions of service for Christ. If we are in that condition we may be sure that we deceive no one but ourselves.

III. Divinely Called.

Moses was called (vv. 4), commissioned (vv. 6-10), and clad with divine authority (vv. 11, 12) for his great task.

God calls His servants to different responsibilities and in different ways, but the important thing is that we should know that we are in His will and that we are answering His call.

No one has any right to choose full-time Christian service simply as a desirable vocation. In any calling of life man needs God's guidance in order to make a proper choice, but in the ministry or missionary service it is an absolute essential.

If we were more careful to seek His will for every individual there would be less unhappiness in the world. But in the case of the one who goes out to speak for God there is not only the danger of distress, but of real disaster for himself and those to whom he tries to minister. ing Christ.

Prepared, qualified, and called, Moses is now ready to meet God before he goes on to his life of holy exploits for Him.

Women Dress to Please Selves, Incidentally Men

Do women dress to please the men? An old question that never loses its popularity. Obviously women take pleasure in dressing themselves with taste and discrimination, and they like to shine at the art in competition with other women. And they also like men—particularly those in whom they are interested—to be pleased.

Biologically, we must go back for an answer to prehistoric times when the human race was just emerging from the animal stage. In nature it is the usual rule for the male to be more resplendent than the female. No doubt when men and women began to acquire the power of thinking things out, women first adorned themselves in imitation of the male.

Note that, in what we call Western civilization, amongst people who could afford the expense men were usually more splendidly dressed than women until the days of the French revolution.

A piece of wax tied in a rag, and rubbed over the hot iron before ironing, will help it to run along smoothly, and prevent its sticking.

The setting of a jelly can be hastened by placing the mold in a pan of cold water.

Mayonnaise used on sandwiches should be thick enough to prevent its running out at the sides.

Wood siding from which moisture has not been sufficiently removed may be finished with semi-transparent shingle stain instead of a solid film of paint.

When stubborn particles of meat and vegetables stick to the inside of the grinder, run a small piece of dry bread through the grinder. The bread acts as a chaser, and saves work in the dishpan.

For a spring dessert how about rhubarb shortcake? Serve rosy rhubarb sauce over slightly hot biscuits made with a bit of sugar added to flour.

When pickling onions, if you are using white vinegar, a few drops of sweet oil of almonds added to each jar will help to keep them white.

One-fourth teaspoon lemon juice added to each cup of heavy cream will hasten whipping.

Admirals may be admirable, but that isn't where the word comes from. It comes from an old Arabic word "amir-al" meaning "commander of." That's what the Admiral is, the top-ranking officer in the Navy. Top-ranking cigarette with our Navy men is Camel—the favorite, too with men in the Army, Marines, and Coast Guard, according to actual sales records from their service stores. Camels are a top-ranking gift, too. And though there are Post Office restrictions on packages to overseas Army men, you can still send Camels to soldiers in the U. S., and to men in the Navy, Marines, and Coast Guard wherever they are. —Adv.

Crime's Punishment
Fear follows crime and is its punishment.—Voltaire.

SNAPPY FACTS ABOUT RUBBER

A chain of rest stations is rising across northern Brazil along the route of workers tracking into the Amazon Basin gateway of Belem to increase collection of wild rubber. They provide medical aid and other human comforts to the 50,000 additional workers being recruited for the Amazon rubber forces.

The rubber normally used in one month's manufacture of baby pants can make 2800 rubber lifeboats for ocean-going planes.

A check of 7,200 farm-owned trucks showed that only 25 per cent of the tires on them were good; 54 per cent were fair; and 21 per cent were in poor condition.

Arctic Emergencies' Advises Fliers How to Survive Amid Snow and Cold

A guide to the Arctic Circle will accompany every army air pilot required to fly across the world, the war department announces. "Arctic Emergencies," a little orange-and-blue booklet will be carried in each flier's agency kit on future flights far

mand, and is a companion piece to "Jungle and Desert Emergencies," predecessor in May. Like its predecessor, it possesses an especially durable cover and water-resistant pages. Authorities on all phases of life in the Arctic were consulted in its preparation.

The guide tells how to make suitable goggles to ward off treacherous snow blindness, how to increase the warmth and protective quali-

ties of regulation flying suits, what to eat and how to cook it.

Dietary tips for the flier forcefully grounded north of the tree line are plentiful and varied. They include the warning that polar bear livers are poisonous. Also, to the pilot who might be tempted to live on rabbits because they are abundant, the booklet points out that such a course will produce "rabbit starvation" and possible death.

IN CLASS 1-A FOR
WAR-TIME BAKING

In the war-time kitchen, where economy rules, where waste must be avoided and where quality counts as never before, Clabber Girl leads the list of dependable baking ingredients. . . Ask Mother, She Knows: Clabber Girl has been the choice of millions of proud bakers, in millions of homes, for years and years.

POPULAR SCIENCE

Staff Sgt. and Mrs. Alvin Lass of Tucson, Arizona, came last week Tuesday to spend a furlough visiting at the parental John Lass home and with other relatives and friends in the community.

The Missionary Defenders of the Methodist Church will meet at the home of Mrs. R. W. Elder Thursday afternoon, July 8 at 2:00 o'clock. Mrs. J. A. Chambers has charge of the lesson.

Harley, son of Mr. and Mrs. H. E. Barz, returned home Saturday from the Eugene Greiman farm. Harley says he has been helping his uncle build a barn, but that he had to be in town for the Fourth.

Miss Jacqueline Kudje, who is attending summer school at State Teachers College, Cedar Falls, visited over the week end and July Fourth with her parents, Mr. and Mrs. Arthur Kudje and family.

Mr. and Mrs. H. D. Ramsay and baby daughter visited over the week end with Mrs. Ramsay's parents at Garrison. On their return journey they visited with Mr. Ramsay's parents at Marble Rock.

Mr. and Mrs. C. G. Waterman, Lt. and Mrs. Lyle Wilcox and Mr. and Mrs. W. C. Keraus enjoyed a picnic supper with Mrs. Antonio Keraus at her cottage at Ventura Heights Thursday evening.

Mr. and Mrs. Walter Beatty and daughter, Joyce, of Chicago, came Wednesday for a visit with Mrs. Fred Ridder and other Klemme relatives and friends for a few days.

Kermit Smith returned to Camp Barkely, Texas, Tuesday evening after spending a fifteen day furlough visiting with his father, Mr. Matt Smith and family, and other relatives and friends.

Miss Oda Hanson began work Tuesday morning at the Northern Implement Store as office helper. Miss Hanson has been employed at the Lewis Radio Shop for the past couple of years.

Corp. T H Barkema returned to Camp Pickett, Virginia, Tuesday night after spending a short furlough visiting with his parents, Mr. and Mrs. Hauko Barkema in Liberty township. He arrived in Klemme last Thursday morning.

Mr. and Mrs. John Micklick and son Bobbie, of Hanlontown, were dinner guests Sunday at the home of Rev. and Mrs. Calvin Grosshuesch. Mr. Micklick will be superintendent of the schools at Hanlontown this coming year.

Mr. and Mrs. Wm. Keraus were guests at the Ed. Buntensch cottage at Clear Lake July 5th. Mr. and Mrs. Buntensch and Junior, of Klemme, and Mr. and Mrs. Verle Keraus of Garner are spending the week at Clear Lake.

The Missionary Societies of the Peace, Zion and Immanuel Reformed Churches of Ell township, Garner and Klemme respectively, held their annual picnic at the Klemme church last Wednesday afternoon, June 30th.

Sumner Trumbell was back on the job carrying mail Thursday after a two weeks vacation. Outside of spending a few days with Mr. and Mrs. Donald Gibbs at their cottage at Clear Lake, Mr. and Mrs. Trumbell spent their vacation right at home.

John Griewe left last week for Brainard, Minnesota. He expects to work in the harvest fields and will return to Klemme again late in the fall. He has been working for Art Wellemeyer for several months during the spring rush at the furniture store.

Melvin Coobs, who has been at Fort Leonard Woods, Mo. for the past few months, returned home Sunday. Melvin has completed his course in radio which he has been studying for the past year. Melvin will leave July 14th for induction into the U. S. Army.

Mr. and Mrs. Awalt Jahnke and children are moving to Mason City where Mr. Jahnke will work for the Northern Lumber Company as a carpenter. The Armour Mullin family will move into the house vacated by the Jahnke's. Mr. Mullin is now employed at the Fred J. Arnold shop.

Mr. and Mrs. Conrad Quandt left early Saturday morning for Wichita, Kansas, being called there by the illness of their son-in-law, Ernest Gerardi, who was in a hospital. Mrs. Worthy Usher of Rowan and Mrs. Tony Ahrenkeil of Goodell are taking care of the cafe while the Quandts are away.

Klemme and Vicinity

DRS. COLBY & HAYDEN, DENTISTS, FOREST CITY, IOWA. OFFICE PHONE 374, RES. 189.

Jack Tabb, a nephew of John A. Chambers will leave for service in the army, July 14th.

Marvin Smith, U. S. N., son of Matt Smith, is enjoying a thirty day furlough.

The Barz relatives of the community held a family picnic at the Klemme Park July Fourth.

Charles Gibbs and family of Mason City were visiting Klemme relatives Monday, July 5th.

Paul Stromer and Ira Overholt were at Otranto on business Monday afternoon.

La Nelle Harvey went to Rowan Friday to visit over the week end with friends.

G. B. Kirchner, manager of the Avery Theatre at Garner, was in Klemme on business Friday.

Will Rule of Dow City is here visiting at the home of his niece, Mrs. Gerald Koerner and family.

Mrs. Henry Voetberg of Garner, spent Tuesday in Klemme visiting with her aunt, Mrs. Clara Barz.

Mr. and Mrs. August Baack and children were guests at the Howard Baack home Sunday, July 4.

Rev. and Mrs. Knight of Goodell were Klemme callers Tuesday afternoon.

B. L. Prouty of Garner, was a business caller in Klemme Saturday.

Miss Phyllis Klotzbach left last Thursday evening for Chicago for a visit over the Fourth with Rev. and Mrs. Floyd Klotzbach.

Mrs. Harry Hampel and Mrs. C. Jacobsen and daughters of Latmer spent Friday visiting at the home of Rev. and Mrs. Harvey.

Lt. and Mrs. Lyle Wilcox left Friday for Camp Claiborne after spending several days visiting with relatives here and at Minneapolis.

Mrs. Gretchen Schlawn is at the Fred Greiman home doing housework as Mrs. Greiman is at the Mercy hospital clinic.

Mr. and Mrs. C. C. Kilgore left Friday morning for Excelsior Springs, Missouri, where they remained over the week end.

Mr. and Mrs. C. A. Larsen and Clarence, Jr. were supper guests at the R. W. Elder home Sunday evening.

Roy Schaefer spent several days last week at the Harold E. Ridder home south of Nora Springs where he was doing some plumbing.

Mrs. Fred Sobek and two children and Mary Lou Mennego left Tuesday for a visit with Pvt. Fred Sobek at an army camp in Kansas.

Gracka Blank has returned to her home at West Bend after visiting for a couple of weeks with relatives in this community.

Mr. and Mrs. Walter Kimball and children of Boone, spent Sunday and Monday visiting with old Klemme friends.

The Klemme Times building was given a new coat of paint last week which helps the appearance of the place.

Mr. and Mrs. Ed. Buntensch and son Edward, Jr., rented a cottage at Clear Lake where they spent the Fourth and are enjoying a week's vacation.

Mr. and Mrs. Wm. Tiggerman are improving their house by putting a brick finish siding material on the outside. It is a nice improvement.

Mr. and Mrs. Henry Lewis and son, Duard, and Mr. and Mrs. C. E. Kluckhohn camped over Sunday and Monday at Coe's Woods, Clear Lake.

Miss Esther Yahnke of Garden City, Minnesota, visited for several days with the R. W. Elders and Ben Katters and with other relatives in this community.

Wedding Stationery printed and engraved at The Times Office.

Rev. Grosshuesch and family are enjoying a visit from his parents, Rev. and Mrs. J. W. Grosshuesch of Sheboygan, Wisconsin, who arrived last Thursday.

Mrs. Herman Paul was ill several days the past week, but is again feeling much better. Esther Tiggerman assisted with the house-work and cared for the Epps children.

The Peace Reformed Church north of Klemme held their annual picnic and gala day at the church grounds Monday, July 5th, with a large crowd present.

Rev. and Mrs. H. E. Harvey and children, Elwood and La Nell, spent Monday visiting with friends at Rowan. Rev. Harvey was formerly the pastor at Rowan.

Lester Merkel of Fort Sill, Oklahoma came Saturday evening for a visit with his mother, Mrs. Peter Merkel and other relatives in this community.

Rev. Earl Josten and family of West Des Moines, spent Monday in Klemme visiting with John Josten and Erick Josten, father and uncle of Rev. Josten, respectively.

Charles Gibbs of Big Lake, Minnesota, came Tuesday for a few days visit with Klemme relatives and friends and to look after business matters.

Mrs. Martha Dreier of Milwaukee, Wisconsin, who has been visiting for the past week at the home of Mrs. Clara Barz, left Tuesday morning for Spencer for a visit.

Mrs. Eddy Epps, of Des Moines, came Saturday evening and visited until Sunday afternoon with her parents, Mr. and Mrs. Herman Paul. Mr. Paul took her back to the city in his car.

Mrs. J. J. Stille and Miss Velda Schaefer have returned home from Sturgeon Bay, Wisconsin, where they visited for a week at the home of Cecil Bridges and family.

Orville Bridges was absent from his work as carpenter at the Northern Lumber Co. the past week as he had the mumps. He has recovered and is back on the job again.

Save your kitchen fats and oils.

Mr. and Mrs. Ira Overholt moved into the Dulmes apartment for part of the week. They have been living in the Griesemer home in the south part of town.

Mr. and Mrs. John Day and Wm. Smith were dinner guests at the Bert Mathews home at Clear Lake, Sunday. Mrs. Smith remained for a visit at the Mathews home.

Of Course We're All Out To win this War

—V—

We're ready to make every sacrifice in order to HIT HITLER HARD, JOLT the jittery JAPS and MUSS up MUSSOLINI.

So if our Armed Forces need paper, we're going to help see that they get paper . . . even if we have to go without it. But here's how the paper situation shapes up today: There is plenty of paper available for America's warime business needs, although we cannot get some of the different weights and sizes we would like.

And to use that paper for the efficient operation of our business and for the production of catalogues, booklets and other sales promotion pieces is to practice intelligent patriotism.

For we who carry on at home must finance this war through the payment of taxes and the purchase of WAR BONDS and WAR SAVINGS STAMPS.

In order to do that, all business must survive, and also show a profit.

And, paper and type in today's crucial times, as in normal times, are potential sales-makers.

So use them wisely . . . you'll be serving your country well.

We are equipped to do all types of Commercial Printing

Men In The Service

KLEMMME COACH NOW CAPTAIN IN ARMY

Glenn R Bowles, former high school athletic director, was promoted to the rank of captain on June 21st.

Glenn R Bowles, who has been at Gruber, Oklahoma for several months, is now at Shreveport, on maneuvers. His address is:

Glenn R Bowles, Captain
CO 351st Inf, A P O 85
Shreveport, La.

KILGORE BACK IN TEXAS CAMP

Lyndon E Kilgore, son of Mr. and Mrs. C C Kilgore, has been transferred from Camp Robinson, Texas, to Camp Fannin near Dallas, Texas.

Kilgore says he is glad to be in Texas as the climate is better there than at Little Rock. He says the camp at Fannin is up-to-date camp, has a nice swimming pool and that it looks somewhat like home around there.

KLEMMME YOUTH WINS PROMOTION IN NAVY

Mr. and Mrs. Aug. Lau of Liberty Township have just been notified that their son Norman E. Lau, has been promoted and now holds the rank of Aviation Metalsmith 2-c. Norman is now back at Camp Allendale, Virginia after several months of intensive training at the Naval Air Station at Elizabeth City, North Carolina. His present address is:

SCHAEFER NOW IN CALIFORNIA

Norman T. Schaefer, son of Mr. and Mrs. Roy Schaefer, has moved from the Great Lakes Base to California. His new address is: Norman T. Schaefer, S 1-c, (AMM) 1st. Barracks 80, U.S.N.A.S., San Diego, California.

MARY NAMES NEW OFFICERS FOR YEAR

New officers for the Klemme American Legion Auxiliary for the coming year were elected at the regular meeting. President, Miss Lydia Bock; Vice-President, Mrs. Lester Stille; Treasurer, Mrs. J C Thomas; Secretary, Mrs. Ernest Helps; Executive Board, Mrs. Albert Edwards, Mrs. Verner Lewis, Mrs. W. H. Hays.

WOMAN SOCIETY MEETS THIS WEEK

The Dorcas Society of the Methodist Church will meet Thursday evening. Fred Ridder and Miss Mary Hays are the hostesses.

LIBERTY TOWNSHIP FARM BUREAU MEETING

The Liberty Farm Bureau township held its regular monthly meeting at the school house in district number one, Thursday, evening, July 8.

Mr. Upmeyer, township chairman, presided. Under the direction of Mrs. Aaron Stromer, the girls 4-H club leader and Mrs. Roger Schlawn, girls 4-H assistant club leader, an interesting program was presented by the members of the Liberty Busy Bee 4-H Club.

If chinch bugs are present in small grain fields, farmers should erect a barrier between harvest fields and nearby cornfields to prevent migration of the pests into the corn when the grain is cut.

4-H SUNBEAMS

An all day meeting was held by the Avery Sunbeams at the home of Arline Wilke on Thursday, July 8. A picnic lunch was enjoyed by the girls.

Work was done on the articles being made by the members in connection with the regular club project "Home Efficiency." Plans for the Achievement Show were made.

MADISON GIRLS 4-H LIVE WIRES MET

The Madison Livewires met at the home of Eleanor Chizek on Wednesday, July 7. Plans for a demonstration team, Achievement Show, and camping were discussed. Goldie Geddes and Grace Lowenkerke each gave a talk on topics related to the club project, "Home Efficiency."

WOMEN ON WAR SAVINGS STAFF RE-ORGANIZED

A special meeting of the general committee of the women's division of the War Savings staff was held Friday afternoon at the home of the county chairman, Mrs. W. S. Pritchard at Garner, for the purpose of re-organizing the county workers.

The following were appointed town booth chairmen and they in turn will name one woman from the Legion Auxiliary, the farm bureau women and the federated club in their own towns to act on their committee: Garner, Mabel Olson, Britt, Mrs. Ray Kelly; Kanawha, Mrs. Knute Fosen; Goodell, Mrs. Owen Conwell; Klemme, Mrs. Paul Mueller; Woden, Mrs. G. W. Goslin; Corwith, Mrs. Frances Oxley and Crystal Lake, Mrs. Henry Myhr.

Mrs. R. R. Roberts, Mrs. R. E. Disselhorst, Mrs. Henry Meyer, Britt, Mrs. D. L. Wilkie, Mrs. Henry Johnson, Kanawha; Mrs. R. A. Jorgenson, Klemme; Mrs. C. L. Strate and Mrs. C. H. Tompkins attended Friday's meeting.

SCOUTS ENJOYED SWIM AT LAKE MONDAY EVENING

Boy Scouts of Troop 56, Klemme enjoyed a supervised swim at Clear Lake Monday evening, under the direction of Scoutmaster H. D. Ramsay. The Scouts made the trip in Lloyd Lau's truck.

Edward Grosshuesch and Dean Jacobs both passed their fifty yard swimming test. Others are working to learn to swim.

SIXTY-FIVE YEARS

The Rev. M. C. Buettell and Mrs. Buettell of Waukon celebrated their 65th wedding anniversary June 26, 1943. Rev. Buettell is 91 years old and Mrs. Buettell is 89.

OATS BEING CUT HERE THIS WEEK

Farmers in this community are busy this week cutting and shocking their fields of oats and by the last of the week the annual job should be pretty well finished.

There will not be as much oats around here as in some years as most farmers have cut down on their acreage of oats and planted more acres to soy beans.

Corn is looking good and the hot nights of the past week is sending it skyward rapidly. Soy beans look good with the prospect of a good crop. A lot of hay has been put up the past week around here.

LEGION ELECTS OFFICERS FOR THE COMING YEAR

The Klemme American Legion at their recent meeting elected officers for the coming year.

Lester Stille was elected Commander; Frank Ward, Adjutant; Jim Thomas, Finance Officer; Charles Hitt, Chaplain; and Jake Hess, Sergeant at Arms.

4-H ACHIEVEMENT SHOW

Plans are being made for the boys and girls 4-H Achievement Show to be held in Garner, August 23 and 24. Premium lists will be soon available for each club. There will be classes for the regular projects and in addition to these will be the victory projects connected with food production and preservation.

PICTURE HELPS RECRUIT

The picture of Nora Lee Bilterman, 8, of Albia, will be used by the Coast Guard on a recruiting poster. The picture, submitted by a relative, a member of the Coast Guard, won a \$25 war bond.

Corn Situation Is Critical

LOCAL ELEVATORS AND FARMERS RESPOND TO CALL FOR CORN IN CRISIS

Local elevators report that purchases of corn for immediate delivery as of July 10th in the amount of 97,195 bushels with more to follow.

The following wire was received by Alfred V. Josten, Chairman of Hancock County AAA, from A. J. Loveland, State Chairman of AAA: "Imperative four million bushels of corn be on rail Tuesday July 13 to keep corn war plants operating. Situation critical, demand immediate action. Contact township committees sealers immediately wire and wire this office Saturday giving elevator purchases as of July 10."

A critical corn jam is threatening to close down our corn war industries. Corn is a critical war item, being used in the manufacture of many vital war materials. If these war plants close down because we fail to break the corn jam, our entire war strategy will be adversely affected. We face a critical emergency. We must get corn jarred loose in the surplus producing areas immediately.

Counties in the surplus corn areas of Iowa have been notified by wire to get township committees and sealers into the field immediately and use their influence in getting corn moved. We think enough corn can be moved to keep these vital war plants operating. We also think there is enough corn available to ultimately satisfy all needs, if we can distribute our supplies orderly and equitably. The immediate emergency is getting corn to commercial users manufacturing vital war products.

The corn purchase plan which was received last week provides for an orderly movement of corn with a price protection feature, giving the farmer the benefit of any corn price increase between the time of the sale and October 31, 1943, on all corn sold between July 1 and August 10 inclusive. The uncertainty of price ceiling changes is out of the picture under the new program. We cannot, of course, predict what will happen to corn ceilings between now and October 31, but if there is an increase the farmer who sells his surplus corn to an elevator today will be protected. He will be reimbursed if there is an increase. There should be no hesitancy, therefore, in selling now because of possible ceiling changes.

In isolated cases, feeders with depleted corn stocks will find themselves pinched. Corn will be difficult to buy, but this tight situation is expected to be eased if the present corn jam can be broken and critical war industries can be supplied within the next week. War has a habit of creating shortages. They are a part of war and as inevitable as fighting itself. The only way to halt war shortages is to stop fighting. We must, therefore, face facts and do our best to adjust ourselves to changing wartime conditions.

CORN GOES TO WAR

One reason for the heavy demand for corn is found in the wartime uses of Iowa's important crop. Since America entered the war comparatively large amount of corn have been pressed into military service. Corn is used in production of chemicals and explosives of war engines for planes and tanks in medical supplies and scores of other war products.

HELLO, FOLKS!

Mr. and Mrs. Paul Kramer are the parents of an eight pound baby boy born to them on Thursday, July 8, 1943. Mrs. Rust of Garner is caring for the mother and baby.

LANCOCK COUNTY'S TRIPLETS—The above is picture of the Beier triplets, children of Mr. and Mrs. Elmer Beier who reside on a farm west of Klemme. On the left is Janis Fay and on the right is Joann Kay and in the center is their brother, James Ray. The triplets are now 14 months old. There are seven other children in the Beier family. (Cut Courtesy Globe-Gazette, Mason City)

HOUSEHOLD MEMOS

by Lynn Chambers

Lynn Chambers' Point-Saving Menu

*Royal Lamb Salad
Sliced Tomatoes Carrot Sticks
Whole Wheat Bread Butter
*Ginger Cooler
Cookies
*Recipe given

garnishing each with sprig of mint and a half slice of unpeeled orange. Salads that are full of protein and that keep the cook cool are these that fill the main dish order of summer meals.

*Royal Lamb Salad

(Serves 6)
2 cups diced, cooked lamb
1 cup diced celery
1 cup Bing cherries
4 hard-cooked eggs
½ cup chopped nuts
1 teaspoon salt
1 cup mayonnaise
6 small tomatoes
Salad greens

Combine all ingredients except mayonnaise and chill thoroughly. Just before serving, toss in mayonnaise lightly and serve on a bed of greens. If desired, garnish with additional slices of hard-cooked eggs and cherries.

Veal and Bacon Salad.

(Serves 6)
2½ cups cold, cooked veal, diced
½ cup crisp bacon, finely cut
½ cup diced celery
¼ cup radish slices
½ cup mayonnaise
6 small tomatoes
Mix the veal and the bacon with the celery, radishes and mayonnaise and chill. Place each peeled tomato in a lettuce cup. Cut down several sections to open. Place a mound of the salad mixture into each tomato and top with mayonnaise.

Occasionally a fruit salad is all that is desired for a simple luncheon. In that case, make it as attractive and nourishing as possible:

Summer Fruit Salad.

(Serves 6)
1 medium cantaloupe, peeled and cut in cubes
2 cups raspberries or dewberries
2 cups diced fresh pineapple
Chill and mix lightly together. Serve portions on crisp lettuce or

A cool dessert for a cool meal—Orange Sherbet. It can be simply made in the cool, morning hours, stored in the refrigerator until ready to serve.

watercress and top with mayonnaise flavored with honey.

Finger sandwiches go well with the salads to round out the meal and are both cool and delicious:

Ground boiled ham with ground pickles and mayonnaise.

Cottage cheese, chopped stuffed olives, nuts.

Peanut butter, raspberry jam.

Chopped dates, orange juice, chopped nuts.

Mashed cooked shrimp and cream cheese.

Flaked salmon, chopped cucumber and mayonnaise.

Cookies like these will go well with your fresh fruits:

Molasses Raisin Bars.

¼ cup shortening

½ cup sugar

1 egg

½ cup baking molasses

2 cups sifted flour

¼ teaspoon salt

¼ teaspoon soda

1¼ teaspoons baking powder

½ cup sweet milk

1 cup chopped nuts

1 cup raisins

Cream shortening, add sugar and beat lightly. Add egg, beat well, then add molasses. Sift flour with dry ingredients and add alternately with milk to first mixture. Add

chopped nuts and raisins. Spread thinly in greased shallow pan and bake in a moderate (350-degree) oven for 15 to 20 minutes. Cut in bars before cooling.

Are you having difficulties planning meals with points? Stretching your meals?

Lynn Chambers can give you help if you write her, enclosing a stamped, self-addressed envelope for your reply, in care

dressed envelope for your reply, in care of her at Western Newspaper Union, 210 South Desplaines Street, Chicago, Illinois.

Released by Western Newspaper Union.

ASK ME ANOTHER?

A quiz with answers offering information on various subjects

The Questions

1. Approximately what portion of an iceberg appears above water?
2. What four states west of the Mississippi meet at right angles?

HOME NEEDLEWORK
530 South Wells St. Chicago

40 Feet of Rain

Much more rain falls on the windward side of the Hawaiian Islands than on the leeward side. One of the wettest spots on earth is the mountain of Waialeale on Kauai island. Its summit is usually bathed in clouds, and 40 feet of rain falls there every year.

The TIRE of TOMORROW is here TODAY!

THE WORLD-FAMOUS FIRESTONE DeLuxe Champion TIRE IS NOW BEING MADE WITH Firestone Butaprene THE MARVELOUS New SYNTHETIC RUBBER

JUST as you'd expect, Firestone is FIRST to build the tire of tomorrow for the car owners of America. It is only natural that Firestone should be the leader in working out new processes, in creating new compounds and in building better tires from American-made rubber, for Firestone has always been the pioneer in developing new materials, new methods and new machines that have resulted in tremendous advancements in tire design, construction and performance.

From Firestone have come such revolutionary improvements as the FIRST straight side tire, the FIRST rubber non-skid tread, the FIRST commercial demountable rim, the FIRST patented Gum-Dipping Process, the FIRST balloon tire, the FIRST Safti-Lock Cord Body, the FIRST Super-Speed Construction and the FIRST practical pneumatic tractor tire.

In 1933, Firestone built the FIRST synthetic rubber airplane tires for our armed forces. In 1940, Firestone built its FIRST synthetic rubber passenger car tires at the New York World's Fair and began the manufacture of its own synthetic rubber, called Butaprene, the same

type that was later adopted by the Government. In 1942, Firestone became the FIRST company to produce synthetic rubber in a Government-owned plant and later became the FIRST to make synthetic rubber using butadiene made from grain alcohol. And today Firestone is making synthetic rubber tires for passenger cars, trucks, buses, airplanes, tractors, farm implements and all types of war vehicles.

All of these years of experience, all of the knowledge that made these FIRSTS possible have been called upon in producing the new Firestone DeLuxe Champion Tire made with Firestone Butaprene. It is now ready for the car owners of America as released by the Government. But do not think that the crisis is past. America's greatest rubber supply is still on the wheels of its 27,000,000 cars. So you must continue all of the rubber conservation measures that have been so effective. However, if you are eligible and require new tires, remember this — in mileage, in strength and in safety the new Firestone DeLuxe Champion Tire upholds the Firestone tradition of "Best in Rubber — Synthetic or Natural."

Listen to the Voice of Firestone with Richard Crooks and the Firestone Symphony Orchestra, under direction of Alfred Wallenstein, Monday evenings, over N. B. C.

WEEKLY NEWS ANALYSIS

Coal Rationing Looms as FDR Asks 65 Induction Limit as Strike Curb; Allies' Mediterranean 'Guessing Game' Factor in Keeping Axis Off Balance

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)
Released by Western Newspaper Union.

An American soldier in a Southwest Pacific outpost has a look-see at the interior of a shattered Jap vehicular water tank after the enemy had been driven off. The shell holes in the tank give the answer to its interior.

COAL: Draft for Strikers

Coal rationing for both industrial and domestic consumers loomed as Fuel Administrator Harold L. Ickes expressed doubt that production losses incurred by three strikes in less than two months could be made up.

Mr. Ickes had announced that he was preparing to "undertake active participation in the supervision of management and operation" of coal mines including possible changes in operating personnel.

Previously, President Roosevelt had warned coal miners and other workers in government-operated industries that those who walk out on strike in future would be inducted into the nation's armed forces. The President announced that he would ask congress for authority to draft men up to the age of 65 for non-combatant service.

In a statement bitterly denouncing the action of the United Mine Workers leadership as "intolerable," Mr. Roosevelt had declared that for the time being "mines would continue under operation of Fuel Administrator Ickes." The terms, he said, would be those laid down by the War Labor board.

FOOD: Czar After All?

Food had continued to hold the Washington limelight as the house agricultural committee had reported on a bill designed to take all food rationing and pricing powers from the Office of Price Administration and transfer them to War Food Administrator Chester C. Davis.

Congressional sentiment for creating a food "czar" had increased in spite of the opposition of President Roosevelt to such a measure. Dissatisfied over home front war operations, proponents of the new bill wanted to vest complete authority over food production, transportation, distribution, pricing and rationing of foods under Mr. Davis who hitherto has had charge only of production and distribution.

As congressional temperatures rose in debate over the proposals, reports of improved weather and crop conditions helped ease official tension over 1943 food production prospects. Particular improvements were reported in midwestern grain, livestock and dairy regions.

SMALL BUSINESS: Reserves for Peace

The National Association of Small Business men through its president, DeWitt Emery, urged congress to permit plants engaged in war contracts to set aside tax-free reserves for easing postwar transition back to peacetime production.

Unless such provisions are forthcoming, Emery told the house naval committee studying war contracts, "thousands of businesses will be shut down after the war, awaiting the whim of some bureaucrat" as to whether they can remain in business.

Emery suggested an allowable tax free reserve of 3 per cent of all sales up to \$1,000,000 and recommended that reserves above that figure be scaled down to one-half of 1 per cent.

MEDITERRANEAN: Axis Kept Guessing

Two events in the eastern Mediterranean had given some observers support for their view that this theater would be the scene of decisive Allied military activity.

One event was the bombing for the first time by Allied fliers of the strategic Axis-held city of Salonika, Greece. The other was the evacuation by Italy of Castelross, easternmost island in the Dodecanese group, lying between Greece and Turkey. Strategists saw the possibilities inherent in an Allied move via Egypt and Syria on mainland Greece and the Balkans.

Meanwhile steady attention to the task of softening up Italy proper and its neighboring island satellites was given by the RAF and U. S. air forces.

One of the most spectacular Allied feats was the inauguration of "shuttle" bombing service. This was accomplished by British Lancasters which had bombed Friedrichshafen in Germany, flown on to African bases and returned home to England, blasting Italian naval bases at La Spezia along the way.

The tenseness of the Axis over impending Allied threats was reflected in the action of Italian secret police in arresting more than 11,000 persons in a search for possible fifth columnists.

GERMANY: Raids Devastating

While military strategists had debated whether aerial warfare could completely knock out the enemy, evidence of some of the results of Allied bombings were dramatically forthcoming in reports from the Ruhr valley area, where British and American airmen had dropped 10,000 tons of bombs within a month.

One report disclosed that Germany had ordered the evacuation of 3,000,000 nonessential civilians from the bomb-gutted Ruhr. Another revealed that the Nazis had massed more than 1,000 fighter planes in western Europe to combat the never-ending Allied raids and had mounted 30,000 anti-aircraft guns along a belt 200 miles long by 20 to 50 miles deep.

Under a new policy of fully publicizing air raid damage, German propaganda broadcasts said the Royal Air force had "practically erased" the city of Krefeld on the western fringe of the Ruhr and had subjected the populations of both the Ruhr and the Rhineland to "unbelievable raids."

MARATHON: Yanks Hit Macassar

Forecasting what will be routine assignments in months to come, Liberator bombers made a 2,000-mile round trip raid from Australia to the Japanese air and sea bases at Macassar on Celebes island, where Allied airmen dropped 28 tons of bombs on enemy objectives, damaging shipping installations and hitting a Jap cruiser and merchantman.

The raid marked the first retaliation on the Japs in the Celebes sector since the enemy seized Macassar early in 1942 when the Nipponese seized the Dutch East Indies.

RUSSIA: Jabs and Feints

Feints and slashes had continued to characterize the action on the far-flung but relatively quiescent Russian front.

With the long-heralded German offensive still in the conversation stage and the Soviet forces still gathering strength for decisive engagements, the rival armies had contented themselves with jabs at localized areas. Thus Russian communiques had reported a series of incidents on the Orel, Smolensk, Belgorod, Staraya Russa and Leningrad sectors.

Russian artillery was credited with blowing up the headquarters of an enemy battalion near Sevesk, in the Kursk salient. But nowhere along the front was large-scale fighting reported.

Observers who recalled that a year before the Nazis had already started their ill-fated expedition against Stalingrad and their offensives for Caucasus oil believed the current inactivity was due to waning German air power, weakened on the Russ front to bolster bomb-shattered areas in western Europe.

POSTWAR: Problems Ahead

Addressing 500 business leaders and army and navy officers in Chicago, Alfred P. Sloan Jr., chairman of the General Motors corporation, declared that he is not worried about the immediate postwar era in the United States, but that he is considerably concerned about the distant future.

The nation, Mr. Sloan declared, faces a postwar period in which it will take at least five years to catch up with the accumulated consumer demand for goods.

The letdown will come when this pent-up buying power has been exhausted, unless private industry is successful in drawing blueprints for winning the peace, he predicted. Mr. Sloan particularly urged the government to make a frank statement of policy now regarding its peacetime intentions to enable industry to plan intelligently. Government, he said, should allow industry to build up profitable reserves on a tax-free basis.

RAIL PAY: Boost Is Vetoed

In a move to hold the dikes against onrushing inflation, Fred M. Vinson, stabilization director, disapproved wage increases of eight cents an hour for 1,100,000 non-operating railway employees. The proposed increases would have boosted wages paid by the railways by \$200,000,000 annually.

Indications that some solution for the railmen's pay demands might be achieved were seen in official quarters, however, President Roosevelt.

FRED M. VINSON
"No" to a million.

Velt had indicated his approval of overtime pay for nonoperating rail workers. On such a basis time-and-a-half pay would be applied to workers putting in more than 40 hours weekly. Those putting in a 48-hour week would receive an average increase of about six cents an hour on such a plan.

The nonoperating railway workers include members of 15 organizations employed by Class I railways.

PACIFIC: Burma Bombed

Big scale land offensives against Japan were apparently not on the schedule until after the monsoon season made Burma operations possible, but Allied air forces showed no evidence of lessening their bombing forays against the foe.

In China, American fliers supported by ground forces of Gen. Chiang Kai-shek blasted two important Jap centers in the Tung Tink Lake area and wrought damage against enemy shipping on the Yangtze river.

Flying in from bases in India, Liberator bombers of the U. S. air force strafed Jap installations at Monywa on the Chindwin river, 60 miles from Mandalay, Burma. Warehouses, railway tracks and highways were damaged.

GOVERNORS: Bureaus Mushroom

Turning from postwar international planning to pressing domestic problems, the 35th annual governors conference adopted resolutions on adjournment urging the federal government to release corn and livestock feed and condemning strikes in wartime.

The governors assailed steadily increasing encroachments on states' rights by the federal government, and increases in the personnel of federal bureaus.

Woman Pilot

By Cornelia Fort

(WNU Feature—Through special arrangement with Woman's Home Companion.)

(Here is one of the most remarkable articles ever published—a personal story by the first woman pilot to die on war duty in American history. Shortly after it was written Miss Fort, 24, of Nashville, Tenn., was killed when the bomber she was piloting crashed in Texas.)

I knew I was going to join the Woman's Auxiliary Ferrying squadron before the organization was a reality, before it had a name, before it was anything but a radical idea in the minds of a few men who believed that women could fly airplanes. But I never knew it so surely as I did in Honolulu on December 7, 1941.

At dawn that morning I drove from Waikiki to the John Rodgers civilian airport right next to Pearl Harbor, where I was a civilian pilot instructor. Shortly after 6:30 I began landing and take-off practice with my regular student.

Coming in just before the last landing, I looked casually around and saw a military plane coming directly toward me. I jerked the controls away from my student and jammed the throttle wide open to pull above the oncoming plane. He passed so close under us that our celluloid windows rattled violently and I looked down to see what kind of plane it was.

The painted red balls on the tops of the wings shone brightly in the sun. I looked again with complete and utter disbelief. Honolulu was familiar with the emblem of the Rising Sun on passenger ships, but not on airplanes.

I looked quickly at Pearl Harbor and my spine tingled when I saw billowing black smoke. Still I thought hollowly it might be some kind of coincidence or maneuvers. It might be, it must be. For sure, dear God!

Then I looked up and saw the formations of silver bombers riding in. Something detached itself from an airplane and came glistering down. My eyes followed it down, down, and even with the knowledge pounding in my mind, my heart turned convulsively when the bomb exploded in the middle of the harbor.

I knew the air was not the place for my little baby airplane and I set about landing as quickly as ever I could. A few seconds later a shadow passed over me and simultaneously bullets splattered all around me.

Suddenly that little wedge of sky above Hickam Field and Pearl Harbor was the busiest, fullest piece of sky I ever saw.

We counted anxiously as our little civilian planes came flying home to roost. Two never came back. They were washed ashore weeks later on the windward side of the island, bullet-riddled. Not a pretty way for the brave little yellow Cubs and their pilots to go down to death.

When I returned, the only way I could fly at all was to instruct Civilian Pilot training programs. Weeks passed. Then, out of the blue, came a telegram from the war department announcing the organization of the WAFFS, and the order to report within 24 hours if interested. I left at once.

Because there were and are so many disbelievers in women pilots, especially in their place in the army, officials wanted the best possible qualifications to go with the first experimental group. All of us realized what a spot we were on. We had to deliver the goods or else. Or else there wouldn't ever be another chance for women pilots in any part of the service.

The attitude that most nonfliers have about pilots is distressing and often acutely embarrassing. They chatter about the glamour of flying.

Well, any pilot can tell you how glamorous it is. We get up in the cold dark in order to get to the airport by daylight. We wear heavy cumbersome flying clothes and a 30-pound parachute.

You are either too cold or too hot. If you are a female your lipstick wears off, and your hair gets straighter and straighter. You look forward all afternoon to the bath you will have, and the steak. Well, we get the bath, but seldom the steak: sometimes we are too tired to eat and fall wearily into bed.

None of us can put into words why we fly. It is something different for each of us. I can't say exactly why I fly, but I "know" why as I've never known anything in my life. Of this I am most positive.

I knew it when I saw my plane silhouetted against the clouds, framed by a circular rainbow. I knew it when I flew up into the extinct volcano Haleakala on the island of Maui, and saw the gray-green pineapple fields slope down to the cloud-dappled blueness of the Pacific.

Washington, D. C.

MORE PLANES TO CHINA
It can now be revealed that the bottleneck has been broken in transportation to China, and greater quantities of equipment for air operations against the Japanese are being moved.

This is an encouraging development following the successful Chinese operations against the Japs in the Ichang area within recent weeks. Incidentally, these operations have been somewhat exaggerated by the Chinese. It now appears that the Japs did not intend to move against Chungking, nor did they have quite the number of men earlier reported.

The outstanding point, however, is that the Chinese were successful largely as a result of air power. This was a tribute not only to Chenault and the American pilots, but also to a contingent of Chinese pilots flying with the Chenault group.

Until recently it was not desirable to increase the number of planes in China, because the limited supply facilities by air from India constituted a bottleneck. There was no need of having more planes if they could not be supplied with fuel and bombs for operation. Now, however, a greater number of transport planes has been provided for this service and it has become feasible to increase the number of combat planes at the end of the line in China.

PLANES TO RUSSIA

About a year ago, Russian Red army men in Washington almost got down on their knees begging for airplanes. U. S. planes were much scarcer then than today. Production was low and there were also heavy demands from Egypt and MacArthur.

At one time, the Russians actually suggested that the best way to parcel out lend-lease equipment would be to adopt a very simple standard, namely, which army was killing the most Germans.

Gradually, however, planes were sent to Russia, until today they are going in tremendous quantities. This is one reason why the Nazis have lacked heavy superiority in the air, which previously they had.

In fact, the Russians now have shifted their pleas away from airplanes and concentrated them on food. With the breadbasket of Russia in German hands, large sections of the population are starving.

MAIL BAG

E. C. S., Charlotte, N. C.: An applicant for enlistment in the navy who has a nude woman tattooed on his arm will not be accepted until the lady acquires a tattooed dress. One of the navy's causes for rejection is "obscene, offensive or indecent tattooing."

P. B., Philadelphia, Pa.: Technically speaking, a WAAC may not resign. She may request a discharge through her commanding officer, but the request will be granted only under such circumstances as physical disability or extreme emergency in her family.

F. E. M., Dayton, Ohio: The sinking of the battleship Bismarck was accomplished principally by the fleet air arm rather than by British battleships.

ARMY DOCTORS STYMIED

Next time the army tries to recruit doctors in peacetime, a lot of medicos who patriotically became reserve officers long before Pearl Harbor are going to think twice before they do so again.

Reason is that the doctors who became reserve officers well in advance of war have now been penalized. They are stymied on promotions. Meanwhile, doctors who have come into the army recently have shot way ahead of them in rank.

What happened was that after a lot of reserve corps doctors had been brought into the army, still more doctors were needed. So the medical corps upped its bids. It offered higher commissions as majors and lieutenant colonels. Meanwhile, when lower ranking former reserve officers raise the question of promotions, the stock reply is: "The tables of organization do not permit it."

MERRY-GO-ROUND

Q The OPA or the army-navy might well do something for army-navy wives who have to pay terrific seasonal rents at Atlantic coast establishments.

Q Gen. Albert C. Wedemeyer, crack strategist of the U. S. general staff, who had opposed some of Churchill's strategy ideas, has suddenly been transferred from War Plans to North Africa.

Q Harry Hopkins knew very little about the creation of Justice Byrnes' new War Mobilization office before it was created—though he is a member. Some politicians interpret this as meaning that Harry is slipping in his close personal friendship with FDR—but he isn't.

Q Shenango Depot, Pa., has a stockade where about 2,000 soldiers are detained as prisoners, but thousands of other 1-A men are sent there for transfer to other areas. It is a transfer center, and the fact that a man is sent there does not mean he is going to a dumping-ground.

Modern Uses for Quaint Patchwork

THERE is endless fascination in old-fashioned quilt making. There are many modern ways to use them. They make a fine finish of the table, and are used for luncheon mats as well for occasional tables. Pieced and quilted sets protect the backs of

arms of upholstered chairs. Keep your new slip covers clean. These sets also have unusual decorative possibilities. Chair sets of this type are at their best on chairs covered with plain material or a fabric with an inconspicuous figure.

The block shown here is easy piece. It should be lined with muslin and interlined with a layer of cotton sheet wadding. These three layers should be quilted together either with diamond quilting or with running stitches following the lines of the pattern. Edges are bound with harmonizing bias tape.

NOTE: Quilt blocks also may be made into unusual borders for curtains, luncheon cloths. There are complete recipes for pieced border designs in BOOKS 5 and 6 of the series offered in these articles. BOOK 6 also has star design pieces to make patchwork. Booklets are 15 cents each. Send request to:

FIRST IN RUBBER

HIGHLIGHTS . . . in the week's news

CANADA: Humphrey Mitchell, Canadian minister of labor, announced that all youths of 16 to 18 are now subject to compulsory labor transfer.

LOSS: Fuel administration statisticians estimated that recent coal strikes had cut coal production in the United States more than 20,000,000 tons.

REPAIRS: The house flood control committee approved legislation authorizing the expenditure of \$10,000,000 for repair of damage in sections recently hit by floods.

PROMOTION: Rudy Vallee, now a band leader in the coast guard, has been promoted from chief petty officer to lieutenant, senior grade, an official announcement stated.

Soldiers' Allotment Checks Help Solve Problem of Home Front Dependency

Army Finance Corps Offers Assistance to Men in Service

As more and more husbands and fathers enter the armed forces, the nation must assume the care of the dependents. No man, it has been well said, fights well when his heart is filled with anxiety about his loved ones. The federal government is providing for the needs, at least, of millions of soldiers, children and parents of fighting men through pay allotment and family allowance checks, sent out monthly.

To distribute the billions of dollars involved, and to handle the many details of this vast affair, the department established the Office of Dependency Benefits in October, 1942, by consolidating four separate agencies. The navy has a similar service in the Bureau of Naval Personnel.

Soldier Gives \$22 a Month.

The family allowance is a sum provided by the soldier and the government jointly. The enlisted man gives \$22 a month from his army pay, and to this the government adds an amount that increases according to the number of dependents. There are two classes of dependents: A, wife and children; and B, parents, brothers and sisters, and other relatives, in special cases. If a man wishes to provide for both class A and B dependents, he must give \$27 a month. Otherwise his contribution is just \$22, regardless of his army pay grade. All men are eligible for this family allowance, excepting those above the rank of sergeant, that is, those in the four lowest grades.

How much dependents can receive is shown for typical cases by this summary:

- A wife gets \$50 a month.
- A wife and one child get \$62.
- A wife and two children get \$72. (There is an additional allowance for each child over \$100.)
- Wife and parents get \$80.
- Father and mother only, \$47.

To be eligible for these benefits, the relatives must meet certain requirements of the office, the principal one being that they prove actual dependency. They must have been supported, at least in part by the soldier before he left for service. In many cases, this proof is difficult. On the other hand, in certain cases, the enlisted man must pay his share of the allowance whether he wants to or not. A wife can demand her allowance, and a minor child may. Even a divorced woman may be entitled to payments, if she has been receiving alimony.

Dependents in class B can get an allowance only if the army man agrees to it, in any case. The family allowance sum begins to accrue the first of the month following the month in which the man applies for it. That is, if he makes application in June, the allowance begins to accumulate on the first of July, and is paid after July 31. A soldier may apply as soon as he is active duty, that is, as soon as he enters a camp or any army establishment under orders. Every enlisted man can provide for his family and relatives both through the family allowance and the pay allotment channels.

Twenty Million Affected.

Army nurses, members of the Women's Army Auxiliary Corps (WAAC) and certain civilian employees of the war department may make use of the pay allotment system, but only soldiers can obtain the benefits of the family allowance.

More than 20 million people are included in families of enlisted men. The army is to be increased to about 8 million by the end of the year, many more wives and children will be left alone. While many women are working in war plants and other essential tasks while their husbands fight, other wives cannot, and should not leave their homes. The family allowance, authorized under the Servicemen's Dependents Allowance act of June, 1942, is the nucleus of home security during wartime.

ODB Rules Children Aren't 'Evidence'

The Office of Dependency Benefits can't accept the physical appearance of a soldier's children as required documentary evidence. Why? Well, for one thing, this evidence has to be filed with the application for that family allowance, and America naturally doesn't want to file Junior and Mary Anne, even in an air-conditioned building. Quite a few Mrs. Americas have brought their young along, however, when they went to the ODB infor-

Wherever they are, soldiers must receive their pay regularly. Here the men of the 46th engineering regiment line up for their money at night, while on maneuvers in Louisiana. More than 2½ million men provide for their dependents through contributions from their salaries under the family allowance plan.

Added to these benefits are the voluntary allotments, thereby insuring the essentials of life to the soldier's family.

The Office of Dependency Benefits mails out about 2½ million family allowance checks a month at present. This number will doubtless increase rapidly as fathers go to war. About 1,320,000 men have made pay allotments. Most of these probably are included in the family allowance figure too. About 83 per cent of the army's personnel are eligible for the family allowance benefit. All men, from buck privates to full generals, may make pay allotments.

The director of the Office points out that more than two-thirds of the money disbursed by the Office of Dependency Benefits comes from army men's pay. The ODB acts as a fiscal agent, that is, a bank or currency exchange, for soldiers. One hundred per cent of the pay allotments, and 45 per cent of the family allowances are deductions from soldiers' salaries. The rest represents the government's contribution to the family allowance, or about one-third of the total sum disbursed each month.

Two Billion Dollars Yearly.

Right now the Office of Dependency Benefits is sending out money at the rate of 2 billion dollars a year, to 7½ million dependents of soldiers. Every month more than 3½ million checks go out, to all parts of the nation, from Newark, N. J., which is headquarters.

Since the Office was organized last October, it has disbursed some 19 million checks. Ten thousand clerks and a staff of army officers under direction of Brig. Gen. H. N. Gilbert labor at the tremendous clerical burden. They are housed in an 18-story building. The volume of mail has forced the Newark postmaster to increase his staff by one-sixth. The mail room of the Office handles 60,000 pieces of incoming mail, and 74,000 pieces of outgoing mail every day. This is exclusive of checks, which would bring the daily outgoing total to 130,000 pieces.

Ample machinery has been set up by the Office of Dependency Benefits to handle the expected increase in requests for family allowances and allotments-of-pay to soldiers' dependents which will result from the

Service men stationed in remote parts of the world often have little opportunity to spend their salaries, so they send home larger sums under the pay allotment method. This der the pay allotment method. The finance corps officer is handling \$150,000 for the 57th fighter group of North Africa.

mation office to arrange for that family allowance, or to present proof that they were really married to the soldier and entitled to the monthly benefits. One soldier's wife arrived the other day with nine children in tow. She didn't leave them, though, as "proof." She left their names on the application blank. The ODB as the application blank. The ODB assured her that their names and their birth certificates would be quite enough.

anticipated induction of more fathers and childless married men as the war progresses, Brig. Gen. H. N. Gilbert, U. S. A., director, has announced.

Even if the induction rate exceeds the present estimate of 12,000 a day, this will not throw the ODB machinery out of gear, nor strain its capacity, the director pointed out. The original framework of the ODB was set up on a modern production line plan, capable of rapid expansion and geared to handle a large volume of work with efficiency and speed. The ODB now receives an average of 12,000 family allowance applications a day and 4,000 Class E allotments-of-pay a day, and is processing those that are in order at a comparable rate, the director stated.

Men now going into the army are given an opportunity to apply for a family allowance at the Reception Center, he said, in order to get the application in as soon as possible since the family allowances begin to accrue the first of the next month after application and are due for payment at the end of that month. To further save time men entering the service are advised to take with them such documents to support their applications as are necessary: certified copy of marriage certificate, and birth certificates of children, and affidavits of dependency for fathers and mothers or minor brothers or sisters who are dependent upon them. In the case of wives and children the family allowance is payable on proof of relationship only.

Chiselers Are Few.

We have all heard that there are some people taking advantage of the family allotment. No doubt there are. It is practically unavoidable that a small number of wives, parents and other relatives who are not entitled to support should be obtaining it. These cases are being investigated, however, and rules are being tightened, so that these leaks will be plugged in time.

On the other hand, it is inspiring to know that many dependents, wives, children, fathers and mothers who are worthy of every assistance, are patriotically refusing aid. Here are a few typical letters: A soldier's mother writes from Michigan:

I, the mother of this soldier, did not expect any monthly allowance. Let my son have his full monthly payments, which I think he needs. The government needs money, too, which we all know. I have a son on the farm yet. I can depend on him and we will do our bit here, too. All I ask is to take care of my son in the forces.

Another mother says:

I thank you very much for sending me the application for family allowance. I wish to say, for the government to take the money which I should have from them, and use it to help win this war, and bring my two sons safe, and to keep the other one from going. Thanking you very kindly...

From a divorced wife in Arizona comes this refusal to accept anything from her ex-husband:

I don't ask of Private or the government any help. I did not ask for alimony when I obtained my divorce, but only custody of the children.

Another mother came into the Newark office and told the interviewer, "I've got a job, and so I stopped in to discontinue my family allowance. My son arranged for it, but I won't need it any longer—I start work tomorrow."

This widespread attitude of patriotic pride and unselfish desire to sacrifice, goes far to counterbalance the chiselers and unworthy dependents. The Office of Dependency Benefits believes that it is providing basic security on the home front.

Security for Mary Ellen, who is 19 and unafraid as she prepares for motherhood while her young husband is fighting to make sure there is a free world for his child to enter.

Security for small Jimmie, whose big brother helped clothe him and get him "book larnin'" before he marched off to war.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

GOD ENCOURAGES MOSES

LESSON TEXT—Exodus 3:13-16, 4:10-17. GOLDEN TEXT—Certainly I will be with thee—Exodus 3:12.

Encouragement is something much needed, and not too often given. The word means to put some new thing into the heart of another, that is, to hearten and assure him, especially in the bearing of a heavy responsibility.

Moses, in all probability the world's greatest military and national leader, was about to lead his people out from under the mighty hand of Pharaoh. His final preparation for that epochal deed and all the years to follow was a personal meeting with God.

Possibly it was the mistake Moses had made and which caused him to be sent into the back of the desert, that now caused him to move with—

I. Understandable Caution (Exod. 3:13).

There is something remarkably fine about real humility. It commends itself to our thinking as the proper attitude of a mortal being, particularly in the face of spiritual responsibility.

Neither God nor man dares entrust a high and difficult commission to foolish man who brusquely "rushes in where angels fear to tread." The fact that one feels fully and unhesitatingly qualified to take over such a responsibility is almost a certain indication that he is not the man to assume it.

Moses' request for God's backing must have been acceptable to Him, for He gave Moses—

II. Unlimited Authority (3:14-16).

Moses went as God's messenger. He was authorized to put all the majesty and power of the Infinite One behind his words and acts.

The ambassador must have credentials. God's representative has them. When "they shall say"—what an important and difficult situation that creates. The one who speaks for God must expect not only the scornful bitterness of God's enemies, but also the unbelieving questions of those whom he seeks to serve.

"What shall I say?" asks Moses, and God answers that he may say that "I AM" had sent him. This name of God reveals Him as the eternal, independent, self-sufficient, self-existent, immutable, personal Being. Consider, Christian brethren, whose we are and whom we serve.

But Moses seems to have been unable to see beyond his own human infirmity even in the light of such a glorious revelation, supplemented as it was by miraculous powers, and we find him showing an—

III. Unjustified Humility (4:10-13).

Perhaps we should not call this humility at all, for in one so divinely called and encouraged it was an act of unbelief and almost impertinence.

When God calls a man He knows his limitations. Why then should one plead them as an excuse for not serving? The excuse of Moses that he was not a fluent speaker has been the standby of unwilling workers all through the ages. When asked to lead a prayer meeting, teach a Sunday school class, conduct a young people's meeting, thousands upon thousands have lamely thus excused themselves and missed a blessing.

The perfect answer of God (v. 11) merits attention. God made your mouth and mine. He gives us the power of speech. He asks not the eloquence of polished rhetorical phrases, or the flights of man's imagination. He wants but the incomparable eloquence of His own words on our lips.

No man should think too highly of himself, but let him beware lest he think too lowly about God. We are not sufficient for the opportunity. But God is more than sufficient.

Having called Moses, God saw to it that Moses went on with His work, even though now He had to call in Moses' older brother to help him. It was, in fact, an—

IV. Unnecessary Substitution (4:14-17).

Loving and patient is our God, but, mark it well, there is a boundary line to that patience. Moses went too far in his needless humility, and really reflected on the ability of God. God promptly substituted Aaron as the spokesman.

Gracious was He in thus providing a helper for Moses. But one wonders what Moses missed of blessing and power because of his slowness of heart. To decline the labor and the responsibility of service for God means loss far greater than we may ever know.

God's dealings with Moses speak eloquently to us of His willingness to enable and use a man who lacked some of the gifts for leadership. Let none of us be like Moses and become involved in needless worry about our gifts, and forget God's purpose and enabling power. When God calls, our gifts are not the controlling factor; in fact, they are not a great factor at all. The question then becomes, Is God able? Let us trust and obey Him.

PATTERNS SEWING CIRCLE

Barbara Bell Pattern No. 1790-B designed for sizes 10, 12, 14, 16, 18 and 20. Corresponding bust measurements 28, 30, 32, 34, 36 and 38. Size 12 (30) ensemble requires 4½ yards 35-inch material; 9 yards ric-rac.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

Send your order to.

SEWING CIRCLE PATTERN DEPT.
530 South Wells St. Chicago.

Enclose 20 cents in coins for each pattern desired.

Pattern No. Size.

Name

Address

Neat as a Pin

IF YOU'RE one for neatness and efficiency you'll appreciate this house frock. So attractive and well cut . . . and definitely slimming besides.

Barbara Bell Pattern No. 1769-B designed for sizes 36, 38, 40, 42, 44, 46, 48, 50 and 52. Size 38 requires, with short sleeves, 4½ yards 35-inch material.

A Real Favorite

SO MANY times this summer you'll be glad for an ensemble like this. Simple and smart for day-long wear.

Recreation Kits Contain Books, Films, Even Piano

A dozen different kinds of recreation kits have been given to our soldiers by the war department, says Collier's. For example, Kit "C" contains 2,000 books; "J" sound-picture projectors and films; "B-1" radios, phonographs and an amplifier; "D" violins, guitars, a small piano; "A" boxing gloves and equipment for baseball, football and softball; "F" playing cards, poker chips, dice and sets of many games, including chess, checkers and backgammon.

One thing a soldier is afraid of is a display of emotion. That's why his slang so often sounds derogatory. For example, he refers to the silver eagles on his colonel's shoulder straps as "buzzards." But when he speaks of his favorite cigarette, he says: "Camels." They're first with men in the Army as well as with Sailors, Marines, and Coast Guardsmen. (According to actual sales records in service men's stores.) And though there are Post Office restrictions on packages to overseas Army men, you can still send Camels to soldiers in the U. S., and to men in the Navy, Marines, and Coast Guard wherever they are.—Adv.

Cordell Hull, Always The Perfect Diplomat

Col. Harold B. Hinton, now with the U. S. army headquarters in London, has written a life of Cordell Hull, United States secretary of state, which is being published in England. He tells the following:

Hull has always been famous for his reluctance to commit himself—and even at the beginning of his political career disliked making a definite statement about anything. However, one self-confident man bet that he could get a direct answer from the cautious statesman.

"What is the time, Mr. Hull?" he asked.

Hull took out his watch, looked at it, and then said: "What does your watch say?"

FISH CARRIES ITS OWN WEAPON

Clemens Meier of Davenport was fishing along the Mississippi River near that city according to the Davenport Democrat, and had a vicious strike. He set the hook and after considerable struggle landed a large perch. He also had hooked a 12 gauge shotgun and landed it. Witnesses to the incident estimated the gun had been submerged for 10 or 15 years, the barrel being badly rusted and the stock deteriorated.

Local Happenings

Klemme and Vicinity

Drs. Colby & Hayden, Dentists, Forest City, Iowa. Office Phone 374, Res. 189.

Mrs. P. M. Wilson was visiting with friends at Clarion, Tuesday.

W. C. Keraus was at Mason City on business Tuesday afternoon.

Jimmie Albertson spent Thursday and Friday visiting with friends at Garner.

Merlin Neuberger and Miss Ruth Neuberger were at Belmont Monday evening on business.

Mrs. Evert Barz and children were dinner guests Sunday at the home of Mrs. Clara Barz.

Miss Fern Gifford went to Des Moines last week where she is employed now.

Mrs. Edna Thada enjoyed a few days vacation last week visiting with friends.

Ed Jacobs and Leo Esbeck were in the Twin Cities on business a couple of days the latter part of last week.

Mrs. Ed Rall returned to Klemme Thursday evening after visiting for about a month with her husband at Hanover, Illinois.

Mr and Mrs. Paul Van Buskirk spent Sunday evening visiting at the Henry Kruse home near Belmont.

Mr and Mrs. Don Christiance and children of near Ventura were visiting in Klemme Monday evening.

Dicky Gilpin, who spent the past week at the home of Mr. and Mrs. Paul Van Buskirk, has returned to his home.

Mr. and Mrs. Wayne Pavey and daughter were dinner guests at the W. F. Pavey home Sunday. The occasion was Mr. Pavey's birthday.

Mrs. W. F. Pavey, Mrs. Clara Barz, Mrs. Lena Schroeder, Miss Luella Lewis and Melvin Coobs were Mason City visitors Tuesday.

Worthy Usher and family of Rowan and Mr. and Mrs. Tony Ahrenkeil of Goodell, spent Sunday in Klemme visiting at the T. Blank and Conrad Quandt homes.

Mr. and Mrs. C. A. Larsen and son Clarence, Jr., spent Sunday at Dows visiting at the home of Mrs. Hattie Leach, aunt of Mrs. Larsen, and with other relatives.

Beverly, daughter of Rev. and Mrs. Harry Buss, returned to her home at Hudson, Iowa, last Thursday after visiting with Klemme relatives.

A number of ladies worked at the Methodist Church last week and painted the kitchen and the League Room. The ladies did a neat job and the rooms look good.

Mr. and Mrs. Harvey Hubbard and Mr. and Mrs. Emmet Hoyt and children, Bobbie and Dixie, enjoyed a picnic dinner at Clear Lake Sunday.

Mr. and Mrs. Geo. Thieman and daughter Stella, Mrs. Clara Barz and Avis, and Mrs. Evert Barz and children were visiting at the Morris Murray home at Britt Tuesday.

Mr. and Mrs. Lloyd Lundmark of Mason City, and Mrs. Gertrude Jahnke and Mrs. E. G. Ell of Garden City, Minnesota, were guests at a lawn supper at the Henry Lewis home Thursday evening.

Mr. and Mrs. Walter Beatty and daughter, Joyce, returned to their home in Chicago Thursday after visiting for about a week with Mrs. Fred Ridder, mother of Mrs. Beatty, and other relatives here.

John Greiwe returned home last Wednesday from northern Minnesota where he was visiting for about a week. John expects to help with harvesting here and then will go to the Dakotas to work in the grain fields.

Mr. and Mrs. Henry Lewis and son, Duard, and Mr. and Mrs. Verner Lewis and family, and Mrs. Gertrude Jahnke, sister of the Lewis men, of Garden City, Minnesota, all enjoyed a picnic dinner at the Lloyd Lundmark home at Mason City, Sunday.

Pvt. David Chapman, of Sioux Falls, South Dakota, came Saturday evening for a short visit with his uncle and aunt, Mr. and Mrs. R. A. Jorgenson. He also got to visit with his other uncle and aunt, Mr. and Mrs. Lyle Liebendorfer who were here from Forest City.

Mr. and Mrs. Ed Buntentbach and son Junior, returned Sunday afternoon from Clear Lake where they had been vacationing at a cottage since July Fourth. Their son-in-law and daughter, Mr. and Mrs. Verle Keraus and son of Garner, also stayed at the cottage with them for the week.

Mrs. Gerald Osborn and son, and Mr. and Mrs. Thomas Thompson and son of Marion, Iowa, came Monday morning for a visit at the Ed Thompson home in Klemme and the Thos. H. Thompson home in Kanawha. Mrs. Osborn is a sister and Thomas is a brother of our townsman and children of Mr. Thompson at Kanawha.

Mr. and Mrs. Conrad Quandt returned Wednesday night from Wichita, Kansas, where they had been for about a week visiting with their son-in-law and daughter. Mr. and Mrs. Ernest Gerardi and daughter, Gracka. Mr. Gerardi has been seriously ill in a hospital but was greatly improved when the Quandts left Wichita.

For the nation as a whole the spring crop this year is 22 percent larger than last year's. Creamery butter production in May was 6 percent below a year ago.

QUARTER CENTURY

For 25 years, the same officers and board of directors have served School Dist. No. 2, Palermo township, Grundy county. The school has been closed for 30 years, but the pupils are sent to the Grundy Center school with the rural district paying the tuition. The school board holds regular meetings each year. The average age for its five directors is 74 years--the oldest one is 91 and the youngest is 64.

Two-Coat System Paint

—V—

We believe somewhat in letting a product earn its "SELLING ABILITY" by demonstration. We do not like to over-advertise any article which we sell.

Right now is the time for OUTSIDE PAINTING, either the house, barn or other farm building. We have the undercoat for the barn paint as well as for the house paint.

• A GOOD PAINT JOB IS GUARANTEED . . .

Just follow the simple directions on the paint can and we will guarantee that if directions are followed that you will get a first-class job of painting.

Our white House Paint is just the very "whitest" white paint you have ever seen. The painters like to put it on and after it is on . . . it is there to stay.

We think you are making a big mistake if you don't try our "TWO - COAT SYSTEM" of painting. Ask for free color card.

Also a complete line of Interior Paints and Finishes; Paint Brushes, Etc.

Uncle Sam needs your help. All the food our farmers can raise will not BEAT THE AXIS unless you help in this year's harvest. Help is needed in detasseling corn, shocking oats, and threshing. If you have any free time this summer, do your country a service by helping our farmers. It's not easy work, but you will be fairly paid and double compensated by your sense of pride and accomplishment in doing your part in this important summer war job.

Miss Elsie Christians Is Bride of Soldier At Ceremony Here

BILL WILSON AND MISS ELSE CHRISTIANS WERE MARRIED SATURDAY EVE

Vows Exchanged At The Reformed Church Parsonage

Miss Elsie Christians, daughter of John Christians, farmer living northeast of Klemme, and Pfc. Bill Wilson of Camp McCoy, Wis., were married at the Reformed church parsonage in Klemme Saturday evening, July 17th, with the Rev. Calvin Grosshuesch reading marriage rites at seven o'clock. The couple was attended at the ceremony by the bride's brother, Pfc. John Christians of Camp Rucker, and Miss Evelyn Havelock of near Garner.

The bride wore a two-piece suit with white accessories. Havelock wore a two-piece dress. Both had corsages of white and red roses.

Following the ceremony the wedding party drove to Mason City where a dinner was served at the Elms Mill cafe.

Private Wilson reports back to his post of duty Thursday, while Miss Christians will remain with her mother on the farm for the present.

COCK COUNTY BOYS PASS PHYSICALS AT CAMP DODGE

The following Enlisted Reservists who have been to Camp Dodge, passed the physical examination and inducted, and are now for their 21 days) will report to Camp Dodge for active service on August 4th.

Sam E. Trafford ... Britt
 James R. Tappas ... Britt
 R. Tabb ... Crowth
 E. Packard ... Britt
 P. Nelson ... Britt
 G. Kluckhohn ... Klemme
 E. Coobs ... Klemme

John J. Peterson, Britt, was inducted as an Aviation Cadet and will report back at a later date.

Harry L. Maw, Corwith, was inducted into the Navy and returned to Klemme seven days later. The induction of Klemme, R. Cockrell, Britt, and Clarence A. Butts of Britt were held at Camp Dodge and will report back for active duty Aug 5. R. Cockrell was transferred from Seattle, Wash., and Clarence A. Butts from Dundalk, Md.

STATE PARK SEASON AT ITS HEIGHT

Young Picniker Finds A Cold Drink On A Hot Day

The use of Iowa's state parks is at its height, and although gas rationing has limited attendance to nearby residents, some areas, particularly near population centers, are getting heavy use by picnickers. Iowa's 72 state parks and preserves are all equipped with picnic tables and other recreational facilities. Within easy driving distance of Klemme are three beautiful state parks: Pilot Knob, Eagle Lake and Clear Lake. Plan a picnic at one of them.

Our Men In The Service

PAUL SCHULDT COMPLETES MARINE OFFICER SCHOOL

Paul Scholdt, son of Herman Scholdt, Garner, last week completed his training at the Marine Officer School at Quantico, Virginia and was commissioned a second lieutenant.

Paul is home on a fifteen day leave visiting at Garner and Klemme. He will return to the East to enter Harvard University August 1st for special training before being assigned to active duty.

BOMBARDIER VACATIONS IN KLEMME

Flying Officer Earl Reitz, bombardier in the U.S. Army air forces, left Monday after visiting since last Wednesday at the home of Mrs. Mary Church. Earl graduated from the Klemme High School in 1937 and has been in the Air Corps for about three and a half years. He has been stationed in Alaska much of this time.

SCHAEFER HOME FROM SERVICE IN TRINIDAD

Merle Schaefer, Aviation Mechanic's Mate First Class, arrived in Klemme Saturday from the Atlantic coast and is spending the balance of the month on furlough visiting with his parents, Mr. and Mrs. Roy Schaefer. Merle has been with a Naval Aviation Squadron for some time and has been in combat in the South Atlantic. He says the subs were pretty thick when they first went down there but hunting is not so good anymore.

EVERETT BARZ COMPLETES SUBMARINE TRAINING

E. E. Barz, 24, Electrician's Mate, son of Mrs. C. Barz, Klemme, has completed basic training at the Submarine School, Submarine Base, New London, Conn., for duty with our growing fleet of underscas fighters.

Elmer M. Barz will be entitled to wear the twin dolphin insignia of the submarine service after further experience aboard a submarine during which he must demonstrate to his commanding officer that he is fully qualified to carry out the duties of his rate. The insignia is regarded as a mark of distinction throughout the Navy.

Barz was graduated in 1936 from Klemme High where he lettered in basketball. He joined the Navy last Sept. and went to Great Lakes, Ill. for initial training.

The Submarine School, the only one of its kind in the Navy, is attended by a picked group of men who must pass special physical, mental, and psychological tests.

The school work takes place not only in classrooms and laboratories but also in numerous training submarines in which students master the actual techniques of operating the powerful fighting craft.

Many students at Submarine School already have seen battle as members of surface ship crews before volunteering for submarine duty. Others are fresh from training stations, but all graduates due for offensive patrol. Large numbers of recent students now are serving in submarines which have sunk enemy naval or merchant vessels.

SUBSTITUTE FOR WATER—Three army bomber crew members remove the husk from a coconut before drinking the milk. Coconut milk was used as a substitute for water which was rationed among the men at this advanced bomber operations base somewhere in the south Pacific.

The soldier on the right is Sgt. Raymond J. Keeper of Klemme. He is the son of Mr. and Mrs. Henry Keeper. He graduated from the Klemme High School where he was a star player in basketball. The Keepers have two sons in the army, the other, Alvin, being in Texas.

The other in the picture above are, left to right, T. Sgt. E. B. Shouldis, Salt Lake City, Utah, and Staff Sgt. R. S. Callaway, Ellenwood, Ga.

Sergeant Keeper is a member of the army air forces stationed in the Hawaiian area. He was one of the first Klemme young men to enter the service before Pearl Harbor.

(Photo by Seventh U. S. Army Air Force.)

Corporal Otho Keraus In Battle Forty-six Days In Tunis

Cpl. Otho Keraus, son of Mr. and Mrs. Wm. C. Keraus, is a war veteran in the real meaning of that word.

Corporal Keraus, who was formerly a printer at the Times office and later a linotype operator on the Swea City Herald, is now in the army's anti-tank corps and has experienced 46 days of battle serving in Tunisia.

"Oats," as he is known among his friends, went with the first contingent to North Africa. He was on the famous Hill 606 which was bombed five times in 3 days.

Corporal Keraus is a close friend of the now famous Franklin M. (Zip) Koons, Swea City boy, who is credited with being the first American soldier to fire a shot in Europe during the present war. He was with the American and British in the Dieppe raid.

Corporal Keraus volunteered for military service in April, 1941. He received his first training at Camp Claiborne, La., then was sent to Ireland.

The last time his parents saw him was in October, 1941, when a party of seven soldiers, including Zip Koons, enjoyed a 15-day furlough, part of which was spent at the Keraus home in Klemme and with relatives and friends at Swea City.

CHICAGO LADY HONORED AT LUNCHEON HERE

Mrs. P. M. Wilson entertained a group of ladies at a luncheon followed by bridge at her home Friday afternoon, honoring Mrs. W. C. Groth of Chicago.

Out of town guests were the following ladies from Clarion: Mrs. C. J. Nagle, Mrs. T. T. Roosevelt, Mrs. C. Hanson and Mrs. M. Birdsall.

In bridge Mrs. Birdsall won the high prize and Mrs. Groth second high.

The two clubs expect to play another game in the near future.

Women Organize To Boost Sale Of War Stamps

WAR SAVINGS STAMP SALES ORGANIZED FOR SOUTH-EAST TOWNSHIPS

Ell, Avery, Liberty And Twin Lake Townships Have Organized

A group of women met at the home of Mrs. R. A. Jorgenson, Central Committee Member, last Wednesday evening, to complete the organization for the sale of War Savings Stamps in Ell, Avery, Liberty and Twin Lake townships, comprising the southeast section of Hancock County. Mrs. W. S. Pritchard, of Garner, county chairman, outlined the plan for re-organizing and promotion the sale of stamps.

Stamp Sales Fallen Off

Since the close of school, stamp sales have fallen off in the county and an effort will be made during the balance of July and August to bring sales up again.

During these two months retailers will sell stamps and customers are urged to ask for their change in War Stamps.

On each Saturday night during July the ladies will have stamp booths in the streets on Saturday nights. Booth Chairman for Klemme is Mrs. Paul Mueller, and the Town Chairmen are Mrs. James C. Thomas and Mrs. Benn J. Coobs.

Mrs. Lee Robbins and Mrs. Amos Hanson are the Town Chairmen for Goodell and Mrs. Owen Conwell is the Booth Chairman.

Ell Township Committee

Committee Women: Mrs. Edmund Josten, Mrs. Alfred Josten.

School District Co-operators:

SERVICE MEN ENTERTAINED AT HENRY WARD HOME

Mr. and Mrs. Henry Ward and daughters, Betty and Sharon, entertained at a 6:30 o'clock dinner Monday evening in honor of Flight Officer Earl F. Reitz, and Av. Mach. Mate F. C. Merle Schaefer, who were home on furlough.

Earl has spent twenty months in Alaska and the Aleutians as turret gunner. Prior to going to Alaska Earl received seven months training in Santa Ana, Cal. and Deming, New Mexico. He was graduated from the Army Air Force Bombardier School at Deming on July 10.

Merle is a crew chief of a Navy Catalina patrol bomber and has been in service in the south Caribbean.

Other guests at the dinner were Melvin Schaefer, cousin of Merle; Mrs. Mary Church and son, Burr; Mrs. Ruth Yohn and Mary Trees.

STAMP SALES SATURDAY NIGHT TOTAL \$58.60

The ladies in charge of the War Stamp sales booths in Klemme report sales totaled \$58.60 Saturday evening.

We can print anything. Call at the Times Office.

BIRD BATHS A "MUST" FOR HOT WEATHER

Cedar Waxwings At Their Old Swimming Hole

During the hot summer months no service is more appreciated by wildlife than the erection and care of a bird bath. To the birds a well-kept bath is a combination of a necessity and a luxury. To the owner it is a source of never-ending pleasure and surprise. To be effective the bath should be in the open, and the water should not be over three inches deep. Sides of the bowl should slope.

The above picture is a typical scene of many Klemme back yards where bird baths have been built.

ELL TOWNSHIP 4-H CLUB WIN FROM LIBERTY CLUB

In a soft ball game played at the Klemme high school diamond Sunday afternoon, the Ell Township 4-H Club defeated the Liberty Township 4-H Club 20 to 7.

The two clubs expect to play another game in the near future.

SOOTHES CHAFED SKIN MOROLINE WHITE PETROLEUM JELLY

Origin of "Two Bits". The term "two bits" was used in San Francisco in days when mints were in existence and wire was chipped up for currency.

CONSTIPATED? GENTLE RELIEF!

If your constipation is due to lack of "bulk" in the diet and you have normal intestinal functions, why resort to powerful purgatives? They act principally by prodding your intestines into action or drawing water into them from other parts of your body! Try KELLOGG'S ALL-BRAN. Instead of working on your ALL-BRAN works chiefly on the contents of your colon—helping you to easy, natural elimination. ALL-BRAN is a tasty breakfast cereal. It's sold by all grocers. Eat it regularly, drink plenty of water and "Join the Regulars!" Make by Kellogg's in Battle Creek

Mind's Sweetness. Let thy mind's sweetness be its operation upon thy clothes, and habitation—Herbert.

YOU WOMEN WHO SUFFER FROM HOT FLASHES

If you suffer from hot flashes, nervousness, irritability, blushing, due to the functional "middle-age" period in your life—try Lydia E. Pinkham's Compound—the best medicine you can buy today made especially for women. Pinkham's Compound has been used by millions of women to relieve such annoying symptoms. Follow label directions. Pinkham's Compound is worth a try.

Watch Your Kidney

Help Them Cleanse the Body of Harmful Waste. Your kidneys are constantly at work filtering out of your blood all the waste matter that is in it. If your kidneys are weak, they cannot do this properly. This causes a build-up of waste in your body, which is the cause of many of the ailments of middle age. Symptoms may be nagging, persistent headache, attacks of dizziness, backache, swelling, getting up at night, feeling of under the eyes—a pap and anxiety and loss of kidney or bladder. Other signs of kidney or bladder trouble are sometimes burning, too frequent urination. There should be no doubt that treatment is wiser than neglect. Doan's Kidney Pills have been used by millions of people for more than 50 years. They have a national reputation. Are recommended by the best doctors in the country over. Ask your neighbor.

DOAN'S PILLS

HOUSEHOLD MEMOS... by Lynn Chambers

Barbecued Beef on Buns Tastes Good
(See Recipe Below)

Fun Outdoors

A family will like eating out for nothing seems so good as barbecues or hamburgers in the open when appetites are sharpest, or coffee made on a make-shift stove from a couple of bricks maneuvered to hold a granite coffee pot in place.

It is good and wholesome, and plenty of it whether you cook it at home and wrap it up to take with you to the spot of your choice, or if you gather twigs and cook to order. Make use of the back yard for barbecue, or take to the woods, even if you have to use the tree. The change from eating on a dining room table will be a welcome change and will do wonders for perking up summer appetite.

For outdoor eating as convenient as sitting at home. Be sure to include things as salt and pepper, napkins, plenty of cups, plates and silverware in your basket to make the picnic comfortable.

Spicy sauce with beef or veal makes up a delicious barbecue. The meat and a quarter of meat is enough for 12 buns—just in case you are interested in stretching those red points.

Barbecued Beef on Buns.
3 pounds beef or veal
1 cup thinly sliced onions
1/2 cup garlic, chopped (optional)
1/2 cup Worcestershire sauce
1/2 cup catsup
1/2 cup salt
1/2 cup pepper
1/2 cup meat in 1-inch cubes and in hot fat. Add 1 cup water and simmer 1 1/2 hours until tender. Onions and garlic in hot fat add to cooked meat with remaining ingredients. Make on outdoor stove or wrap carefully in compound with plenty of towels to keep warm and take to barbecue. To serve, spoon on to warmed buns. Hamburgers are still a great favorite for outdoor eating, particularly now since the weather is still fairly low value. This recipe makes a tender, seasoned hamburger.

Prize Hamburgers
(Makes 24 hamburgers)
3 pounds hamburger
1/2 cup chili sauce
1/2 cup Worcestershire sauce
1/2 cup salt
1/2 cup onion salt
1/2 cup celery salt
1/2 cup onion, toasted and buttered
1/2 cup hamburger well with sauce and seasonings. Form into 24 patties.

Lynn Says

Score Card: Ceiling prices in effect for such vegetables as cabbage, carrots, lettuce, spinach, snap beans and tomatoes. Watch for changes in point value of meats and other red stamp items. Look, too, for the ceiling on many cuts of meat. Butcher usually posts ceiling prices on his wall. Your butter and cheese man will collect your points before he gives you your order. In this way, you won't wake you up if he comes in the day. Should he fail to give you a ration check for the butter given him but not used, you can turn this in to your war price and rationing board. Uniform prices for poultry have been established, and the campaign against the poultry black market is swinging into shape.

God Will Hear

By William C. Taggart

(WNU Feature—Through special arrangement with The American Magazine.)

I am an air force chaplain. For more than a year I have lived with men whose daily job is to risk their lives in combat with the enemy.

I have seen these men go off on missions never to return. I have watched them during bombing attacks against our base. I know what they think and feel. I know how they pray.

One of our Flying Fortresses was forced down at sea on its way back to Australia. The crew of nine was given up for lost. Weeks later, nine bearded, disheveled men straggled into camp, and I had the story of their rescue from Maj. Allen Lindberg of Westfield, N. J., pilot of the plane.

"It was before dawn when we crashed," Lindberg told me. "We just had time to shove off on two rubber rafts, without a crumb of food or a drop of water."

"A grim outlook," I suggested.

"Grim enough. The boys were pretty worried—all except Hernandez. Right away that lad from Dallas started praying, and pretty soon he startled us by announcing that help was on the way. He didn't know how or when, but something told him that we should be saved."

"I'd only been praying a few minutes when I felt like God had heard me and was taking a hand to help us out. From then on, no matter how bad things got, I was sure we would come through."

The major continued: "You've no idea what hell is like until you have been crowded with four other men on a rubber bubble built for three, and left to drift beneath a broiling sun. Toward evening we thought we saw the peaks of mountains to the west. When they dissolved into mist, Hernandez just prayed harder. He got the rest of us to pray and sing with him. We sang 'Rock of Ages' and 'Lead Kindly Light.'"

"The second day our lips were too cracked and our tongues too swollen for much hymn singing. But the prayers never stopped."

Natives Rescued Us.

"Then something happened. We felt a current reach us and hurry us along. Before nightfall we saw the silhouette of palm trees, the white streak of surf, and—almost beyond belief—the black hulls of three out-rigger canoes."

"Our rescuers were Australian aborigines—black-skinned, kinky-headed, fishermen from the mainland several hundred miles away. They told us that, the day before, they had been homeward bound with their catch, when a strange urge came over them. Something impelled them to change their course, and steer for this uninhabited and worthless bit of coral."

Yes, prayer does work. There have been other incidents. Lieut. Frank Beeson of Tuscaloosa, Ala., lay in our base hospital, a gaping shell wound in his shoulder. A pursuit pilot, he had been shot down at Port Moresby. The doctor's verdict was: "He'll never fly again."

"Oh, yes I will," Frank told me. "How do you know?"

"I asked the Lord to give me strength to rejoin my squadron." A few weeks later, after an incredibly short recovery, Frank was on his way back to Port Moresby and more dogfights with the Japs.

I know of men lost and starving in the deserts of Australia, who were found and brought to safety after asking God for help. Of men in bombers shot to pieces by enemy gunfire who, quite literally, "prayed their way" back to base. I know, too, that many times appeals uttered by mothers, wives and sweethearts in the United States stretched a protective mantle half around the globe to shield us in the South Pacific.

Power of Prayer.

One high-ranking general told me that he owes his life, in part, to the petitions voiced by his closest friend and former business partner. I myself am living on borrowed time because my parents prayed for me in a situation of great danger.

As a parson's son, brought up in a devout Southwest community, I have always believed in the power of prayer. I cannot recall a time when it was not an integral part of my daily life.

One of my professors at college was a missionary in China. Captured by bandits, he and his fellow prisoners were taken to a lonely mountain pass. When no ransom was forthcoming, the bandits determined to shoot them the next day. That night he prayed fervently for guidance, and before dawn a thick cloud settled on the pass. Wrapped in this cloud of invisibility, he led his party down the mountainside to safety.

Millions of Americans who in the past relied on themselves are now reaching out for help.

PATTERNS SEWING CIRCLE

8447
2-6 yrs.

Pretty Frock and Panties.

SUCH a pretty picture—a 2 to 6 year old in this darling frock with whirling skirt. There are panties to match.

Pattern No. 8447 is in sizes 2, 3, 4, 5 and 6 years. Size 3 dress takes 2 yards 35-inch material, panties 1/4 yard.

ASK ME ANOTHER?

A General Quiz

The Questions

1. What does chicanery mean?
2. Why are macadamized roads so called?
3. Who was the tallest President of the United States? Who was the shortest?
4. How many lines has a sonnet?
5. What is the status of children born in this country of alien parents?
6. How many states meet where the Ohio and Mississippi rivers merge?
7. Why is a stiff hat called a derby?
8. Who was Jean Lafitte?

The Answers

1. Trickery or sharp practice, especially in legal proceedings.
2. That type of road was invented by John Loudon McAdam, a Scottish engineer.
3. Abraham Lincoln was our tallest President, at six feet four inches. James Madison, five feet four inches, was the shortest.
4. Fourteen.
5. They are citizens of the United States.
6. Three—Illinois, Kentucky and Missouri.
7. That type of hat was first worn at the Earl of Derby's race track.
8. An American buccaneer.

If you know a Navy man, don't ever call him a "gob"—sailors consider the name an insult. You can get on the right side of him though if you offer him a Camel—or better yet, send him a carton. Camels are the favorite cigarette with men in the Navy (Army, Marines, Coast Guard, too, for that matter) based on actual sales records from the service men's stores. And though there are Post Office restrictions on packages to overseas Army men, you can still send Camels to soldiers in the U. S., and to men in the Navy, Marines and Coast Guard wherever they are.—Adv.

★ IN THE ARMY ★ they say:

"ARMY BANJO" for shovel

"HIVE" for discover

"BOUDOIR" for squad tent

"CAMEL" for the favorite cigarette with men in the Army

FIRST IN THE SERVICE

The favorite cigarette with men in the Army, Navy, Marines, and the Coast Guard is Camel. (Based on actual sales records in Post Exchanges and Canteens.)

SNAPPY FACTS ABOUT RUBBER

Recapped tires will render
satisfactory service—if the
tire carcass is in good con-
dition, good workmanship is
exercised, inflation rules are
observed and speed is kept
to 35 mph. Have your tires
recapped at a reliable shop.

Scientists have developed the fact
that when a car is driven at 50 mph
there is a centrifugal force of two
tons trying to pull the tires apart.

That our standard of living is
affected in many ways by
the shortage of rubber will
be appreciated when it is
known that normally about
50,000 items were made with
rubber.

Ink Spots
And Spatters

By Jergle

In Salt Lake City a monument
has been erected in memory of the
gulls. The pioneers who settled
Utah in 1848 were faced with star-
vation because the crickets were
destroying their crops. Then one
day when they were almost inde-
spair the gulls came in great
flocks. They were just as hungry
as the crickets were, and all day
long they feasted on the insects.
The crickets were destroyed and
the crops were saved. So grateful
were the settlers that they erected
the monument and also passed a
law forbidding the killing of a gull.

If there are any medals to be
passed out for early gardening this
year, Dr. D. P. Anderson should be
handed one for having the first
sweet corn in the community. Dr.
Anderson and family have enjoyed
sweet corn from their garden since
as far back as last week Tuesday.
C. G. Waterman is a close second
as the Watermans had sweet corn
from their garden Saturday.

At the present time, according
to the War Department, 17,083 Am-
ericans are being held prisoners
of war. Of this number, Japan is
holding 11,307 including Filipinos.
Germany holds 3,312. Italy holds
2,164. The casualty list shows 13,
641 deaths. Of this number the
army loss is 6,218 the Navy 5,644
the U. S. Marines 1,601. Coast Guards
73.

If you are looking for things un-
usual go to the Henry Ward farm.
Right now Hank is quite pleased
with a western variety of pop-corn
that in tassel and setting ears
might be classed as a midget, at
the stalks are only about two feet
high. If the kernels are as small
in proportion Hank will have to
use a magnifying glass to find the
kernels.

The war is causing the German
people to give annually one-half of
their income to carry on their de-
struction of other nations. Thus far
we have had just a taste of taxes
but we may come close to the 50
percent before we get through this
job.

The Iowa state treasury bulged
with money July 1 at the close of
the fiscal year. Books of the
State Treasurer W. G. C. Bagley
the state banker, showed \$54,190,
057.02 in state funds in cash, bonds
and subject to call.

It seems the United States has
three wars on its hands," says the
St. Louis Post-Dispatch. "One a-
gainst Germany, one against Japan
and a third against John L. Lewis."

About one Iowan in every family
on the average, is associated direct-
ly with the war effort. There are
582,300 Iowans thus engaged.

One-tenth of all the food prod-
ucts in the United States comes
from the state of Iowa. We may be
proud that we live in Iowa.

Three factors should be checked
on cream separators to see that
they are working correctly. Each
separator should be in good mach-
anical condition, fastened firmly to
a level foundation, and turned at
an even speed at the rate recom-
mended by the manufacturer.

We want your news Phone 12.

BETTER IOWA

GARDENS

It is time to plant Chinese cab-
bage (celery cabbage), particularly
in northern Iowa. Gardeners in
southern Iowa can plant as late as
the last week in July. Plant 3 or 4
seeds per hill and space hills 15
inches apart. Cut off the weakest
seedlings later and save the strong-
est. Varieties to grow are Chihli,
Petai and Wong Bok. Remember
that Chinese cabbage must not be
transplanted.

Market supplies of bleached cel-
ery and head lettuce will be very
limited during the coming winter.
Prices will be high. Families who
want leafy vegetables for the table
will want to store Chinese cabbage
as well as some late cabbage. It
costs very little to produce and
store fresh vegetables. Head lettuce
and bleached celery are not adapted
for midwest conditions, but Chinese
cabbage can be produced success-
fully by every home gardener.

Gardeners who planted Chinese
cabbage in the spring inspite of
warning to wait until July are
nearly all disappointed. Wherever
Chinese cabbage has been observed
this spring little or no heading has
occurred. It develops flower stalks
when planted as a spring crop.
Therefore it is a waste of time and
good garden space to grow Chinese
cabbage as a spring crop. Garden-
ers who have planted it as a spring
crop can demonstrate the value of
July planting by making another
planting within the next week.

According to the New York State
College of Home Economics,
Chinese cabbage is somewhat high-
er in mineral value than are head
lettuce and celery. Chinese cabbage
also is reported as being a much
better source of vitamins A and C
than either head lettuce or celery,
but is not quite equal to them in
vitamin B or in riboflavin content.
Chinese cabbage can be used in as
many ways as ordinary cabbage.
However, it is essentially a salad
vegetable. The thick midribs are
particularly choice in delicate
flavor and are preferred by some
people in place of celery.

The turnip is another vegetable
that better as a fall crop than a
spring crop. Sow the seed the last
week in July for storage turnips.
Purple Top White Globe is the var-
iety most commonly planted. Many
gardeners prefer varieties of yellow
fleshed turnips as they are consid-
ered by some as better in quality
than white fleshed varieties. Golden
Ball is a good yellow fleshed var-
iety. Rutabagas are yellow fleshed
and closely relate to the turnip but
in most parts of Iowa it is a waste
of time to grow rutabagas.

Rutabagas require a long, cool
season to mature and for this reason
are not adapted to our climate.

AVERAGE RURAL TEACHER NOW PAID \$100 A MONTH

Most township school districts in
Hancock County have complete
teaching staffs for their rural
schools this fall. This county is
more fortunate than some in the
state which still are short up to 25
per-cent of the required number of
teachers needed.

The independent and consoli-
dated schools are finding it more
difficult to fill the vacancies in
their high schools, and a complete
staff is an exception.

Some teachers have left the
ranks to embark in matrimony, as
is always the case, and some have
merely taught as long as they wish
to. But in addition to these cus-
tomary causes of abandonment of
the occupation, the war has been re-
sponsible for many more vacancies.
A good many young women either
are going into war service or are
changing their type of work under
the lure of higher salaries in
civil service or other office employ-
ment.

It appears at the present time
there will be 91 rural schools
operating in Hancock County this
fall, including Miller independ-
ent and the St. John's Lutheran
Parochial school. Three sub-dis-
tricts have closed since last fall
and one sub-district is reopening
after having been closed a number
of years.

The average salary to be paid is
about \$100.00 per month, the high-
est being \$115.00 including bonus,
the lowest, \$85.00 per month. Gen-
erally speaking the salaries have
been substantially raised since
last year.

Most townships are planning to

use the basal and co-basal readers,
selected by the county board of ed-
ucation, in their schools this fall. In
most instances where both are in-
troduced the township is purchas-
ing the co-basal as their supple-
mentary reader and paying for the
series from the general fund. The
number introducing science this
fall is still incomplete.

26.

What You Buy With WAR BONDS

"Smoke Eaters"

A battlewagon loaded with various
explosives, bombs, torpedoes, oil
and gasoline is not the safest place
to be with a fire raging, so all but
the smaller ships of our Navy are
equipped with elaborate fire fight-
ing apparatus.

It may be that this equipment
never will be used during the en-
tire course of the war, but it must
be paid for out of the War Bonds
and Stamps that we are setting aside
each payday. U. S. Treasury Department

Cities Given Right to Build Post-War Funds

Wide interest of the nation's mu-
nicipalities in preparing now for
the postwar era is reflected by 1943
legislation giving cities and towns
legal authority to build up cash re-
serve funds for public works con-
struction after the war.

Seven state legislatures gave their
local governments such authority
this year, raising to 16 the number
of states where local governmental
units have been given legal authority
by the state to lay money aside for
the future, the American Municipal
association reports.

States taking action this year were
Arizona, Connecticut, North Caro-
lina, North Dakota, Minnesota,
Pennsylvania and Rhode Island. The
nine states enacting the legislation
previous to 1943 were Oregon, Cali-
fornia, Nebraska, New York, Michi-
gan, Washington, Kentucky, New
Jersey and Massachusetts.

Three of the latter states—Michi-
gan, New Jersey and Oregon—
broadened their previously enacted
statutes this year. Oregon, the as-
sociation pointed out, was the first
state to authorize municipalities to
build up reserve funds, taking the
action in 1931. Reason for the move
at the time, a reason which the as-
sociation says holds good today, was
to help cities out of situations where
they would be paying off long-term
loans long after the projects for
which the money was borrowed had
worn out.

Saudi Arabia Fills Allied Gap in Mohammedan World

Saudi Arabia, latest addition to
the long list of nations receiving
Lend-Lease aid from the United
States, fills the final gap in the United
Nations front in the Arab world.
The large and strategically situat-
ed desert kingdom occupies the
lion's share of the Arabian penin-
sula.

Saudi Arabia has long coastlines
on the Red sea and the Persian gulf
—both important Allied supply ar-
teries. Across the Persian gulf to
the east is Iran, whose "corridor"
is keeping Russia supplied with
American war goods.

Two holy cities of Mohammedan-
ism, Mecca and Medina, are in the
Hejaz portion of Saudi Arabia. De-
vout Moslems try to make the pil-
grimage to Mecca at least once a
lifetime. Every year thousands of
these tourist-pilgrims make the trip.
They provide the Hejaz with its
greatest income. Mecca and Jidda,
its seaport 45 miles west on the Red
sea, almost live on this trade.

Recently, oil has been struck by
American engineers at several
places in the kingdom. A pipe line
connects one field with Ras Tanura,
new Persian gulf port. Concessions
and royalties for the "black gold"
are greatly increasing Arabia's rev-
enue. Pearl fishing on the east
coast is also profitable.

Canning Affects Nutrients

The effect of nutritive value varies
from one canning method to another.
To a large extent, the factors that
affect palatability also affect nutri-
tive value, so the product which looks
and tastes the best is many times
also best nutritionally. Time and
temperature are important in deter-
mining vitamin content. In general,
the higher the temperature required
for processing and the longer the
time it must be applied, the greater
the destruction of vitamins.

As in freezing, the chief nutrients
to be affected in canning are vita-
mins A and C. Both are rather
easily destroyed by oxidation. Hence
if food containing them is heated
in the presence of air, much larger
amounts are destroyed than if air
is excluded during processing. On
this basis, open-kettle canning is
more destructive to vitamin C espe-
cially, than water-bath canning.
Foods which are pureed when hot
are apt to lose considerable amounts
of vitamin C. On the contrary, foods
which are processed in closed con-
tainers, as the waterbath and pres-
sure cooker, are protected to some
extent from such losses.

Reinforce Sweaters

Sweaters should be examined oc-
casionaly for thin places, particu-
larly the elbows and the underarm
sections, and reinforced before they
wear through or before the thread
breaks. Weak places in the thread
where stitches may drop should like-
wise be noted and caught with
matching sewing thread. One
dropped stitch can be replaced with
a chain stitch without being notice-
able, if fastened inconspicuously on
the wrong side. Ladder runs, sim-
ilar to those in hose, can be re-
paired with a crochet hook. Latch
needles, however, which are used
for stockings, are too fine for sweat-
er yarns.

Train Tomato Plants

One of the best ways to manage
tomato plants when planting space
is limited is to prune them to a
single stem and train them upright
in the way they should go. Many
gardeners with ample space prefer
this method.

Tomato plants grown in this way
give a larger yield of early fruit
and, if properly spaced, about the
same yield for a given amount of
ground although there will be less
fruit per plant. The method insures
clean fruits of possibly a little better
shape and color although it may in-
crease the danger of sunscald and
blossom end rot.

Hancock County Board Proceedings

5TH ADJOURNED JUNE MEETING

Garner, Iowa
July 19, 1943
Supervisors met in session on above date with J. A. Chabers, Penn Eckels, and F. J. Schoun present.
The minutes of the last meeting were read and approved as read.
Supervisor Schoun appointed a committee to investigate and cause to be made in 1944 No. 47.33 and 1944 No. 7, Section 5.

WHEREAS Hancock County, Iowa, by its Board of Supervisors desires to rent the SE 1/4 of section 27, Township 36, Range 26 to P. Frank Gabhan and George Gabhan brothers for the aggregate rental of \$400.

BE IT THEREFORE RESOLVED by the Board of Supervisors of Hancock County, Iowa, that the real estate described in the foregoing report be and the same is hereby leased to Frank Gabhan and George Gabhan brothers for the period of one year from and after the first day of March, 1944, at an agreed rental of \$400 per year, cash on or before December 1, 1944.
Chairman F. J. Schoun being and is hereby authorized to execute said lease in behalf of Hancock County, Iowa.

The foregoing resolution was offered and read by Supervisor Eckels who moved its adoption, seconded by Supervisor Chabers, who upon being called to the chair, placed the motion on adoption and upon being called to the chair, carried.

On motion and a vote of the Board adjourned to July 26, 1943, at Hancock, Iowa.

F. J. SCHOUN, CHAIRMAN

OFFICIAL NOTICE

BEFORE THE IOWA STATE COMMERCE COMMISSION
TO THE CITIZENS OF HANCOCK COUNTY

Notice is hereby given that a petition for a franchise to construct and maintain poles, wires, guy wires, towers, cables, conduits and other fixtures and appliances for the purpose of conducting electricity for heating, power and heating purposes has been filed by the Central States Electric Company, Cedar Rapids, Iowa, in the office of the Iowa State Commerce Commission, that said petition asks the right to construct, own, and maintain said electric transmission line over, along and across the following described public lands, highways, streams and private lands:

(6600 volts)
Beginning at the southeast corner of Section eighteen (18), Township ninety-six (96) north, Range twenty-five (25) West of the 5th P. M., Hancock County, Iowa, then east on the highway on the south line of said Section eighteen (18) one (1) mile, and beginning at the northeast corner of Section sixteen (16), said Township, and thence thence south on the highway on the east line of said Section sixteen (16) one half mile, and beginning at the northeast corner of the northeast quarter of Section sixteen (16), Township 36, Range 26, on the north line of said Section sixteen (16), Sections twenty-four (24) and twenty-five (25), said Township, Range two, and one half mile, to miles.

The Iowa State Commerce Commission fixed the tenth (10th) day of August, 1943, ten (10) o'clock A. M. in its office at Des Moines, Iowa, as time and place for hearing said petition.

Any objections to the granting of such franchise must be in writing and filed in the office of the Commission at least five (5) days before the date of hearing. The Iowa State Commerce Commission suggests that if you are to be represented at the hearing by someone who has not filed a petition for it.

(Publish July 21, 1943)

Dairy cows need spraying with fly sprays, but use just enough to do the job. To heavy spraying may produce such a thick coating on the hain that the have difficulty keeping cool.

Around Iowa

PUT TO USE

The Storm Lake airport hangar, never occupied by a plane, will now be used as a machine shed. Alex Kent recently purchased the building from the city council.

GOOD GRADES

On the basis of the statewide eighth grade rural school examinations Harry R. Shipton, Tama county superintendent of schools, has received a report from the state department of public instruction stating that Tama county pupils were above average of students in the state. The only subject in which the Tama county pupils failed to catch the highest average was geography.

MAYBE IT'S GOLD

Rock with a yellow cast were found by workmen excavating on a lot in Humboldt. The verdict by some individuals was that the yellow flakes in the rocks are gold.

IN RUNNING ORDER

The first moving picture machine to be used in Waverly was located the other day among the assets of the Howard Page estate. Although the machine has not been used for several years it will still work.

DOUBLE TROUBLE

While getting their son, Joseph, ready to take to the hospital for an emergency operation, Mr and Mrs Ed Schilling of New Hampton had to take another son at the same time. John Schilling fell, injuring his arm badly enough that it was necessary to have it placed in a cast.

MUST PARK CORRECTLY

LeMars police were having quite a time bringing parking violators into court recently. The car owners will probably park their cars now so that they do not straddle yellow parking lines or are parked at too great an angle. It cost each \$1 to learn this lesson.

NEW PARKING LOT

To save parking congestion in the streets, Tipton officials have now obtained a parking lot large enough to handle 60 cars. The lot will not be placed at all times, but will be supervised by someone part of the time.

GROWS OWN LUMBER

Theodore McLain of Decorah recently has cut 8,900 feet of native lumber on his farm. One proof of his work is a picket fence made from lumber taken from his place.

TRADED CARS

Conrad Abels of Holland parked his automobile alongside one of similar make and model belonging to Lee Chandler, Dike banker. Upon returning to the car, through error Abels got into the Chandler car and started homeward. Mr Chandler called the J. J. Abels home and asked if Conrad had arrived, advising them he thought he had the wrong car as Abels car was still parked. Conrad was soon back in town with the Chandler car, offering to pay for the gasoline used, but the offer was refused. Within a few days Mr Chandler received a \$100 check from Conrad Abels marked "experience", plus a ration stamp for the gasoline used.

HOOKS HIMSELF

John Sullivan of Waverly injured his nose when he gave a bale of hay a push, catching himself on the hay hook. The hook either pierced the nose at the bridge or pushed hard enough to dislodge something there. Two days later he jabbed the same kind of hook into the back of his left hand.

SPEEDS WORK

Ernest Hoffman of Madrid is now able to cross 40 acres of corn per day since he has hooked two single-row cultivators behind his two-row tractor cultivator. Mr Hoffman claims that it takes very little more power to plow four rows than it did two.

Sweet cream is needed to produce the best quality butter.

MORE GASOLINE NEEDED

Last week thieves moved four Waverly automobiles from their parking places, uncoupled the gas lines and drained all of the gasoline out.

RECOVERED

Before he knew that his billfold containing \$46 had been lost, Darrell Sorey of Logan was again it's possessor. Archie Graybill found the billfold, upon opening it found the \$46, and returned it to Mr Sorey.

MUD BATH!

Dave Steel and Pat Clark of Iowa Falls were comfortably seated on folding chairs while fishing from a boat Mr Steel spied some clams in shallow water. Reaching out to get the clams, the chair folded and Mr Steel landed head first in the mud. Needless to say, Mr Steel was muddy from head to foot, and he had to wash mud from his hair. For all of his trouble, though, Mr Steel got the clams.

TO ENGLAND

Herbert H. Plambeck, radio farm editor of Des Moines, is visiting the United Kingdoms as guest of British Ministry of Information with sanction of U. S. departments of State and Agriculture, primarily as an agricultural observer.

CONSIDERATE

The Guthrie county officials who notified Clegg Hilde and Fur company of Ft. Dodge by telephone that one of its drivers had improperly disposed of a dozen hog hides, took into consideration gasoline and tire rationing. A guilty plea was entered by phone and the fine of \$25.65 was assessed the same way. The check to cover the fine was promptly mailed to the proper authorities.

NEW PET

Joan Steinbrecher of Pocahontas, has a new pet to help her while away her time. Her father, Lieut. (sg) B. C. Steinbrecher with the U. S. Navy, recently sent a monkey that he obtained while on a South American trip.

ROSES, ROSES, EVERYWHERE

The house belonging to Miss Ida Hoffas of Decorah has been beautifully covered with vining roses this summer. The vines have climbed to the roof of the two-story house, and recently have been full of pink blossoms.

OF ITS OWN ACCORD

A large window that had been cracked for sometime on a Knoxville cafe, recently gave way and part of it fell to the sidewalk. The remainder of the glass was found to hang dangerously, so the entire window was removed.

Many summer plantings off carrots, beets, snap beans, and sweet corn are now up. Particular care must be given to carrot and beet seedlings. Such delicate seedlings need to be watered in case of dry, hot weather.

Although unknown in many parts of the world, popcorn is believed to be grown in every state in the Union as a garden crop to supply home needs.

Potatoes should be lifted as soon as the vines have died. The risk of the tubers rotting in the ground is too great to neglect digging the potato crop.

Farmers are urged to cull laying flocks now. If hens are culled now they will not have to compete with the heavier marketings of springs expected later.

In culling hens, take out those with gray eyes or with irregular-shaped pupils of the eyes. Birds with this kind of eyes are likely to have range paralysis.

Farmers who had erysipelas in their hogs last year are advised this year to have the hogs given the double-treatment to prevent the disease.

Erysipelas and hog cholera often have much the same symptoms.

If eggs are left out at room temperature for 3 days, they will lose as much freshness as in 12 months of refrigeration.

Deliver cream at least three times a week.

Feeding a little raw steamed bone meal with your calf meal or grain mixture probably will stop calves from growing on wood. The habit usually indicates phosphorous deficiency and the bone meal will correct this.

4-H GIRLS' CLUB OFFICERS MEETING AND PICNIC

Thirty Hancock County 4-H Girls' club officers and leaders participated in a training conference and picnic at Britt on Tuesday, July 12. The Bingham Boosters Club led the attendance with five officers and leaders.

The county officers, Clarice Nelson, President, Jeroldene Goll Secretary - Treasurer, an Marjorie Greimen, Historian, conducted a model business session for the group. A plan for making the 4-H insignia to be worn by each girl on the sleeve of her uniform was presented by Mrs. C. J. Wille. Suggestions for demonstrations and displays at the Achievement Show August 23 and 24, were given.

Games and stunts were planned by each club for the enjoyment of the group during the last hour before adjournment.

Treatment of noxious weeds with chemicals should be carried on during the blossom stage when root reserves are lowest and the weed can be damaged most. The treatment with chemicals such as Atlacide or sodium chlorate is practical only for small patches, or places that are not easy to get at. Use about a pound of the chemical to a gallon of water. The weeds should be well covered, using a high pressure sprayer. Evenings or cool days are the most effective times for this work, and probably about three applications will have to be made for a complete kill.

FIELD OF EARLY OATS

Clarence Newberger, farmer residing south of Klemme, probably set the record in north Iowa this year for early oats harvest.

On July 12th Mr Newberger combined his field of oats and on that date very few fields had even been cut with a binder.

He stated the oats was of good quality and uniform and tested 36 pounds per bushel.

RURAL YOUNG PEOPLE PLAN ANNUAL PICNIC

The Hancock County Rural Young People's organization announce their annual picnic to be held at the Clear Lake State park, Sunday, July 25. Those attending are to meet at the Hancock County Farm Bureau office in Garner at 11 a. m. The committee asks each car load to plan for food for their group.

WEEKLY NEWS ANALYSIS

Senate, House Conference Committee Stops Roll-Back of Retail Food Costs; Revised Bill Approves Funds for FSA; Heavy Aerial Action Marks Pacific War

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysis and not necessarily of this newspaper.)
Released by Western Newspaper Union.

To test new rubber life rafts and accessories, six men were cast adrift off Cape Fear, N. C., in the Atlantic. The men were equipped with a new lightweight life preserver which also holds rations and other essentials, solution for purifying salt water for drinking and oars out of which a mast and boom can be erected by linking them together in a right angle.

PRICE 'ROLL-BACK':
Doomed by Committee

Drastic revision of the administration's subsidy program was indicated by action of a senate and house conference committee, which prohibited use of funds for the "roll-back" of retail food prices. The committee's move would kill the present "roll-back" of butter and meat, only permitting payments to processors for commitments to June 15.

However, the committee did authorize the payment of 150 million dollars in subsidies to offset increased transportation costs, and stimulate the production of scarce metals and essential food products. Congressional approval, however, would be required for expenditures over 150 million dollars.

The conference committee's action ignored an appeal by the War Labor board for the adoption of the administration's "roll-back" program. Citing its policy of limiting wage increases to 15 per cent over the January 1941 level, the WLB declared that the cost of living has spiraled up 6 per cent since last October, with food alone rising 12.9 per cent.

The conference committee increased the Commodity Credit Corporation lending authority 750 million dollars to an aggregate of 3 billion 400 million dollars. Under the terms of the bill which also extended the life of the CCC for two years, the war food administrator would be allowed to buy food from farmers and resell it at a loss to stimulate production.

CHEERS ALLIES:
Major Blow

Invasion talk quickened with the statement of Malcolm MacDonald, British high commissioner to Canada, that the Allies would soon assault Hitler's European fortress.

In predicting the invasion, MacDonald said a series of small forays could be expected to feel out the enemy before a major blow would be struck.

MacDonald saw further cheer in the Allies' operations against U-boats in the North Atlantic. Even as he revealed that one submarine had been sunk each day during the preceding two weeks, Goering's Essener National Zeitung confessed that the Allies had surprised the Nazi U-boat force by the use of aircraft carriers in convoys.

As invasion talk increased, Allied bombers continued to pound Germany.

TREASON:
New Trials in Chicago

Basing part of its decision on a recent Supreme court ruling, the United States Circuit Court of Appeals voided the conviction of six defendants for treason in Chicago and ordered the case reheard.

It was pointed out that the Supreme court had held arraignment before a magistrate necessary before a suspect could be questioned. In the treason case, statements had been taken before such arraignment, although the government claimed the suspects had waived the right of appearance before a judicial officer.

The appeals court also held that the individuals were entitled to separate trials which the court denied, and Judge William J. Campbell had erroneously instructed the jury.

CHESTER DAVIS:
Resigns Food Job

As support grew in congress for his appointment as Food Czar, Chester Davis resigned from his position as War Food administrator. Lack of sufficient authority and opposition to the government's subsidy program were the reasons Davis gave for his action.

President Roosevelt accepted the resignation and immediately named Marvin Jones, a former Texas congressman and chairman of the United Nations' recent food conference, as his successor. Mr. Roosevelt also relieved Davis of responsibility for plotting the 1944 food program, saying it would not be proper to tie another administrator to somebody else's policies.

In his letter of resignation, Davis declared that subsidies would not tend to halt inflation in this country unless accompanied by current tax and savings programs. Mr. Roosevelt replied with the statement that congress had failed to enact the added tax legislation he had asked.

In answer to Davis' assertion that authority over broad food policy and the day-to-day decisions were being exercised elsewhere, Mr. Roosevelt said he had named a War Mobilization director for the purpose of co-ordinating all functions of the war agencies.

MEDITERRANEAN:
Blast Axis From Air

While the Axis continued to report Allied concentrations in North Africa, U. S. airmen struck at Nazi aerial installations in Greece, further diverting attention to the Balkans.

Strong formations of Liberator bombers raided Axis airdromes near the ancient Greek capital of Athens. Although enemy planes arose in number to the defense, hits were reported on hangars, fuel dumps and aircraft spread over the fields.

In announcing the raids, the ninth U. S. air force also revealed that the Axis continued their novel attacks on our planes by attempting to drop bombs on them from fighters overhead.

British Wellington bombers dropped incendiaries and block busters on Naples as direct attacks were continued on Italy. Docks and industrial installations were reported struck and the Italians admitted damage.

COAL PRODUCTION:
U. S. Names Director

While 156,000 miners stayed out of the pits, Carl Elbridge Newton, 45-year-old president of the Chesapeake and Ohio railroad, was appointed to direct the operations of the nation's mines now under government control. The selection of Newton was announced as Secretary of the Interior Harold Ickes told a congressional committee that there was no hope for an early return of the properties to the owners.

Although many locals voted to resume work, thousands of soft and hard coal miners insisted they would not go back without a new contract. Pits of several steel companies in Pennsylvania were affected, but in Illinois where the union and operators had come to an agreement before the War Labor board refused to recognize the concession, all of the 25,000 miners were on the job.

Formerly an assistant United States attorney in New York and special assistant state attorney general in New York, Newton was named president of the Chesapeake and Ohio last December 15. However, he had been connected with railroad matters since 1938. In his capacity, Newton is answerable only to Ickes, although he will have the services of Ickes' office.

U. S. BACKS GIRAUD:
F.D.R. Shows Support

President Roosevelt's approval of General Eisenhower's support of Gen. Henri Giraud's French command in North Africa was seen in an invitation extended to Giraud to visit the U. S. Although Giraud accepted, he is not expected to make the trip until cessation of hostilities.

General Eisenhower came to Giraud's side during the recent conferences of the French National committee at Algiers. Gen. Charles DeGaulle had boldly sought to subordinate Giraud to a military commission and replace certain of his officers. General Eisenhower then stepped in and insisted on the retention of Giraud's command.

Back of the maze of political complication, one could see General Eisenhower's firm respect for the honor so strongly cast in military men. It was General Eisenhower who negotiated with Admiral Jean Darlan for French North Africa's collaboration with the Allies at the time of the U. S. landings in 1942. When Darlan was assassinated, General Giraud inherited his position as high commissioner and with it, Darlan's organization.

NAZI SPY:

Trial for espionage with death or prison facing him if convicted loomed before 57-year-old Ernest Lehmitz, Staten Island, N. Y., air raid warden, following his confession to the FBI that he had informed the German government of American troop movements, convoys and arms production.

Lehmitz had communicated with the Nazi intelligence by using invisible ink to write between the lines of apparently harmless letters to acquaintances in Germany.

IMAGINARY INTERVIEWS:
Benito and Adolf in July

Benito—Well, what do you advise me to do now?

Adolf—I have nothing to suggest at the moment.

Benito—This is a helluva time to reach that decision. You were plenty free with suggestions in the past.

Adolf—Things have changed since then.

Benito—You're telling me!

Adolf—What makes you so irritable and nervous? We haven't lost MY war yet.

Benito—You used to call it OUR war.

Adolf—Pull yourself together and look like a Roman emperor!

Benito—I keep pulling myself together but I don't get any results.

Adolf—You don't even talk like a Caesar any more.

Benito—Every time I talk like Caesar these days I imagine I hear laughter.

Adolf—What's this I hear about you wanting peace? You can't quit. You're in up to your neck.

Benito—Why don't you make it "OUR" neck?

Adolf—One neck will be enough.

Benito—Not from what I hear!

Adolf—Come, come, things can't be as bad as you think.

Benito—They can be as bad as we BOTH think.

Adolf—You're a pessimist. Every cloud has a silver lining.

Benito—Not any more. Every cloud I see has 100 bombers and a fighter escort.

Adolf—Have some sense. Try to be like me.

Benito—It's trying to be like you that made me what I am today.

Adolf—Whenever things look bad, think of Napoleon.

Benito—You can have Napoleon. I'll take his horse.

THE DIARY OF A 1943
VACATIONIST

My vacation began today. Packed my bags early and went into my own back yard at once, picking a nice spot between the clothes pole and the apple tree. It is not hot and uncomfortable enough in my yard to fit the requirements for a standard vacation, but it will have to do.

Tuesday

Feel quite rested, which starts any vacation off all wrong. Here it is the second day and I haven't had ptomaine poisoning yet.

Wednesday

It is so cool and quiet that it's disturbing. I had some sand, mud and shells dumped in a corner of the yard. Scattered a lot of broken bottles in it to get the effect of being at a popular bathing beach. Something missing. Didn't get quite the right atmosphere. Suddenly realized what was wrong. No banana peels, lunch remnants, eggshells or tin cans. Had them scattered around at once.

Thursday

Think of it! Three full days on a vacation and not annoyed once by invitations to make a fourth at bridge! Took a little trip around to see the sights. Finnegan's saloon, Ye Old Homestead Tavern, Epstein's delicatessen store and a new excavation down at the corner where they must be putting in a new sewer pipe. Wish I knew where there was some poison ivy. I've had it every vacation in my life by this time.

Friday

Up early and peeked into the garage to see the flivver. It seemed so wonderful to look at it and know that I wouldn't be needing it. Haven't the slightest idea whether it has any oil or gas in it or how the tires are. And don't give a darn. Never recall being on a vacation this long before with automobile still in one piece. Have lived at this address 15 years, but this is the first time I ever knew my back yard was shady.

Just the same, I got a little yearning for an old-time vacation this afternoon, so ate four poorly cooked all-hot, which gave the necessary feeling of distress to which my vacations have accustomed me. Had mom put some red ants in the desert this evening. Having a fine time. Wish you were here.

Saturday

I just can't believe it! A full week gone and I haven't had to have the doctor for sunburn, snakebite or a nervous breakdown! Six days without having to clean a white shoe!

Sunday

Got up early to write letters and postcards to my family. Suddenly realized I was home and in their midst. Never had such a feeling of joy and relief. Feel so relaxed, refreshed and rejuvenated that it makes me a little sick.

OUR WOMEN IN SERVICE

Let there be many Fascist graves in honor of the lovely Waves. A blow at all the Axis pack Is surely every splendid Waac. And high among the stripes and stars

Belong our patriotic Spars.

Alfred Schenck.

Vanishing Americanisms

You drive straight ahead for about 100 miles and then turn at the monument . . .

GOOD NEIGHBOR

Many a state department official wishes we could fix up Argentina as neatly as Comrade Stalin thinks we can.

When Willkie was in Moscow, Stalin raised a question about Argentina, describing it as the Axis source of information about ship movements. He couldn't understand why such a condition should be allowed to exist.

"If you have so much power," Stalin told Willkie, "why don't you clean up the Argentine government, or take over the country—do something to turn the Axis out of there?"

Willkie found it somewhat difficult to explain that the Good Neighbor policy would prevent such interference, in time of war as in time of peace.

NOTE: State department experts expect that, despite the new Argentine government's reactionary attitude on domestic questions, it will be driven to break relations with the Axis, in order to get lend-lease supplies from the United States. This is what Latin generals want most.

HUMANE BOMBING

Strange as it may seem, the United States air forces are planning the humane bombing of Germany. They want to avoid killing people and destroying non-military buildings. They want to bring the war to a merciful ending.

High ranking officers of the air forces are urging that we conduct our bombing operations in such a way that unnecessary destruction of enemy life and property shall be held to a minimum.

This is part of their thesis in favor of precision, or "pin-point" bombing, as contrasted with the "area" bombing of the RAF. The precision bombing, carried on in daylight, is able to pick out the precise military target, and destroy that without laying waste to an entire city, or killing helpless civilians.

These air forces officers speak of the post-war attitude of nations toward each other, emphasizing that careless bombing would intensify the hatreds of war, and make it more difficult to build a peaceful world. Somebody will have to rebuild the broken cities of Europe. World ties are now so close that no great areas of destruction can be allowed to remain; rebuilding will have to be done, and only the victors will have the power to do the work.

Therefore, say these exponents of precision bombing, let us have no indiscriminate bombing, but only a precision job, which spares the life and property of the enemy as much as possible.

CHURCHILL THE PROPHET

Students of air power have dug up an old statement of Winston Churchill's, written in 1917, which reveals an amazing foresight in the possibilities and limitations of aerial bombing.

As everybody knows, the Nazi blitz against England, intended to terrorize the people, failed in its objective. On the other hand, the more scientific bombing of the continent by the RAF and AAF—strategic bombing—is now expected to bring Hitler to his knees.

Churchill seemed to foresee both of these developments when he said in a paper on Air Power, written in 1917, that nothing we know about warfare can lead us to believe that bombing for terror alone can cause such a morale collapse as to force a major nation to sue for peace.

Churchill emphasized that air power must single out and attack transportation, factories, and other enemy installations, upon which the enemy war-making ability depends.

England's survival of the blitz gives dramatic support to the first part of that statement, and Allied air power is now proving the second part.

INSTALLMENT BUYING

Business is usually squawking about government regulation, but here is one case where merchants want it continued after the war. They want to cherish and preserve Regulation W.

This is the regulation requiring heavy down payments on consumer purchases. For example, the down payment on a \$200 refrigerator today—if you could get one—would be about \$60, compared with three or four dollars before the war.

War-time purpose of this regulation is to curb buying and thus reduce inflation. But retail merchants like it for other reasons. It saves them bookkeeping expenses, avoids the nuisance of dunning, and provides cash.

CAPITOL CHAFF

Most carefully guarded targets in all Germany are the synthetic gasoline and synthetic oil works of Blechhammer and Bruex. If they could be knocked out, Germany would be pretty well out of the war. U. S. airmen are itching to get at them.

The Japanese embassy and grounds are being carefully cared for by the neutral Spanish embassy.

Manpower shortage has caused substitution of women for men at the switchboard of the FBI.

In N. Africa With the
British Eighth:

(By George Lait, Int'l News war correspondent, who is back months' continuous action under the British retreat and the triumphant Rommel-rout to Bir el Jebel gomery's Eighth Army. He lived in the desert for a year and a half, was there three times and frequently cited for

It gets really hot in the desert—130 degrees and no being quite common during the summer season. But it is no more comfortable than New York degrees. In the desert it's just in New York it's humidity. American fliers and British "mies" wear lightweight clothing, but the Arab wraps heavy woolen blankets and dozens flannel nightshirts "to out the heat." Everyone's comfortable.

The Boche and Ginzo are serious observers of international as regards rendering useless frequent wells in the desert. In of poisoning the vital water supply, which is prohibited by treaty, they pollute wells as a means of killing a camel, sheep and goat and tossing the carcasses well. Makes water temporarily fit for human or animal consumption, but doesn't permanently decontaminate the spring. Several times of the Eighth Army's 2,500-mile after Rommel this was the water we had, we drank it by the nose, retained it a few moments and then did a rail-the-ship act. But managed to just enough moisture to keep. When forced to abandon huge heads of wine at Tobruk, the Italians paused just long enough pour a gallon of gasoline into barrel. So we used the wine radiators of our desert cars drank the water originally intended for the radiators.

Mail deliveries to the boys there vary, in my own experience from one week to eight months. Through the U. S. Army Post Office I have received airmail letters New York to Tripoli in seven days. Through the regular steamer via Cairo and the civilian delivery setup, a Christmas package Sherman Billingsley was delivered to me in July. It contained too-sedate neckties—for which Arab offered to exchange a camel—or a camel—and 100 books of Club matches, which are precious in the blue. In Tunisia, the stork is considered a favorable omen, Sherman's books were highly acceptable and valuable articles of barter in our dealings with the Senussi, reg and Berber sheiks. The exchange was one book of matches for one egg, one book of matches for one scrawny chicken, one of matches for one meal.

Certain Bedouin tribes and the famous Indian Ghurkas of the gomery's Eighth Army never their knives from the scabbard. The blade draws blood. To pose the naked blade without "ing" it makes the weapon lose. So when a Bedouin or Ghurka his knife out to show to a pal cuts his own finger to draw a drop of blood before returning it to sheath.

In New York when a dame to give a guy a brush-off she him her name is Miss Trout. Gives him the phone number of Aquarium as hers. In Cairo Alexandria, under similar circumstances, she gives him the number of the Egyptian Army racks and tells him to ask Yamenick Talata (in Arabic, by-threes, or "squads right").

The Arab in the cities of Africa is dirty beyond civilization. The Bedouin of the desert, however, is meticulously clean, although he may die of old age without having had a bath in water. desert Arab scrubs himself times daily with fine, dry sand at least seven times daily, as he cleanse himself thoroughly by each of the seven required prayers to Allah.

Throughout North Africa the mon tongue is Arabic. But differ so widely that natives of other regions. But written Arabic is the same throughout, as the Arabs learn to write from Koran. So, while an Arab can ways talk to a stranger, if both write they can get along by scratching tracings in the sand.

Ordinary dry tea leaves are most valued article of barter between the troops in the desert. The Arabs. A pound of tea is about \$6 in the desert region of Egypt, Libya, Cyrenaica and Tunisia. Sugar is second in the choice; hashish (prohibited law) third. When I first arrived the African Desert, the normal of exchange was 75 eggs for a teen cup of dry tea. As more more soldiers poured into Africa, the rate dropped to cup of tea, one egg.

HIGHLIGHTS . . . in the week's news

RYE: Rye sold at a 15 year peak on the Chicago market at \$1 for July delivery.

CHEMICALS: Three chemical companies have been indicted on three counts alleging violation of the anti-trust act. They are National Lead company, E. I. du Pont de Nemours company, and Titan company.

ORDNANCE: A huge ammunition depot is being constructed in the desert of Utah, on a 26,000 acre plot. Buildings housing explosives are well isolated in the great expanse.

INSURANCE: Life insurance in force now totals more than 139 billion dollars, according to a report of the Consolidated Chart of Insurance Organizations.

Will a Trial of the 'War Criminals' Be Aftermath of 'Unconditional Surrender'?

They Didn't 'Hang Kaiser'
In 1918, but Will Adolf
Be as Lucky?

By ELMO SCOTT WATSON
Released by Western Newspaper Union.

UNCONDITIONAL surrender" is the watchword of the Allies and, that has been brought out, the Axis leaders who placed upon trial for crimes against humanity which they and their followers have committed.

Such is the promise of President Roosevelt and Prime Minister Churchill and it is not likely that there will be any objection to that program from Joseph Stalin and Generalissimo Chiang Kai-shek. Certainly if the people of Poland, France, Belgium, Holland, Norway, Denmark, Greece and Czechoslovakia have anything to say about it, Hitler, Mussolini, Hiroto and their fellow international gangsters will not escape punishment as did Kaiser Wilhelm a quarter of a century ago.

Back in 1917-18 "hang the kaiser" was a popular slogan in the Allied countries even after the German monarch had abdicated and found refuge in Holland. That slogan helped continue Prime Minister Lloyd George in power in the British elections of November, 1918, and that promise in it might be made was indicated by Article 227 of the Treaty of Versailles, which was signed a few months later. The article said:

The Allied and Associated Powers publicly arraign Wilhelm II of Hohenzollern, former German emperor, for supreme offenses against international morality and the sanctity of treaties. The Allied and Associated Powers will address a request to the government of the Netherlands for the surrender to them of the ex-emperor in order that he may be put on trial.

Accordingly it was proposed that a tribunal, consisting of five judges, one each from the United States, Great Britain, France, Italy and Japan, should be organized to serve as a court of justice for the arch-criminal, and in January, 1920, a formal demand was made upon Holland for his surrender. But immediately the plan struck a snag. For the Dutch government announced that it was not a signatory to the Versailles treaty, therefore not bound by its terms and, moreover, national honor forbade the surrender of the royal refugee.

Expressing the fear that the kaiser might flee from Holland, the Allied governments repeated their demand. But Queen Wilhelmina and her ministers announced that this war was groundless since by royal decree the kaiser would be restricted to a certain section of Utrecht and forbidden to leave it. Warning the Dutch government that "the responsibility is now that of the Netherlands," the Allies left the matter there and so the Prussian war-lord retired to his wood-chopping at Doorn where he lived to see an Austrian house-painter revive his old dream of world-domination and German aggression plunge the world to another holocaust.

The kaiser, however, was not the

Von Hindenburg and Von Ludendorff—Their names headed the list of German "war criminals" of 1914-18.

only German leader whom the victorious Allies had marked for punishment. Another article in the Versailles treaty stipulated that "the German government recognizes the right of the Allied powers to bring before military tribunals persons accused of having committed acts in violation of the laws and customs of war. . . . The German government shall hand over to the Allied powers all persons accused of such offenses."

A list of 900 names, which included almost all of the military and political leaders of Germany during the war, was prepared in accordance with this article. The publication of this list, which was headed by the names of Field Marshal Von Hindenburg and General Ludendorff, stirred up a violent protest among the people of Germany and the new rulers of that country pleaded with the Allies not to force them to hand over these war criminals, declaring

KAISER WILHELM II

that it would mean the overthrow of the government and the resultant chaos.

Farceful Trials.

In response to this plea, the Allied governments cut the list down to 45 persons and permitted the Germans to conduct the trials. The result was a foregone conclusion. The Germans stalled as long as possible on the matter and it was not until three years after the war ended that a court in Leipzig went through the motions of staging a trial. All of the war criminals were freed either because their "innocence was proved" or because "their misdeeds were not covered by German law."

By this time the Allies were no longer allied and public sentiment among their peoples was largely indifferent to the idea of retribution. As a climax to the whole farceful affair, the outstanding "war criminal," the outstanding "war criminal," Von Hindenburg, was elected president of the republic of Germany and the weakness of this hard-bitten old warrior as the head of a civil government paved the way for the rise of Adolf Schickelgruber. So the "war criminals" section of the Versailles treaty remained as the only dead letter in it until this same Schickelgruber made the others dead letter also by tearing up the whole treaty and hurling it in the faces of Germany's conquerors.

Will the "war criminals" of 1939 "get away with it" the same way that those of 1914 did? Will Schickelgruber emulate the kaiser and find sanctuary in some "neutral" country? The list of such possible havens is small indeed—Sweden, Switzerland, Portugal, Spain and Turkey—and it is doubtful if any of these would welcome the arch-criminal of all history. The present Fas-

cist-minded government of Argentina might—if he could get across the Atlantic, either by U-boat or airplane. But that is a remote possibility, so it looks as though the Austrian house-painter has little chance of living to a ripe—if dishonored—old age in exile.

Perhaps, like Napoleon, he would exclaim "I prefer death." That was what the French dictator said when told that the British government was sending him to the barren rock of St. Helena. After his defeat at Waterloo, he surrendered to the captain of the British man-o'-war, Bellerophon, and threw himself upon the mercy of the prince regent, who later became King George IV. Napoleon believed that he would be allowed to settle down in some comfortable little place in England and great was his dismay and indignation when he learned that his captors had other plans for him.

A Dictator in Exile.

It was then that he declared his preference for death and it is said that Lord Liverpool, the British prime minister, was quite willing to accommodate him, just as millions today would be glad to accommodate Adolf Schickelgruber if he expressed a preference for death to exile or imprisonment. However, delegates from Great Britain, Russia, Austria and Prussia who formed the "Convention of Paris" in 1815 to pass upon Napoleon's war guilt overruled the wish of the British prime minister and the exile to St. Helena was the result. On that cheerless little island in the South Atlantic, he spent the next six years as a military prisoner with the rank of a British general "out of employment." Under instructions from the British government, he was treated as Gen. Napoleon Bonaparte, not as the emperor of France—a fact that was particularly galling to the ego of a man who had dreamed of world conquest.

One of the horrors of civil war is the bitterness of feeling between citizens of the same country which frequently transcends the bitterness the people of one nation feel toward "foreigners" with whom they are at war. During the Revolution many Patriots had a greater hatred for their former friends and neighbors, who were Loyalists, or Tories, than they had for the British soldiers or the Hessian mercenaries. Similarly four years of war which began in 1861 engendered animosities that were to linger for generations.

If many Southerners hated "that ape in the White House," there were an equal large number of Northerners whose favorite song was a promise to "hang Jeff Davis to a sour apple tree." For the North, which could admire the military genius of a Lee or a "Stonewall" Jackson, apparently could not concede that "that archtraitor," Jefferson Davis, had a single admirable trait. So their wrath for all "rebels" was concentrated on the head of the president of the Confederacy.

After Lee's surrender Davis, with members of his cabinet, fled south and he was captured in Georgia. He was imprisoned in Fortress Monroe and subjected to unnecessary indignities through the influence of certain revengeful members of the radical wing of the Republican party who were determined to bring him to trial for his "war guilt." Finally, after two years, Davis was released, with Horace Greeley and other Northerners, who had been his bitterest enemies during the war, providing his bail bond. His health broken by his prison experience and the public outcry for revenge having died down, no further effort was made to prosecute him.

Jefferson Davis

mand for the leader of the party. He was Col. Luke Lea of Nashville, later a prominent newspaper owner in the South, and his companion "footnote-to-history writers" were Capt. Thomas P. Henderson of Franklin, Capt. Leland S. MacPhail of Nashville, Lieut. Ellsworth Brown of Chattanooga, Sergt. Dan Reilly of Franklin, Sergt. Owen Johnson of Franklin, Sergt. Egbert Haile of Nashville and Corp. Marmaduke Clokey of Knoxville.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

By HAROLD L. LUNDQUIST, D. D.
Of The Moody Bible Institute of Chicago.
(Released by Western Newspaper Union.)

Lesson for July 25

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education, used by permission.

BIBLE TEACHINGS ON THE COST OF DRINKING

LESSON TEXT—Deuteronomy 21:18-21; Proverbs 23:20, 21; 1 Corinthians 6:9-11.
GOLDEN TEXT—Know ye not that the unrighteous shall not inherit the kingdom of God?—1 Corinthians 6:9.

Billions of dollars—how many we cannot say—make up the annual cost of liquor to America in dollars and cents. Terrifying as it is, that stupendous waste is but a drop in the bucket compared with the moral and spiritual degradation, the sorrow and suffering, the poverty and distress, which must be added into our liquor bill.

For it is not only a matter of dollars, but of blood and tears, or destroyed usefulness, lost virtue, wrecked homes, and so on and on and on. We go right on paying the bill, allowing ourselves to be misled by clever propaganda, and skillfully manipulated statistics—or it may be our sheer indifference. When will America awaken!

Our lesson faces us with the cost of this despicable traffic in the life of the individual to the social order, and in the light of eternity.

I. The Personal Cost (Deut. 21:18-21).

Liquor destroys individuals relentlessly, rapidly, and effectively. Have we forgotten that fact?

The passage in Deuteronomy presents a drastic remedy for a dreadful situation. Drink and gluttony were recognized as the deadly instrument which would bring a boy to the place where he was incorrigible. Stubborn, rebellious, and disobedient, his parents were to bring him to the elders for a final judgment.

If one thinks the penalty too harsh, he must remember that it was established in the early days of Israel when it was necessary for God to use such drastic remedies to stamp out incipient evil.

It must be remembered that in ancient Greece weak children were left out to die, and in Rome a father could at will put to death even a grown up son.

The point of this scripture for us is that a life of debauchery (and it can start with just a glass of wine) leads to the ultimate destruction of life. It is far too high a cost to pay for a sinful indulgence.

II. The Social Cost (Prov. 23:20, 21).

Drunkenness and gluttony lead to poverty and rags. The intemperate man cannot keep up with the high cost of supplying his growing appetite. Even as he tries to satisfy his insatiable demand, it also renders him unfit to earn a living.

So the vicious circle works its way around, and stops not until the drunkard totters off in his rags, unless perchance some loved one or friend takes care of him.

Do we not all recall how families in our own communities have been ruined and become charges upon the county or charitable organizations because of the destruction wrought by a father who was a winebibber.

Not only does it bring poverty upon families, but it reduces able and gifted men to shambles wrecks and thus deprives society of the benefit of their lives and service.

A present-day illustration is the unsolved problem of absenteeism for days after pay day in our essential industries. Again we say the cost is altogether too high; let us get rid of this monster before it destroys us!

III. The Eternal Cost (1 Cor. 6:9-11).

Money lost is serious. Life lost is far more serious. But the saddest cost of all is the eternal damnation of the drinker's soul.

We quote from Dr. Horace Martin these stirring and meaningful words: "It is my calm judgment that any man who names the name of Christ should take an attitude of horror and disgust at the liquor traffic and the use of liquor as a beverage. There are at least three places in the New Testament where the Bible says that no drunkard shall inherit the kingdom of God."

"If any man takes that statement seriously he must think twice before he refers to the use of liquor in a joking manner, or in any way condones the use of alcohol as a beverage." (Lesson Commentary).

Drunkenness is a foul and sinful thing, classed by the apostle Paul with the lowest of human vices. Review the list as it is given in verses 9 and 10 (and by the way notice the other sins mentioned there), and place drunkenness in its proper classification.

Call it what it really is—sin, and then call on the One who can save from sin. You will then be washed from your sin, sanctified, and justified in the name of the Lord Jesus (v. 11). In Christ there is hope for the drunkard. A spiritual revival is the real answer to the liquor problem. Let us seek to promote it even as we at the same time give ourselves to an intelligent and constructive battle against this destructive force in the life of our nation.

Pattern 577 contains a transfer pattern of 18 motifs ranging from 5 1/2 by 7 1/2 to 2 by 2 1/2 inches; stitches; list of materials required.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

This Modern Hen Creates Incubator of Her Own

Among the interesting birds on Guadalcanal is the brush fowl, a dark-colored bird about the size of a bantam hen. Instead of setting on her eggs, this mother bird covers them with decaying vegetation. The heat generated by the action of decomposition keeps the eggs at hatching temperature.

The incubation period lasts around 50 days—longer than for any other land bird. As a result, the young have the power of flight as soon as they are hatched.

Your Bedside Tables From Orange Crates

THESE orange crate bedside tables are useful and easy to make; they are very decorative, too, when fitted out as illustrated. These were lined with green oil cloth cut, fitted and pasted, as

shown. The full skirt pieces were tacked to the top of the sides and lapped a few inches around the back. A top cover with a 3-inch frill was then added. The bedspread is trimmed with 5-inch frills of the muslin and 1-inch straight bands over seams and for the monograms.

NOTE—These bedside tables are from BOOK 7 which also contain 31 other thrifty home making ideas. BOOK 2 contains a complete alphabet for making monograms similar to the one illustrated. Books are 15 cents each. Send your order to:

Breaking Glass

Ordinary glass is now made so that it will break in any desired manner, says Collier's. For instance, pitchers, jars and other containers for the home are manufactured so that they will break in large pieces, lessening the danger of glass fragments getting into food.

Some glass ceilings, like those in the National Gallery of Art in Washington, are constructed to shatter in powder form to eliminate the danger of injury from falling pieces.

CLABBER GIRL Baking Powder

ALONG WITH THE Best OF EVERYTHING...

The war-time recipe demands the finest ingredients—choose carefully—then, guard against waste and be sure of results with Clabber Girl Baking Powder, the baking day favorite in millions of homes for years and years.

Ask Mother, She Knows: Clabber Girl goes with the best of everything, for baking.

Attempt to Kidnap Kaiser—a 'Fascinating

Aftermath of the "hang the kaiser" cry of World War days was the daring attempt of eight American soldiers—all from Tennessee—to kidnap the kaiser in a refugee in Amerongen, Holland, and take him to Paris, there to turn him over to the Allied authorities. Under the pretense of being on a journalistic investigation, they gained admission to the castle of Count von Bentinck and asked for an interview with the "All Highest."

Kaiser—a 'Fascinating

They almost succeeded in their bold plan, but even though they failed, they "did write a fascinating footnote to history." The result was the launching of an investigation by the Dutch authorities (in the course of which the ex-kaiser filed a complaint that the unauthorized and unwelcome visit of these Americans to come visit of these Americans to his castle "made me nervous!") who soon decided to hush the matter up and a threatened court martial which ended only in a mild reprimand.

MANAGED BY DA. PROP.

Mrs. R. A. Jorgenson says she would have enjoyed being in Kansas City Monday, July 19th when her father, Titus Davis, celebrated his 87th birthday, but with gas rationing and rail travel crowded, she gave up making the trip.

Rosemary, little daughter of Mr. and Mrs. Alfred Josten, had the misfortune to fall down a flight of stairs at her home northeast of Klemme and suffer a fractured collarbone. The little miss is making a satisfactory recovery from her injuries.

Mr and Mrs Don Christiance have purchased Mrs. Lena Schroeder's house located one block west of the drug store. The Christiance family is living on their farm north of Ventura but expect to move back to Klemme.

Mrs Evert Barz left Tuesday morning for New London, Conn. for a visit with her husband Electrician's Mate Evert Barz who is in the Navy Submarine Service. The Barz children are staying with their grandmother, Mrs. Clara Barz.

Dr and Mrs W F Missman left Monday for the Twin Cities where the doctor took part of his X-Ray machine to be repaired. From there they expected to go to their cabin at Land O' Lakes, Wisconsin for a few days rest before returning to Klemme.

Mrs. Asa R. Arnold, of Traer, came the latter part of the week to spend a few days visiting with Klemme relatives and friends. She stated that she may leave for a visit with her husband, Sgt. A R Arnold who is now taking a special course for six months in the Oregon State College.

Mr and Mrs. Arthur Wellemeier left for the Twin Cities early Sunday morning. Mrs. Wellemeier went on to Ingram, Wisconsin and visited with her son-in-law and daughter, Mr and Mrs. James Carlson, while Mr. Wellemeier looked after business matters in the city. They expected to return to Klemme this Wednesday afternoon.

Local Happenings

Klemme and Vicinity

DRS. COLBY & HAYDEN, DENTISTS, FOREST CITY, IOWA. OFFICE PHONE 374, RES. 189.

Ira Overholt was at Mason City on business Friday morning.

Larry Van Syoc was visiting in Indianola Sunday.

C A. Frisbee of Garner, was a business caller in Klemme Saturday.

Mrs. J E. Stille entertained several ladies at a quilting bee at her home Tuesday afternoon.

Jimnie Albertson spent the past week at Corwith visiting with relatives.

Miss Ruth Neuberger is enjoying a weeks vacation from her duties at Thada's Store.

Mrs. Wayne Lemke and children of Des Moines are visiting at the home of Mr and Mrs. Otto Lemke.

Mrs. Helen Masterson of Des Moines spent Sunday visiting at the H. F. Jost home.

Numerous showers and rains the past week has delayed grain harvesting considerable around here.

Worthy Usher and family of Rowan spent Sunday visiting with Klemme relatives.

Mr and Mrs Emil Barz of Waterloo were visiting with Klemme relatives the fore part of the week.

Mrs Peter Merkel is spending this week visiting at the Ed Christians home east of town.

The Misses Ruth Stille and Shirley Johnson, who are employed in Des Moines, spent the week visiting at the Lester Stille home.

Mr and Mrs R A. Jorgenson were dinner guests at the home of Mr and Mrs. Lyle Liebendorfer at Forest City, Sunday.

Edwin Medaus was at Grafton the past week assisting his mother in harvesting the oats crop on her farm.

Rev. Wm Huenemann, pastor of Peace Reformed Church north of Klemme, is critically ill at this writing.

Mr. and Mrs. B R. Meyer and son Le Roy of Mason City came Saturday evening and spent Sunday at the C. A Larsen home.

Patricia Kudje spent the week end visiting with her sister, Jacqueline at State Teachers College at Cedar Falls.

Mrs. Fred Nagel has a flower garden that has gone patriotic. The other day she sent a calla lily to the Times office that had a V-shaped blossom.

Rev and Mrs. Calvin Grosshuesch and Miss Lydia Bock drove to Knoxville Tuesday to visit William Bock who is a patient in the hospital there.

Mrs. Benn Coobs and son Melvin, Mrs. Verner Lewis and son Luverne; Mrs. W. F. Pavey and Miss Novella Bredbenner were Mason City visitors Tuesday.

Mrs. Lena Schroeder accompanied Mrs. Asa Arnold to her home at Traer and from there she went to Iowa City for a check up at the hospital.

Mrs. Quentin Stille and daughter, Shirley, spent Thursday and Friday at Mason City visiting with the former's sister, Mrs. W D. Tyler and family.

Our "devil," Elwood Harvey helped harvest the oat crop this year by going to the Emil Beier farm Saturday to run the tractor for Mr. Beier.

Mr. and Mrs. Dwight Helps little children, Joan and Eunice, stayed in town at the Ed. Becker home a few days last week as Mrs. Helps was running the tractor for her husband during harvest.

The street around the park and the street running north past the school house was treated for dust Thursday by applying calcium chloride to the road surface. It is a fine improvement to that part of town. All streets in Klemme should be given chemical treatment to hold down the dust.

Mr. and Mrs. Frederick Schneider of Sioux City were guests at the E. J. Schneider home several days the past week. Frederick will report for duty in the army this week Thursday.

Mrs. Ernest Sheets, Ft. Atkinson, Iowa, and mother Mrs. John Carothers of Garner, and Mrs. Quentin visited at the Bert Jones home Sunday. Mrs. Carother is the mother of the other ladies.

Pfc. Harry Christians, stationed at Camp Rucker, spent the past week on a furlough visiting with his father, Mrs. Christians and other relatives in the community.

Herman Paul took his daughter, Mrs. Eddie Epps and her two children back to Des Moines Thursday afternoon, after the latter had been here for several days at the home.

Linoleum

—V—

WE DO NOT KNOW what the situation will be six months from now but at present we have plenty for all customers.

PLENTY OF LINOLEUM RUGS in almost all sizes.

PLENTY OF INLAID LINOLEUM and Linoleum by the yard.

OUR MR. PERKINS is an experienced Linoleum worker.

THE HOTTER THE WEATHER... the easier it is to handle Linoleum for floors and for table tops.

Phyllis Klotzbach Is Bride Of Young Belmond Farmer

CELEBRATION PERFORMER AT METHODIST MANSE HERE SATURDAY EVENING

Young Couple Will Reside On Farm Near Belmond Following Short Honeymoon Trip

Phyllis Klotzbach, daughter of Mr. and Mrs. V. L. Klotzbach of Belmond, and Mr. Walter Henry Belmond, were united in marriage at the Methodist Manse here on Wednesday evening, July 21st at 8:00 o'clock, with the Rev. H. E. Harvey performing the ceremony.

The bride attended the Klemme High School and has been living in Belmond with her parents. The groom is a farmer on a farm east of Belmond where the couple will reside after taking a short honeymoon trip.

HANCOCK COUNTY WOMEN IN 1943-44 HOME PROJECT

Insight into 1943-44 problems was made at the meeting July 30 by members of the Hancock County home project committee. With Miss Hazel Grimes, extension home economist, for the coming year's education program for Hancock County homemakers.

Marion Edwards, district fair supervisor for home economics from Iowa State College, will be here to help plan the project. The meeting will begin at 8 a. m. in the Central States building at Britt.

GASOLINE A BOOKS HAVE BEEN ISSUED IN HANCOCK COUNTY

Mr. Hughes, of the War Price Reasoning Board at Garner reported that all A books have been issued for which applications have been filed.

There are approximately 4000 registered in Hancock County. To date the Board has renewed Basic A gasoline books.

The Fuel Oil applications are processed and the Coupons start going out this week, says Mr. Hughes.

Nationwide Molly Pitcher Tag Day

Washington, D. C.—On August 4th, Molly Pitcher is stepping out of the pages of American history to sell War Bonds and Stamps. The gal who carried water to thirsty soldiers during the blistering Revolutionary Battle of Monmouth and took over her husband's cannon when he was wounded, has been a symbol of the heroism of American women.

Her honor, brigades of modern Molly Pitchers will take their stands at the nationwide Molly Pitcher Day at the corners, building entrances, and public places to sell the bonds and stamps that back up our fighting men.

Our Men In The Service

EARL REITZ GRADUATES AS FLYING OFFICER

Deming Army Air Field, Deming, New Mexico

Aviation Cadet Earl F. Reitz of Klemme, Iowa, was graduated from the Bombardier School here on July 10, 1943, and was presented with the coveted silver wings symbolic of the aeronautical rating of a bombardier, and appointed a Flight Officer in the Army of the United States.

Flight Officer Reitz attended the Klemme High School and graduated in 1936.

Prior to his advanced training at Deming Army Air Field, he completed an intensive preflight course at Santa Ana Army Air Base, Santa Ana, California. He has seen action in Alaska and the Aleutians.

PVT ORVAL BARKEMA IN NEW ARMY CAMP

Relatives of Pvt. Orval Barkema received word that he has been transferred from Camp Otterburg, Indiana, to a new camp near Nashville, Tenn., and that he is now out on furlough. His new address is:

Batt. B 535 AAA
Auto Wpna Mbl
APO 402 c-o P. Stmaster
Nashville, Tenn.

Injured In Farm Accident

PAUL LAU RECOVERING FROM SERIOUS ACCIDENT

Paul Lau is a patient at the Mercy hospital at Mason City where he is recovering from a serious accident which he suffered last week Tuesday at the Edwin Josten farm, southwest of Klemme, where he is employed.

Paul was filling the tractor with fuel when he slipped and fell onto a lever of the tractor which punctured his abdomen. He was taken to the Mason City hospital and underwent an operation immediately. The accident happened about six o'clock in the evening.

As we go to press Paul's condition seems to be greatly improved and he has a good chance now of recovery.

FARMS CHANGED OWNERS HERE RECENTLY

Two farms changed owners in this community recently when Clifford Anderson purchased the "Shorty" Kraus farm at the northwest edge of Klemme. In the deal Mr. Kraus became owner of the 80 acre farm southwest of Klemme owned and tenanted by Clifford Anderson and family. The new owners will exchange places next March 1st.

HARD WORK

Mr. and Mrs. James Archer of near West Union were glad when the wind started blowing for four and a half days, due to a shortage of wind power, they had to pump water for livestock. The wind was not strong enough to run the windmill, so Mr. and Mrs. Archer resorted to manual power to obtain water.

Bad News: Gas Shortage May Cut Coupon Value

OFFICIALS CLAIM AN ACUTE SHORTAGE NOW EXISTS

Value Of Coupons May Be Cut From Four To Two Gallons

DES MOINES. —Oil trade circles here heard Tuesday that the value of gasoline ration coupons in this region will be cut from four gallons to two within a short time.

This possibility was linked with the report that a serious gasoline shortage is developing in the mid-west. Distributors said that some bulk stations in the state already are without gasoline.

R. E. Walters, head of the Des Moines district office of price administration, said there has been no official notice of the likelihood of a gasoline ration cut, but he declared the tire situation in Iowa has become serious.

Walters said it is possible that automobile owners without an essential use for them may be required to sell their spare tires to alleviate the shortage.

V-belts or any good rubber belts should not require dressing to keep operating correctly.

ERNIE WILKINS, GOODELL DIED MONDAY P. M.

Funeral Services Held Today At Goodell U. B. Church

GOODELL — Funeral services for Ernie Wilkins, 59, will be held Wednesday at 2 p. m. at the United Brethren church, the Rev. Harold Knight officiating.

Ernie was born January 12, 1884, in a family of eight children. He was born and reared in Goodell and followed the trade of a painter.

The past few years he had been ill. A week ago he was taken to the Lutheran hospital at Hampton and his left leg was amputated below the knee. His condition seemed favorable but he died at 4 a. m. Monday with a blood clot.

He is survived by one sister, Lula, postmaster of Goodell, two brothers, Lester of Rockwell and Albert of Goodell. His brothers, Fred and Charlie, sisters, Mrs. Ida Bingham and Mrs. Edith Knisley, with his parents preceded him.

Production of most spices will be adequate this year.

Predicts Another Bumper Corn Crop In Iowa

GOVERNOR'S DAY AND WATER CARNIVAL AT CLEAR LAKE

Clear Lake Governor's Day, Aug. 7 and 8, is close at hand, and plans rapidly taking shape here to make it a gala celebration for Governor Hickenlooper and his family, and members of the state legislature. Dr. H. C. Krueger, chairman of the housing committee, visited the State house last week, and reported that almost every state official he contacted said they were looking forward to the outing. There have also been over fifteen acceptances from legislators in remote parts of the state. Dr. Krueger's committee includes Oma Butten, Mrs. C. A. Knutson, and Repr. H. M. Kudson. They will register, welcome, and find accommodations for the state officials and members of the state legislature who attend. The Lakeshore Hotel will be headquarters for registering again this year.

Prizes totaling \$110 will be awarded in the Venetian night parade on the lake, with Henry Volstead's committee in charge. The parade will be held both Saturday and Sunday nights.

A general outline of the program includes a water ballet both days, the Venetian night parade both nights, banquet Saturday evening for the officials, Governor Hickenlooper's speech at the Methodist church Sunday morning, sailboat races, concessions on the lake front, and various other features.

AUXILIARY WILL MEET AUGUST 3

The Legion Auxiliary will meet at the Community Building on the 3rd of August.

Mr. and Mrs. H. F. Jost and Mr. and Mrs. David Schwichtenberg in charge of serving.

New Interior At Bank

FIRST NATIONAL BANK MODERNIZES BANKING ROOM

The First National Bank is modernizing their place of business by having the fixtures in the banking room cut down and eliminating the bars and glass above the counters.

The small office in the front of the building has been taken out and the bar extended to make the banking room larger.

The whole adds to the appearance and convenience of the bank.

4-H GIRLS' DEMONSTRATION TEAMS INSTRUCTED

Mrs. Winifred S. Sarnard Jones, Assistant State Club Leader, spent Wednesday, July 21 in Hancock County giving special assistance to the 4-H club girls who will represent their club in demonstration teams at the Achievement Show August 23 and 24.

Now with the assistance of their leaders and the county extension home economist, the teams will gather and organize their materials and then practice giving their demonstration. When Achievement Show days roll around, some interesting and helpful material will be presented by these girls.

PLENTY OF BUSINESS

A sawmill moved recently from Shelby county to Crawford county is doing a "land office business" in its new location. The firm running the sawmill now employs seven men regularly. The workers of the sawmill company do the complete job from cutting down the trees to sawing them into various sizes of boards and delivering the finished product.

IOWA CORN CROP MAY BE SECOND LARGEST IN HISTORY

Estimate Figures For 1913 Are Furnished By L. M. Carl

Iowa's 1943 corn crop may be the second largest in history, figures supplied by State-Federal Statistician Leslie M. Carl showed Monday.

"If the August estimate of production increases one bushel an acre over July that would indicate a yield slightly greater than the current second place year of 1932," Carl said.

Iowa's all-time corn production record of about 596,000,000 bushels was set last year. In 1932 the production was 509,000,000 bushels.

The July indication for Iowa's 1943 corn crop was about 500,000,000 bushels of approximately 46 bushels an acre.

"Indicated production for 1943 is far ahead of the average for the 1932-41 period and considerably above the yield for 1940 and 1941," Carl said.

Albert R. Kendall, assistant statistician, reported meanwhile that wages being paid laborers by Iowa farmers are 33 percent higher than last year and four times higher than in the low period of 1933.

Farmers with regular help are paying at the average rate of \$74.25 a month with board, compared with \$56.75 a month with board last year.

100,000 USED ARMY TIRES TO BE MADE AVAILABLE TO CIVILIANS

More than 100,000 tires no longer suitable for severe army duty will be made available for civilian use, Acting Secretary of War Patterson announced Thursday. Most of the tires are the heavy cleated type used on trucks for "off the road" service and are primarily suitable for farm trucks used in moving food to market, the department said.

KLEMMME CIVIC CLUB MEETS THIS THURSDAY EVE

The Klemme Civic Club will hold a meeting at the Community Hall this week Thursday evening, with a dinner at 7:30 p. m.

YOUTH ARRESTED MONDAY NIGHT FOR SPEEDING

Johnny Hanson, farm youth, was apprehended by Marshall George Buseman Monday night at about 11:30 o'clock for speeding through the streets of Klemme.

He was arrested and placed under a \$15.00 appearance bond, and in Mayor Stille's court Tuesday noon was fined \$10.00 and costs of \$3.85. Officials also confiscated his "A" gasoline ration book for sixty days.

HELLO, FOLKS!

Mr. and Mrs. Bill Pannhoff of Garner are the parents of a daughter, Rosalie Ann, born at the Forster City hospital, July 9th.

Mr. and Mrs. George Lawhorn received the announcement of a baby boy born to Mr. and Mrs. A. T. Doyle of Tulsa, Oklahoma.

Mr. and Mrs. Buster Nail of Kamrar, are the parents of a baby daughter born July 12. The baby has been named Shirley Lillian.

Mrs. Nail will be remembered in Klemme as the former Miss Ruby Greiner, home economics teacher in the Klemme Schools.

Instructions for Home Canners

Housewives doing home canning during wartime jar caps are cautioned to follow implicitly the instructions of the cap manufacturers. Experiences and advice of the patriotic effort to conserve food and breakage are certain to result, if instructions are not followed to the letter. Proper methods and careful canning will insure excellent results, and are important in the present food situation than at any other time.

The Glass-Top Seal Fruit Jar Cap, wartime product developed to conserve metal, requires careful use, according to the home service department of fruit jar manufacturers. The cap consists of a metal band, a glass lid and rubber ring. With these widely varied materials making component parts, the cap must be used according to important but followed instructions. First of all, the cap is not recommended for use in the oven, as the food is processed (cooked in jar), one inch of space must be left in the top of the jar when filled, in order to allow room for expansion. An open kettle is used a half-inch space must be left in the top of the jar.

The next step is to place the rubber ring around the projection on the bottom of the lid and the lid must be placed so that the rubber lies between it and the top edge of the jar. All jars on which top-seal closures, either glass or metal, are used must have smooth-top edges.

The band is then applied tightly immediately loosened slightly at one-quarter of a turn. Bands must fit loosely during the processing (cooking). If an open kettle is used, bands are to be screwed tight as the jar is filled. After the processing is completed the bands are to be tightened to complete the seal. The bands may be removed one hour after the canning operation. At no time should the filled jar be turned up-side-down.

The housewife who takes no chances and variance from any one of these simple but important steps is assured success and the enjoyment of the delicious flavor of home canned food this winter.—Adv.

acid Indigestion

Relieved in 5 minutes or double money back. Excess stomach acid causes painful, suffocating, sour stomach and heartburn, doctors usually advise the fastest-acting medicine known for immediate relief—medicines like those in Bell-Ann. No laxative. Bell-Ann brings comfort in 5 minutes or double your money back on return of bottle to dealer at all drug stores.

SNAPPY FACTS ABOUT RUBBER

At a Navy yard, 3000 workers travel daily 60 to 85 miles round trip by automobile—a good reason why war workers must have tires.

Tire users now restricted because of the rubber shortage will have to make do with traveling conditions open to them in post-war days if State and Federal highway plans materialize. Already twelve States have approved building express highways of tomorrow when peace comes. Seven others are considering such plans.

A truck tire that is overloaded 30 per cent will only deliver 44.5 per cent of its mileage expectancy.

Vegetable Canning Guide

Non-Acid Vegetables

Are you putting up many greens and vegetables from your Victory garden this year? In other years, the first question we asked after that was, do you have a pressure cooker?

You see, a pressure cooker is the safest, most desirable method of putting up vegetables which are non-acid. The reason in most soil there is a deadly germ called Botulinus which attaches itself to vegetables in the non-acid class, to which most of them belong. Mr. Botulinus is hard to destroy except by extreme heat—which the pressure cooker can give as most vegetables are processed at an above-boiling point, 240 degrees Fahrenheit.

Let me go on record as saying use the pressure cooker if you possibly can. Chances of your being able to buy one are slim, but perhaps there's a neighbor or friend or a local canning center which will give you the means of having one. If it's absolutely impossible to obtain a pressure cooker, do non-acid vegetables by the boiling water bath. It takes much longer to process the vegetables, but don't skimp a minute of it, if you would be successful.

Processing Foods

Processing times have been carefully tested and cannot be shortened. Follow them to the letter to get results. Processing may be done in various ways, and it is important to select the one best suited to the food you are putting up.

A pressure cooker gives you the greatest degree of safety in canning non-acid vegetables for it permits the greatest degree of heat to penetrate the jar and thus destroy botulinus. To use the pressure cooker, prepare the product, pre-cook it and pack carefully in sterilized jars. Adjust cap. Prepare pressure cooker by pouring hot water into the bottom of the cooker up to the level of the rack. Place filled jars on rack, allowing for sufficient circulation of water around them. Be sure jars do not touch.

Place top on pressure cooker and clamp on tightly. Leave pet cock open 7-10 minutes to exhaust all steam in cooker, otherwise you will not get correct pressure. After all steam is exhausted, close pet-cock and let pressure mount to desired degree, then turn down heat, and maintain pressure exactly or liquid will be drained from jars if pressure is allowed to fluctuate.

When processing time is up, remove cooker from heat, let pressure reach zero, then remove lid, so steam does not hit you when cooker is opened. Set jars on several thickness of cloth or paper, and let cool, without inverting.

Hot Water Bath.

A large, deep vessel with a tight-fitting cover is best for making this type of canner. Use a big kettle, a lard can, a deep well cooker with galvanized wire or rack at the bottom of it to hold the jars one-half inch from the bottom of the canner. Before putting jars in canner, have water boiling briskly. If the jars lower the temperature and it stops boiling when they're submerged, do

This Week's Menu

Tomato Stuffed with Cottage Cheese
Potato Chips
Rye Bread-Butter Sandwiches
Raspberry Shortcake Beverage

not count processing time until the water boils.

It's especially important to make certain there's plenty of water in the boiling water bath. There should be enough to come two inches above the jars. If water boils out during processing, add some boiling water from a teakettle on the range.

Canning Procedure.

Use the table given at the head of this column for guiding you in pre-cooking and processing vegetables. The ideal way of proceeding with your canning is as follows:

First, before you even start canning, get jars ready by washing them in hot soapy suds and scalding them. Check for nicks, cracks and sharp edges on jars, to see that they are perfect. Prepare jars ahead of time and invert them on several thicknesses of clean towel near your stove so that you have them on hand when canning.

Prepare vegetables by washing thoroughly and then cutting or preparing as for table. Precook, according to table. Pack in sterile jars and process for required time.

Set jars to cool, after processing on several thicknesses of towel or newspaper, away from drafts. Let cool for 24 hours. If using a self-sealing lid with screw band, remove screw band and use it over again. Test the jars by tapping gently on lid. If you get a high ringing note, the jar is sealed and may be stored.

Reasons for Spoilage.

Spoilage reasons are many and may be traced to any part of the canning procedure. Sometimes it is easier to avoid failures if you know what causes certain types of spoilage.

If fruit or vegetables are over-ripe, sterilization is difficult as bacteria may have developed to a degree which it is not possible to arrest. Use only produce in prime condition as you get out of your jars what you put in them.

Washing all vegetables and fruits before working will get rid of bacteria which cling to the soil.

Unclean jars can work havoc with your canning effort. Best remedy for this is washing jars thoroughly in clean soapy suds and then scalding, and laying the jars inverted on several thicknesses of clean towel until ready to use. Lids should also be sterilized.

Sealing.

Seal the cap according to the principle on which it was made. A self-sealing cap seals by vacuum created by the cooling of the contents of the jar, and the screw band does not need tightening after processing. Zinc caps and rubber bands should be tightened.

Can for Health.

Fruits and vegetables are known to be a rich source of health-giving vitamins and minerals. Vitamin A for example, so extremely essential to children and adults alike, is found in large quantities of certain fruits and vegetables. Vitamin A promotes growth; it helps to prevent eye diseases; it helps guard against infections; it helps prevent night blindness; it aids in the normal functioning of glands; it increases the life span. From experimental studies it appears that if a child, during the years from 3 to 10 is fed very large amounts of vitamin A, he will be less susceptible to the usual children's diseases. A growing child requires 3,000 International Units of vitamin A daily; an adult 6,000 to 8,000 daily.

If you have a canning problem, write to Miss Lynn Chambers, Western Newspaper Union, 210 South Desplaines Street, Chicago, Ill. Please enclose a stamped, self-addressed envelope for your reply.

Dozens of Uses

YOU'LL find dozens and dozens of uses for this sleek sports ensemble. Grand for your figure and summer sports.

'And Nary a Drop Was Spilt Along the Way

A young Scottish couple had moved from their country cottage into a modern house. All their goods and chattels arrived safely—with the exception of the rain water tub.

After the wife had pleaded with her husband that this was an asset to her household, he said he would go and get it that evening.

As he had not arrived home at 12.30 a. m. his wife became worried. At 1:15 a. m. the back gate slammed and there was a dull thud. In a few seconds the door opened to reveal a dishevelled and perspiring man, who remarked:

"Ee, lass, 'A've 'ad job wit' tub. These didn't tell me it were full o' watter."

Pattern No. 8445 is in sizes 10, 12, 14, 16, 18 and 20. Size 12 dress takes 3 yards 39-inch material, jacket 1½ yards.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

Double Knockouts

Of the seven professional American prize fights that ended in a double knockout, the last occurred during the welterweight bout between Pat Kissinger and Al Dorlac in Memorial Hall in Kansas City on April 7, 1941, says Collier's. In the third round, both boys landed knockout blows simultaneously and went down together for the count of ten.

Household Hints

Put all vegetable and flower seeds away in a box or drawer kept for that purpose only so they can be found quickly when wanted.

Never remove the radiator cap of a tractor or car when the radiator is steaming. Wait until it cools.

Peanut butter blended with cream makes a delectable dressing for dry cake, bread pudding, or day-old doughnuts.

Handles of garden tools should be sandpapered and waxed to save splinters in fingers and hands.

PROTEIN BUILDER-UPPER!

The protein supplied (2.2 grams) by a normal serving of Kellogg's Corn Flakes and a normal amount of milk (4.0 grams protein) is a valuable contribution to daily protein requirements... helps make up for scarce protein foods and their vitamins.

SAVES TIME—WORK—FUEL—OTHER FOODS

IMPORTANT NOTICE TO HOME CANNERS

The Glass Top Seal Fruit Jar Cap for Home Canning was developed as a Wartime product to conserve metal. It consists of a Metal Band, Glass Lid and Rubber Ring.

Because of the difference in the nature of these three materials this Cap must be used differently from any other fruit jar cap. If used properly it will give excellent results. If not used properly, results will be bad, including failure to seal and breakage of jars. Following are simple instructions for use of the Glass Top Seal Cap and must be followed carefully.

1. Do NOT use in Oven Canning.
2. If processing, (cooking in jar), leave 1 inch space in top of jar. If using open kettle, leave ½ inch space in top of jar.
3. Fit rubber around projection on bottom side of lid.
4. Place lid so rubber lies between lid and top edge of jar.
5. Turn bands tight, then loosen slightly (about ¼ turn). Bands must fit loosely during processing (cooking). This is important and must be done to insure best results. If using Open Kettle, screw bands tight as soon as jar is filled.
6. After processing, screw bands tight to complete seal. Remove bands 12 hours after canning.

For complete canning instructions, send ten cents for your copy of the Ball Blue Book to Ball Brothers Company, Muncie, Indiana, U. S. A.

DO NOT TURN FILLED JARS UPSIDE DOWN

For meritorious work as commander and military governor of the Territory of Hawaii during the critical period after Pearl Harbor, Lieut.-Gen. Delos Emmons (extreme right) receives Distinguished Service medal from Secretary of War Henry Stimson (at extreme left). Brig.-Gen. H. B. Lewis (center) attended the ceremonies.

RUSSIA: Blitz Again

Seeking to wipe out the big Russian bulge on the central front, 500,000 German soldiers continued their attacks at both ends of the bulge, with the objective of encircling the huge Red army from the rear.

At the southern extremity of the bulge near Belgorod, the Reds admitted that the Nazis had scored early gains. According to the Russians, the Germans were backing up their forces with masses of tanks and airplanes. In action was a new tank, bigger than the 60-ton Mark VI.

From dispatches, the battle assumed the old lines of German blitzkrieg. The Nazis concentrated their strength at certain points and then threw their whole weight against them. As their forces streamed through, the Russians moved to pinch off the tanks and infantry and isolate them from the main armies.

Although claiming success, the Germans said that the huge bulge still extended 85 miles to the west.

CONGRESS: Adjourns for Recess

Capping its hectic deliberations with an agreement to give President Roosevelt a free hand in reducing retail food costs through subsidies, the 78th congress recessed for a summer vacation.

The session saw passage of notable legislation. For the first time, taxpayers were put on a current basis with the enactment of pay-as-you-go legislation. Approximately 130 billion dollars was appropriated.

The administration's authority to make lend-lease and reciprocal trade agreements was renewed, and permission was given for use of 2 billion dollars to stabilize foreign currencies.

President Roosevelt's limitation of wartime salaries to \$25,000 was repealed. Spurred by the walkout of the nation's coal miners, anti-strike legislation was passed over a presidential veto. Although both houses took favorable action on the Commodity Credit corporation and agricultural department bills, they killed a senate proposal to raise the ceiling on corn to \$1.40, and also voted to abolish crop insurance.

PACIFIC ADVANCE: On 700 Mile Front

The languorous islands of the Southwest Pacific know peace no more.

Along a great arc of 700 miles, Gen. Douglas MacArthur's offensive continues to rage, with American troops menacing the Jap air base of Munda in the Solomons, and Allied troops pressing against Salamaua in New Guinea from three sides.

Trapped in the narrow Kula gulf, eight Japanese warships were reported sunk, sent to the bottom by a thunderous broadside from U. S. naval vessels.

By making two landings on New Georgia island, American troops closed in on Munda from the north and east. Finished by the Japs last December, this air base would give Allied fighters and bombers a springboard for attacking the great enemy naval and airplane center of Rabaul, between the Solomons and New Guinea.

Strafed and bombed by Allied airmen, Jap troops gave ground before advancing columns in the area south of Salamaua.

MEAT: Hog Marketing Heavy

Because of heavy pork production, output of meat has been running fairly even with that of 1942. Record slaughtering of hogs has offset the decline in the butchering of cattle, and, to a considerably smaller extent, of sheep.

According to recent estimates of the War Meat board, hog slaughter rose 26 per cent over last year, and pork production was up 40 per cent. The severe decline in cattle slaughter and resulting meat products amounted to 40 per cent under last year. Although calf butchering slid 28 per cent, meat output was down about 38 per cent.

Moderate decreases were noted for sheep and lamb slaughter, although meat production showed a sharper drop.

GIRAUD Welcomed in Capital

While 15,000 residents of Martinique reportedly rioted in support of Gen. Charles DeGaulle, Gen. Henri Giraud was received in Washington by President Roosevelt under circumstances indicating the Allies' public acceptance of his leadership of the French National committee.

According to the Martinique reports, the rioters' actions prompted the administrator of the island to consider severance of relations with Vichy and entrance into the provisional government of the French National committee headed by Generals Giraud and DeGaulle. The committee already had appointed a military commander over the territory.

General Giraud's stock in Allied circles rose with the U. S. government's announcement that it had uncovered a secret document, showing that General DeGaulle's followers have sworn to perpetuate him in power after the war, contrary to the promise that the French people would be permitted to freely choose their own leaders following the liberation of the nation.

Production Miracle

Sprawling over 1,350 acres of rambling plains near Fontana, Calif., stands the first complete steel mill ever built west of the Rocky mountains—the work of Henry J. Kaiser, the production genius of World War II, the man who can get things done.

Fifteen months ago, 60,000 hogs grubbed over these plains. Today, a long row of white buildings of concrete and steel, with entire sides of windows tinted blue, mark the first great steel mill to be laid out on an assembly line basis. Relieving the monotony are victory gardens planted around the entire site.

Everything in the new mill is moved by 3½ miles of conveyor belt. Ore from Utah and coal from California move to grinders and coke ovens on these conveyors. Two banks of 45 coke ovens each feed a huge 97 foot blast furnace, which resembles a milk bottle. In the fall, a mill for rolling steel plates will be completed to round out the construction, and this building alone will be 1,100 feet long and 300 feet wide.

Built in consultation with the United States, Bethlehem and Republic Steel corporations, the Fontana mill has cost \$3 million dollars. The RFC advanced the funds.

SHOPPING NEWS: Stockings; Salmon

Government agencies moved on two fronts to give good cheer to the women and housewives of America.

War Production board announced that it would permit spinning of 100 denier rayon yarn to assure continued manufacture of full-fashioned hosiery. WPB also allowed an increase of 1½ inches in the length of women's full-fashioned acetate rayon stockings to provide better wear, since this type does not stretch readily.

The price of the half-can size of Alaska Chinook salmon was "rolled-back" six cents by the Office of Price Administration. Maximum dollars and cents ceilings also were placed on canned Alaska King, Coho, Pink and Puget Sound sockeye salmon.

GREAT BRITAIN: Taxes High

Speaking before the house of commons, Sir Kingsley Wood, Great Britain's finance minister, revealed that taxes took 40 per cent of all private income in England last year. More than 12 million Britons are on the tax rolls, and of these, 10 million are in the lower brackets.

It was also announced that already the British government has borrowed a sum more than double the size of the national debt before the war began. The debt now approximates 70 billion dollars.

Sir Kingsley said that thus far Great Britain has advanced 780 million dollars to Allied governments, exclusive of lend-lease aid.

SOCIAL HYGIENE: New Step in Alabama

In an action marking a new step in social hygiene in the United States, Gov. Chauncey Sparks of Alabama signed a bill requiring blood tests for syphilis of every resident in the state between 14 and 50 years of age.

An appropriation not to exceed \$75,000 annually will be made under the law, provisions of which call for tests on a county-wide basis under direction of the state health department.

Notes of a City Slicker:

Margaret Bourke-White, just back from taking pictures of world famous statesmen, was showing her long line of short-snorters. Several were autographed by Eisenhower, Marshall, Churchill and others, but the one that held the eye was a bill inscribed, she said, by people with whom she had been torpedoed. "Huh?" you huh. "Oh," says Margaret, "you'd be surprised at the people you meet nowadays, who have been torpedoed!"

La White was on a ship that sank in the Mediterranean. A troopship, it appears, including about 200 British women returning to England from the Colonies. All were saved by British warships.

The 200 women salvaged nothing but their lipsticks!

Joey Adams forwards the one about the French peasant in occupied territory, whose home had been ransacked by the Nazis. It is not humor. It is grim stuff brought here by escaped refugees. The famished man caught a tiny fish and raced home with it. "Here!" he said to his wife, "at last we can eat!" "But how will we cook it?" she asked. "They took our coal and wood, our matches and even the stove!" The peasant took the fish to the lake, tossed it back and stood watching it wiggle back to life. Suddenly the fish gave the Nazi-Vichy salute and yelled: "Viva Laval!"

Fort Custer's company commander, ironically enough, is a full-blooded Indian. March of Time's latest, "Inside Fascist Spain," makes audiences wonder why the State Dept. plays ball with Franco. James Cromwell's new business: "De-inking" all the paper used at the Pentagon Bldg., Washington. Secret papers no longer are burned, but de-inked. Permission for Kate Smith to sing "God Bless America" in "This Is the Army" cost Warners' \$10,000. The Boy and Girl Scouts get that song's royalties, \$113,000 to date.

George Lait, the INS correspondent, says there is little love lost between King Farouk of Egypt and the British High Commissioner. They needle each other often. One day the Commissioner remarked to the King that a man hasn't proved his mettle until he has shot a lion. Farouk proceeded to the Cairo zoo and shot seven!

New York Heartbeat:

Sallies in Our Alley: Confre Skolsky, as all Hollywood knows, is a furious hypochondriac. His pockets bulge with medicines at all times. As he walked past a drug store the other day, Arthur Murray said: "Don't you want to go in?" "N-h-n-h," n-h-n-h'd the colymbist, "I don't need anything." "I know," was the reply, "but maybe the druggist does!" Lucy Monroe counsels: Three ways to avoid criticism: "Say nothing. Do nothing. Be nothing!"

Midtown Vignette: Groucho Marx tells it. Happened, he says, to a pal who wanted a pair of bowling shoes—but was reluctant to surrender his ration coupon. He went to a sporting goods shop where he told the owner: "Your brother said I could buy a pair of bowling shoes here without a coupon." The boss nodded and sold him the shoes. As the patron started to go, he said: "Now that I've got 'em, I got to confess your brother didn't send me in." "That's all right," the owner said, patting the chap on the shoulder, "don't worry about it, boy. I ain't got any brother."

Broadway Tinsel: Ingrid Bergman will be the third star to be honored with a Time cover. Rita Hayworth was first. A sign outside the Los Angeles Marriage License Bureau: "Think! Is It Cupid or Con-scription?"

Sounds in the Night: At the Hurricane: "Her husband doesn't talk in his sleep—he just grins." At La Conga: "The same flattery that turns your head will later turn your middle." In the Mayan: "She fell for him hook, line and bank account." At LaMartique: "His favorite exercise is taking bows." At the Famous Door: "He has that typical B'way look—green with envy!"

Manhattan Murals: The Chinese copy girl in the AP news room. The undertaker's office advertising: "Air conditioning."

All Hollywood is swapping this one. It concerns a movie favorite, whose most recent film is one of the season's biggest hits. But he hasn't seen it—although he keeps figuring out ways to do so. His wife, the legend goes, is sure that he was—and still is—in love with the girl who played opposite him in it. The wife will not go to see the picture and has threatened everything—if he sees it. He almost saw it one night last week—but the Mrs. threatened to swallow some pills—and he didn't go.

Washington, D. C.

GAS-LESS AUTO RACE
An automobile race was staged in Brazil recently which should interest gas-less Americans. Thirty-two cars took part, and not one of them used a drop of gasoline.

Each car was equipped with a charcoal burning apparatus known as "gasogene," producing a charcoal gas whose combustion takes the place of the combustion of gasoline in the ordinary automobile engine.

These devices have been so successful in Brazil that they are being produced at the rate of 40 a day, selling for about \$200 each. Some of the units are capable of generating a thousand horsepower, and are used even on the inter-city buses between Santos and Sao Paulo.

Brazil has practically no petroleum resources of her own.

TANKERS DELIVER PLANES

Everybody knows that bombers have long been delivered to England under their own power. But the big problem has been to deliver fighter planes, which have had to be taken apart, crated, then reassembled on the other side.

Now, however, a new system has been devised whereby U. S. tankers are carrying fighters on deck—20 to each tanker—and setting them down a few days later in England.

The War Shipping administration is keeping the army "cleaned out of fighters" by this method of delivery, and is rapidly building up the strength of the Eighth Air Forces command which is battering Germany.

Note: PT boats are also being delivered to England on the decks of tankers.

NO GERMAN SAUSAGE

The diplomats' grapevine reports that the German food supply is running low. A new cut has been made in the meat ration. This, coming at a time when the greatest muscle must be exerted in defense of the Vaterland, is expected to be a severe blow to German morale.

The basic ration of meat for normal uses was 400 grams at this time last year. But now the ration has been cut to 250 grams—which is about half a pound per week, including fat and bone. An effort is being made to compensate this reduction by the substitution of cheese and groats (hulled and crushed oats and wheat). During the winter, however, it was reduced to 300 grams. In the spring the cut was partially restored, when the ration was moved up to 350 grams, recognizing the necessity of more nourishment with the coming of the season of greater military activity.

ARMY AND GOLD MINING

American soldiers who spent dreary winters tracking through the Arctic forest to build the Alcan highway to Alaska frequently saw the sparkle of gold in the stream beds, and wanted to stake out claims for peacetime development. They were not allowed to do so.

Now, however, civilian construction crews are coming along the same trail, and are staking out claims for the gold which U. S. soldiers could not touch.

Boys from almost every state were sent to Alaska on that pioneering job—cutting a road through tall timber where none but Indians had passed before. They worked from Dawson Creek, in Alberta, to Fairbanks, Alaska, but the place where they saw the gleaming gold was in the Yukon, near Whitehorse.

At first, there was little time to think about private projects, for one battalion was racing against another to complete its 20-mile stretch of highway. But when a lull came in the work, the men asked permission to try their luck at panning gold. The officers, however, ruled this out.

Another season has rolled around, and things have changed. The pioneer road is being replaced by a permanent highway, built by big construction companies—Elliott Construction Co., and Becketel, Price and Callahan.

These companies have mining engineers attached to the construction gangs, and they are not bound by military discipline.

Note: Finally the army has modified its regulations to permit a little amateur gold panning by soldiers in Alaska, for recreational purposes. This activity will be in the same class with fishing, to give the soldiers sport in their spare time.

Washington wives with backs aching from work in their Victory gardens wish they had top sergeants to hoe their gardens as do the wives of high-ranking army officers at Ft. Myer across the Potomac.

MERRY-GO-ROUND

Congresswoman Clare Boothe Luce made one of her rare public appearances outside of congress when she spoke at Haverford (Pa.) School recently. Her husband, Harry Luce, is brother-in-law of Haverford Headmaster Leslie R. Severinghaus.

Coast Guardsman Warren H. Kimzey, Pacific hero who has seen men killed under all sorts of conditions, says he would rather fly in Pacific action than fishing long, drowned duck hunters out of the Detroit river.

Sister's Dress Has Applied Flower

Pattern No. 5527

LITTLE sister will look something right out of a handbox in this charming dress. Make it her "best" little. Do it in pale pink, blue or green organdie or dotted. Applique the flowers in white, darker shade of the dress material.

The dress is designed for size 4. Pattern number is 5527. Approx. same pattern.

Due to an unusually large demand current war conditions, significant is required in filling orders for the most popular pattern number.

of these is the corvette, a
merchant ship converted to a
warship. It can function much
destroyer does, although it

A HELICOPTER LANDS—Settling slowly on the space marked out as its landing "field" on the deck of a Victory ship, this helicopter makes a perfect landing. This peculiar aircraft can rise and descend almost vertically, and can hover over the water, spotting submarines.

does not have its speed or maneu-
verability. Then there is the air-
craft carrier, which is accompany-
ing large convoys lately. Planes
from the carrier can patrol a wide
circle and prevent any enemy sur-
face craft from surprising the con-
voy.

That new marvel, radar, can lo-
cate enemy planes and submarines
with amazing accuracy, in fogs or
at night. Destroyers are being
equipped with radar now. Listen-
ing devices to detect submarines by
the pulsations of their propellers,
have been in use for some time, so
the officers in charge of the de-
fense of a convoy have several
means of knowing when the enemy
is approaching.

Only about 500 miles of the voy-
age between the United States and
British ports is beyond the range of
land based aircraft, according to
Secretary Knox. The patrol planes
of the Allies can protect shipping
within an arc six or seven hundred
miles in radius.

Ships Mount Heavy Guns.

Convoys are so large, however,
that despite all sorts of armed
guardians, some ships will be at-
tacked, and perhaps damaged or
sunk. Often too, a single merchant
ship has to travel without escort to
enter a small port off the regular
run, or for a number of other rea-
sons. Merchant ships have long been
accustomed to mount some cannon
in wartime, but against modern en-
emy craft, ordinary seamen have
little chance to use their weapons
effectively. The maritime commis-
sion has ordered every American
ship to carry a five-inch gun. A
crew from the navy mans the piece,
which is deadly to enemy subma-
rines and destroyers, or any vessel
with thinner armor than a cruiser.

Ships are protected against air-
craft by anti-aircraft guns and .50
caliber machine guns. Expert navy
crews also handle these ordnance.
Submarines and planes are reluc-
tant to get too close to a ship that
can defend herself, and torpedoes,
bombs and gunfire aimed from a dis-
tance are less accurate.

A barrage balloon is now being
added to the defensive equipment
of merchant ships. The balloon
trails steel cables when in the air,
thereby preventing a divebomber
plane from getting too close to the
ship, or from running along it and
strafing the crew with machine gun
bullets. The gas bag is raised and
lowered by a cable attached to a
winch near the stern.

Last month the maritime commis-
sion and the War Shipping admin-
istration decided, after a suc-
cessful demonstration, that helicop-
ters can be employed to give added
protection to individual ships. Ev-
ery new Liberty model ship will
carry a helicopter, according to
present plans. As these peculiar
aircraft can rise and descend almost
vertically, they can operate from a
small area on the deck of a ves-
sel. Whether the ship is part of a
convoy or sailing alone, the helicop-
ter can hover around, watching for
the enemy.

Some Sinkings Inevitable.

Ships will be damaged and sunk,
however, despite all defensive pre-
cautions and efforts. Some are
wrecked by storms, or are smashed
on rocks or icebergs. Even when
in a sinking condition, nevertheless,
a ship may sometimes be saved by
some of the safety features that are
part of a modern ship. If the ship
must be abandoned, other emer-
gency features help to save the lives
of the crew.

Many safety devices have been
added, and old ones have been im-
proved. Several have been built
into the ship itself. The maritime
commission found that men were
hurt frequently in the dark passage-
ways when the lights went out after
a torpedo had struck. Luminous-
paint signs now mark all passage-
ways and exits, and directions point
to ladders and indicate the switches
of emergency lights.

Crash panels must now be put into
every door, by coast guard regula-
tions. These are sections of thin
wood within every door, that can be
smashed out by trapped crewmen,
leaving a space big enough to per-
mit escape.

To preserve the nerve centers of a
ship as long as possible, the pilot
house and radio shack are covered
with reinforced concrete and steel
capable of withstanding submarine
shelling.

Latest In Life Boats.

Finally, when seamen have to
abandon ship, the latest and best in
life-saving equipment comes into
play. By orders of the coast guard,
the life boats are always kept swung
out and clamped against canvas-
covered cushions. The ropes holding
the boats are secured by a single
"pelican" hook which can be tripped
by simply releasing a catch allow-
ing the boat to be lowered into the
water in a minute or two.

At the same time a boat is low-
ered, a life net, kept rolled up
against the side of the ship just be-

LIFE RAFT—Six research men are
shown testing the new rubber life
raft under actual shipwreck condi-
tions for the Maritime commission.
They were "cast adrift" near Cape
Fear, N. C., to study conditions of
survival at sea, and to report de-
fects and possibilities for improve-
ment. Merchant ships carry these
rafts in addition to the lifeboats.

low the boat deck, is released. Three
or four men can scramble down this
net at the same time.

Merchant ships must also carry
liferails, since the boats may be
damaged by shells, or the sinking
ship may be leaning so far over that
it is impossible to lower life-
boats on one side.

Boats Carry Radios.

A portable sending and receiving
radio set must be included in the
equipment of at least one lifeboat on
every ship.

Water rations on each boat have
been increased from three to ten
quarts per person. Fourteen ounces
each of pemmican, malted milk
tablets, chocolate and type C army
ration biscuits must be included in
every boat for each person.

Rubber lifesaving suits are is-
sued to each member of the crew.
Besides keeping a man dry while in
the water, the suits give protection
against exposure in a lifeboat or
raft. Attached to the shoulder of
each suit is a jackknife with which
a man can free himself if he is en-
tangled in ropes, and a police whis-
tle and a red signal light to at-
tract the attention of rescuers.

So the perils to Allied shipping are
being combatted successfully by
combining all known resources of
warships, planes, guns and radio.
The war goods are getting through.
The ships are arriving safely. But
when a ship does go down the brave
seamen have a much better chance
of living to sail again than ever
before, thanks to ever better equip-
ment.

FOR SHIPWRECKED SAILORS—
The boat has built-in air tanks that
render it non-sinkable, and there are
grab-rails fastened to the bottom, so
that seamen can hang on if it over-
turns. A bright red triangular sail
is part of the accessories. Canned
food and drinking water, a fishing
kit, a first aid outfit, and a machine
for making sea water drinkable are
part of the supplies and equipment
shown.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

By HAROLD L. LUNDQUIST, D. D.
Of The Moody Bible Institute of Chicago.
(Released by Western Newspaper Union.)

Lesson for August 1

lected and copyrighted by International
Council of Religious Education, used by
permission.

GOD DELIVERS HIS PEOPLE

LESSON TEXT—Exodus 5 22, 23, 6:1-7;
12:51

GOLDEN TEXT—Call upon me in the day
of trouble. I will deliver thee, and thou
shalt glorify me.—Psalm 50 15.

Why doesn't God do something?
People are quick to ask such a ques-
tion in a time of crisis. Today they
want to know why God permits the
war to go on. In the day of our
lesson Moses wanted to know why
God did not deliver His people from
Egypt. He and Aaron had been ap-
pointed of God to lead them out, but
their first efforts only met with fail-
ure and increased persecution.

The complaint of Moses, and the
response of God make an instructive
story for our consideration and
guidance. It will answer our ques-
tions.

I. Moses Said, "Thou Hast Not
Delivered Thy People" (Exod. 5 22,
23).

When the efforts of Moses brought
heavier burdens on the people they
blamed him and Aaron for making
their situation worse. This sorrow
and shame made them doubt God's
calling and commission. How quick-
ly men are discouraged in their pur-
pose to serve God.

The people were wrong in their
attitude. They should have been
patient. They ought not to have as-
sumed that the loss of the first
skirmish meant the loss of the whole
campaign.

Are we not just like them? The
new minister or the recently elected
Sunday school superintendent makes
a mistake and instead of helping
him to pick up the pieces and start
over, we decide that he just will
not do, that we must have a change.

Even though the people were
wrong, however, the man of God
should not have lost his faith and
accused God of failure to keep His
promise. He was supposed to have
learned the lesson of patience in the
long years on the backside of the
desert. Had he forgotten the experi-
ence of the burning bush?

II. God Said, "I Am Jehovah,
Thou Shalt See What I Will Do"
(Exod. 6:1-7).

In other words, Moses was to re-
member that he was dealing with
the Eternal One, unchangeable, and
always true to His word and able
to make His will come to pass.

So often men in dealing with God
think of Him in terms of their own
weakness and failure. What we need
is to have a Godlike conception of
God, not a manlike idea of Him.
God is the infinite and Eternal One
with whom we have no right to
quarrel, and whose dealings with us
are too high for us to judge (Ps.
139:1-6).

God's covenant with His people
was established (v. 4). He had heard
their cry (v. 5) and His deliverance
was sure (v. 6). The only thing
Moses had to do was to wait and
see God work.

That word "wait" is a little one.
It seems to call for no effort, to be
easy of fulfillment; yet it seems to
be the hardest thing for a human
being to do. Men who carry the
burden of active warfare with ease
and with honor become discouraged
and sick when they must sit in a
prisoner's concentration camp and
wait for deliverance.

Christians who can speak and
work for God when things are ac-
tive and moving become querulous
and despondent when they have to
wait for something to happen, or
when they are laid aside for a time.

His promise is sure. That is not
just a religious sentiment. It is a
fact, and it is proved by history.
Note that in the case of Moses—

III. History Said, "It Came to
Pass the Selfsame Day" (Exod. 12:
51).

Moses had to take God's word,
for "the selfsame day," which we
read here came later. It came in
God's own time, after He had,
through Moses, humiliated and broken
the hard will of Pharaoh. Then
He gave His people the great me-
morial feast of the Passover, teach-
ing them the needed lesson that re-
demption is by the shedding of blood.

In that night Jehovah did bring
the children of Israel out of the
land of Egypt. That deliverance
was as certain the day He made the
first promise to Abraham (v. 3, and
Gen. 12:1-3) hundreds of years be-
fore, as it was now that it had been
accomplished.

History is really God's story, re-
vealing His outworking of His plan
for mankind. The torn and blotted
pages are man's handiwork. Sin
and unbelief have caused him to
hinder the work of God, but God is
not defeated, and in the midst of
man's self-created chaos, He pro-
ceeds quietly to work out His own
purpose.

The many prophecies of Scripture
which have been fulfilled not only
prove its divine inspiration, but
demonstrate its dependability. Ev-
ery promise of God is "yea and
amen" in Christ (II Cor. 1:20, 21).
We can count on that!

PEAS, WEEVILS AND APHIDS

Ima Dodo is hysterical with fear.
We never saw her so upset, nervous
and apprehensive.

"How can I get out of this? Do
you know any influential politicians?
Would a letter to the President do
any good? Would I be tried by
jury? Oh dear, oh dear!" she bab-
bled on.

"Now look," we began . . .
"I just didn't know! I mean it
was just an oversight. Should I
maybe get a lawyer?"

We clapped a hand over her big
mouth and shoved her into the near-
est chair. "What's this all about?"
we demanded.

"It could be two years and \$10,000
even," she cried.

"What have you done, robbed a
bank, set fire to the orphan asylum,
talked back to an OPA scout or been
found in an auto while in motion?
Speak!"

"I was just spraying," she bawled.

"What were you spraying?"

"Peas," she sobbed. "And beans."

"You're supposed to spray peas
and beans. Stop shivering. It's
legal."

"But I wasn't spraying the peas
against pea weevil or pea aphid,"
she cried. "I was spraying them
for other bugs."

"What of it?"

"And that isn't all. I'm not sure
I was spraying the beans against
Mexican bean beetle. It's too, too
terrible. They'll be after me any
minute. Phone a lawyer, please!"

"Who cares what you were spray-
ing a pea or bean for? It makes
no difference."

"Oh, but it does," sobbed Ima.

"There's a federal regulation as
amended January 23, 1943, Section
1189, I. Look! It's right here on the
spray label . . ."

Ima showed the label. It read as
follows:

The use of this spray is restrict-
ed by WPB's Conservation Or-
der M-133, as amended Jan. 23,
1943, to the following uses:

1. Peas. Against the weevil
and aphid.
2. Beans. Against Mexican
bean beetle.
3. Cole crops, other than cab-
bage. Against caterpillars and
aphids.

"See!" sobbed Ima, as we finished
reading. "It's all so clear."

"Woman," we said severely. "Do
you mean you used a spray without
being positive what you were spray-
ing?"

"I'm sure I hit a caterpillar in-
stead of weevils and aphids on the
peas," she wept. "And I have
a feeling I sprayed aphids on the
broccoli. Heaven knows what was
on the beans!"

This was too much. There was
nothing to do but consult counsel
and give herself up. We so advised,
hoping for the best. Maybe she can
prove it was an accident.

AXIS PRISONER SONG

A little trip, a little camp,
A little work, some chance for
smiling;
A little rest, a little hope,
A little peace . . . and no more
heiling!

HUH!

Mr. Morgenthau says that by the
end of the year the average family
should be putting 25 per cent of its
income in War Bonds. It is Howard
Smith who cheers the idea but point
out some difficulties. Twenty per
cent of the income is deducted for
new income tax; the cost of living
is up 20 per cent, and a man is sup-
posed to give 15 per cent to various
charities, city funds, Red Cross
drives, etc. This totals 80 per cent.
"That leaves 20 per cent for rent,
food, clothing, transportation, fuel,
light, doctors, hospitals, medicines,
education, state taxes, entertain-
ment and maybe cigarettes," says
Mr. Smith, exclaiming "Who dat
man!"

IDEA OF HOLLYWOOD

Out there the men wear dinner coats,
All conversation's witty;
The sea holds naught but pleasure
boats,
And every woman's pretty.

DEFINITION A LA WASHINGTON

Effective Teamwork —Trying to
operate a six-horse hitch with the
horse-collar on the driver, the whif-
fletree where the wagonstep should
be, and with a horn replacing the
reins.

In Hollywood, yes, life is gay,
To all the world I say it.
At least I guess that it's that way,
For that's how films portray it.

AN ALL-TIME HIGH FOR DEFEATS IS BEING SET IN A GOOD MANY VICTORY GARDENS.

Can You Remember—
Away back when all you worried
about in summer was whether
moths would get in the white-flannel
pants?

OBSERVATION

I always can
Detect the man
Who aimed to get
A week-end tan.
He sports instead
A lobster-red . . .
That is if he
Can leave his bed!

SMOKES and the SOLDIER

Is it true that a soldier is always
hungry?

Yes—up to a point. But the Quar-
termaster Department has found that
some soldiers, particularly new re-
cruits, actually don't eat enough.

The Army mess table is exactly
like a football team's training table.
The food served there is carefully
planned to aid in the physical devel-
opment of the soldier. And the Army
has discovered certain little ways to
increase Johnny Doughboy's appetite.
The Army has found it can add to a
soldier's enjoyment of his food—and
therefore increase his consumption of
all those carefully prepared vitamins,
minerals, and proteins—if he is al-
lowed to smoke during meals. Meas-
ured tests run by the Quartermaster's
Department show that food consump-
tion actually increased by 5% when
soldiers were permitted to smoke cig-
arettes at the mess table.

"Smokes," of course, play a prom-
inent part in many phases of the life
of a soldier. Whenever you see a
news photo of soldiers at ease, you're
apt to see them enjoying a cigarette.
Particularly among American troops
overseas, cigarettes—real American
cigarettes—are highly prized and al-
most never present in sufficient
quantities.

What kind of cigarettes do Uncle
Sam's fighting men prefer? Well,
records show that the favorite cig-
arette is Camel. That is true not only
with men in the Army, but with Sail-
ors, Marines, and Coast Guardsmen
as well. Sales records from the serv-
ice men's own stores—Post Ex-
change, Sales Commissaries, Ship's
Service Stores, Ship's Stores, and
Canteens—show that Camels are first
with men in all branches of the serv-
ice.

Further proof that Uncle Sam's
fighting men like their smokes is
given in the service man's preference
in gifts from home—it's a carton of
his favorite brand of cigarettes. To-
bacco dealers, recognizing that Cam-
els are the favorite among service
men, are equipped to help you in
properly wrapping, addressing, and
stamping your gift of Camels to the
man in the service.—Adv.

R. A. Jorgenson was at Garner on business Thursday afternoon.

Miss Ruth Neuberger returned to work Monday at Thada's store after enjoying a week's vacation.

Morris Ahrenkeil of Hunter Field, Georgia, visited at the Matt Smith home Wednesday evening.

Mrs. Fred Greiman is reported to be critically ill at the Rochester, Minn. hospital.

Carol Larson is having his service station west of town treated to a new coat of white paint.

Mr. and Mrs. Edwin Josten and Marcelle were visiting at the C. A. Larson home Sunday evening.

Clayton, son of Mr. and Mrs. Ben V. Greiman, spent Monday visiting with Harlan and Graydon Barz.

Mr. and Mrs. Lyle Liebendorfer of Forest City, spent Sunday at the R. A. Jorgenson home.

Mr. and Mrs. Harvey Hubbard were guests at the Charlie Halfpup home at Goodell, Sunday.

The Misses Marie Blank, Stella Thiemann and Irene Schmidt drove to Des Moines Saturday evening to spend Sunday visiting in the city.

Mrs. Edna Thada and Miss Avis Barz drove to Minneapolis Sunday to spend a few days buying merchandise for the Thada Store.

Mrs. C. C. Kilgore returned Friday night from Excelsior Springs, Mo. where she had been for about three weeks receiving treatment.

Mrs. J. C. Thomas, and Miss Irene Harms, and Miss Hazel Spiker, their house guest, were Mason City visitors Thursday.

Leo Esbeck has been assisting George Lawhorn with painting the past week or more.

Herman Paul drove to Des Moines Sunday for a visit with his daughter, Mrs. Eddie Epps and children.

Jay T. Griggs of Ventura, and Ira Overholt left Monday for northern Minnesota on a vacation and fishing trip.

Sunday dinner guests at the Otto Schlawin home were Menno Enhuis and family of Hayfield, and Otto Lemke and family of Garner.

Herman Paul and Dwight Hummel attended a meeting of the Hancock County Co-operative Oil Association at Garner Thursday evening.

Levi Klotzbach was on the sick list Friday suffering with a light case of summer flu which kept him off the job at Jacobs store for the day.

Martha Ann, daughter of Mr. and Mrs. C. R. Elder of Ames, spent the past week visiting with her grandparents, Mr. and Mrs. R. W. Elder near Klemme.

Melvin Coobs went to Hudson last Thursday for a visit with the Rev. Harry Buss family. He also visited with friends in Des Moines before returning home Monday.

Mr. and Mrs. Walter Kimball of Boone visited with Klemme and Garner friends Sunday and Monday and also looked after business matters here.

Al Koerner is building a big cement floor at his barn on the place occupied by the Sport Bridges family. Al says he will use about 200 sacks of cement on the job.

Mr. and Mrs. Edw. Schaefer are having their house insulated this week. The improvement should make their house more comfortable in summer and warmer in winter.

First Lieutenant and Mrs. Victor Greiman of Dayton, Ohio, are here enjoying a leave and visiting with their parents, Mr. and Mrs. Wm. H. Greiman and Mr. and Mrs. Albert Kehl. Lt. Greiman is in the Army Air Corps as a laboratory engineer. Lt. and Mrs. Greiman have a nine day leave from duty.

Twenty boys, girls and women of Klemme signed up for corn detasseling and began work Monday east of Klemme at the Lindon Ranch. Tuesday they worked in a field near Belmond.

Mrs. Dick Moeller, Dayton, Ohio, arrived Monday for a visit with her parents, Mr. and Mrs. Arthur Wellmeyer. Mr. Moeller is also in Iowa and is visiting with his parents at Waterloo and expects to come to Klemme the middle of the week.

Mavis, daughter of Mr. and Mrs. Art Polsdof, returned home last week from the University hospital at Iowa City, where she had been for eleven days receiving treatment. At this writing she is reported to be improved.

The Klemme Food Market was further improved the past week by repainting the back rooms of the shop. The processing room and the storage room were painted white, which makes it very clean looking and attractive.

Miss Hazel Spiker, of Ames, visited last week until Friday with Miss Irene Harms at the J. C. Thomas home. Miss Harms accompanied Miss Spiker to her home for a visit. Mr. Thomas took the young ladies to Ames in his car Friday evening.

Walt Lemke stepped into the "heavy-weight" fishing class Sunday when he hooked and landed a 7½ pound catfish while fishing in the channel near the sandbar at Clear Lake. With Walt was Leonard Swanson, who recently hooked a 23 pound catfish from the same spot in the lake.

Julius Priebe is having his house repainted on his farm at the northwest edge of Klemme, occupied by the Gerald Koerner family.

Hogs were more profitable than fattening cattle in 1942.

Save your silk and nylon. They may save a life.

Funeral Services Held Sunday For William Huenemann

His Home Thursday For A Long Illness

Made In Cemetery Near Reformed Church

Wm Huenemann, age 62, pastor of the Peace and Reformed Churches of Ell and Garner, died at his home north of Klemme on Saturday afternoon after a long illness.

Funeral services were held at Peace Reformed Church Sunday afternoon at 2 o'clock in charge of the Rev. H. F. Jost.

Interment was in the cemetery near the church. The Rev. H. F. Jost, pastor of the Peace and Reformed Churches of Ell and Garner, officiated. The choir consisted of the following: Ben V. Greiman, Gid. Enberg, Herman Stromer, Paul Elling, Victor Hu. Messrs. Elmer Katter, Ben V. Greiman, Gid. Enberg, Herman Stromer, Paul Elling, Victor Hu. The organ was played by Jacob Mau-

ment was made in the cemetery near the church. The Rev. H. F. Jost, pastor of the Peace and Reformed Churches of Ell and Garner, officiated. The choir consisted of the following: Ben V. Greiman, Gid. Obituary

Huenemann, the youngest son of Gerhart and Katherine Huenemann, was born in Norwood, Minn., Jan. 2nd, 1881. He received his education in the public schools of his native place. At the age of 17 he came to Klemme, Iowa, where he was employed on the farm. On the 23rd of January, 1937, he was united in marriage with Mary Hansmeier of Klemme. This union was blessed with seven children, of whom Roland died in infancy. The days of his youth the Huenemanns felt the desire to be Lord and Master as a result of the Gospel. In 1913 he came to Klemme to leave his farm and the Mission House at Plymouth, as a student of theology for the five years that he attended College and Seminary there. He was graduated from the Seminary in 1918 and ordained to the ministry of the holy ministry the following year.

During his life time: Curtis charge at Curtis, Iowa, for years.

Church near the house six years; Kasal charge north of Dak eight years. December 1935, he served Peace and Zion Reformed at Garner. The early years of his pastorate in Garner were marked by the illness and death of his faithful life's companion who was called from this earth July 26th, 1936.

Huenemann was a diligent worker of God's Word, a faithful member of his flock. His members were biblical throughout the fundamental of the sacred Scriptures. His teacher he sought to be and in the way of God determined not to know anything among them, save Jesus and him crucified.

He was elected by the North Iowa conference as a member of the board, in which capacity he served for a period of ten years. He was a member of the Sheboygan, Dakota and Minnesota conferences. He took an active interest in the affairs of the Church and served in various offices. On December 12th, 1937 he was married to Anna Greimann of Gar-

ner, who remained his faithful helpmate throughout the remaining years of his life.

The Rev. Huenemann continued his active ministry until a few weeks ago. Although illness impaired his usual vigor for the past year and a half he continued to devote himself to his pastoral duties. He preached his last sermon to his congregation on Sunday, June 27th on the text, Titus 1:17.

He was called to his eternal home on Thursday morning, July 29th (1943) at the age of 62 years, 6 months and 27 days.

His death is mourned by his widow, Mrs. Anna Huenemann. Eight sons: Ruben at St. Louis, Mo.; Calvin at Waukon, Ia.; Karl, at Klemme, Ia.; Elmer, at Garner, Ia.; Edward and Lorenz at the Mission House.

Paul, serving in the United States Army.

William, at home.

Five daughters: Ruth at Knoxville, Tenn.

Miriam, (Mrs. Otto Huber) Custer, So. Dak.

Lois, (Mrs. Albert Streyer) Hayfield, Ia.

Elna at St. Louis, Mo.

Dorothea, at home.

Two step sons: Curtiss Greimann at Garner.

Eugene Greimann at Ventura.

Three step daughters: Charlotte, (Mrs. Leonard Swanson) Glendale, Cal.

Adeline, (Mrs. Charles Carothers) Austin, Minn.

Dorothy, (Mrs. Robert Anderson) East ver. S. C.

Twenty grandchildren.

Three brothers:

John at Pembina, N. Dak.

Gerhardt, at Waukon, Ia.

Rev. H. Huenemann, Dell Rapids, So. Dak.

Four sisters:

Mrs. Geo. Kuhn, Plymouth, Wis.

Mrs. Charles Sickmeyer, Waukon, Ia.

Mrs. Ed. Rupp, Waukon, Ia.

Mrs. Geo. Tressmann, Minneapolis, Minn.

The members of Peace and Zion congregations mourn the loss of their faithful Pastor, his many friends among the former congregations that he served, and his fellow Pastors are saddened by his departure.

But we do not sorrow as such who have no hope, for we believe that Jesus died and rose again, even so them also which sleep in Jesus will God bring with him.

For we believe that "when the Chief Shepherd shall appear, our departed friend and brother" shall receive a crown of glory that fades not away."

Funeral services were conducted at the home and the Peace Reformed Church Sunday afternoon.

RATIONING BOARD EXPLAINS FUEL OIL COUPONS

The Rationing Board at Garner reports that some confusion is experienced by those who have received coupons for fuel oil. Some come back to the office to see why they were cut down or for correction.

Says the Board: "We are sending out three different types of Fuel Oil coupons. The one unit are valued at 10 gallons and the 5 units are 50 gallons. The coupons for smaller amounts are not made up yet but will be out before long. If they do not understand their coupons, their oil man will take care of it for them."

FATHER DIES

The only priest ever born in Decorah, The Rev. Father Joseph Schrubbe, 33, died in China on July 18. Father Schrubbe went to China following his graduation from Maryknoll Missionary Seminary in New York, in 1939.

FIGURE IT OUT YOURSELF

Points On The Food Situation

(By Hazel Grimes, County Extension Home Economist)

1 Liberty ships transport food to other countries. At the launching of the 200th Liberty ship, it was stated that it takes all of the food (milk, eggs, meat, vegetables, fruit, cereals, etc.) from 3824 farms to supply one ship load. Compare this with approximately 2,000 farms in Hancock county.

2 A combat soldier eats 5 1/2 pounds of food every day, contrasted with the civilian average of 3 pounds.

3 The 1500 naval trainees at Iowa State College eat 2500 eggs every morning. It takes three cocks working three hours just to break those eggs.

4 In one week the 1500 naval trainees at Ames drank 18,666 pints of milk. In addition 216 gallons were used in cooking their food.

5 They eat half a ton of butter a week.

6 They eat four tons of beef and a ton of poultry, liver and fish for variety in a week.

7 Tomatoes are most nutritious as they come from the vine. On picnics and in lunch boxes they are good whole, with a little salt.

8 Peeled or sliced tomatoes lose some of their ascorbic acid (vitamin C), especially if allowed to stand uncovered for any length of time, but if kept cold and served reasonably soon, the loss will be small. They are so rich in ascorbic acid that they supply fairly large amounts even when cooked.

9 A delightful variation from sliced tomatoes is whole tomatoes, cored and stuffed with a hearty filling of protein food, such as cottage cheese, chopped peanuts, left-over fish, chicken or meat or chopped hard cooked eggs.

Roads Being Improved

LOTS OF GRAVEL BEING SPREAD ON ROADS IN THE VICINITY OF KLEMMME

Gravel trucks have been going through the streets of Klemme for the past week and a number of roads in the vicinity are being improved, according to County Engineer Wm. Henschen.

Engineer Henschen reports that the following roads have been surfaced with gravel which was taken out of the Greiman pit southwest of Klemme.

From the Wes Lenz corner, west 2 1/2 miles.

Road near the Wittenberg and Josten farms 1 1/4 miles.

From Klemme east 4 miles.

From the Ell Center School to the Greiman school.

A number of other roads as follows are to be surfaced as soon as the work can be done.

In Avery Township one mile past the Marshall farm, and one mile past the Bachman farm.

The road from the R. W. Elder farm will be resurfaced east three miles and then north a half mile.

From Goodell west one mile.

In Twin Lake township one mile past the Prangnitz farm.

And in Amsterdam township one mile past the Rickensud farm.

In addition to the above work, there will also be quite a few small spot jobs which include a few leads where needed to bring the road up to par again.

TWO FARMS NEAR BRITT SELL AT GOOD PRICES

The Equitable Life Assurance Society recently sold two farms in Britt township when they sold the A. E. Townsend farm west of Britt to Clifton A. Lenz and Swan Rapp. Clifton A. Lenz purchased the 280 acres south of the C. M. St. P. & P. railroad at a purchase price reported to be \$38,900.

Swan Rapp bought the 100-acre tract north of the tracks for \$11,000. The farm is well improved and in a high state of cultivation.

10 Fresh tomato juice-ripe red tomatoes should be washed, chopped and forced through a fine sieve. A few slices of onion, some lemon juice, horse radish or sauerkraut juice will give extra zip.

11 Tomato combinations as the man hot dish-fried tomatoes baked in the skins with a stuffing of bread crumbs, left-over cereal or corn and seasoned with meat drippings are first-rate dishes.

Klemme Man Retires After Thirty Seven Years In Grain Business

HENRY F. JOST

H. F. JOST RESIGNS AS NORTH IOWA GRAIN CO. MANAGER

Began Grain Business At Lidderdale In 1906

Mr. Henry F. Jost has resigned his position as manager of the Federal North Iowa Grain Company after being with the firm here for the past seventeen years.

Mr. Jost has been in the grain business for thirty-seven years. He entered the grain business at Lidderdale, Iowa in 1906 under L. V. Mighill and put in twenty years there as manager for a private concern and later for the Farmers Elevator Company.

Mr. Jost came to Klemme and began work for the North Iowa Grain Company on January 1st, 1926, and has been manager of the company here since that time, for a period of 17 years and 7 months.

But grain was not the only thing Mr. Jost was interested in during his career at both Lidderdale and Klemme. At both places he was active in community affairs. At Lidderdale he served for a number of years on the town council and was a councilman there when he came to Klemme. He also served a number of years on the school board at Lidderdale.

During his years in Klemme he has been active in the affairs of the community and has always been a booster for a bigger and better Klemme. He served for a number of years on the town council and has had the distinction of being president of the board twice. He is at present the president of the board, having assumed that duty when Pres. Dr. Dulmes resigned from the board to enter the army. He is a member of the Klemme Civic Club and has always been active in that organization.

Mr. and Mrs. Jost expect to continue to make their home in Klemme.

Mr. Jost will be succeeded here by Mr. Otis Whitehead of Bagley, Iowa, who will take over active duties as manager here in about a week. Mr. Whitehead spent a few days in Klemme the past week getting acquainted.

SEVERAL REAL ESTATE DEALS COMPLETED PAST WEEK

Wednesday afternoon Mr. and Mrs. J. W. "Bill" Johnson completed arrangements for the purchase of the Dr. Dulmes building next to The Times Office. Mr. and Mrs. Johnson expect to do some remodeling on the building which will be their home when they retire from the farm next year. They have rented the place to Mr. and Mrs. Ira Overholt.

Mr. and Mrs. Stenus Hains have purchased the Walter Kimball residence and lots in the northeast part of Klemme and will move to town sometime in the future.

Mr. and Mrs. Herman Thiemann have purchased the Henry Josten property east of the Frank Kluckhohn home, and which is now occupied by the Reuben Lemke family. Mr. and Mrs. Thiemann will retire from farm life and move to town.

TOO MUCH RAIN, OATS SPOILING IN THE FIELDS

Farmers in the vicinity of Klemme had prospects for a wonderful crop of oats this year, but the prospects are fading out each day because of rains.

Some threshing has been done but most of the crop is still in the fields. Because of rain nearly every day, farmers say the oats are getting musty and off color and the quality will not be as good as expected.

On the other hand, we have had ideal corn weather and the corn is doing alright. With plenty of moisture and hot weather, the corn is really bumping the stars, almost.

State To Omit Property Levy

DROP IOWA TAX FOR SECOND YEAR

Gov. Bourke B. Hickenlooper announced Saturday that there again will be no state property tax levy this year.

Comptroller C. Fred Porter instructed the state tax commission not to levy any state property tax this fall for collection in 1944.

Governor Hickenlooper said he was "glad to report that the excellent condition of state finances make the levy unnecessary."

This marks the second year the state has operated on receipts from its various miscellaneous taxes without levying any property tax.

First in 1942.

Former Gov. George A. Wilson first eliminated the state property tax levy in 1942.

The levy in previous years ranged from three to nine million dollars in state tax revenue.

The groundwork for elimination of the levy again this year was laid by the last legislature when it set up the state general fund.

Transfer. The legislature directed that two million dollars of the balance in the sinking fund for public deposits be transferred to the revenue from the 4-cent-a-barrel beer tax also be transferred to the general fund. The beer barrel tax customarily raises about one million dollars annually.

Transfer of the two million dollars from the sinking fund for public deposits was made possible by the fact the fund, once 20 million dollars in the red, now has ample balances to pay off all claims against it.

Balance. The beer barrel tax formerly went to the emergency relief fund, but the sharp drop in direct relief needs left that fund with a balance of \$1,300,000 on June 30. This amount is considered ample to meet Iowa emergency relief needs for the next two years.

Two other state tax levies also will be eliminated again this year.

One of these is the former 27-mill property tax levy for the retirement of soldiers bonus bonds and the 1-mill tax on moneys and credits for the same purpose.

The soldiers bonus bonds, resulting from the 20 million dollars Iowa paid after the world war, were paid off last December. Consequently no further levy is needed to retire them.

Bad News!

NO MORE CANNING SUGAR

There will be no more canning sugar allowed in this county as we have already allowed the maximum of 15 pounds, and with the 10 pounds in each book (numbers 15 and 16 stamps) they have the 25 pounds, states the Board.

There is nothing allowed for threshers.

General Quiz

Where is the Valley of Ten Thousand Smokes?

What state's name means "people's"?

What is the chemical symbol for gold?

What name is given to a person who derives pleasure from inflicting pain?

What opera was based on the life of King Gustave III?

What is the separation of complex rays into different colored rays called?

How long did federal prohibition last in the United States?

What is the approximate population of Alaska?

The Answers

1. The Valley of Ten Thousand Smokes is in Alaska.

2. The chemical symbol for gold is Au.

3. Sadist.

4. "The Masked Ball."

5. Dispersion of light.

6. Thirteen years.

7. Approximately 72,000.

Ant Ducks With Nets

An old custom, and a favorite of the wealthy in the duck hunting season opens. The sons of the Rising Sun used all of their weapons else-where, and for a different purpose, duck hunting practice should be popular.

Idea seems to be to sneak the duck. It's quite a trick. The Japs are masters of sneak.

HAPPY FACTS ABOUT RUBBER

Millions of wild Hevea seeds from Brazil have been sent to neighboring countries and as far north as Central America in the extensive program under way to encourage rubber development in the Western Hemisphere. Congress appropriated \$500,000 in 1940 to stimulate rubber planting in the Americas.

Rubber pontons and ponton boats were used by the U. S. government 100 years ago. They were made of coated canvas in three compartments, each inflated by a separate tube. They were inflated by a hand bellows and collapsed and sank with the slightest leak.

For war or peace

FIRST IN RUBBER

HOUSEHOLD MEMOS

by Lynn Chambers

Angel Food cake with a fruity icing handles your summer dessert problem effectively but doesn't eat into your sugar ration.

Cooling Off

Fruity desserts for summer lend just the right tartness to the meal and give your menus a nice seasonal note. When fruits and berries are plentiful, plan them to go into your first courses, summer drinks, desserts and snacks.

Fruits and berries have a good store of vitamins and minerals which will help keep your spirits up when the warm weather wants to get you down. Acid fruits such as lemons, grapefruit and oranges alkalize your system and help you keep cooler while fruits and berries coming in season will give a delightful note to your menus.

Cakes, pies and puddings come in for their share of attention when there are fruit and berries on hand. This angel food cake looks mighty pretty served with fresh fruit or berry icing. The eggs, if removed from refrigerator several hours before using, will beat up more lightly and give increased fineness of grain and delicacy of texture to the cake:

Angel Food Cake.

1 cup sifted cake flour

1 1/4 cups sifted granulated sugar

1 1/4 cups egg whites (10 to 12 egg whites)

1/4 teaspoon salt

1 1/4 teaspoons cream of tartar

1 teaspoon vanilla

1/4 teaspoon almond extract

Sift flour once, measure, add 1/2 cup sugar, and sift together four times. Beat egg whites and salt with rotary beater or flat wire whisk. When foamy, add cream of tartar and continue beating until eggs are stiff enough to hold in peaks, but not dry. Add remaining sugar, 2 tablespoons at a time, beating after each addition until sugar is blended. Fold in flavoring. Then sift in about 1/4 of the flour and fold in lightly. Repeat until all is used. Turn into an ungreased 10-inch angel food cake pan. Cut gently through batter with knife to remove bubbles. Bake in a slow (325-degree) oven, 1 hour or until done. Remove from oven and invert pan 1 hour. Cover with fruit or berry icing.

The repertoire of cherry desserts is an extensive one for there are such things as cherry cobbler, shortcakes, pancakes, fritters, roly poly and pie! If you make the pie with this popular prepared cereal crust you will save time, requires no special technique for making:

Cherry Meringue Pie.

Crust:

3 cups oven-popped rice cereal

4 tablespoons sugar

1/2 cup butter, melted

Roll cereal into fine crumbs; combine with butter and sugar, mixing well. Press mixture evenly and firmly around sides and bottom of pie tin. Bake in a moderate oven (350 degrees) for about 8 minutes. Cool before adding filling.

Lynn Says:

Point Wisdom: If you're parting with more red stamps a month than you should, check up on yourself.

Don't buy meat and neglect other red stamp foods. Space out the stamps just as carefully as you figure out the financial end of things.

Study point values and learn to understand how the system works instead of having the busy butcher explain it to you every time you buy.

Family likes and dislikes are out of place in a wartime budget. Serve low point meats appetizingly cooked.

Buy meats and fats sensibly—as you need them. Buying too much or carelessly storing what you have is sabotage on the home front.

Lynn Chambers' Point-Saving Menus

Broiled Halibut

Creamed Potatoes

Garden-Fresh Beans

Green Salad

Whole Wheat Rolls

Raspberries and Cream Beverage

Filling:

3 cups fresh cherries, pitted

1 1/4 cups sugar

2 tablespoons flour

1/2 teaspoon salt

2 eggs, separated

Combine pitted cherries, 1 cup sugar, flour, salt and egg yolks. Cook in double boiler until mixture is thickened. Pour into crumb pie shell. Beat egg whites until stiff. Gradually beat in remaining 1/4 cup sugar. Spread meringue over pie. Bake in a moderate oven (350 degrees) 12 to 15 minutes until meringue is browned.

Orange Ice Cream.

1 pint scalded milk

2 tablespoons flour

1 cup sugar

1/4 teaspoon salt

2 eggs, separated

Grated rind of 2 oranges

Grated rind of 1/2 lemon

Juice of 4 large oranges

1 quart light cream

Make a custard of the first four ingredients as follows: Mix flour, sugar, salt, and add milk gradually. Cook over hot water for 10 minutes, stirring occasionally. Take from fire and pour over well-beaten egg yolks, and add grated lemon and orange rind. Return to double boiler and cook until mixture coats the spoon. Strain and cool, then add orange juice, cream and beaten whites of eggs. Freeze. If desired, serve with candied orange peel.

Sliced Pears in Orange Juice.

(Serves 6 to 8)

2 1/2 cups fresh orange juice

2 tablespoons powdered sugar

6 to 8 pears, sliced thin

Sweeten orange juice with powdered sugar and chill well. Fifteen minutes before serving, peel pears, slice thin, and sweeten. Pour juice over the pears, and serve with cookies.

Berries are coming in season and will give a lift to your meals. Cherries go into this pie which is covered with a meringue to save precious fats.

Sliced Oranges in Orange Sherbet.

(Serves 8)

1st part

8 navel oranges

1/2 cup sugar

1 cup water

2nd part

1 quart water

2 cups sugar

Grated rind of 2 oranges

2 cups orange juice

1/4 cup lemon juice

3rd part

1 cup sugar

1/2 cup water

Whites of 3 eggs

For the first part, peel oranges and with a sharp knife remove all white membrane. Slice oranges into sections between skins. Boil sugar and water together, let cool, then pour over oranges and let stand in refrigerator.

For second part, boil sugar and water for 5 minutes, add grated orange rind, and juices. Cool and strain. Freeze, in round mold.

Make a meringue for 3rd part by boiling sugar and water for 5 minutes, until it forms a soft ball in cold water. Incorporate a little into the beaten whites of three eggs until all used. Continue to beat for 2 minutes. Cool. Remove top from mold in which orange ice is packed, stir in meringue. Serve in large glass dish with sliced oranges in meringue nest.

If you have a canning problem, write to Miss Lynn Chambers, Western Newspaper Union, 210 South Desplaines Street, Chicago, Ill. Please enclose a stamped, self-addressed envelope for your reply.

WAR ON ALL FRONTS

A SERIES OF SPECIAL ARTICLES BY THE LEADING WAR CORRESPONDENTS

Every 7th Girl A Spinster?

By Aram Scheinfeld

(WNU Feature—Through special arrangement with Collier's Weekly)

For the first time in history the United States is confronted with a big shortage of potential husbands. The situation already is so serious that one out of every seven girls now seems headed for spinsterhood. And if we add to this the young widows and divorcees who won't be able to marry again, we are threatened with a standing population of millions of women—six, seven, eight million, no one can estimate exactly how many—who will have to go through life without husbands.

This simple fact is social dynamite. It can rock the foundation of our social system and attitudes toward sex, cut down our population, change our American way of life.

Those who best understand the dangers ahead—our population experts, sociologists, economists and psychologists—are genuinely concerned. They have seen throughout Europe, notably in Sweden, England, France and Germany, the grave changes that have accompanied marked reductions in the proportion of men to women. They know that unless we begin planning speedily and realistically to meet the unbalanced situation of the two sexes, it is going to be difficult to maintain our present-day moral and social standards.

You can't blame the situation on the war. It will make things worse, but it isn't the primary cause. Long before it started, there had been a steady drop in the ratio of men to women in the United States. If the war ended today and we could recall to life and health every one of our casualties, there still would not be nearly enough men to provide husbands for all our girls.

Men Less Resistant.

There are two fundamental causes for our man shortage. One is biological, affecting the whole civilized world: the fact that males are inherently weaker in resistance to disease and death. The other cause is peculiar to the United States, and results from our having used up the artificially created male surplus brought in by past immigrations.

Most dramatic is the biological factor. Males enter the world with the cards stacked against them. No matter how we might equalize conditions for both sexes—by abolishing war, or eliminating accidents and added strains on men—males are destined to die off at a faster rate.

That fact now is known to apply not only to human beings, but to most of the animal kingdom. From mice to elephants, from birds to flies and fish, in almost every species the male is biologically less resistant, and has, on the average, a shorter life span.

One of the most interesting experiments on this point was made at the New York aquarium, with guppies, the familiar little tropical fish that give birth to live offspring. Expectant mamma guppies were placed in one tank, and after their hundreds of progeny had been born and had grown for a certain period, they were counted by sexes. It was found that the females outnumbered the males two to one.

One of the reasons for this much higher survival rate of females is that males are more likely to enter the world with inherited defects. Another is that the female organic mechanism is better able to adjust to sudden internal upsets or external adversities.

Among infants dying in the United States before their first birthday, at least 25 per cent more boys than girls are carried off. During childhood this mortality ratio drops, but at maturity the male death rate goes up again, and thereafter the death toll among men is at least 25 per cent higher than it is among women. By the time the mid-twenties, the principal marriage years, are reached, the original surplus is completely gone, and thereafter women increasingly outnumber men.

One remarkable fact is that as the "expectation of life" has been extended, women have profited more than men have. From 1900 to 1941, the expectation of life at birth had been increased by about 15 years for males, but 17 years for females.

Up to this present generation, we always had more than enough men to go around, with "seconds," as well, for young widows and divorcees. We were still able to draw upon the heavy surplus of foreign-born males brought in by previous immigrations. Now the situation for American girls is something like playing "Going to Jerusalem," using men instead of chairs. With each turn of the years, additional men have been yanked away and more girls have been left to stand alone.

For you to make

540

"Do it yourself" is a patriotic motto this wartime year. Thriftily re-upholster your own furniture—with these clear, step-by-step directions that also show

Bananas Launch Ships

Greasing the ways of shipyards to permit thousands of tons of steel to slide smoothly into the water at launchings of battleships requires about 45 tons of a special grease. Once, when a surplus of overripe bananas was a disposal problem in one port, they were used to grease the ways for launching.

you how to give a "lift" to sagging springs; how to repair webbing and lumpy padding; how to make seat pads.

Instructions 540 give directions for repairing and upholstering.

'Bumped Off'

In busy Washington to be "bumped off" no longer means to be taken for a ride—it means to lose a ride. Government officials are bumped off when they lose their seat on a plane to someone with a higher travel priority.

MEAT GOES FAR WITH ALL-BRAN "BRANBURGERS"

Here's a new way to serve that old favorite, the hamburger. Make it with KELLOGG'S ALL-BRAN to stretch the meat supply, to give the popular hamburger new interest, and to get ALL-BRAN'S nutritional benefits—valuable proteins, carbohydrates, vitamins and minerals.

Kellogg's All-Bran Branburgers

1 egg 1 tablespoon
2 teaspoons salt 1 cup milk
1/4 teaspoon pepper 1/4 cup catsup
2 tablespoons minced onion 1 cup Kellogg's All-Bran

1 pound ground beef

Beat egg slightly, add salt, pepper, onion, parsley, milk, catsup and All-Bran. Let soak until most of moisture is taken up. Add beef and mix thoroughly. Shape into 12 patties. Bake in hot oven (450°F.) about 30 minutes or broil about 20 minutes.

Yield: 6 servings (12 2 1/4 inch branburgers.)

CLABBER GIRL Baking Powder

ALONG WITH OTHER Proved INGREDIENTS

... choose Clabber Girl as part of that war-time recipe ...

Guard against waste and be sure of results with the baking powder that has been the baking day favorite in millions of homes for years and years ...

Ask Mother, She Knows: Clabber Girl goes with the best of everything, for baking.

A Georgia cracker sitting, ragged and barefoot, on the steps of a tumble-down shack was accosted by a stranger who stopped to ask for a drink of water. Wishing to be polite, the stranger said, "How about getting some?"

"I got none," replied the cracker.

"Didn't you plant any?" asked the stranger.

"Nope," said the cracker, "Fraid of boll weevils."

"You said the stranger, 'how about getting some?'"

"Didn't plant none," said the cracker. "Fraid there wa'n't goin' to be no crop."

The visitor was abashed but persisted. "Well, how are your potatoes?"

"I got none," said the cracker. "Scairt o' potato bugs."

"Really, what did you plant?" asked the stranger.

"None," said the cracker. "I got scared."

Sung a song of salvage,
Pocket full of tin,
Four and twenty stew-pans
Dropped in a bin.

Four and twenty BOEINGS
Laid in formation—
A line of how we gals
Control the situation.

Olive Carleton Munroe,
Christian Science Monitor.

BOARD SAYS TIRE SITUATION IS REALLY CRITICAL

Following communication received from the War Relocation Authority at Garner, Iowa, the board of the tire rationing board has decided to take good care of the present tires.

The members of the tire rationing board would like to present a more thorough picture of the shortage of tires so that every one in Hancock County will understand the seriousness of this condition and realize that the actual needs must be taken care of first.

There are too many applications coming into the office and only one car is down on three tires on the board issue a certificate of replacement. It is not possible to replace the shortage of Quota to allow a spare tire.

There is one exception. This rule does not apply to high speed cars such as doctors and fire trucks.

EVERY 4-H SUNBEAMS

The Avery Sunbeams met at the home of Maxine Bachman, Thursday evening July 29. It was necessary to hold the meeting in the evening as two of the members were busy during the day helping with the corn.

Next week meetings will be held at the county Achievement Show. On the evening of August 3rd the girls will hold their local Achievement Show to which parents and friends will be invited.

Miss Irene Marshall, the club leader, presented each girl with an insignia showing the number of weeks which she has spent in club work. These are to be worn on the sleeves of the girls' 4-H uniforms.

Lunch was served by Maxine and her mother.

Plan now for storing the products which are growing in the garden. A cave is the most satisfactory storage place.

BETTER IOWA GARDENS

It is not necessary to water the garden if there has been approximately an inch of rainfall within a week. Gardens should be watered if there have been only several light showers and the weather has been warm. Watering may be held off, on the other hand, if cool, humid weather prevails. Special effort should be made to nurse the summer garden plantings on during warm, dry periods.

The majority of summer plantings of vegetables have been made. A few fast maturing vegetables can be planted the last 2 weeks of August—kale, the globe type radishes, leaf lettuce and spinach.

The round, green berries found on some potato plants are a source of worry to some gardeners. These berries are simply fruits containing seeds. They are nothing to be concerned about. We depend on the tuber for propagation of potatoes in home gardens and not the true seed.

Has it been 2 weeks since your potato vines have died? If it has, it's time to dig them. It is dangerous to leave your potato crop in the ground much longer than 2 weeks after the vines die. Considerable loss may result from rot. Avoid this possible waste of your potatoes by harvesting at the right time.

Do not allow freshly dug potatoes to dry in the hot sun. Potatoes under these conditions sun scald easily. Early morning, when it is cool, is a good time to dig potatoes. They should be removed to a shady, protected spot as soon as possible after digging. Another method is to dig the potatoes in the evening and pick them up early in the morning. Every gardener who does not have a permanent vegetable and fruit storage room would do well to make some plans for one now. The storage season will be upon us before we know it and we must have the storage facilities ready to receive the surplus products.

In some homes where coal furnaces have been adapted to oil or gas, the coal room may be converted with a little expense into a fruit and vegetable storage. A small coal room with about a 7'x10' floor space and 7' ceiling may cost only about \$7.00 for insulation. This is assuming that the room is a corner of the basement. In this case the two foundation side walls need no insulation. The inner two sides and the ceiling should have several inches of insulation batting.

Many gardeners are wondering why their raspberries have not produced well this year. The main reason for this is winter injury.

DRAINAGE ONE WAY TO BOOST YIELDS

Have No Tile Restrictions And No Priorities on Ditch Digging

Besides the generally accepted has been cited by C. H. Van Vlack, Iowa State College extension agricultural engineer, as an aid to wartime production that returns many times the original investment.

Besides the generally accepted benefits from drainage due to improved bacterial life in the soil, drainage of wet spots makes it possible to plow, plant or cultivate the entire field at the same time, when the soil is in good condition.

Ditch digging requires no priorities, and tile of clay or non-reinforced concrete not more than 12 inches in internal diameter is exempt from restrictions.

Shallow ditches are the simplest and the cheapest method of surface drainage. The best locations for ditches can be determined after a heavy rain, when water is standing on the ground. This method is not entirely satisfactory, but will gradually bring new areas into cultivation where numerous and comparatively shallow open ditches are dug.

Outlet Important

A tile drainage system is most effective, however, with the location and suitability of an outlet rating as the most important consideration in laying out a tiled drain. The ideal outlet permits a free flow from the tile line under all conditions. It may be a natural watercourse, a large open ditch, or another tile drain. The tile outlet should be planned so that it will not be submerged for any considerable period of time, even during

periods of heavy rainfall. The system should be set up to reduce, within 24 hours after a rain, the groundwater table between the tile lines to an elevation most beneficial to plant growth. Texture of the soil will be the determining factor, of course. In general, however, tile drains spaced 100 feet apart and 3 to 4 feet deep will do a satisfactory job of drainage. No tile should be laid less than 30 inches deep.

Selecting Tile

Van Vlack says tile should be at least 4 inches in diameter, even for short lines or laterals. The carrying capacity of a 4 inch tile is twice that of a 3 inch tile. The extension specialists says, therefore, that the difference in cost cannot warrant the risk involved with the smaller size.

Water enters the tile through the joints between the tiles and not through the walls of the tile. For this reason, porous tiles are no more efficient than any others, and are more likely to be soft and easily damaged.

BEGIN PREPARING NOW FOR WINTER EGG CROP

Begin preparing for the fall and winter crop of eggs. W. R. Whitfield Iowa State College extension poultry specialist considers five months the proper age for housing the pullets which will produce most of that harvest. They should be housed 2 to 3 weeks before laying starts.

Early hatched pullets (March and April) will benefit from a change to laying concentrate with shelled corn and whole oats. This concentrate should contain ground alfalfa and vitamin A and D oil, which are not found in most growing mash.

The pullet flock requires adequate floor and feeder space to encourage eating and laying. Leghorns should have 3 square feet per bird, while New Hampshires, Plymouth Rocks, and Wyandottes need 3½ square feet. Flock owners who have only one laying house and enough replacement pullets should sell all their old hens during August. This not only allows space for the pullets but protects them against carrier hens that have only partially recovered from disease.

Clean the house thoroughly before housing the pullets. Remove all manure and dust and scrub the floor if made of concrete. A dirt floor may be replaced with one built of concrete or tight clay.

Disinfect the entire interior of the house with lye water or a solution of creosote. Note the directions on the container to avoid burns and to secure good results.

When the pullets are housed the floor should be covered with 6 inches of coarsely ground corn cobs. This is to save labor in cleaning and to prevent disease. More ground cobs should be added to the old litter at regular intervals, beginning early in the fall while the litter still is dry. This may be continued until the litter is about 8 inches deep, and that will remain dry throughout the winter if the house is correctly ventilated.

SUGGEST SEEDING OF BROMEGRASS SOON

Starting Conditions Usually Ideal Between Aug. 15 And Sept. 10

Weather conditions during the late summer and early fall in Iowa are ideal for establishing stands of brome grass. The period between Aug. 15 and Sept. 10 generally is figured as best in this state. In areas where grasshoppers may be present in large numbers, vigorous steps to poison out these pests must be taken if a successful fall establishment of brome grass is to result, however.

Maurice L. Peterson, Iowa State College extension agronomist, recommends brome grass not only for its superiority both as a hay and as a pasture crop, but also as a logical choice for farmers to plant on idle acres upon which other crops could not be planted this year, or were flooded out.

Strains that are considered superior for Iowa conditions, and for which considerable seed is now available, are the Fischer strain, Lincoln brome and Achenback brome. Names of growers are available at county extension offices.

Add Legume

Alfalfa and brome grass make an ideal combination, in most cases. Alfalfa seed probably will not be available for late summer seedings this year, through. Peterson suggests therefore that brome grass be

seeded at the rate of 10 to 12 lbs. per acre with 6 to 8 lbs. of sweet clover. It is recommended that brome grass always be seeded in a mixture with a legume.

Fall seedings ordinarily are made following a small grain crop. Usually the stubble land is plowed and the seedbed fitted by disking, harrowing and rolling. It also is possible to prepare a seedbed by disking the stubble land if weeds can be controlled in that manner.

This procedure is particularly advantageous on rolling land which is subject to erosion. The protective stubble mulch left already on top of the ground cuts down erosion and eliminates the danger of crusting or baking of the top soil.

Roll Seedbed

Regardless of the method of preparing the seedbed, however, the soil should be finely pulverized and packed. A corrugated roller or cultipacker used before and after seeding greatly improves the chances of getting a good stand.

Brome grass seed is chaffy and difficult to seed by mechanical methods. This difficulty may be overcome to a large extent by mixing the brome grass seed with a small quantity of oats or cracked corn. Legume seed should be seeded separately and not mixed with the brome grass seed as it will sift to the bottom and an uneven stand will result.

Peterson points out that brome grass responds well to nitrogen fertilizer. Seeding made on badly eroded soils which are low in organic matter by a top dressing of manure applied immediately after seeding.

Around Iowa

TIMES HAVE CHANGED

Ten years ago the only government offices in Decorah was the Farm Bureau office, employed, two people, of course the post office and a few other such long established offices. Today, there are 18 government agency offices, employing between 50 and 55 persons.

MODERN TIMES

For many years, Mrs. Anna Sievers, 94, of Westside, has heard and seen much of fancy hair-dos and permanents but had not done much about them for herself. Last week, for the first time, she visited the local beauty shop and had her hair cut.

FIRST TO REPORT

Crawford County Superintendent of Schools F. N. Olry didn't lose the honor this year of being first to file annual county reports with the state office. W. A. Winterstein, statistician in the office of state department of public instruction, advised Mr. Olry has held this honor for a number of years.

GOOD RECORDS

The oldest ledger known to be in existence in Ringgold county is on display at the Todd Hardware in Mt. Ayr. The first entry in the ledger was made on July 14, 1857. At that time the ledger was in the possession of Henry Clabb & Co., general merchandisers. It has been handed down to the successors of the original company until today it is owned by the Todd Hardware.

TALL CORN

The corn this year may not be as tall as it has been in past years but J. F. Teal of near Keosauqua has this story to tell. One evening recently he measured his corn about 5:00 p. m. and staked two hills. The next day at 5:00 p. m. he measured the same two hills and found that one had grown ten inches and the other 12 inches.

IRON TOO HOT

A hot flat iron forgotten and left on at the home of Mrs. Iris Needies of Chariton caused considerable damage to the house. It burned through the ironingboard and dropped to the floor where it started a fire in a rack of clothing. Firemen kept the fire confined to the one room but some bedding and furniture were badly damaged.

Iowa is asked by the government to salvage 274,000 pounds of fats each month.

CARL BREDLOW FAMILY PICNIC HELD HERE SUNDAY

Fifty-five People Present At The Picnic In Klemme Park

The annual picnic of the Carl Bredlow family was held in the Klemme Park Sunday, August 1st with fifty-five people present meeting for the fifteenth time.

Those present at the family picnic Sunday included Mr. and Mrs. Aug Kropp, Lester and Neva; Mr. and Mrs. Caris Kropp and Carita; Mr. and Mrs. Lloyd Drugg, Marilyn and Marlys of Forest City; Mr. and Mrs. F. A. Bredlow, LeRoy, Lorraine, Ronald, Margie and Sheryl; Mr. and Mrs. Herman Gast, Lola and Lois.

Mr. and Mrs. Kenneth Gast and Roger of near Miller; Mr. and Mrs. Kenneth Zwald, Wanda and Eugene, Mr. and Mrs. Albert Borchers and Martin De Vries.

Mr. and Mrs. E. G. Beier; Mr. and Mrs. Will Riemer and Iola of near Miller, Mr. and Mrs. Ben Riemer and Lois, Mr. and Mrs. Emil Blumer, Mr. and Mrs. Herb Bredlow; Lester Bredlow, Swaledale, Mr. and Mrs. Aug. Neuhring and Arno.

Mr. and Mrs. Sam Hammno and Doris; Mr. and Mrs. Clair Bredlow and Marcella of near Goodell.

This family group also has several young men in the armed service. Orville Kropp, Glenn Bredlow, Marvin Bredlow, Loren Gast, Wayne Hammon, Dale Suckow and Arthur Stephen.

A number of new babies were listed in the family this year.

Jerry Dorenc, son of Mr. and Mrs. Leon Kropp.

Dean Orlien, son of Mr. and Mrs. Merlin Neuberger.

Daryl, son of Mr. and Mrs. Carol Berger.

Jorn Thorman, son of Mr. and Mrs. Mac Finn.

Marcella Jean, daughter of Mr. and Mrs. Claire Blakewell.

Jerry Art, son of Mr. and Mrs. O Kemp.

Thank You!

—V—

After being with the Federal North Iowa Grain Co. for 17 years, I am returning as manager here.

I want to take this opportunity of thanking you for your friendship and patronage during those many years. There are years which I will remember fondly, as it has indeed been a pleasure to do business with the fine people of this community.

My sincere hope is that you will extend the same courtesies to my successor, Mr. Otis Whitehead. Come in and meet him. He is a fine fellow and we know he will meet with your approval.

—V—

Henry F. Jos

BADGER FOUND

Union park custodian Lou Burnside, Denison, was surprised to find a 32-inch badger staring him in the face the other day. Rocks wouldn't dislodge the animal, but a gun did. It is not known where the animal came from.

CATALDO IS ELECTED NEW ATHLETIC COACH

Garner - Samuel Cataldo, formerly of Garner, has been elected to be athletic coach and teach science in the Garner high school of the coming year. Cataldo coached at Alden last year and previously coached at Dows. He was in business a number of years.

He grew up in this community and lived for some time with Mr. and Mrs. I. V. Rasmus north of Garner. He was graduated from Garner high school and from Monmouth college at Monmouth, Ill. He is married and has two sons.

Mr. Cataldo will succeed Paul Zurbruggen who was inducted into the army this summer.

WALNUT TREES OF GOOD SIZE ALWAYS SELL WELL

Walnut brings good prices when it is of good size, regardless of whether we are at war or not. Guy Ramsey, Iowa State College extension forester, advises growers, however, that buyers who contract for trees of all sizes are bound to cut down on what they would pay for the large trees, in order to allow for the loss they will have on the small ones.

Only the large trees should be sold. If a tree doesn't measure 14 inches in diameter 4 1/2 feet above ground, it is too small. Logs are cut at least 8 feet. Timber grown walnut trees are preferred by purchasers, because sometimes those growing in pastures are defective or are of poor form.

Ramsay says that trees offered should not be standing along roads, in yards, or about buildings. They are apt to be branching too low to get a log 8 feet long or longer from them, and also may contain metal from nails or wire placed in them perhaps many years ago and forgotten.

No government agencies are buying walnut. Purchases are being made principally by firms who have government contracts for gunstocks, airplanes and boats, but the government itself is not doing the buying.

LUCKY

With rattling of stoves soon to start, the John Anderson family of Tama are lucky in obtaining a new one. The Estate Stove company of Ohio had been looking for a particular model to finish a collection of every make and model of stove and range that they had manufactured. The stove belonging to the Andersons was the exact model of stove wanted by the company. The stove company presented the Andersons with a new stove in exchange for the old one, now about 21 years old.

FAMILY PICNIC HELD SUNDAY AT CLEAR LAKE

Families from Klemme and McGregor met Sunday at Clear Lake where they enjoyed a get-together and picnic dinner. Included in the group were Mr. and Mrs. W. F. Pavey, Mr. and Mrs. Wayne Pavey and daughter, Ben Coobs and family, Verner Lewis and family, all from Klemme, and Herman Coobs and family of McGregor. The picnic was held in honor of Robert Coobs, U. S. Navy who was home on a furlough from Camp Farragut, Idaho and for Melvin Coobs of Klemme who is leaving for service in the army.

SORROWED FAMILY

Judy Kay Edwards, 16-months-old daughter of Mr. and Mrs. Orrin Edwards of Algona, met death in a unusual accident recently. The little girl was strangled by curtains tied together at the bottom of a window. Apparently she was caught when she started to walk away from the window.

WEEKLY NEWS ANALYSIS

FDR, Churchill Seek Italy's Surrender As Allies Smash at Sicily Resistance; MacArthur Forces Gain in New Guinea; Farmers Get First Call on Gas Stocks

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)
Released by Western Newspaper Union.

Seabees are shown about to board a transport somewhere in Australia for duty in a combat zone. A naval band gives the men a lively sendoff. Although performing construction work, Seabees are also trained to protect themselves against attack.

SICILY:

'The Hour Has Come'

Axis resistance on Sicily stiffened as Gen. Bernard Montgomery's British 8th army moved on the big port of Catania, which is 55 miles from the terminus of Messina, where but two miles of water separate the island from the Italian mainland.

As the battle of Sicily raged, President Roosevelt and Prime Minister Churchill told the Italian people the hour had come to honorably capitulate.

While British troops clattered toward the great plains which roll around Catania, Gen. George S. Patton's 7th American army fought its way into the area of Vizzini, from which the British flank can be covered or an assault sprung toward the Axis rear.

Hundreds of Allied paratroopers continued to be dropped behind the enemy's lines near Catania. To the front, the 8th army recovered from a heavy Axis blow with which they had driven into Montgomery's base at Augusta before being repelled.

FUEL:

Gas for Farmers

Predicting a tightening of the supply of crude oil in the West, the Petroleum Administration for War took steps to provide sufficient gasoline for farmers throughout the country by giving them first call on available stocks.

According to WAP, farmers are using about 100,000 barrels of motor fuel daily, 90 per cent of which is being consumed outside of the East. About 70,000 barrels are required in the Midwest.

As the WAP made its announcement, the big-inch pipe line running from Norris, Ill., to the East was opened. Eventually the line will pump 300,000 barrels of crude daily, thus draining the West of supplies that had previously abounded because of a lack of transportation facilities.

Meanwhile, the oil industry continued alarmed by the drop in oil reserves, partly caused, spokesmen said, because of a virtual cessation of exploratory drilling as a result of prices for crude. Between 50 to 60 billion barrels of new oil will have to be discovered within the next 20 years, it is said, to maintain present production.

RUSSIA:

Giants Locked

Rain drenched the sprawling Ukrainian plains around Belgorod, hindering mechanized activity on the south end of the flaming Russian front, but Red armies attacked in force above the northern pivot of Orel, extending the battlefield to 225 miles.

Both the Germans and the Russians were agreed on one thing: the great number of men being used on both sides. Around Orel, the Nazis admitted that the Reds had broken their lines at two points, but had been driven back in counter-attacks.

Heavy ground action at Orel was supplemented by strong Russian aerial action. Red bombers blasted the principal railway installations of the town, from which the Russian lines bend southward in a great arc, thus offering the Germans a pivot for encirclement from the rear.

PACIFIC:

New Guinea Victory

With the fall of Mubo, the big Japanese base of Salamaua in New Guinea lay in peril of capture by Australian and American forces operating from all sides.

Mubo fell about two weeks after the start of General MacArthur's Pacific offensive. American troops had landed on Nassau bay to the east of the town, and then marched into the interior to cut off Japanese forces from the rear and effect a junction with the Australians. At the same time, Allied soldiers attacked the enemy's main lines, and thus, completely enveloped on all sides, Mubo was overrun.

The Allied success at Mubo came as American troops pressed closer to the Japanese air base of Munda on New Georgia island. Approaching the stronghold from the north and east, doughboys worked cautiously through jungle foliage to gain ground. Squeezed, the enemy launched one counterattack, but withdrew fire after being stopped.

CANNED GOODS:

Cut Civilians' Share

Already rationed, canned fruits, vegetables and soup supplies for civilians will be cut another 15 per cent in the next 12 months, the War Food administration announced. Of the prospective pack of vegetables and soups, domestic consumers will get 70 per cent, and of canned fruits and juices, they will receive 53 per cent.

The total supply of canned vegetables and soups in the next year is expected to total 262,000,000 cases. Of this amount, civilians will be allotted approximately 180,000,000. The War Services will obtain practically all of the remainder, with about 4 per cent going to the Allies and other purposes.

About 61,000,000 cases of canned fruits and juices, excluding citrus, will be produced, WFA estimated, and of this supply, civilians will be allowed approximately 31,000,000 cases. Approximately 24,000,000 cases will be allotted to the services, with the remainder marked for the Allies and export.

FOREIGN DEBTS:

Mexico, Canada Pay

An improvement in financial conditions arising from the stimulation of the war was noted in the action of the Mexican and Canadian governments in announcing plans for the discharge of their debt obligations.

For the first time in years, Mexico resumed payment on 15 issues of national debt, excluding all railroad bonds except the Tehuantepec National railway 5 and 4½ per cents. Annual distributions on the issues will amount to only \$2,050,000, however, on a total Mexican debt of 1 billion 200 million dollars, including back interest.

Last December, the Mexican congress ratified an agreement to pay 40 million dollars in settlement of all U. S. claims except for expropriated oil property.

Canada's improved financial condition was reflected in its redemption and prior payment on 106 million dollars of bonds.

CABINET:

FDR Restores Order

Hereafter, if any administrative heads in Washington are in conflict over fact or policy, they must resolve their differences quietly or else turn in their resignations. That, in short, was the ultimatum President Roosevelt laid down after Henry Wallace had charged Jesse Jones with interfering with the operations of the Board of Economic Warfare, which Wallace headed.

The President solved the Wallace-Jones fracas by abolishing the BEW and establishing the Office of Economic Warfare and then appointing as its director Leo T. Crowley, alien property custodian and chairman of the Federal Deposit Insurance corporation.

The action relieved both Wallace and Jones of direction in the government's purchase of foreign materials. Previously, the two agencies had shared in the program, with the Reconstruction Finance corporation, which Jones heads, supplying the funds for the buying.

OPA:

Raps 'Bright Boys'

Declaring the best thing that could happen to the Office of Price Administration would be a reduction of 50 per cent in its staff of 2,700 attorneys, Lou R. Maxon, deputy administrator of OPA, turned in his resignation.

Maxon's withdrawal came at a time when he was being prominently mentioned as a general manager for the OPA, a job later given to Chester Bowles, a New York advertising executive. He complained of the government's failure to establish a definite food program, charging that instead of working out a set policy, the administration was meeting each crisis with a makeshift compromise, thus creating the basis of another crisis. Price Administrator Brown replied that OPA had a definite policy in "roll-backs" to reduce retail costs to September, 1942, levels.

A Detroit, Mich., advertising executive, Maxon flailed OPA "theorists" and "professors" for attempting to institute a grade labeling program for goods, which would eliminate all trade marks and brands and have the effect of eliminating competitive merchandising.

CATTLE:

Marketing Increases

Marketing of cattle increased in the face of talk in Washington that the OPA was considering establishing ceilings on livestock to break the speculative angle of growers and spur liquidation of herds. Plans also called for modifying the government's support price of \$13.75 for hogs, to discourage feeding for heavy porkers.

Although cattle marketings increased over recent abnormally low levels, supplies still were well below last year's runs. Calves remained

Calves scarce in market.

exceptionally scarce. Continued heavy shipments of hogs and sheep, however, bolstered the over-all meat production.

OPA's plans for livestock ceilings have been bitterly contested by congressional farm spokesmen, meat packers and cattle raisers. Under the present system of setting wholesale ceilings, small packers have found difficulty operating since no bar has been set on prices paid for stock.

BANKING:

Deposits Rise

The extent to which banks are financing the war was illustrated in the announcement that the investment in government securities by 20 of the nation's largest banks approximated 18 billion dollars on June 30, an increase of 7 billion dollars from a year earlier.

The announcement also revealed that the 20 institutions had total deposits of 31 billion dollars on June 30, a rise of six billion dollars over 1942. Total resources amounted to 33 billion 700 million dollars.

GREAT BRITAIN:

Discuss Post-War

Growing American seapower and the administration of neutral colonies after the war were subjects of lengthy discussion in Great Britain.

Laborite Emanuel Shinwell said that the end of the war will find the U. S. with a merchant marine of 30 million tons against Britain's 9 million tons. He proposed the organization of an Anglo-American board to regulate shipping in the post-war world.

A Londoner in New York:

This is the voice of a friendly alien. I've been reporting this United Nations' war since September, 1939. But first thing I had to do when I sought permission to visit U. S. A. was fill out form for aliens. This peacetime form is all rules and a yard wide, full of highly personal, cryptic questions. It floored me. Only two questions I'm certain I answered correctly were could I read and was I masculine. They asked me also if I'd ever been insane. Even in the evil Nazi prewar days when I went often to Germany the formalities were never so tough, and I'd never been called an alien. It seemed a symbol of our life and times that you and we, so (as I believe) fundamentally alike in thought and aspiration, should build and maintain barriers to association and understanding.

Symbol of our times, too, I never saw Liberty as we steamed upriver. Liberty passed by as I was answering an FBI quiz. Very charming, very courteous those FBI men, but the going-over they gave me wasn't less thorough for being so friendly. Is it too much to hope that after the war the American and British peoples may share common citizenship in each other's countries? That would be a war aim. It might even prevent World War 3.

I was entirely unprepared for New York. Years spent in the jungles of Burma and on the vast deserts of Egypt, Libya and Tripolitania were poor training grounds for this exhilarating contact. A strange city—but the natives are friendly. Everything has been said of New York, but I was surprised at its smooth, velvety functioning, the politeness of the inhabitants; not surprised at its fascinating window displays, its high prices, its "nothing for nothing, and damn little for a dollar" attitude. London has nothing of New York's spirit or character. Paris had, a little; the same tempo, same fruity smell of gasoline, same gusts of warm air uprushing from the subways, chestnut trees. Nostalgia broke over me like a wave at sight of those chestnuts, recalling Paris Maytime in 1940.

Sydney has something of New York, in its waterfront, its irregular skyline, its hamburger heavens and gay, gaudy and swift taxicabs. New York's women and Sydney's have certain kinship, too. The skillful makeup, lithe figures, slim ankles and well-shod feet. (I am not disloyal to you, you gallant British women who fill our factories, clean our streets and man our guns.) On Fifth Avenue maidens in uniform are rarer than on London's Piccadilly. But those I saw rated a backward glance. Unlike British women's service uniforms, seemingly designed by repressed spinsters as revenge on their sex, US women's uniforms are chic, feminine, frequently fantastically. Perhaps occasionally un peu trop fantastique, devised more for front-row chorines than for front-line corps. There's something to be said for ugly uniforms: those who volunteer to wear them must be pure patriots.

A New York girl asked me: "I suppose you must resent our remoteness from actual war, and seeing buildings unscarred, coming as you do from Britain and the African front-line?" But of course not! Because my home is shattered and my people killed should I wish the same fate for others? No Britisher does. As they stroll on Fifth Avenue I guess they feel like me, that it's good to be able still to find unscarred loveliness and beauty in peacetime proportions.

Unaided I spotted Jack Benny, Una Merkel, Billy Rose, and some lesser aristocrats. Walter Winchell was there, too, doing his homework. I was quite prepared to dislike Winchell. (It's the human thing to resent success in others.) I did not expect to meet a starry-eyed youth, but Winchell was much less sophisticated than I'd imagined. Maybe it's true what they say that every New York columnist yearns to be a farmer's boy.

Lunch-taking the other day I pleaded for postwar common citizenship for British and US peoples. Someone cracked: "Ah-hah! The British want America back." But what with the jungle heat, the miners' strike, the Roosevelt versus Congress issue, the food wrangle and the race riots, America was no gift just then. And in Britain right now we've troubles enough of our own.

Talking to an intelligent New Yorker about the United Nations' air assault on Germany these days I referred to the air Battle of Britain. He had never heard of it. I told him it was the Battle of America under another name. Except that chops and steaks are elusive, New York doesn't show signs of war privations. But war isn't merely doing without things, war is heart-break, personal loneliness, for those left behind. For frontline soldiers it is short periods of intense fear, long periods of intense boredom.

IDEA FOR VARIETY ON THE AIR

Why not vary the radio routine by reading the commercials without music or rime and having the radio speakers and artists do their stuff in jingles? The present routine is getting pretty tiresome. We could have Gabriel Heatter, for instance, chant: Here's the news from everywhere—Five full pounds and all by air! Twice as much as Oursler, too—Old Gabe Heatter is the man for you!

And why couldn't Edwin C. Hill get rhythmic: Red hot news events, red hot news events

Given the Ed Hill way; Here's a newsy feast Good for man or beast—Lend me your ears, hey! hey!

Take the matter of a fireside chat: When you're feeling low and flat Ask me for a fireside chat; Figures, facts and plans to boot—Please accept no substitute!

Ask for Roosevelt on the air—Good for dry and falling hair; Helps the nerves run down by war—Get the label "F. D. R."

Now, my friends and neighbors, hark While I spread the vital spark; Never mind what killjoys say, Stick to me and you'll feel gay.

On the war front all goes well—Adolf is a hollow shell; Watch the Axis partners scam; Quick results from Uncle Sam!

Ask for Franklin's Tax Pill when You have acidosis, men! Have you rickets, hives or money? Let me rid you of them, honey!

And what a novelty it would be if "Information, Please" went in for the jingle craze!

Mr. Fadiman: Mrs. Gregory Atterbury Wayne; Asks who was the melancholy Dane? Let the drops of wisdom trickle For Mr. Heinz and every pickle.

F. P. A.: Away with Danes and let's have more

Of merry tunes from Pinafore! Oscar Levant:

Ten fast fingers, that's a lot; Mine have hit the big jackpot; From that query I will flee—Musical questions are the ones for me!

John Kieran: Hamlet—that's the Dane you seek; I like Sanskrit, I like Greek; On round claims the seagulls fatten; Ask me for a verse in Latin.

Shakespeare is the author's name; Baseball is a kind of game; Woodchucks chew your lima beans Wanna know who wrote "Blue Jeans"?

The idea is worth considering. Or isn't it?

"I was a fool at the beginning of the war. I could have got all the whisky I wanted, and now I have only a three-years' supply left."—The Maharaja of Jammu and Kashmir.

The Indian problem gets more and more complex, doesn't it?

That restaurant which used to overlook all Naples, of which you recently spoke, was Renzo e Lucia on San Martino. It's the place where you sampled those small scorpions which they called oysters that year. Let's hope it has survived the bombings.

Traver Briscoe.

Elmer Twitchell is delighted with that OPA decision to let "A" card holders have one short vacation fling if properly certified. He has a certified cottage on a certified lake with certified scenery, and will make the trip with his certified wife and kiddies.

"General Giraud's visit is strictly military."—News item. Wanna bet?

COMING EVENTS Farewell goosestep, High and strong! You'll be a deuce-step Before long.

"Six Point Meat Program Proposed."—headline. Nonsense; you can't get any meat for six points.

WARNING TO A CARD HOLDERS By automobile Or "alternative means," This summer's vacation's For kids in their teens.

THANKS, OPA! Behold the modern Phoebe Snow—Vacationing by gas she'll go; She feels so guiltless deep inside Because her trip is certified.

John D. Rockefeller drove a battered electric roadster over 30 years old and capable of going only about eight miles an hour to a celebration the other day. The rich get all the breaks.

Vice President Wallace now sings it "Deep In The HEAT" of Texas.

CATCHES THE GERM AS WELL AS THE FLY

6 double sheets 25¢

THE TANGLEFOOT CO. Grand Rapids, Mich.

HIGHLIGHTS . . . in the week's news

INFLUENZA: Navy physicians have developed a serum which they hope will prevent influenza. Tests on white mice have been 90 per cent successful.

GERM WARFARE: Spreading deadly disease germs by bombing or any other means is not a practical offensive weapon, according to the Journal of the American Medical Association.

BARGES: The first of 100 new tugboats, built to tow oil tankers along the Atlantic coast, is on its way south from Boston to pick up its first load.

WHEAT: Feeders and grain merchants are bidding vigorously for the final allotment of wheat to be released by the Commodity Credit corporation this year, amounting to 215 million bushels.

Current Social Security Board Report Visualizes Coverage of Added Millions

Benefits Outlined Farm Help, Domestic

The social security program is a nationwide undertaking which in eight years ago this month. In its seventh annual report the Social Security board points out that while great progress has been made toward security for the American people, there are serious gaps in the program as it stands.

Millions of people are covered by the insurance features of the social security act, other millions are not. More than half a million are regularly drawing monthly insurance benefits amounting in all about 11½ million dollars a month. These are benefits paid under the old-age and survivors insurance which covers wage and salary workers on business or in industrial jobs. The benefits go to workers and their families if the worker qualifies at age 65 or older and is no longer at work, or to family in case of the worker's death, whatever his age. There are, however, some 20 millions of workers who are now excluded from old-age and survivors insurance.

The same is true of unemployment insurance. Millions of people are covered by the state unemployment insurance laws, operated by the states but with administrative support paid by the federal government. During one year when jobs were hard to get nearly 5½ million people were out of work receiving benefits for weeks at a time. During the war boom when jobs were plentiful, fewer than 120,000 people are getting unemployment benefits in any one week. The number may go down even further when the war continues.

When the war is over, millions of former soldiers, sailors and war workers will be looking for jobs. They will be entitled to unemployment insurance while they are looking. There will also be many who need the insurance payments but will not be eligible as the laws stand.

Under the public assistance provisions of the social security act, the million needy people are receiving monthly cash payments of \$700,000,000. These payments go to persons who do not have enough to live on and cannot provide for themselves because they are blind, or because they are young to work and have lost a parent's support or care. There are two million old people and one million children on the lists. The number around 55,000. But other people who lack the essentials of life cannot be helped under the present public assistance programs because they are over 65, nor very young, nor

Gaps in Insurance.

Most serious, however, according to the social security board, are the gaps and shortcomings in the insurance features. The purpose of these programs is to furnish some income for families to live on when the breadwinner cannot earn wages or salary. But wages or salary may be lost for reasons other than unemployment, old age, or death. If a person cannot work because he is disabled, not only does his

When a worker loses his income through sickness or injury, he generally is unable to support his family for long, after he is unemployed. He must meet heavy medical costs, so his savings are exhausted. His wife and children then often suffer privations. The social security board recommends that the laws be amended to cover such cases.

Social Security Board Would Assist All People Who Have No Means of Support

The social security board recommends expansion of the present social security program to provide:

1. Social insurance protection for every body who depends on wages or salary (for the self-employed also, as far as possible). Regular insurance benefits would take the place, in part, of the pay the worker and his family lose.

2. When he loses his job and is temporarily unemployed.

3. When he is unable to work be-

Right now more old and physically handicapped people are employed than ever before. But everybody knows it's the war boom. When peace comes, these marginal workers will be dropped. Then, whether supported by relatives or private charities, many of these people will be hard pressed to live decently. The social security board proposes to extend the benefits of social insurance to millions who will fall into the over-age or crippled class in a few years.

pay check stop but he has the extra expense of his illness. The social security board thinks we should have insurance against disability and the costs of hospital care, along with our present unemployment insurance and old-age and survivors insurance.

About 20 million workers, including some of the lowest income groups in the country, are not covered by the old-age and survivors insurance provisions of the social security act. Most of these do not have the protection of any social insurance system. Farm workers, domestic servants, employees of non-profit educational, religious and charitable organizations constitute the largest groups of wage and salary workers left out in the cold. The self-employed, such as farmers and storekeepers, are also excluded.

More than 600,000 persons already are drawing monthly payments under old-age and survivors insurance. Thousands more have earned rights to benefits and will be able to claim them whenever they stop regular work. The benefits go to insured workers and their families when the worker is 65 or older and is no longer employed, and to the families of insured workers who die either before or after they are 65.

As the law stands today, the old-age and survivors insurance system covers wage and salary workers on business and industrial jobs—that is, all kinds of jobs in factories, shops, mines, mills, stores, offices, banks, hotels, restaurants, laundries, telephone and telegraph offices, and other places of business or industry carried on by private firms, corporations, or individuals. This leaves, however, a good many who are not covered, merely because of the nature of their employment. For example, the \$10,000 executive employed by a corporation comes under the federal insurance system; the man working for himself whose income may fall below \$1,000 a year is not insured, because the present law excludes the self-employed.

When a Worker Is Disabled.

Every time the clock ticks off a second, five people in this country get hurt or get sick, to such an extent that they are unable to carry on their ordinary activities for one day or longer. If the disability is slight, the worker may not lose much, but to a man dependent upon his earnings, every dollar counts. The loss is especially serious if the injury lays him up for life.

Yet the big majority of workers disabled off the job have no insurance protection—nothing to make up, even in part, for the pay they lose and the extra expense they have to meet. Congress has directed the Social Security board to make recommendations for such changes in the present regulations as will provide for insurance payments to ease the blow of these calamities.

Disability insurance is one of the missing girders in the social insurance structure we have been building in this country since 1935. Along in this country since 1935, the ready in place are two of the main supports—unemployment insurance, which pays weekly benefits to in-

cause sick or disabled, temporarily or permanently—(the insurance should cover also costs of hospital care for the worker and his family).

(c) When he is old and no longer at work.

(d) When he dies.

2. The cost of this insurance to be met through contributions from workers and their employers into one national insurance fund in the U. S. treasury.

sured workers who lose their jobs through no fault of their own and cannot get other jobs within a short time; and old-age and survivors insurance which pays monthly benefits to insured workers and their families when the worker is old and retires, or to his family when he dies, whatever his age. The social security board believes the next step is insurance against disability, temporary or permanent, with provision to cover also the costs of hospital care.

The need for such a program is pointed up by the fact that of more than 3 million disabled workers between 16 and 64 years of age, nearly one million have been disabled for more than a year. Around 7 million people are ill on any one day in the year—many of them for protracted periods of months and years; many with no prospect of recovery.

Six Cents on the Dollar.

No new governmental agency would be necessary to administer disability insurance, and no additional reports would be required of employers. The cost of the entire social insurance program, including disability protection, could probably be met through a total contribution rate of 5 or 6 cents on each dollar of pay roll from employers and 5 or 6 cents on each dollar of wages from employees. The total of 10 or 12 cents on the dollar (the rate would depend on the exact benefits provided) instead of 9 cents which will be the figure in 1949 under the present law would provide insurance protection against all the most important economic risks faced by all workers. American families would be assured of an income when wages of the breadwinner stop because of unemployment, old age, illness, disability, or death and would also have insurance protection against the costs of hospital care.

Twenty-eight nations now provide insurance protection to their workers against temporary disability. With only one exception (Spain), the United States is the only country which provides insurance against old age without also providing against the risks of chronic or permanent disability.

"When can we best afford the additional cost of an expanded social insurance system?" asks Arthur J. Altmeyer, chairman of the social security board. "Now, when earnings are high and all the wheels of industry are turning, workers and employers can set aside the contributions needed to ensure future rights to benefits," he replies. "There is no way in which increased earnings could be better invested, from the standpoint of either the family or the nation. For the family which actually meets with disaster—sickness, unemployment, chronic disability, or death—insurance benefits give a far greater protection than could have been obtained if the worker's insurance contributions had been kept as his individual savings. In any period of recession, the money now saved would be paid at a time when it is most needed and to those who most need it."

3. Assistance to all needy people who have no means of support.

"This is one case," said President Roosevelt, "in which social and fiscal objectives, war and post-war aims are in full accord. Expanded social security, together with other fiscal measures, would set up a bulwark of economic security for the people now and after the war and at the same time would provide anti-inflationary sources for financing the war."

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

By HAROLD L. LUNDQUIST, D. D.
Of The Moody Bible Institute of Chicago.
(Released by Western Newspaper Union.)

Lesson for August 8

GOD SHOWS HIS PEOPLE THE WAY

LESSON TEXT—Exodus 13:17-22; 15:17-22a
GOLDEN TEXT—The Lord is my strength and song, and he is become my salvation.—Exodus 15:2.

The destinies of the nations are in the hands of God. Warriors are mighty in battle, counselors are quick to declare their wisdom, and diplomats are clever in the manipulation of wealth and people. But when they have all exercised to the limit their ingenuity and power they have only succeeded in bringing us "blood, sweat and tears" as the portion of all mankind.

Israel was about to be delivered from the bondage of Egypt, and God through His leader Moses was ready to be their guide. Even so He guides every believer in Christ. We may learn three things from this lesson.

I. God Has a Plan (Exod. 13:17-19).

There was a direct, easy road along the coast of the Mediterranean up to Canaan, but God with His pillar of cloud and fire did not lead out in that way.

How strange that He should take them by a longer, more difficult way! Not at all. He knew the danger of the easy way. It was there that the warlike Philistines would be lying in ambush. Such immediate conflict would discourage Israel and tempt them to return to the fleshpots of Egypt. So He took them the other way.

Note that God's guidance for them was one of intelligent planning, not just impulse or chance. He knew what to do, and He did it, for their good.

God has a plan, not only for the nations, but also for individuals, for your life and mine. Let us find His will for us, for it is good, acceptable and perfect (Rom. 12:1, 2).

Note the honoring of the faith of Joseph in God's promise (v. 19). The memory of his assurance was a blessing to his descendants, and they honored it and him. What will our descendants have to say about our faith in God?

II. God Provides Guidance (Exod. 13:20-22).

God's plan is made known to His people as they follow Him step by step. This means that there must be guidance, moment by moment, if His plan is to be worked out. He gives such guidance and it is only when His children fail to follow it that the pattern of life becomes confused.

The field of divine guidance is one in which Christians have widely divergent experiences. Some know the sweet, unconfused daily experience of God's hand upon them, caring for even the minor details (or are they minor?) of life. Others have known the directive power of God in some life crisis, but not in the ordinary affairs of life. Many, and perhaps most, think of divine guidance as a spiritual theory of which the preacher talks, but know nothing of it in their own lives.

What makes this great difference? Faith—or the lack of it. Those who trust God accept and receive His blessed leadership moment by moment. It is as simple as that. Others reach out and take it when the pressure of life makes them cast themselves on God. Others simply muddle along "doing their best," which is not their best, for God is not in it.

The pillar of cloud, which became luminous at night, was ideal for the guidance of Israel. It provided shade by day from the hot sun, and a sure guide in the darkness of the night.

III. God Gives Joyous Victory (Exod. 15:17-22a).

Israel soon came against the insurmountable barrier (humanly speaking) of the Red sea. Then Pharaoh, regretting that he had released them, came up after them—an impossible situation, and the people began to berate Moses. This time he stood still in his faith and said: "Stand still and see the salvation of Jehovah"—and it came!

Then followed the song of victorious joy, which Moses wrote and the people sang. Deliverance brings joy, and forget it not, God is able to deliver those who put their trust in Him.

The application to our spiritual lives is a blessed one. Setting out on God's way does not mean that one will not have trials. They come, and quickly. We do not get farther than our Red sea when the world sees an opportunity to draw us back and comes charging at us from the rear, like Pharaoh. What to do? Trust God, and He will drown the Pharaoh who pursues you in the very Red sea which is now your difficulty. He will bring you through dryshod if you count on Him.

Fearful, fretting, fussing Christian, why not "stand still" and let God work out your salvation. You cannot bear the burdens of all the world. He can, and will set you free so that you too may go forward for Him.

PATTERNS SEWING CIRCLE

Colorful Set

THE prettiest little girl for miles around will be the one who wears this ensemble—darling bolero, jumper and panties.

Barbara Bell Pattern No. 1781-B designed for sizes 2, 3, 4, 5 and 6 years. Size 3 Jacket with trimming for dress and pantie takes 1½ yards 35-inch material, dress and panties 2½ yards.

HOUSEHOLD HINTS

String beans will be more tender if you cut them twice lengthwise before putting them on to cook.

Most amateur gardeners water their gardens too often and not deeply enough. A good soaking when the ground has become practically dry is the rule for best results.

A leaky water bucket can be stopped-up by putting melted paraffin inside.

Watering a garden in the evening means less evaporation and more moisture left in the ground.

Additional flavor is given baked beans by adding salt pork which has first been ground fine and fried a delicate brown.

If you keep any poisons in the medicine cabinet, push two pins crosswise through the cork. Even in the dark they'll warn a person to "beware."

Place a ball of twine in a twine sack, cut a small hole just above the ball, thread the string through the hole, then hang the sack on the wall and the twine will be handy when needed.

Less sugar will be needed if a pinch of salt is added to sour fruits during the cooking period.

To protect the ends of hemp rope and to prevent them from fraying, wrap well with light but strong twine and then dip the bound ends in shellac.

Hooks, eyes, and snaps are most satisfactory when sewed on with the buttonhole stitch.

Teen Ager's Pet

THERE'S such flattery in the princess frock that it goes on and on as a favorite fashion of teen agers. Today's princess pattern presents a new wrinkle, too—lacing—emphasizing the smooth figure following seams at the waistline! Try this model at once if you are looking for a sweet pretty frock.

Barbara Bell Pattern No. 1732-B is designed for sizes 11, 13, 15, 17, 19. Corresponding bust measurements 29, 31, 33, 35, 37. Size 13 (31) dress, short sleeves, requires 3¼ yards 39-inch material.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

Send your order to:

CADET DORANCE GRANGE BEGINS BASIC FLYING

Aviation Cadet Dorance Grange has been transferred from the primary flying field at Vernon, Texas to Greenville, Texas, where he will begin basic training and fly the larger and speedier training planes in the Army Air Forces.

His new address follows:

A-C Dorance S. Grange, 43-K, Barracks T-143, Av. Cad. Det., Majors Army Air Field, Greenville, Texas.

KLEMME YOUTH HONORABLY DISCHARGED FROM ARMY

Pfc Luther Schmidt, son of Mr. and Mrs. Albert Schmidt, has arrived home from Camp Fannin, Texas, having received an honorable discharge from the U. S. Army because of a physical disability.

Luther served slightly over one year with the army.

RATIONING CALENDAR

TIRES—Class A ration. Second inspection deadline Sept. 30. Class B ration. Third inspection deadline Oct. 31. Class C ration or bulk coupons. Third inspection deadline Aug. 31. Commercial vehicles. Every 60 days or every 5,000 miles, whichever occurs sooner.

Tire situation critical. Conserve present tires on wheels.

GASOLINE—A Book (new) coupon 7 (4 gals. each) valid through Sept. 21. (Steel Plate License number and the state must be endorsed on face of each coupon immediately on receipt of book.)

FUEL OIL—Period 5 coupons '42-'43 season (11 gals. each) expire Sept. 30. Period 1 coupon for '43-'44 season valid till Jan. 4, 1944.

COFFEE—Effective July 29 all restrictions on coffee removed.

SUGAR—Coupon No. 13 (5 lbs.) valid through August 15. Coupon No. 14 (5 lbs.) valid August through Nov. 1.

Coupons No. 15 and 16 (5 lbs. each) valid through Oct. 31 for home canning. No extra sugar allowed in Hancock County.

PROCESSED FOODS—Blue coupons N P and Q valid July 1 through Aug. 7. Blue coupons R and S valid Aug. 1 through Sept. 20. (Note longer overlap period.)

MEATS, Fats, Cheese, Canned Fish—T red stamp valid through Aug. 31. U red stamp valid through Aug. 31. V red stamp valid Aug. 8 through August 31. W red stamp valid Aug. 15 through August 31.

SHOES—Stamp No. 18 in Book One valid June 18 through Oct. 31. (Stamps may be exchanged among members of a family.)

Mr and Mrs. Wm. Ax and son, Irvin, Mr and Mrs. Arthur Schoenwetter, Mrs. Fred Schlichting; Mr and Mrs. Lester DeMerritt and family, and Mr. and Mrs. Lloyd Ax of Mason City, drove to Fenton Sunday and spent the day visiting with the Elmer Weisbrod family.

Mr and Mrs. Arnold Hovland of New London, Connecticut, arrived Friday for a visit at the parental Herman Theiman home and with other relatives here and at Mason City. Before her marriage Mrs. Hovland was Miss Mildred Theiman. Mr Hovland is in service with the U. S. Navy.

Mrs. Lyle Wilcox returned home Thursday from Alexander, Louisiana where she had been with her husband, Lt. Wilcox who left the camp for over-seas duty. Mrs. Wilcox visited with friends in Indiana and with relatives at Chicago on her way home. From Chicago she was accompanied to Klemme by Mrs. Mary Waterman, who will spend some time visiting here with relatives and friends.

KLEMME REFORMED

CHURCH

Calvin Grosshuesch, Pastor

Sunday:

No services at Klemme Sunday. The congregation will be guests of the Ell Town Church who will observe their Mission Fest Sunday. Services at Ell Town in morning, afternoon and evening.

TAG DAY

AUXILIARY LADIES WILL
HAVE MOLLY PITCHER
TAG DAY

The Klemme Auxiliary ladies will have their Molly Pitcher Tag Day on Saturday, August 7th.

The ladies will sell War Stamps on the streets and in the stores during the day and evening.

Buy War Stamps and wear a tag this Saturday and help build the new aircraft carrier Shangri-la.

Local Happenings

Klemme and Vicinity

Drs. COLBY & HAYDEN, DENTISTS, FOREST CITY, IOWA. OFFICE PHONE 374, RES. 189.

Mrs. Will Ax visited with Mrs. Herman Stille Saturday afternoon.

Miss Novella Bredbenner left on Tuesday for a visit with friends at Cedar Falls.

Mrs. Otto Schlawin was ill the fore part of the week and under the doctor's care.

H. D. Ramsay and family are enjoying a visit from Mr. Ramsey's father from Marble Rock this week.

Mr. and Mrs. John Day were visiting in Mason City Saturday afternoon and evening.

Mr. and Mrs. Levi Klotzbach visited at the Lesley Smock home in Kanawha Sunday afternoon.

Mrs. Antonio Keraus left Friday for Iowa Falls where she will visit with relatives.

Miss Arlene Schmidt, daughter of Mr. and Mrs. Fred Schmidt, began work at the Quandt Cafe Monday.

Mrs. Verle Keraus and son, Mickey of Garner, visited at the parental E. C. Buntenbach home Saturday afternoon.

Mr. and Mrs. Walter Braner of Belmont spent the week end visiting at the parental Levi Klotzbach home.

Dr. and Mrs. W. F. Missman attended a picnic and family gathering held at Woden Tuesday evening.

Mr. and Mrs. Henry Glave, former residents of Klemme, but now of Britt, visited with relatives and friends here Saturday evening.

Dr. D. P. Anderson has been ill and confined to his bed for the past week. He is reported to be improved at this writing.

Bobby, son of Mr. and Mrs. Fred J. Arnold, had his tonsils removed at a Mason City hospital Tuesday morning.

Merlin Neuberger is recovering from a tonsil operation which he had performed at the Hampton hospital Saturday.

Mr and Mrs. Harvey Hubbard and Mr and Mrs. Clarence Lemke enjoyed a picnic supper together at Clear Lake Sunday evening.

Mrs. Eddy Epps returned to Des Moines Sunday after visiting for a few days here with her children, and her parents Mr. Mrs. Herman Paul.

Mrs. Emil Beier, Miss Lois Riemer and Mrs. Aug. Neuhring were at Clear Lake last Thursday visiting with Mrs. Augusta Riemer, mother of Mrs. Beier.

Mr. and Mrs. J. A. Chambers entertained the Ben Coobs family at a chicken dinner Friday evening in honor of Melvin Coobs who is leaving for the army.

Mr. and Mrs. Art Thompson and daughter, Dorothy of Britt, were visiting at the Dr. D. P. Anderson home Monday. Miss Thompson will teach in the Britt schools this year.

Miss Jeanne Perkins came from Estherville Tuesday and will remain in Klemme with her parents, Mr. and Mrs. Louis Perkins until school begins.

Levi Ridder and family and Mrs. F. H. Ridder drove to Eldora Sunday and took in the band concert and marching demonstration of the Training School band.

Bobby Risser of Des Moines enjoyed visiting in Klemme nearly all of last week with his grandparents, Mr. and Mrs. P. M. Wilson.

T-Sgt. Asa Gibbs from an army camp in the Northwest is home enjoying a furlough visiting with his parents, Mr. and Mrs. H. R. Gibbs and family.

"Abe" Lauritsen, county superintendent of schools in Kossuth county, visited with his parents, Mr. and Mrs. Einar Salling Monday evening. Mr. Lauritsen had been at Clear Lake to attend a convention of county superintendents.

Dr and Mrs. W. F. Missman returned Friday evening from Land O' Lakes, Wisconsin, where they spent two weeks at their cabin on a lake and enjoyed a vacation.

Mr. and Mrs. R. A. Jorgenson accompanied Mr. and Mrs. Lyle Liebendorfer of Forest City to Hampton, Sunday, where they enjoyed dinner at the Joe Liebendorfer home.

The gang at the Northern Lumber Company had their annual chicken dinner at the yard last week Tuesday evening. When the boys at the Northern have chicken, we mean lots of chicken!

The Ben Coobs family of Klemme and Mr and Mrs. Paul Grange of Mason City enjoyed a picnic supper together at East Park at Mason City last Wednesday evening.

John N. Day and Sumner Trumbell attended the funeral services for Mr. Ernie Wilkins at Goodell Wednesday afternoon. Mr. Wilkins was a brother of Lulu Wilkins, the postmistress at Goodell.

Louis Perkins will enter some of his gladioli at the Waterloo flower show Saturday and Sunday. Mrs. Perkins and daughter, Jeanne will visit with her brother and family while in the city.

Miss Oda Hansen was a Sunday dinner guest at the Ita Overholt home. Mr. Overholt had brought blue berries home from Northern Wisconsin and Mrs. Overholt made a delicious pie for dessert.

Rev and Mrs. H. E. Harvey and daughter, La Nelle and Elaine Neuberger returned Monday afternoon from Lake Okoboji, where they attended the Methodist Bible Institute the past week and enjoyed a vacation.

Aviation Cadet Harold Wicks and wife, the former Miss Lorraine Buntenbach, have moved from Bakersfield, Cal to Williams Field, Arizona where Cadet Wicks will resume his army training on the P-38 fighter plane.

Mr and Mrs. George Carmen and the latter's mother, Mrs. Fred Wessendorf of Buffalo Center visited Saturday evening and Sunday at the Donald Neuberger home. Mr. Carmen is editor of the Buffalo Center paper. Mrs. Carmen is a sister of Mrs. Donald Neuberger.

Ira Overholt and Jay Griggs returned Friday night from the Lake Superior region where they spent a day fishing for lake trout near the Apostle Islands out from Bayfield, Wisconsin. The men had just fair luck, but brought home a few nice "lakers." They enjoyed the experience of deep lake fishing and would like to try it again in a more favorable season of the year.

IN MEMORY OF LEO BRINKMAN

OUR BROTHER

A rose most beautiful had grown
Far in the wilderness alone.
There blooming, quite too frail to last
Unhindered from the sweeping blast.

The gardener came, with skillful toil
He bore it to a friendly soil,
Where nurtured by his gentle care
Its blossomed fragrance filled the air.

Just so our dear brother grew,
Where sickness chilled as the dew,
And sin and sorrow, dark as night
Combined the tender plant to blight.

Jesus removed the lovely flower
Safe to his own immortal bower
To bloom in paradise more fair,
And shed a richer fragrance there.

Garland Brinkman

THE ROSE BEYOND THE WALL

Near shady wall a rose once grew
Budded and blossomed in God's free
light.
Watered and fed by morning dew,
Shedding its sweetness day and night.

As it grew and blossomed fair and tall,
Slowly rising to loftier height,
It came to a crevice in the wall
Through which there shone a beam
of light.

Onward it crept with added strength
With never a thought of fear or
pride.
It followed the light through the
crevice's length.

And unfolded itself on the other side
The light the dew the broadening
view.
Were found the same as they were
before.

And it lost itself in beauties new,
Breathing its fragrance more
and more.

Shall claim of death cause us to grieve
And make our courage faint and fall?
Nay! Let us faith and hope receive,
The rose still grows beyond the wall.

Scattering fragrance far and wide,
Just as it did in days of yore,
Just as it did on the other side,
Just as it will forevermore.

Alvin Keeper

When you have company or take
a trip, that's news. Phone 12.

Sunday dinner guests at the J. Arnold home were Mr and Mrs. Albert Koerner, Martha Bredbenner and Novella, Mr and Mrs. Lloyd Lau and Cozette, Leona Lau, Marjorie Lau and Eloise Etchem. The occasion was Cozette's 2nd birthday, and Mrs. Arnold had baked a cake decorated with two candles. Ice cream and cake were served in the afternoon. Bruce Arnold showed colored pictures on the screen taken by himself and Kermit Koerner. Afternoon visitors were Mr and Mrs. Wesley Lau.

A SAFE FOOD for those dangerous first six weeks is New, Improved Security Calf Food. It costs about 15¢ as much as whole milk and good prices.

There's profit in veal calves with Security Calf Food. Nutritious for reaching 100 lbs. in 12 weeks. You will see gains right from the start. Cost per calf average \$1.25 (plus a small amount of whole milk) for six weeks. **SAVE MOST OF YOUR MILK AND SAVE MOST OF YOUR CALVES. TOO.** by feeding the Security way. Come in and get a pair New FREE folders for the asking.

Dehydrate Vegetables and Fruits The Shellane Way!

• SHELLANE'S NEW BOOK ON "PRESERVATION OF FOOD" TELLS YOU HOW!

To help SHELLANE Gas users to conserve their garden produce and fruits, Shell asked the editors of the "Better Homes & Gardens" magazine to prepare a helpful, compact and easy-to-understand book, illustrated and describing the latest approved methods of food preservation.

Every SHELLANE user received a FREE copy of this book. If you failed to receive your copy, call at our store.

Not only does this book tell and show you how to do all sorts and ways of canning . . . but it also goes into detail on DEHYDRATING in several ways and shows how you can use your Shellane Gas Range to dehydrate easily and quickly. We will be glad to have you call at our store for details on making your own DEHYDRATER at a cost of only 18 cents!

Mr. Fred Greiman Died Monday Rochester Hospital

Funeral services will be held Thursday at the Peace Church north of Klemme.

Grosshuesch Will Deliver The Funeral Address

Funeral services will be conducted Thursday afternoon at the Peace Church north of Klemme for Mrs. Fred Greiman, who died Monday morning at 4:30 o'clock, August 10, 1943 at a Rochester, Minnesota hospital.

Mrs. Greiman had been ill since winter. About six weeks ago she entered a hospital at Mason City and two weeks later she was transferred to Rochester, Minnesota. She had attained the age of 57 years, 9 months and 20 days.

Calvin Grosshuesch, pastor of the Klemme Reformed Church, will deliver the address. The following obituary was prepared by Grosshuesch and will be read at the services.

CAROLINE M. GREIMAN

Caroline Minnie Greiman, nee Schmitt, was born in Belmont, Iowa, December 19th, 1885. She received the sacrament of Baptism in the Reformed Church at Belmont. During her childhood days her family moved to a farm near Klemme. Here she attended the public and religious schools. She was confirmed in the Peace Reformed Church north of Klemme by the Rev. John Gatterman. Her baptismal name was Deut. 31.

"Be strong and of good courage, fear not, nor be afraid, for the Lord thy God, He is that shall go with thee, he will not leave thee nor forsake thee."

On January 14th, 1915, she was married to Fred Greiman. They were married in the Reformed Church. Mr. and Mrs. Greiman located on a farm two miles south of Garner, where they are still residing. Three sons were born to this union, all of them living their mother.

Mrs. Greiman was a very active member of the Farm Bureau. At the time of her death she was the chairman of the Township Farm Bureau, which office she held for many years. She also served as a member of the 4-H Club and as a member of the County Women's Committee for several years.

She was a faithful and loyal member of her church. She served as president of the Women's Missionary Society, and as a Sunday school teacher. Her chief delight, however, was her own home, where she spent many happy years with her husband and her three sons. Her own Christian example and concern for the religious training of her children will ever be remembered by them as a sacred memory.

In 1940 Mr. and Mrs. Greiman celebrated their Silver Wedding Anniversary.

Surviving her and mourning her are her husband, Mr. Fred Greiman, her sons, Kenneth, Burton and Wayne, one grandson, Daniel Greiman, two brothers, C. J. Greiman and Carl Wille, Klemme, two sisters, Mrs. Gretchen Schlawn and Mrs. Naska Bock, Klemme, her mother, Mrs. Henry Wille of Klemme and one half-sister, Mrs. Edna Leitzinger of Hayfield.

GARNER YOUTH HEARD ON RADIO PROGRAM MONDAY

Those who listened to the Vox radio program Monday night heard Bob Denny, son of Mr. and Mrs. Jim Denny of Garner, who was prominent in athletics at the Garner high school, and some of his experiences in the Sea Bees while on Gaudacanal. He is now stationed in California.

Our Men In The Service

HAROLD WICKS IN ADVANCED ARMY FLIGHT TRAINING

Aviation Cadet Harold A. Wicks, class of 43-1, has completed his basic flight training in July 1943 at the Army Air Forces Basic Flying School in the West Coast Training Center, Gardner Field, California. He has been sent to an advanced flying school to finish his pilot training at Chandler, Arizona.

Upon the successful conclusion of this course, he will receive a commission as a Flight Officer or a Second Lieutenant in the Army of the United States.

His parents are Mr. and Mrs. Albert Kohl of Klemme, Iowa.

Wicks was accepted as aviation cadet at Omaha, Neb., May 1942. He attended Klemme High school from which he graduated. He was prominent in athletics in K. H. S.

Cadet Wicks is now located at Williams Field near Chandler, Arizona. His new address is as follows:

A-C Harold Wicks
43-1 Sqdn 12 Box 318,
Williams Field
Chandler, Arizona

LT. PAUL H. SCHULDT AT BOSTON, MASS.

The Times is in receipt of a letter from Paul son of Herman Schuldt, stating that he is now located at the Marine base at Boston, Mass. Paul's address is as follows:

Lt. P. H. Schuldt, U.S.M.C.R.,
104 Beacon Street,
Boston, Mass.

GRAVELING ROADS TO BE COMPLETED IN COUNTY

Engineer Wm. Henschen reports that the summer graveling project of roads in the county will be completed by the middle of the week.

Approximately 35,000 yards of gravel have been spread on the county road. Twenty-two miles of new gravel roads were surfaced, and 31 miles of old roads were resurfaced.

What You Buy With WAR BONDS

Battle of the Atlantic

A sinking smokestack, a great air bubble, an empty lifeboat, all that is visible of a torpedoed tanker, all that is evident of the hard work, the savings we put into War Bonds to build this tanker, to load it with 50,000 gallons of high octane gas.

Our money is still safe but the tanker is lost forever. Another and another must be built to take its place. The men who sail the seas are giving their lives to win the Battle of the Atlantic. We are asked only to lend our money.

More Pointers On The Food Situation

By Hazel Games, County Extension Home Economist

1. You Blue Stamps will buy approximately 30 to 35 quarts of fruits and vegetables during the entire year. If it is estimated that each adult should have 125 quarts of canned fruits and vegetables when garden produce is not available.

2. In most of Iowa Blue Stamps should not even be necessary. We must not forget those boys who open their K-rations with a bayonet.

3. Do you have soy beans in your garden? Leaflet, in regard to cooking and canning vegetable soy beans may be obtained from the Extension Service at the Farm Bureau office.

4. Will your school serve hot lunches to the children? Perhaps beans and tomatoes could be canned for that purpose.

5. In canning tomatoes it is better to preheat them or pack them cold into the jars before processing.

Answer:
Research in recent years indicates that the amount of vitamin C in tomatoes is about the same whether you pack them hot or cold. Canned either way, tomatoes are a good source of this vitamin. But heating tomatoes and packing hot into not sterilized jars before canning has other advantages. It shrinks the food so you get more into the jars and shortens the time needed to process them. So the hot pack is in general the better pack.

6. Cooking vegetables quickly for a meal in as little water as possible until just tender saves time, vitamins, flavor and color.

7. To save the minerals use all the water in which they are cooked.

GARNER BARBER DIED SUDDENLY SATURDAY

W. C. Ziesmer Was Once A Baseball Team Manager

W. C. Ziesmer, 56, of Garner, died at a Mason City hospital Saturday afternoon following a brief illness. He was born in Detroit, Mich., the son of Mr. and Mrs. August Ziesmer, on Jan. 28, 1887. He came to the Garner vicinity as a young man and followed the barber trade.

Funeral arrangements are pending the arrival of a son, Leland, who is serving in the army at Vancouver, Wash.

He leaves his wife and seven children, Mrs. David Rysrum and Mrs. Clarence Gatchel of Seattle, Wash., Mrs. Ronald Yohn of Garner, Jean and Doris of Garner, Leland, who is serving with the armed forces at Vancouver, Wash., and Marvin, who is stationed at Great Lakes Naval Training Station.

Ziesmer was a lover of sports and for many years played baseball and later managed baseball teams.

AUXILIARY LADIES SELL \$725 IN STAMPS AND BONDS

The Klemme Auxiliary ladies report that they sold a total of \$725 worth of War Bonds and Stamps in observance of Molly Pitcher Day held here Saturday.

The ladies sold \$105.25 worth of War Stamps; three \$25 War Bonds and one each of \$50, \$100 and \$500.

CORN DE-TASSELERS EAT \$500 CAKE AT PICNIC SUPPER

The large group of folks in and around Klemme who worked at corn detasseling this summer enjoyed a picnic at the Clear Lake State Park Sunday evening.

Along with a lot of good food they consumed a \$500 cake! The cake was a double decked angel food, decorated in red, white and blue and baked by Mr. and Mrs. Otto Lehman of the Garner Bakery! The cake was donated to the detasseling gang by Ed Buntentbach, of Klemme, who bid it in at the Molly Pitcher auction at Garner Saturday for a \$500 war bond!

The detassellers said the cake was sure good and worth the money.

Organize Hancock County For Coming War Relief Drive

CAMPAIGN COMMITTEE WAS NAMED AT MEETING HELD LAST THURSDAY NIGHT

All War Relief Drives To Be Under One Organization In The Future

An executive committee of the Hancock County War Chest has been named by Dr. C. V. Hamilton, War Chest chairman in this county. The committee will direct the county campaign in October for the National War Fund in which the Hancock County War Chest is a unit and will serve for the duration of the war. The committee is representative of a cross-section of the business, agricultural and civic institutions of the county.

Members of the executive committee are as follows: C. A. Ashman, Britt, Alvin Hanson, Kanawha, Swan Rapp, Britt, Chas. S. Whitney, Walter E. Edelen, Dale M. Bardo, Garner, V. D. Koons, Britt, H. L. Ollenburg, Garner, Oscar Johnson, Kanawha, C. Waterman, Klemme, J. M. Townsend, Britt, Otto Vaughn, Kanawha, George Goodell, Lester Stille, William Ingram, Rev. W. T. Wolfram, Garner, Charles Muir, Corwith, Niels Peterson, Alfred Josten, Frank Schoun, Garner, A. C. Taylor, Hayfield, Ernest Asleson, Woden, Rush Gabrielson, Crystal Lake, Ed Thompson, Klemme, W. S. Pritchard, Si. Fred C. Missal, Garner, Carl Frick, Britt.

Mr. Koons is vice-chairman of the Hancock County War Chest and Mr. Ollenburg is treasurer. Dr. Hamilton appointed the following committees: publicity, Mr. Bardo, chairman, and Mr. Vaughn, budget. Mr. Ollenburg, chairman, Mr. Waterman, Mr. Gabrielson, Mr. Koons.

Twenty-four members of the executive committee met last Thursday night at the opera house in Garner to begin active planning of the fall drive which will raise \$15,000, Hancock county's quota of the \$125,000,000 National War Fund. Mr. Missal served as secretary for them at the meeting. E. L. C. White, of Spencer, field representative for the Iowa War Chest, was present and explained the War Chest program and organization. The campaign will be conducted

through Iowa War Chest, which has been set up to coordinate all war relief fund-raising activities in Iowa through locally constituted war chests. The War Chest includes all war relief agencies, except the Red Cross and thereby unites campaigns for funds into just one group, War Chest and Red Cross.

Initial job of the executive committee is to secure town and city chairmen throughout the county. These latter chairmen will select school districts, select black workers who will be organized into an effective school unit to conduct a similar public subscription drive.

The campaign will be held such drive to be held during October 1944 for the 17 agencies of the U. S. O., which include the National War Fund, Boy Scouts, the war morale and the following agencies included and the amount it will receive out of the \$125 subscribed in the fall drive:

U. S. O. \$61.22, War Rel. Aid \$41.2, United Christian Society \$9.87, Russian War Relief \$10.15, United Seamen's Society \$4.12, British War Relief Society \$5.70, Dutch War Relief \$2.00, French Relief Fund \$12.00, War Relief \$3.75, B. I. W. Relief Society \$3.00, Greek War Relief association \$5.12, New Czech Relief \$2.00, United Czech-Slovak Relief Fund \$2.00, Yugoslav Relief Fund \$2.00, Refugee Relief Fund \$2.00, Committee for Children \$1.00, Children \$1.00, Luxembourg \$1.00, fund \$12.80.

A picnic dinner was held at the State Park at Clear Lake Sunday in honor of the late Wm. Ziesmer. Those present were Mr. and Mrs. Herbert Webner and Doris of Madison, Wisconsin, Mr. and Mrs. N. C. Nelson of Wesley, and Mrs. Lloyd Brockman of Algona, Mr. and Mrs. Dan Webber of Eldon, Mr. and Mrs. Kenneth Schlawn and Bobby of Garner, Mr. and Mrs. Willard Palmer and Dorothy of Clear Lake, Mr. and Mrs. Mike Kinsella, Patey and Junior of Ventura, Mr. and Mrs. Donald Webner and Earl of Britt, Mr. Ted Webner of Garner and Miss Hilda Peterson of Lake Mills.

IOWA DUCK SEASON SET EARLIER FOR 1943

Family Of Mallards Awaiting Cool Nights To Begin Southward Migration This Fall

At the request of the State Conservation Commission the Federal Government has set the opening of the 1943 duck season for this state September 25, instead of October 15 as during the past several years. Many Iowans have advocated the earlier season so that hunters may limber up on the local blue-winged teal, the most common nesting duck in Iowa, and one of the earliest migrants. In the past many of the sporty blue-wings have left the state prior to the open season.

The 70-day season in Iowa opens September 25 and closes December 3. The new rules differ only slightly from those in force last year except that duck hunters may shoot migratory waterfowl from one-half hour before sunrise to sunset, which is one-half hour earlier, and are allowed possession of ducks and geese lawfully taken for 45 days after the close of the season, instead of 30 days as in the past.

DOAN'S PILLS

HOUSEHOLD MEMOS... by Lynn Chambers

Follow Rules to Make Canning Easy (See Directions Below)

Fruit Canning

time now to begin putting up for next winter and fall to stretch those ration points and be sure your family is going to get the two fruits a day required by nutritional yardstick.

wise and watch the fruit trees for vines or markets—wherever you get your fruit—to see that you get it for your canning at just the ripe stage. Fruits should be firm-fleshed, ripe but not over-ripe and in prime condition.

Remember canning does not give any product; it merely preserves it for later use, so it follows that you get out of the can what you put into it.

Methods for processing fruit for canning in order of their desirability are hot-water bath, pressure canner, steam cooker, open-kettle. Though many homemakers prefer open kettle for the fruits, the danger of spoilage is so high and vitamin loss so great that it is desired than processing in the

Hot Water Bath. In a hot water or boiling water as it is sometimes called, utilize a large deep vessel. Fit it with a rack of some kind that will hold jars ½ inch from the bottom of the canner. Be sure the vessel is large enough so that when the jar is lowered in the boiling water, the water comes to within 1 to 2 inches of the top of the jar.

Place jars on the rack, allowing circulation of air between the jars. The water should be kept boiling during the entire processing period. If it boils down, particularly during some of the lengthy processing times, add sufficient boiling water to keep it at the proper level.

Oven Canning. Many homemakers like to use the oven for canning fruits and tomatoes. This can be successful if the oven you are using is thermally controlled and will keep required temperature of 250 degrees.

Jars should be set on a rack, at least 2 inches apart—starting from a cold oven. Jars should be allowed to warm on the sides of the oven. If a second batch of jars is being put in after the first batch, oven does not need to be cooled.

After the jars are placed on the rack, turn on the switch or light oven. Start counting processing time as soon as the oven is

Lynn Says:

Canning Pointers: Most fruits can be canned by the cold pack method, but apples, pears, pineapples and quinces are pre-cooked in their syrups to give them that jelly, transparent look. Most homemakers are using the light syrup—three cups water to one cup sugar—for canning. If you can't afford any sugar, use fruit juices in place of the syrup, and then sweeten the fruit when ready to use. Or, if you can't make up all the jellies and jams because of lack of sugar, use the juice and make it into jam during the winter when you have sugar.

Money syrup may be used in canning fruits, but expect to have a slightly different flavor to the jam and somewhat darker appearance.

Use a large kettle in cooking jam syrups because they have a tendency to boil over and foam while being cooked.

This Week's Menu	
Cold Cuts	
Old-Fashioned Potato Salad	Radishes
Sliced Tomatoes	Garden Onions
Hot Baking Powder Biscuits	Cherry Pie
	Beverage

turned on. Temperature should never exceed 250 degrees. Higher temperatures cause liquid to boil out of jars and evaporate.

Cooling and Testing Jars. If you have used a self-sealing lid on the jars canned, do not invert them after taking from the canner. Instead, set them upright on several thicknesses of newspaper or clean towels, away from drafts and let them cool. After the jar has thoroughly cooled, remove the screw band and re-use it again and again. To test for seal, tap the lid of the jar with a spoon, and if you get a clear, high ringing note you can be certain that the jar is well sealed.

Fruits for canning are most often cold-packed, rather than hot-packed as are non-acid vegetables. Select fruit only in prime condition, ripe rather than over-ripe. Wash it thoroughly, then prepare as for table and pack in jars. Fill with hot syrup to within ½ inch of the top. Process according to the time table:

Fruit Canning Timetable. (Time in Minutes)		
Fruit	Hot Water Bath	Oven
Apples*	25	75
Apricots	20	68
Berries	20	68
Cherries	20	68
Figs	30	90
Fruit Juices	20	68
Grapes	20	68
Peaches	20	68
Pears*	25	75
Pineapple**	30	90
Plums	20	68
Quinces*	35	75
Rhubarb	10	63
Tomatoes	35	75

*Pre-cook fruit in light syrup (3 cups water and 1 cup sugar boiled together 5 minutes), for 3 to 5 minutes before packing in jar.

**Precook fruit 5 to 10 minutes in syrup before packing in jar.

Fruit Juices. Many homemakers who will be unable to put up all the jellies they would like this summer may put up fruit juices and make them into jelly later. Canning fruit juices is a fair-ther for jelly or other uses is a fairly simple matter, and processing is usually done in a hot water bath, at a simmering temperature, 180 degrees F.

Flavor of the fruit juices depends upon the fruit selected. The juice of fully ripened fruit should be used. Partially ripened fruit lacks flavor whereas over-ripe or bruised or decayed fruit will make sterilization more difficult.

Extracting Juice.

The cold process method must not be used if the fruit is extracted for jelly making. It is far better to heat the fruit or berries. Do not add much water, particularly for soft fruits and berries. Simmer at soft fruit heat—do not boil—until the juices start running. Strain the fruit juices through a cotton flannel bag, and fill sterile jars to within ½ inch of the top. Adjust cap, and process in hot water bath for 30 minutes.

Working as quickly as possible will save the flavor of the juices and make it more desirable for jelly-making.

If you have a canning problem, write to Miss Lynn Chambers, Western Newspaper Union, 210 South Desplaines Street, Chicago, Ill. Please enclose a stamped, self-addressed envelope for your reply. Released by Western Newspaper Union.

WASHINGTON MERRY-GO-ROUND BY DREW PEARSON

Washington, D. C.

GERMAN-ITALIAN ANTAGONISM With the invasion of Sicily, the question of whether Germany and Italy can pull together as a team now becomes something much more than a subject of amusing wisecracks. The basic hostility always existing between them—both the armies and the people—may now prove to be the fatal fault in the Axis.

United States diplomats and newsmen who lived interned in Italy until May, 1942, recall many an expression of Italian resentment against the Germans.

On the night before the interned Americans left Rome to return to the U. S., a group of newspapermen, including Richard G. Massock of the Associated Press, visited a restaurant called Biblioteca, which had been a favorite haunt for most of them before the days of internment. The place was packed, largely with Germans, but when the head waiter recognized them, he hustled some diners off, to make room for his old American friends.

An Italian at the next table mumbled something about Germans intruding, whereupon AP's Massock spoke up "We are not German!" "Excuse me," said the Italian, indicating clearly that to call a man a German is a fighting word.

This prompted another Italian to come to Massock, the first American he had seen for months. With an affectionate embrace, he said: "Please give my kind regards to President Roosevelt!"

TANKS AND POTATOES

The army doesn't like to say too much about it, but the United States now has an embarrassment of riches with respect to tanks. A year ago, and for at least a year before that, there was great clamor about speeding production of this weapon with which Hitler overran the continent.

However, both the invasion of Sicily and raids over Germany now make it apparent that the weapon with which we shall take back the continent is not the tank but the plane.

Tanks were needed for the campaign in North Africa, and a year ago they were the most important weapon in the arsenal in preparation for the landing of November 8.

But fewer tanks were expended in North Africa than had been expected, and we still have most of those which were sent to that theater. Further, there will be less demand for tanks in Europe than in Africa, because of shorter distances and less mobility.

A tank factory closed down in Ohio last week, a fact which normally would have caused great alarm. But it passed almost unnoticed because of the fact that we now have miles of tanks standing in line waiting to be used in whatever theater may require them.

Note: Claude Wickard says that tanks are like potatoes. A few months ago everybody clamored for them. Now they are a glut on the market.

NAZI AIR STRENGTH

Air force experts are commenting on the fact that German air activity is stiffer in every theater of the European war. More German planes have been rushed to Italy, and are also active on the Russian front, and are more active over the European continent in combating Allied bomb raids than at any previous time in the war.

Experts believe the Germans have put up all their air strength. This is highly significant, for it means they have taken everything they have, leaving no reserves.

Thus every loss inflicted on the Luftwaffe in any of these theaters represents a decline from the minimum required for a defense of the continent. And when you cut a force below its necessary minimum, you are bringing about its downfall.

MERRY-GO-ROUND

A professional cameraman's appraisal of capital figures, as seen under the flash bulb: Cordell Hull, patient; Donald Nelson, harried and hurried; handsome Ed Stettinius, vain as a Hollywood actor; Henry Wallace, philosophically reflecting on "how the news camera distorts life."

Enemy broadcasts, intercepted by FCC, declare Washington is pushing an Argentine break with the Axis with "increasing eagerness" to satisfy U. S. "appetite for encamping" on the Falkland Islands—"unjustly" snatched by Britain from Argentina. Thus Berlin tries to drive wedges both between Argentina and U. S., and between U. S. and Britain.

PACIFIC WAR WILL TIGHTEN

Operations in the Pacific have met with glorious initial successes, and American forces will push on from one island to another, in a campaign which will have no permanent pause.

But don't look for a continuation of one-sided warfare much longer. We made our first landings in places where the Japanese were weak and where resistance was not substantial. But as we advance farther, resistance will become stiffer, and the progress slower.

Notes of an Innocent Bystander:

The Magic Lanterns: Take "For Whom the Bell Tolls" as a hearty action flicker, and you've got something to like. The acting of Ingrid Bergman, Gary Cooper, Katina Paxinou and the cast is big time. It all holds together fine. But if you want Hemingway's story, which called Franco some of the things he is, this isn't your dish. All very proper and sparing of the Fascist feelings. . . . Too bad it was released right after Allen Chase's sizzling "Falange," documented truth about what Franco's Spain is up to. The cinema has made Hemingway flabby, poor guy.

The Wireless: The commentators, especially the Britons, were full of contradictions during the first days in Sicily. They kept cautioning us that it looked tough ahead. Then they'd have to report the fabulous progress that had been made. . . . Bob Trout debunked the idea that the Sicilians were Fascist-haters who would jump right in on our side. He cited a dispatch from John Gunther to prove his point. Gunther reported that on the first night three Allied sentries had their throats cut. . . . Joe Goebbels, the liar who looks like a midget, kidded the home folks, but betrayed his panic to the world. His radio stooges claimed that all landings in Sicily were repulsed, save a few on the East coast. That being the only coast that was visited. . . . Willkie put this common sense into the mikes: "It is time for us to decide whether we are going to commit ourselves to staying in this war until it has been really won in a lasting peace and not in just an armistice." . . . The whimpering of the Axis short-wavers makes delicious listening.

The Magazines: Max Werner makes a point worth thinking about in Liberty. It is the Nazis, he writes, who are cheered by all this talk of a long war. That is their only hope now, Werner reminds, since the Blitz is gone on the Fritz. Werner guesses there will be a ninth inning in 1944. . . . Collier's is concerned (editorially) about Americans who keep picking on John L. Lewis. The editorialist fears that criticism of labor's prima donna may arouse new attempts to slow up the war effort. Such nail-biting leaves me cold.

Beverly Hills Novelle: He is well known among the Texas millionaires. . . . After a long struggle to accumulate his great wealth he decided to settle down and marry. . . . "Where does an aging man with nearly all the money in the world," he once said, "find a woman who will marry him—because she cares about him—and not his dough?" . . . He finally met a lovely gal—considerably younger. . . . "If you marry me," he proposed, "I'll build you the most beautiful home in California—among all the movie stars—and we will give wonderful parties there—and meet them all." . . . "But that's not what I want," she said. "I want someone who loves me. A beautiful mansion and all the money there is couldn't make me live in it. If you want to try your luck, I'll marry you." . . . And so they were married. . . . The mansion is now his tomb. . . . A week after it was finished—she ran away with the interior decorator.

Studio Small Talk: They hear Myrna Loy will return to pictures with Wm. Powell in "The Thin Man Comes Home." And then one film a year for MGM. . . . Errol Flynn, Ida Lupino and Ann Sheridan are dickering to finance films in Mexico. . . . Robert Donat, the star, is in Algeria broadcasting news for BBC. He was first to air the Sicily invasion. . . . The "Victory Through Airpower" film has reconciled Gen. Arnold and Major Seversky. . . . Barbara Brewster (Mrs. A. Bloomingtondale) has retained former U. S. Attorney I. R. Kaufman in her melting action. . . . Insiders hear that it may be a sizzler. . . . Edith Gwynn's sum-up of a certain celeb: "She's my best false friend!"

Brown Derby Tickertape: Add local fads: Mrs. Darryl Zanuck wears her husband's campaign ribbons. . . . Stop-the-press-item: OPA has abandoned price control over book-ends, artificial fruit and reading racks.

The Intelligentsia: John Lardner and Vincent Sheean are among the correspondents back in town. . . . Lt. Doug Fairbanks, on leave, appears younger than ever.

Faces About Movietown: Greer Garson in tears over a surprise gift of jewelry from "The Gang"—during the last "take" of "Mme. Curie." . . . Mervyn LeRoy's headache—shaving it from 20 reels to 14. . . . The Chaplins on a Beverly Hills corner chatting. And not a passerby stared. ("Whaddaya think this is—New York?") . . . Sophie Tucker, who attracts a weekly gross of nearly \$40,000 in a local cafe. Previous stars there averaged 22 Gs. . . . Capt. Jimmy Stewart, who was always so thin—now very skinny.

PATTERNS SEWING CIRCLE

1796

Little Belle

ANY little girl would be happy as a lark in a dress like this. Note the sweetheart neck and perky sleeves.

Barbara Bell Pattern No. 1796-B designed for sizes 6, 8, 10, 12 and 14 years. Size 8 requires 2½ yards 35-inch material.

Household Hints

If door and window screens are painted with aluminum paint it gives a clear vision out, yet makes it difficult to see in from the outside during the daytime.

When making jelly, shave up a sufficient quantity of paraffin, place in the empty jelly glass and pour in the hot jelly. The paraffin melts, rises to the top, and seals the jelly all in one performance.

Should the wooden handle of a crosscut saw break, temporary bolt on a worn-out horseshoe. This will serve quite well until a new handle can be had.

Using a brush will loosen more dirt from a stubborn spot than scrubbing on the board.

Give geraniums fresh air every day; do not allow them to become too dry; fertilize them with a commercial fertilizer and give them plenty of sun.

Clean rain water makes the best cooling fluid for the auto or tractor radiator in summer, since it does not form scale in the radiator tubes as hard water does. The cooling system should be flushed occasionally.

Be sure that all electrical connections are safe. Repair frayed or worn cords and loose connections. Never repair electrical lines of installations without turning the power off.

Eggs for home use should be stored in the refrigerator as soon as they are gathered or purchased.

Corduroy need not be pressed. A whisk broom is a cool way to bring up the nap and restore its softness.

1802

Bright Basque

YOUNG set favorite—the basque topped dirndl that will be seen everywhere this summer. Gay, cool, becoming.

Barbara Bell Pattern No. 1802-B designed for sizes 10, 12, 14, 16, 18 and 20. Corresponding bust measurements 28, 30, 32, 34, 36 and 38. Size 12 (30) requires 3½ yards 35-inch material; 6 yards ric-rac.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers. Send your order to:

SEWING CIRCLE PATTERN DEPT.

Paint Drying

It took six weeks to paint grandfather's carriage, but the drying time on an automobile paint job has been reduced to an hour and the latest furniture finishes will dry in ten minutes. Now comes the army with war tanks, the paint on which is dried in four minutes by infra-red rays.

NO ASPIRIN FASTER

than genuine, pure St. Joseph Aspirin. World's largest seller at 10¢. None safer, none surer. Demand St. Joseph Aspirin.

Groundhog in Hibernation

During hibernation the groundhog's body temperature falls to about 37 degrees, or just above freezing, and its heart beat slows down to less than ten beats a minute.

WHOLE GRAIN

Kellogg's Corn Flakes are restored to whole grain nutritive value of Thiamin (Vitamin B1), Niacin and Iron, as recommended by the U. S. Official Nutrition Food Rules.

NUTRITIVE VALUES OF THIAMIN (VITAMIN B1) NIACIN AND IRON!

subscriptions will be discontinued
one month after expiration, if not
renewed, but time for payment will be
extended. If arrangement is made by
the subscriber.

Ink Spots
And Spatters

By Jergie

BACK TO THE GOOD OLD DAYS AGAIN!

The war has brought on many
things we have not seen for the
past twenty or more years.

Last Wednesday afternoon Klemme
folks witnessed a good old fashion-
ed run-a-way, something that
has not happened in Klemme for
more than twenty years.

Raymond Barz team, driven by
his brother, Allan, became fright-
ened at the creamery and ran down
the alley, swerved past the post
office and north up the street past
the Community Hall and at the
corner near the telephone office
one of the horses fell down, and the
run-a-way simply ran itself out.
But it was a good show while it
lasted.

We can remember that when a
run-a-way that was a very dull week
about three or four good run-a-
ways in town.

A BOUQUET

Our bouquet this week goes to
Ed C Buntensch of Klemme who
donated the large sign board at
Garner recently completed as a
Hancock County Roll of Honor.

The large sign contains the nam-
es of all Hancock County men to
date who are in the services of
Uncle Sam.

WITICISMS

Said the scarf "Go on ahead, I
want to neck"

Said one eye to the other "Just
between us, there's something that
smells"

Big rose to the little rose. "Hiya,
bud"

Executioner as he pulled the
switch "This'll kill you"

Ceiling to the wall "Hold me up,
I'm plastered"

Dentist sang to his patient "The
Yanks Are Coming"

Robber as he jumped on the
scales: "Here's where I get a
weigh"

One stocking to another: "So
long! I gotta run"

Salmon as he took the hook: "I'll
be get canned for this"

Cub to the north wind: "Don't
blow so hard! I'm a little bear."

"Good morning, my son," quoth
the census taker. "You seem to be a
mighty little shaver. Have you any
brothers or sisters?"

"Yes, I got a lot of brothers and
sisters. There's seven of us boys,
and eight girls"

My, my The stork must visit
you often"

Visit us? He lives with us"

Man "Did you ever have any
exciting experiences?"

Brisk Salesman "About 20 years
ago I was ordered to leave a west-
ern town by a notorious two-gun
man who didn't like the style of my
clothes"

Man "As you are still alive, I
suppose you left"

Brisk Salesman "No, I bought
him a couple of drinks and sold
him the suit."

Hancock County Board Proceedings

7TH ADJOURNED JUNE MEETING

Garner, Iowa, August 3, 1943
The Hancock County, Iowa, Board of
Supervisors met in session on above date
with F J Schoun, Penn Eckels and John
Chambers present.
The minutes of the last meeting were
read and approved as read.
On motion and second a cash allowance
of eight dollars (\$8.00) per month is here-
by granted to Mrs. Chas Quintus, effective
August 1, 1943, and to continue until
further notice. The County Auditor, be and
he is hereby directed to draw warrants on
the Poor Fund of Hancock County, Iowa,
therefor as by law directed.

On motion and second Homestead Tax
Credit application No. 1 to 2118, inclu-
sive, are approved for the year 1943.

On motion and second the lease with
Gahan Bros. is approved.

On motion and second bond to insure
against double payment of Court Expense
warrant No. 4906 is approved.

On motion and second the final hearing
on the report of Engineer Henschen on lat-
eral No. 8 of D. D. 3 and 4, is con-
tinued to 10 o'clock A. M. on August 16,
1943.

Supervisor Eckels is appointed a com-
mittee to investigate and cause repairs to
be made in D. D. No. 46-3.

RE IT RESOLVED that the claims here-
inafter set out be allowed in amount re-
sponding thereon, and the County Auditor
be and he is hereby authorized and order-
ed to draw warrants on the several funds
of Hancock County, Iowa, in payment of
such claims in amounts set opposite each
claim.

On motion and second the Board ad-
journed to August 16, 1943, at 9 o'clock
A. M.
F. J. SCHOUN, Chairman
County Auditor

"Can you keep a secret?"
"Sure."
"I need to borrow some money."
"Don't worry. It's just as if I
never heard it"

Englishman: "I say, what are
they doing?"
American: "They're dancing"
Englishman: "They get married
later, don't they?"

Onlooker: "Why does that cow
seem so happy while being
milked?"
Farmer: "She's a baseball fan
and likes the Yanks!"

Mother to Daughter: "I don't
want you to marry. I've seen the
folly of it"
Daughter: "But, mother, I want
to see the folly of it, too!"

"Your wife used to be terribly
nervous. Now she's as cool and
composed as a cucumber. What
cured her?"
"The doctor did. He told her that
her kind of nervousness was the
natural result of advancing age"

"My wife is very irritable. The
least thing sets her off"
"Your lucky at that. Mine's a
self-starter"

"Bill, what makes you stay away
from school?"
"Class hatred, father."

Iowa farmers have produced
more dairy products this year than
ever before.

A straw loft in a poultry house
helps keep it cool in summer and
warm in winter.

Bacon fat may be used as short-
ening in waffles, pancakes and
muffins. It adds flavor at the same
time that it conserves rationed
fats. Biscuit topping for meat pie
also can be shortened with bacon
fat.

RATIONING CALENDAR

TIRES—Class A ration. Second inspec-
tion deadline Sept. 30. Class B ration.
Third inspection deadline Oct. 31.
Class C ration or bulk coupons. Third
inspection deadline Aug. 31. Com-
mercial vehicles. Every 60 days or
every 5,000 miles, whichever occurs
sooner.

Tire situation critical. Conserve pres-
ent tires on wheels.

GASOLINE—A Book (new) coupon 7
(4 gals. each) valid through Sept. 31.
Steel Plate License number and the
state must be endorsed on face of
each coupon immediately on receipt
of book.

Around Iowa

MARINE HOSPITALIZED

Wilber Brandt, 20, was due to report to the Marines last week, but wasn't able to, because he fell asleep while driving a truck which went off the road at an intersection and crashed into a tree, injuring himself and two companions. The two passengers pulled Brandt out from under the wheel of the car, where he was pinned, before the car burned.

HANDY POLICE JOB

The LeMars Chamber of Commerce is without a typewriter as the result of a reported theft of the machine to police. Since the organization is located in the city hall, officials did not have to go far to report the loss.

FOXHOLE OCCUPIED

Other than cacti and mosquitoes, the only thing that bothered Soldiers Ed Sitzmann of LeMars during recent maneuvers in California, was in dropping in on 8-foot rattlesnake. Though will to dispatch the reptile, Sitzmann and his companions were prevented by an officer who feared the snake might strike.

MOVIE PREVIEW

Part of a foundation herd of milking shorthorns for the ranch of Movie Actor Fred MacMurray of Haldsburg Calif, were purchased in Iowa from the Irvin F Meyer Gold Mine stock farm near McGregor. The Iowa cattle were shipped to DeLoan Wis to comprise a herd obtained from states in the midwest. They were later shipped as a unit to California.

THE VERWALD APPENDIX

When Cyril Verwald of Elkader had his appendix removed recently by Dr W J McGrath it was the seventh time in a number of years that the doctor had performed similar operations on Verwald brothers and sisters. The physician also performed similar operations on four sisters of Mrs William Verwald mother of the boy.

TOSSED OUT OF ARENA

George Den Besten, 45 farmer near Birmingham forced by an irate animal to become a bull fighter figures he came out victor in that he came out of the encounter all in one piece. While driving hogs to pasture, Mr Den Besten was attacked by a young bull. He was forced back against a barbed wire fence and at the third lunge the bull tossed the farmer head first over the fence but with the fence sticking to him. From this position Mr Besten resolved to get rid of the bull the next day and did.

HELENA SURVIVORS

Glenn Juhl of Marcus was one of three Iowa sailors rescued from a Jap-held island in the south Pacific. They were survivors of the sinking of the Cruiser Helena in Kula gulf.

TIME SAVER

A columnist in the Decorah Journal reports seeing a sign in Waverly reading 'LENA WENDT. Upstairs Dressmaking and Hemstitching'.

ATTENTION, MR. MORGENSTHAU

War bond sales at the recent Chariton Horse show amounted to more than \$45,000.

EGG EATING TECHNIQUE

When Mrs Hilmer Head of Marango went to her poultry house to gather eggs she discovered a bull snake making short work of the day's egg harvest. The snake would swallow an egg whole, lodge it in its throat, contract the throat muscles and thus crush the egg for better digestion. Mr Head later killed the reptile.

CAUGHT

Two-year-old Karen Kendrickson of Waukon pushed her head through the back bars of a dining room chair. Her head went through all right but wouldn't come out. Grandfather Nels Quamme came to the rescue and sawed the back of the chair to release the tot. Karen now keeps the chair at a safe distance.

COLLECTION

Decorah Boy Scouts collected 12 tons of waste paper in one day recently. Several local dealers assisted the boys by furnishing trucks to haul the paper.

BUCKLED CARROT

A carrot growing through an overall buckle was found by Lyle Combs of Greenfield.

BREAKS LOOSE

A trailer hitched to a car driven by Howard Schroedermeier of Waverly became loose and landed in a ditch. In the trailer were 7 children and some beans picked on the Schroedermeier place. Howard was taking the children home after working for him that day. Bruises and cuts were the only injuries received by the children.

GLASS BENDS

The brick base and window frames were pushed in nearly 3 inches on the Lake Mills Graphic building but the big plate glass windows did not break. Cause of the misplacement was a car driven by an intoxicated driver.

NEEDED TEETH

Without teeth, Ernie Landsman of Emmetsburg couldn't get a job promised to him on the Alaskan highway, at least that is what he was informed at the time he was given his final physical examination in Seattle. Walking down the street in Seattle, Ernie hit upon the idea that changed the doctor's mind. A dentist found a set of temporary plates and for \$5 for the teeth and some "sticking power" Ernie walked out of the dentist's office with new teeth. Ernie was accepted the next day but now says that his teeth fit perfectly — in his coat pocket.

ANOTHER ENGLISH COLONY

More than 123 persons of British descent assembled in the Washta community recently to honor British Air Craftsmen Eric Raymond and William E Smith of the Royal Air Force now visiting relatives in the community. The young men loaned to the Canadian government for the duration, say they intend to locate in the United States after the war.

BUGGY RIDE

"Midnight" and "Blackout" a span of well-matched black horses usually seen hitched to the delivery wagon of B Alton at Cherokee often have copped high honors at neighborhood horse shows. Hitched to a "Victoria" buggy, and driven by their former owner, Harry Lamoreaux, they are an attraction worth going miles to see.

PROUD GRANDMA

Mrs Elizabeth Edie of Tabor has 10 grandsons in the armed forces of the United States, three more are about to enter, one other grandson has received a medical discharge, and three additional grandsons by marriage are in uniform. That is a record hard to beat.

MEMORIAL

A project has been started in Tama county to preserve as a historical monument the 91-year-old logcabin, oldest building in North Tama county, built by Giles Taylor, father of the later Elemer E. Taylor, editor of the Traer Star-Clipper. It was in this cabin that the late editor was born. The Traer Lions' Club has taken up the project with a view of investigating the possibility of moving the cabin to public ground in Traer.

WELL-STOCKED LARDER

When this canning season is over Mrs Ivan Croxell, farm woman living near Deloit hopes to have exceeded her last year's record of 1,184 quarts of canned food to supply the family table. Storage will be in a new cave on the farm, and this will also house a supply of late garden vegetables. Five of the Croxell children are still at home, and assist their parents in the canning and farm work.

Mr Bennie Liljenberg from the Veterans Hospital at Knoxville and Mrs Julia Bianche of St. Louis, Mo., visited in Klemme for two weeks with their sister, Mrs Blanche Frederick, and mother Mrs Carrie Kinden. They also visited at the Frank Kluckhohn home and with relatives at Thompson and Forest City.

We can print anything. Call at the Times Office.

BETTER IOWA GARDENS

Let's take a look back over the garden season to see where a better job of insect control could have been done. And let's start with the potatoes, since they show more serious insect damage now than most other crops.

* * *

Most unsprayed potato vines are dead now, but look at your neighbor's sprayed or dusted vines. They are still green because the insecticide controlled the potato leafhopper. Those green vines are maturing more and bigger potatoes, so the crop obtained is much larger than from unsprayed or partially sprayed vines. In fact, it is nearly twice as large.

* * *

And another thing is happening. The leafhoppers are leaving the dead potato vines and are moving to those late beans, where they can and will do serious damage unless you dust frequently and thoroughly with dusting sulfur.

* * *

We should resolve here and now to do a good job of spraying or dusting the potatoes next year. Use either berdeaux mixture plus lead arsenate or calcium arsenate, or dusting sulfur plus lead arsenate or calcium arsenate. Apply the dust or spray every 10 days from June first on.

* * *

Other crops which have suffered serious damage from insects are the vine crops. Cucumbers, melons and squash have been set back, weakened or killed by the cucumber beetles. All of the various varieties of squash are host to millions of gray squash bugs—and are rapidly being killed. Squash and pumpkins also are being attacked by the vine borer.

* * *

All of these pests can be controlled by the proper use of insecticides and proper management of the plants. Calcium arsenate-gypsum dust every 2-3 days on young cucumbers and melons will prevent damage by the beetles. Shingles laid in the planting area will trip most of the adult squash bugs so you can kill them, and strong nicotine sulfate-spary water spray will kill the young bugs.

* * *

Cabbage worms also are taking advantage of poor spraying earlier, and are ruining heads which were almost ready for the table. If lead arsenate dust or spray had been applied early at frequent intervals, the worms wouldn't be working now.

* * *

Individual losses may not seem so severe, but when put on a statewide basis, thousands of tons of food were destroyed this year by bugs. Let's stop it next year.

FALL PIGS AND BROOD SOWS GET GOOD PROTECTION FROM STRAW SHEDS

Getting fall pigs off to a good start so they weigh 50 or 60 pounds by the first of December and are hardly enough to go through the winter well is one of the most important considerations for the hog producer. Proper housing will go a long way toward insuring the good start. A straw shed is the cheapest and most satisfactory shelter that can be constructed, where additional facilities are needed. County Extension Director Paul Henderson recommends a shed about 16 to 20 feet deep and about 50 feet long, for 100 hogs. When this much room is provided the pigs, less piling up results, the air is better, and congestion in other sheds is relieved.

Posts should be set with about 6 feet above the ground, then cross pieces nailed to them. Over this, woven wire or boards or poles may be used as a top to hold straw. Threshing straw directly on this frame will save labor of handling.

The straw shelter should face south, with an entrance about 4 feet wide. Sides and the back also should be packed with straw about 1 foot thick, packed into a skeleton framework.

WEEKLY NEWS ANALYSIS

U. S. Capture of Palermo Pockets Axis Army in Sicily's Northeastern Corner; Allied Activity in Pacific Is Intensified; Nation's Employment Reaches 38 Million

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)
Released by Western Newspaper Union.

American fliers moved closer to the Japanese mainland when they bombed Paramushiro, which lies below the Kamchatka peninsula of Siberia, 1,200 miles from Tokyo. Hits and near misses were reported on Jap ships lying in the harbor.

SICILY: Pocket Axis

The second stage of fighting in Sicily found the Axis forces retreating from the western reaches of the island as the Seventh American army of Gen. George S. Patton moved into rapid occupation of the territory.

The Yanks' seizure of Palermo sealed off the Axis troops in the northeastern corner of Sicily. As Patton's army hemmed the remaining Axis forces of approximately 100,000 men in from the west, Gen. Bernard Montgomery's British Eighth army pounded at the enemy's line on the southern extremity of the trap, at Catania.

Units of the celebrated Herman Goering division put up a stiff fight on the outskirts of Catania. In this section, the broad Catania plain is criss-crossed by several rivers, making tank and motorized operations difficult; and many shallow creek beds and thick grain fields gave German machine-gunners good cover for defensive fire.

While the fight raged in Sicily, British naval and air units bombarded the sole of the Italian boot at Crotone.

CIVILIAN GOODS: Increase Possible

The government's effort to get a more effective production for the war might result in a reduction of certain programs and free materials for civilian goods, War Mobilization director James F. Byrnes said. That, however, is a hope and not a prediction, Byrnes cautioned.

Byrnes' statement came on the heels of a revelation that the munitions program was being cut down in some lines because our growing air power was amply protecting Allied industries abroad from destruction from bombing, and thus reducing their demands on U. S. plants for material.

According to Byrnes, the various war agencies are studying their purchasing programs, to confine procurement to articles most useful in the light of recent combat developments. Where cancellations or reductions in orders may be feasible, the possibility exists that material spared will be used for civilian goods.

EMPLOYMENT: 38 Million at Work

As the labor department announced that over 38 million people were currently employed in non-agricultural establishments, the war department revealed that it had authorized the release of 4,500 men from the army for work in copper, zinc and molybdenum mines.

According to the labor department, current employment was 1,663,000 over that for the same period a year ago. Despite the fact that the manufacturing and public utilities and transportation industries put on 162,000 workers recently, total employment was only 66,000 more than in May of this year. Since May, the construction industry has laid off 89,000 men.

The war department said failure of the metal mines to secure the necessary amount of workers left only the army as a reservoir of men with the requisite skills for the pits.

HIGHLIGHTS . . . in the week's news

NEWSPRINT: The price of newsprint paper on which newspapers are printed, will be raised \$4 a ton, on September 1 by order of the Office of Price Administration.

"INVASION" MONEY: Government printing presses are turning out specially designed paper money for use of American servicemen in countries they occupy.

SOUTH PACIFIC: Range to Dutch Indies

Ranging 1,200 miles to the west, American heavy bomber formations struck at the Japanese naval base of Surabaya in the Dutch East Indies.

Tumbling down on an oil refinery, docks, warehouses and railway installations, 500 pound bombs caused heavy damage, Gen. Douglas MacArthur's communique said. The action marked the first air raid on Surabaya since that former Dutch base was pounded by the Japanese early in the war.

The raid on Surabaya was part of intensive Allied activity in the South Pacific area. As American troops worked closer through heavy jungle to the Japanese air base of Munda on New Georgia islands in the Solomons, medium and dive bombers and fighter planes kept up a rain of explosives on the embattled enemy troops guarding that stronghold. In one day alone, American airmen made 250 raids on the Japanese positions.

ROME: 'Priceless Treasures'

Declaring "... Despite the precautions that may be taken it is almost impossible to avoid, on this sacred soil of Rome, the destruction of venerated edifices," Pope Pius XII deemed it "... our duty once more to raise our voice in defense of the priceless treasures that constitute the ornament of Christian and human endeavor," following the Allied bombing of the Eternal City.

In citing the historical, cultural and religious importance of Rome, the pope said "... All that we put before competent authorities on several occasions in clear terms, recommending to them in the name of human dignity and of Christian civilization the inviolability of Rome." Then stating that he had hoped the papal authority would have proved sufficient in addressing a plea for the immunity of Rome, the pope said "... But alas, this so reasonable hope of ours has been disappointed."

RUSSIA: Reds Whittle Bulge

Throwing the full weight of their might into the drive, the Russians bore down on Orel from three sides, while embattled German troops fought desperately to prevent being cut from the rear.

While the battle of Orel raged, the "Anti-Nazi German National Committee" in Moscow appealed to the German high command to overthrow Hitler and negotiate a peace with the Russian government. Although presumably composed of former German army officers, the "national committee" bears a liberal sprinkling of former leaders of the Communist party of the old reichstag.

At Orel, the Nazis were holding a big bulge eastward, from which they could strike out against the rear of the Reds' northern or southern armies. Russian troops made notable progress cutting across much of the bulge in the north, but the Germans were offering stiff resistance on the southern fringe.

For their part, the Germans made no effort to minimize the power of the Russian drive. They contended their strategy called for a continuation of the struggle so as to wear down the Reds' strength.

FARMS: 1.3 Per Cent Idle

A total of 76,704 farms with an acreage of 6,484,292 lay idle in the United States when the decennial census was taken in 1940. The number represented 1.3 per cent of all farms in the country.

New England and the Middle Atlantic states showed the greatest percentage of abandonments, with one out of every 20 farms idle. This compared with Iowa's report of one out of every 2,000.

Abandoned farms averaged 85 acres against the 174 acres for operating tracts. Depleted soil and crop failures accounted for one-third of the vacancies, and there were many departures for employment in industry.

Almost 57 million acres of land lay idle on producing farms, census figures also showed.

CASUALTIES: Light, So Far

War and navy department casualty lists issued for the first year and half of the war totaled 16,556 men killed in action or from wounds, and 31,343 missing. The missing, it was explained, may either be dead or prisoners, but final tabulation must await the war's end.

Casualties were almost equally divided between the services. Of the known dead, 8,412 are navy, marine and coastguardsmen, while 8,144 are army men. However, the army's record of 21,076 missing doubled the navy, marine and coast guard's figure of 10,267.

As the services' casualties were announced, word was received of the death of Maj. Gen. William P. Upshur of the marines and Capt. Charles Paddock in the crash of a naval plane near Sitka, Alaska. General Upshur was commanding general of the marines for the department of the Pacific, while Paddock, who had served on General Pershing's staff in the First World War at the age of 18, was world famous as a sprinter, having set 94 records from 1920 to 1929.

POULTRY: Army Takes Over

Under the second war powers act, the Office of Price Administration ordered the detention of poultry trucks on eastern highways and the requisitioning of their stock for the army.

OPA took the action, it said, after black market operations had interfered with the army's purchase of poultry in the Delaware, Maryland and Virginia area, largest food producing section in the East. According to OPA, much of this meat was being sold to dealers over the price ceiling.

Dealers from whom the poultry was requisitioned, were paid the prevailing ceiling price.

MINERS: Seek Contract Approval

With the War Labor board rested the task of determining the fate of the new wage contract entered into between Illinois' United Mine Workers and bituminous coal operators, providing for a daily payment of \$1.25 for time spent traveling underground. Differences over such compensation was the chief cause of three walkouts, leading to government seizure of the pits.

In addition to providing portal-to-portal pay, the new two-year contract outlaws strikes and lengthens the 35-hour week to 48 hours. Under present conditions, the miners now receive \$7 daily for a seven-hour shift, but the new pact would award them time-and-a-half for the eighth hour each day and for the full eight hours on the sixth day.

Besides WLB approval, the agreement is dependent upon the Office of Price Administration's authorization of an increase in coal prices to offset the wage settlements.

LABOR: Demands Roll-Back

Meeting in the White House, organized labor served notice on President Roosevelt that it would not continue support of his anti-inflation program unless prices were rolled back to the September 15, 1942, level.

Charging Price Administrator Prentiss Brown with having failed to execute the government's roll-back program, labor representatives declared they would open a pressure campaign for his removal from office unless plans were set in motion to push current prices back.

The labor leaders said further dalliance on roll-backs would lead them to repudiate the wage stabilization program, in which wage increases have been limited to 15 per cent over the January, 1941, levels. Living costs have jumped approximately 21 per cent since that time, they said, outstripping income by at least 6 per cent.

WAR BONDS

With 23 billion dollars already raised from non-banking investors since last December, the government announced plans for a new 15 billion dollar war bond drive to start in September. Individuals, corporations, insurance companies and other non-banking sources will be eligible for the purchase of the various denominations of savings bonds, notes and certificates.

In the two previous drives, banks bought over 10 billion dollars of securities.

Cunningly Styled Cottons Tune to Many-Purpose Wear

By CHERIE NICHOLAS

SUCH a breathtaking rush as is going on for smart, gay and versatile cottons these days! Whether you work or whether you play, designers have taken it upon themselves to turn you out in cunningly devised, intriguingly styled cottons that enter into the spirit of every environment and every occupation, no matter what, this summer. It's lots of fun these style creators of ours are having, making up chambrays and gingham, seersuckers and sprigged dimities and glazed chintz and a host of other equally interesting cotton weaves that will tune picturesquely and faithfully to where you are and what you are doing.

No matter whether you are working in a factory, manipulating a typewriter, driving a truck, entertaining in a USO center, watering and weeding a Victory garden, giving a barbecue party in your own backyard or moving with rhythmic grace up the church aisle to the strains of a wedding march, it's cottons you'll be wearing if you are properly style-minded.

Now that most of us are destined to be stay-at-homes during the days to come because of traveling difficulties, it is with utmost enthusiasm that designers are letting imagination have full play in creating clothes that, while practical and functional, are of the "be pretty" type that make women look their most attractive selves. Which calls to mind the importance of that charming little newcomer in the field of at-home fashions — the brunch coat. In the brunch coat, cottons bright with color, show off for all they are worth; the more color, the merrier. The girl centered in the picture is wearing a most attractive brunch coat, just such as should be included in every summertime wardrobe. It is of rose-

strewn cotton oxford cloth and is vividly colorful.

In the costume shown to the left the colorful chambray skirt registers a most exciting new idea in the use of quaint ribbon-run beading to edge the capacious pockets and the free-and-easy hemline. With its demure and flattering white peasant blouse it is appropriate for a barbecue party, a walk or just summering on the home-front lawn. And she can sit on the grass if she wants to because bug and grass stains will "come out in the wash" of a chambray skirt.

After a decade, bareback dresses have again come into their own. The fashion is being greeted from coast to coast as very important because it is practical, being adaptable to so many occasions and places for the new-type bareback dresses all have matching jackets or boleros. There is just everything in the way of practicality to recommend the several-piece costume shown in the foreground of the illustration. Depend upon it, this skirt and halter with its matching gingham bolero will solve your dress problem for more occasions than one. From the front it looks like a suit, with three buttons making the halter look like a shirtwaist when the bolero is slipped on. There are side slits in the skirt which lead to roomy pockets. It has brief panties of jersey sewn right in the skirt and the ensemble might rightfully be called a one-minute wardrobe.

Released by Western Newspaper Union.

Modish Black

Fashion decrees dark beauty for a sultry summer. You'll look cool and feel cooler in this linen-textured spun rayon garnished with crisp eyellet of pique. It's a smart choice for your conservation-conscious wardrobe, because it is made of stabilized fabric. Among the performance qualities for which this fabric has been approved are seam strength, non-shrinkage and stretchage and a high degree of color fastness to hand-washing and perspiration. The eyellet embroidery touch is a widely featured trend, and you'll love it on your black or navy spun rayon. A wide-brim black or matching navy hat makes for ultra high fashion this summer.

Wartime Hats Have Changeable Trims

For hat-conscious girls and war brides who are making trips to camp, the big packing problem is hats. The story of crowded trains and lack of porters is well known this summer. Sally Victor, known in every style center the country over, has evolved the idea of one basic shape that becomes you most, supplemented with half-a-dozen or more trimming changes that require no special knack in adjusting. With this comes a double-ruffle brim of straw lace mesh which slips right over the crown of a straw or felt shape. Take it off in a jiffy, and in your ensemble you'll welcome a sequin beaded band that fits about the crown and so on. The group-trims include a feather sweep that can be clipped on, and other items that tune to time and occasion.

Fringe Trimming Shown In Advance Displays

The newer incoming fashions bring the news of fringe trimming. Advance displays highlight afternoon and evening black crepes handsomely trimmed in fringe of varied description. The most exciting news, however, is that fringe is turning up in the sportswear realm. Loop-yarn fringe leads with fringe formed of self-fabric cord being a close second. Suede slashed into fringe trims the new leather jackets, hats and accessories. Upholstery fringe is used on smart cotton frocks. Also entire little hats are made of either straw or wool fringe sewed row on row.

Motifs From Mexico

Accessories reflect a decided Mexican influence in color and motif. These Mexican inspired items include gay Mexican straw hats, Mexican plaid straw bags, and the Mexican peasant blouse in white cotton.

ON THE HOME FRONT
With RUTH WYETH SPEARS

TODAY'S living room is often furnished with streamlined pieces that have served a more humble purpose. Almost any plain washstand or dresser may be given long smart lines by adding open shelves at the ends. Here a top of plywood with a plain moulding around the edges extends

across the stand and shelves. By adding a plain baseboard and a coat of paint the piece is finished with a modern air. The paint should match the woodwork and if old hardware is removed to make way for simple new drawer pulls the screw holes should be filled with plastic wood and sandpapered before painting.

The diagram at the upper right shows how to make the wall decoration from a remnant of flowered chintz. If you use an old frame, the chintz picture may be given the appearance of an oil painting by applying several coats of varnish, allowing plenty of time for each coat to dry thoroughly.

Note: The remodeled washstand is from Book 10 of the series of home-making booklets prepared for readers. Book 10 also contains more than 30 other things to make from things on hand and available materials. Booklets are 15 cents.

U. S. Envoy Brought Us Poinsettia From Mexico

Joel Robert Poinsett, American minister to Mexico (1825-29), noticed the striking beauty of the scarlet and green head of the poinsettia, and the fact that it usually came into blossom about Christmas time.

Poinsett, who was a botanist as well as a diplomat, brought several specimens back to this country, and fellow scientists soon learned that the plants thrived in sub-tropical parts of the United States.

When the soldier talks about "the skipper" he means his captain, the head of his company. And that's just what the title "captain" means. It comes from the Latin word "caput" meaning "head." Another leader high in the Army is the Army's favorite is Camel cigarettes—they're first choice with men in the Army. (Based on actual sales records from service men's canteen stores.) When you're sending gifts from home, keep in mind that carton of cigarettes is always most welcome. And though there are Post Office restrictions on packages to overseas Army men, you can still send Camels to soldiers in the U. S., and to men in the Navy, Marines, and Coast Guard wherever they are.—Adv.

Historic Rainbow Division Is Born Anew

By ELMO SCOTT WATSON
 The other day veterans of the 42nd Division of World War I held their reunion in Tulsa. Then they went to Gruber near Muskogee, to see the reactivation of the tradition-rich outfit, to pass the new 42nd Division of World War II their honored badges and to gaze proudly upon the shoulder patch adorning the uniform of each man in it—red, yellow and blue striped—circle which was the "first-fighting" man, a member of "Rainbow" Division.

The reactivation took place at the "Champagne hour," called because it was the hour of the last great German push in World War I, the Champagne offensive, began. That offensive, started on July 14, 1918, broke against the stubborn resistance of those fighting Yanks of the 42nd division and from that day on the kaiser's armies until it reached low tide in a car in Compeigne forest months later.

Two Messages.
 The veterans of the Rainbow division of a quarter century ago addressed their 1943 meeting, they sent messages to widely separated parts of the world. One was flashed to Douglas MacArthur, "somebody in the Southwest Pacific," because it was he who had given them their nickname. The other was to the traditional reunion greet-one-armed Gen. Henri Joseph Gouraud, who commanded the French army, which in the American division, at the battle in the Champagne on July 14 and 15, 1918. The message was sent to Gen. Dwight Eisenhower, commander-in-chief of Allied forces in the European theater of war, to be transmitted to Gen. Gouraud "somewhere in Occident."

In the early summer of 1917 a colonel named Douglas MacArthur was serving as "censor" for coming out of the war department in Washington. Visited by his men one day, he told of the forthcoming organization of a new division to be composed of units from 27 states and District of Columbia. As the lists were leaving, MacArthur noted that the assembling of so many units from so many states into one division was somewhat like putting up a rainbow. Struck by the expression, the censor used it in their story, the nickname stuck to the division when it was organized on June 1, 1917, and concentrated at Camp Mills on Long Island in New York.

The division was still at Camp Mills, many different kinds of designs were used as divisional insignia. They were irregular and nearly all were a half of the three colors of red, yellow and blue in them. It was the division was engaged in action in the Meuse sector that the final, official design was conceived and adopted.

William N. Hughes Jr., who succeeded Col. Douglas MacArthur as chief of staff of the division, ordered the measurements, retained the original design to a quarter and telegraphed the design, with the approval of Maj. Charles T. Menoher, then division commander, to corps headquarters. One of the cherished traditions of the 42nd that Gen. Menoher, acting on an order of a rainbow in the sky, divided the division into action in the Champagne operation. From

CHARLES T. MENOHER
 saw a rainbow on the battlefield

Second Division

Gen. Douglas MacArthur, become one of the outstanding figures of World War II, the division included in its personnel who were marked for fame. Among these were Gen. James P. Duffy, chaplain of the "Fighting Irish" (the 167th), and Sgt. Joyce Kilmer, to be remembered for his exploits in war

THE RAINBOW
 ... became the insignia of the 42nd division

the time that he told of seeing the rainbow in the sky from his bivouac in the Baccarat sector, rainbows kept showing up at decisive hours in the division's history, as if to justify its selection as the 42nd's talisman.

Before long veterans of our regular army as well as veteran French and British troops were joining in proclaiming the Rainbow division as one of the hardest fighting outfits in France. Here is its record as given in a series of articles on "AEF Divisional Insignia," written several years ago by Sgt. Herbert E. Smith for the United States Recruiting News:

First Taste of War.

It trained under veteran French soldiers in Lorraine, and elements of the Rainbow division entered the front line trenches for the first time February 21, 1918. This was along the Lunerville sector, at a point north of Celles-sur-Plaine, through Neuville, Ancerville, the eastern edge

GEN. HENRI GOURAUD
 ... to him, each year, a greeting

of the Bois Banal, to the eastern and northern edges of the Forêt de Parroy. Elements of the 42nd's artillery brigade entered the Dombasle sector, also on the night of the 21st, to receive their first taste of combat warfare affiliated with the French 41st division.

From March 31 to June 21 the division occupied the Baccarat sector in Lorraine, moving from there to Chatel-sur-Moselle in the Vosges. Then came July, with its heavy fighting in the Champagne and Champagne-Marne areas. The highlight of the 42nd division's activities at this time would seem to be the battle of La Croix Rouge Farm.

This farm was a low, widespread group of stone buildings connected by walls and ditches. The Germans had made an enormous machine gun nest of this natural stronghold, and had defied several earlier determined efforts of Allied troops to dislodge them from this key position.

The 167th and the 168th infantry regiments, old Alabama and Iowa troops respectively, struggled all day, July 26, against this nest of horrors. It was practically impossible to rush this enemy stronghold across the open; endeavors to work around the edges were thrown back by flanking fire; an accurate punishing shell fire from the German artillery ripped through the wet underbrush; gas, made doubly dangerous by the moisture, swirled about in terrible gusts.

At last, two platoons of assembled casualties—volunteers, all, from the 167th and 168th—led by two lieutenants, squirmed their way forward, Indian fashion, and closed upon the farm buildings with grenades and bayonet. The raid, staged at dusk, was successful. The 42nd possessed La Croix Rouge farm at nightfall, but at a fearful cost in dead and wounded.

Less than a week later these same regiments, with their sister outfits of the Rainbow, were pressing forward toward the Ourcq river. Upon the 42nd fell the chief burden of the

main attack. It was ordered to storm the heights on both sides of the Ourcq, in conjunction with the French on the left, to take Hill 184 northwest of Fere-en-Tardenois.

A Deadly Hail of Fire.
 The 168th infantry crossed the stream under a deadly hail of fire, to climb by slow stages to the crest of Hill 212, between Sergy and Cierges. The 167th meanwhile, had made its way down the Rue de la Taverne, crossed the Ourcq, and swept on up the northern slope of the hilly country.

New York's "fighting Irish" of the 165th infantry emerged from Villers and secured a precarious lodgment on the slopes on either side of Mercury Farm. Subjected to the same raking fire that had made this push so costly, this fine regiment still carried on, plunging forward to the sunken road north and west of Sergy.

By midafternoon the weary doughboys of the 42nd division were battling in mortal, hand-to-hand combat with the Germans in the streets of Sergy. The enemy troops were of the 4th Prussian Guard, grim and spirited fighters embittered by recent German setbacks, veterans all and determined men.

Twice the Americans were pushed out of Sergy, but thrice the Yanks returned, and the third time the Americans captured the entire village. Again the men of the Rainbow division had proved to be of heroic mould.

In the St. Mihiel drive, launched in mid-September, the 42nd, with the 1st and 2nd, formed the spearhead of the attack which penetrated deepest into the enemy positions. In the main attack, the 2nd division captured Thiaucourt, the 1st took Nonsard, and the 42nd division drove through to Pannes.

Through the thick of the heaviest action of the Meuse-Argonne operation, the Rainbow carried on. It penetrated the Kriemhilde line, swooped up the fire-swept slopes about Romange and Cote Dame Marie, it seized Cote de Chatillon by skillful infiltration behind its protective wire, and early in November, on the extreme left flank of the American attack, it began to fight through Bulson, Thelonne and Bazelles, on the Meuse, to gain the cherished final objective—Sedan.

The taking of Sedan, for sentimental and historic reasons, however, was left to the French 9th corps, on the left of the Rainbow. On the night of November 10 the 42nd division was relieved, and assembled in the area of Artaise-le-Vivier and Les Petites-Armoises.

The Full Tide of Victory.

The 42nd thus shared in the full tide of victory, on the morning of November 11, 1918. The American Second army was even then preparing for a general assault in the direction of Metz, in an offensive with the famous Mangin and 20 French divisions. The Meuse had been crossed, French troops in Sedan in retaliation for the terrible French defeat there in 1870; the Germans were on the run, almost in utter rout.

Naturally, the Rainbow was one of the crack divisions of the AEF chosen to be a part of the American Army of Occupation. Concentrating near Stenay, it began the long hike into the Rhineland on November 20. On December 14 it took its station in Germany in the Kreis of Ahrweiler. Training continued there, on the steep hill of the Rhineland, through the winter and spring of 1918-1919, until April 5, when the division began entraining for Brest. On April 9 the first element to sail for the United States, the 117th Trench Mortar Battery, boarded a transport for an American port. By May 12, demobilization had been completely effected at Camps Upton, Dix, Grant and Dodge.

"After the storm, the rainbow!"

GEN. DOUGLAS MacARTHUR
 ... he named it the "Rainbow" division

Added Many Names to Our Roll of Heroes

as a peacetime accomplishment—his writing the poem "Trees."

The 42nd division was made up of the following outfits:

83rd infantry brigade; 165th infantry, 166th infantry, 150th machine gun battalion.

84th infantry brigade: 167th infantry, 168th infantry, 151st machine gun battalion.

67th field artillery brigade: 149th field artillery (75's), 150th field artillery (75's), 151st field artillery (75's), 117th trench mortar battery.

Divisional troops: 149th machine gun battalion, 117th engineers, 117th field signal battalion, headquarters troop.

Trains: 117th train headquarters and military police, 117th ammunition train, 117th supply train, 117th engineer train, 117th sanitary train (ambulance companies and field hospitals 165-168).

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

GOD PROVIDES FOR HIS PEOPLE

LESSON TEXT—Exodus 16:11-18; 17:3-6.
 GOLDEN TEXT—Give us this day our daily bread.—Matthew 6:11.

Only God can provide the necessities of life. Rationing has taught us that lesson anew if we have been at all thoughtful about it. The plan is one of sharing. Sharing what? The food and other provisions which come to us from God's hand. Unless our crops are good there will be less to share. Only God can help us.

This was the lesson Israel learned in the wilderness. To reach the goal to which God was leading them they must pass through the wilderness. Not only were there many weary miles to travel, but there were privations to be borne. Life is like that.

Now they cried for food. Note how elemental are man's needs in the final analysis—bread and water. The very things we take almost for granted as we concern ourselves with life's weighty interests and profound problems become, if lacking, the only things that have any real meaning. And who is it that can provide them? No one but God Himself.

I. Bread from Heaven (Exod. 16:11-18).

Israel's longing for meat was met by the miraculous coming of quantities of quail (v. 13). But that was not the food to sustain them day after day. For this they needed bread, and it came from heaven, every day until they entered the promised land (Josh. 5:12).

Observe four things about the manna.

First, it was a divine provision. There are responsibilities in life which we may bear—and must bear—but in the ultimate meeting of our real needs we must look to God.

Secondly, it was a daily provision. What forehanded folk many of us are, and no doubt rightly so, for God puts no premium on improvidence. But once again we must recognize, as did Israel in receiving the daily manna in the wilderness, that ours is indeed a moment by moment existence.

We plan bravely for the next decade or the next generation, but as a matter of fact it can only come to pass "if the Lord will" (read James 5:13-17).

Next, it was a limited provision—enough for the day and no more, except for a double portion on the sixth day, and none at all on the Sabbath. These provisions were made clear to Israel, and yet there were those who attempted to lay up for the morrow, and some even went out to seek manna on the Sabbath day.

We marvel at their stubborn obtuseness, but are we not often just like them. Some there are who are always expecting that the laws of both God and man should be set aside for them, but they come to grief.

Finally, it called for diligence and action on their part. They had to be out early each day (except the Sabbath) to gather it. God's mercies are for those who are willing to obey Him. He gives to those who receive by active faith.

II. Water from the Rock (Exod. 17:3-6).

"And the people thirsted"—for the daily manna was not enough, they must have water. Needy, yes, constantly needy are God's children.

"Every life knows the bite of necessity . . . every soul cries out in pain because there is wanting some completing favor, some culminating and all-containing benediction. Here it is bread; there it is water; but everywhere a famine . . . in many a case a famine of soul, a spiritual destitution, a consciousness of a void which time cannot satisfy or space content."

God always provides. There is a rock in the wilderness. But what pleasure does a murmuring people find in a rock when they famish for water? It is God's delightful custom to meet our needs in unexpected ways and by means which we do not understand. Even our physical necessities come from unthought of sources.

III. Christ, the Bread and Water of Life.

Our lesson does not give the New Testament application of Israel's experiences, but let us not miss that blessed spiritual truth.

In John 6:31-33, Christ is declared to be the true bread from heaven, of which the manna was but a type.

Paul speaks in I Corinthians 10:1-4 of this incident in the history of Israel, saying that they "did all eat the same spiritual meat, and did all drink the same spiritual drink; for they drank of that spiritual Rock that followed them: and that Rock was Christ" (see also John 4:14).

Hungry and thirsty soul, you who are still unsatisfied after tasting all that life apart from Christ has to offer, will you not, just now, take Him?

OUR OWN QUESTIONS AND ANSWERS ON VACATION GAS

Q.—What is meant by a single round trip to a cottage?

A.—Don't begin this by getting into an argument.

Q.—Instead of driving to a vacation place 15 miles away and return it is okay if I drive to one 30 miles away and leave the car there until the war is over?

A.—If the garage people don't object.

Q.—What is the meaning of the clause "for vacation purposes for which adequate alternative transportation is not available"?

A.—That is put in to make it harder.

Q.—What is "adequate alternative transportation"?

A.—Boy, will the ration board get into arguments over that one!

Q.—When is alternative transportation really "available"? A bus runs to my vacation place but it is always crowded. Does that constitute available transportation?

A.—Lissen, save time by seeing your legal staff.

Q.—What is all this certification business? How do I certify that I have enough gas, or coupons for enough gas, for a vacation trip?

A.—You must put it in writing.

Q.—Won't OPA take my word?

A.—You've been an A card holder long enough to know your word is never taken.

Q.—Do I really have to certify my speedometer reading before I leave?

A.—Yes, sir. The OPA wants to start you off on your vacation under the usual suspicions or not at all.

Q.—Must I certify that I have a vacation place to go to?

A.—Positively. You might be fooling the OPA.

Q.—How?

A.—By just using the gas without going on a vacation.

Q.—What would be the difference. It would be the same gas wouldn't it?

A.—There you go quibbling again.

Q.—If I am driving to my cottage and inspectors hold me up as a pleasure driver what do I do?

A.—You show them a "vacation validation" certificate. This makes the vacation valid.

Q.—But does it make me valid?

A.—On an A card you can never be quite valid.

Q.—I have a cottage 20 miles away. A neighbor has a better one 40 miles away and wants me to spend my vacation with him. If we pool our gas we could make this trip using less fuel than if we took separate ones. Would this be permitted?

A.—Probably not. It sounds too reasonable.

Q.—After reading all the requirements I do not feel like going on a vacation by car. Must I?

A.—So you're running out on us after all this trouble!

ADOLF DECIDES ON A NEW UNIFORM

"I am putting on the uniform of a soldier, never to take it off until Germany is victorious everywhere." Hitler in 1939.

Tailor—Ah, Herr Hitler, what can I do for you?

Hitler—I need some new clothes.

Tailor—I hadn't expected you so soon.

Hitler—That goes for me, too. But it's an uncertain era. Anyhow this uniform hasn't stood up the way it should.

Tailor—After all, you've had it ever since 1939. Has it had steady wear?

Hitler—Has it!

Tailor—Is this the one you put on when the war broke out and said you would never take off until it ended with victory?

Hitler (sadly)—Ach, yes!

Tailor—Well, there's a limit to the wearing quality of any material. It looks pretty worn everywhere except in the seat. That's as good as new.

Hitler—That's easily explained: I haven't had any chance to sit down in it.

Tailor—Were the pants always as baggy as this?

Hitler—I'm not sure whether they were that loose to begin with or whether I've shrunk.

Tailor—Well, let us go on. Now about the length of the pants?

Hitler—Make them a lot shorter than the old ones.

Tailor—A lot shorter? You don't want running pants?

Hitler—IZZAT SO!!!

A bull market in wild animals is reported. So many human beings these days are discovering they can use them for doubles.

MANPOWER SHORTAGE

Utterances made by the fair sex in recent years:

1941.—"What a man!"

1942.—"What? A man!"

1943.—"What's a man?"

Descriptions of the Hour: He had the worried look of an "A" card vacationist.

ASK ME ANOTHER?

A General Quiz

The Questions

1. If you are contumacious, you are what?
2. How many locks has the Suez canal?
3. In the United States navy which flag may be flown above the Stars and Stripes?
4. What great writer's middle name was "Makepeace"?
5. In what part of his body did Paris mortally wound Achilles?
6. What is Hedonism?
7. Who discovered Cuba?
8. A majority of our Presidents have been of what occupation?
9. Who was Lawrence of Arabia?
10. In what year did the regular air mail service commence?

The Answers

1. Rebellious.
2. The Suez canal has no locks. It is at sea level.
3. The church pennant.
4. William Makepeace Thackeray.
5. The heel.
6. The doctrine that pleasure is the chief or sole good in life and that moral duty is fulfilled in the gratification of pleasure-seeking instincts.
7. Columbus.
8. Lawyers.
9. T. E. Shaw, an Englishman who did much to help the Arabs.
10. 1918—New York to Washington.

Housewives Are Urged To Turn in Waste Fats

That there is an acute need for more fats and greases is emphasized in a recent statement by Donald M. Nelson, chairman of WPB.

Over 85 per cent of all glycerine produced is now used for military purposes and the need is increasing. Housewives have been most co-operative in response to appeals to save waste fats; but government surveys reveal that while six out of ten women are saving fats, only three out of ten have thus far been delivering their waste fat to meat dealer collectors.

Directions are very simple. Housewives simply strain waste fats of every kind into a clean can and, as soon as the can is full, take it without delay to a meat dealer or frozen food locker operator. Any clean can will do.

RELIEVE MOSQUITO BITES

For stings or itches, those mosquito torments that so often spoil summer fun, get Mexsana, formerly Mexican Heat Powder.

Early Permanent Waving
 The Egyptian women of Cleopatra's time practiced permanent waving.

Baby's Choice

FAULTLESS No. 10 WONDER NIPPLES

Highest quality, translucent rubber. Triple-perforated. Withstand repeated sterilizing. Fit all standard narrow mouth nursing bottles. Slip on easily, anchor firmly. AT ALL DRUG STORES, 3 for 18c

SNAPPY FACTS ABOUT RUBBER

The annual consumption of gasoline on highways, which has a bearing on rubber consumption, jumped from 8,500,000,000 gallons in 1925 to 22,000,000,000 gallons in 1940. Some figures to keep in mind when gasoline shortage is mentioned today.

In general, guayule rubber has the same qualities and characteristics as plantation tree rubber, except that it has a high resin content, about 20 per cent, compared with 4 per cent in tree rubber.

The first manufacture of rubber footwear outside of the United States took place in 1856 in Scotland.

Klemme Schools Ready To Open Monday, Aug. 30th

TEACHING STAFF IS NOW COMPLETE FOR KLEMMME SCHOOL SYSTEM

Course Of Subjects Will Again Offered Students This Year

Leo J. Esbeck, superintendent of the Klemme Schools, announced this week that the teaching staff for both the grades and high school has been completed for the year ahead.

Many schools are finding it difficult to procure teachers and have it necessary to cut down on courses offered. The Klemme is fortunate in being able to have an excellent teaching staff and will be able to offer a variety of subjects.

Classes will begin here Monday, August 30th with the following teaching staff:

Leo J. Esbeck, superintendent, Iowa State Graduate of Iowa State College with a B. S. degree and received his M. A. from the University of Iowa. Mrs. M. Turgason, of Klemme, degree graduate of University of Iowa will teach Social Science and English.

Vera Campbell of Sioux Falls, Graduate of Morningside College with a B. A. degree, will teach mathematics and speech.

Phyllis Shearill, of Waterloo, Graduate of Cornell College, degree B. A. will teach vocal and instrumental music.

Dorothy Ann Dieterich of Dubuque is a graduate of the University of Dubuque with a B. A. degree. She will teach Home Economics and direct girls' physical education.

Grade Faculty Named

Clea Smith, of Goodell, is teacher in the first grades.

Barz Voetberg, of Klemme, former teacher here, will teach the 5th and 6th grades.

Mary Jane Holm of Britt will teach the 3rd and 4th grades.

Alma Bugh, of Cherokee, will teach Kindergarten and the 1st grades.

Of the faculty, with the exception of Mrs. Smith, will be new to the schools this year.

Prospective student who desire information may contact Esbeck by telephone and he is glad to interview students regarding the course of study and other matters pertaining to local schools.

BEATABLE TEAM

On Oct. 1 to Oct. 8, Iowa newspapers will observe National Paper Week and this time use the slogan "A Free Press For Every People - An Unbeatable Team."

What You Buy With WAR BONDS

Free the Seas

When we win the final battle with the Nazis all navy men are free. We must win the battle of the sea, that is to free the sea of the German U-boats.

Year ago we were building destroyers and nearly 200 destroyers just about enough for a two navy.

"We have come to realize that the war is to the finish, 'winner take all,' and our Government is going to win a five ocean navy."

That is why we are being asked to increase our subscriptions for war bonds. That is why we must

SUPT. LEO J. ESBECK

PLANS BEING MADE FOR 1944 PROGRAM

Help to Individual Farmers Is Extension Service Basis of Plan

Benefit that the success of the production program will be determined by the individual farmer will be the basis of the 1944 program of the Agricultural Extension Service of Iowa State College.

R. K. Bliss, director of the Agricultural Extension Service, has announced that the Extension program will be set up in recognition of the fact that the individual farmer makes the final decision as to what will be produced. The program will strive to develop methods of helping each individual farmer.

Bliss says that "Iowa is a key state, the front line in the battle for food and must lead the parade in food production in 1944."

Advisers of the Extension Service already planned for each individual farmer include a live radio, recording and management program, and winter planning starts.

Stress Efficiency

A farm efficiency program will be another phase stressing labor, shortcuts, machinery, and making the best use of labor and machinery and neighborhood and trade area responsibility for getting the job done.

Conservation of food and clothing, nutrition and home management will be given a share of attention.

A spring program of gardens is planned together with care of livestock, prevention of animal disease and specific emphasis on helping the farmer make good in his 1944 individual farm plans.

Methods that have proved successful in the past will be continued by the Extension Service. Bliss has pointed out of members of the Extension Service through out the state that all farmers must be reached by literature and personal contact if the Extension Service is to do its part in maximizing food production in Iowa in 1944.

Iowa Led Way

The Agricultural Extension Service in Iowa planned and started the increased livestock production program in 1940, months earlier than other sections of the country and in time for farmers to make plan of reaching all farmers to make plans for 1941. It developed the plan of reaching all farmers with brief direct literature.

It developed the neighborhood block leader system so that all farmers could be reached personally. This plan since has spread over the United States.

Likewise, Bliss points to the fact that the Iowa Agricultural Extension Service has pioneered a farm efficiency and farm labor self-help program based on better farm and neighborhood organization in the use of machinery, labor, power and the development of labor-saving de-

Christmas Packages For Overseas Should Be Mailed Out Soon

MAIL PACKAGES OVERSEAS FROM SEPT. 15-OCT. 15

One Each Week May Be Sent Without Request From Man in Service

Overseas packages may be sent without request from men and women in the armed services from Sept. 15 to Oct. 15 according to an announcement received from Theodore H. Hoffman, St. Louis director of home service, midwestern area.

An official war department release on the subject follows:

Christmas packages may be mailed to American soldiers serving overseas with no presentation of a request from the soldier during the period from Sept. 15 to Oct. 15, which has been designated as Christmas mail month for soldiers overseas.

"These Christmas Gift packages will be accepted for mailing only within the present limitations of weight, 15 inches in length and 36 inches in length and girth combined."

Christmas packages mailed during this period should bear the endorsement "Christmas Gift Parcel." Only one such package will be accepted for mailing by or on behalf of the same person or concern or for the same addressee during any one week.

"Under the relaxation of the overseas mail restrictions during this period, it will not be necessary for the mailer to present either a request or any envelope bearing an APO cancellation at the time of mailing and every effort will be made to discourage the mailing of fragile articles."

"The army postal service of the army service forces reports that only through the whole-hearted cooperation of the mailing public in complying with the above mailing rules and dates will it be possible to deliver on time the tremendous volume of Christmas mail to American soldiers overseas which is expected this year."

It also has developed trade area responsibilities and cooperation in getting certain seasonal jobs done such as canning, corn detasseling and the like.

REED SAYS CORN PROGRESS IS VERY GOOD

Rains Cause Damage in Central, Southern Iowa

Outside of areas damaged by heavy rains last week, corn has made "good to excellent" progress, Charles D. Reed, state meteorologist, recorded Wednesday in his weekly weather and crop bulletin.

In the northern half of the state and in the earlier fields in the southern half, he said, the corn has reached the blister and roasting ear stages and indicated productivity will largely offset the wet, weedy and damaged spots in some fields.

Oats harvest is nearing completion, but has been delayed by rains and made difficult by the heavy undergrowth of weeds and grasses. Yield and quality reports have been good for the new rust resistant varieties which were badly rusted. Alfalfa and other hay crops and pastures are making "excellent" growth generally, the bulletin said, and hemp varies in height from 4 to 10 feet.

ANTI-FREEZE WILL BE AVAILABLE TO MOTORISTS

Mountain States Will Receive A Permanent Type Anti-freeze

The war production board Thursday assured the nation's motorists an ample supply of anti-freeze for next winter's driving with an order releasing permanent type radiator solutions for 12 western high altitude states.

The permanent fluids were made available to any persons in Arizona, California, Colorado, Idaho, Montana, North and South Dakota, Nevada, Oregon, Utah, Washington, and Wyoming, where motorists must contend with boiling points, and hill driving.

Forty-five million gallons of Ethyl alcohol have been allocated for civilian use in anti-freeze mixtures for next winter. The WPB said that supply will be adequate for motorists in the 36 states not affected by the permanent type order.

Save your silk and nylon hoes. They may save a life.

FUNERAL AT KANAWHA FOR ALBERT CAROLUS

Burial services were held Tuesday at the Goodell Amsterdam cemetery for Albert Carolus, Sr. 73, who died Saturday at the home of his daughter, Mrs. Fred Tehark at Kanawha Church services were held at the Kanawha Reformed church with the Rev. Mr. Eckhoff of West Bend in charge.

Mr. Carolus was born in Holland July 1, 1870. With his wife and children he came to America in 1903. His wife died Dec. 25, 1939 while they lived in Belmond. He had arthritis and was in a wheel chair for 12 years.

Ten of his 12 children survive as follows: Albert of Goodell, Mrs. Grace Tehark of Galt, Mrs. Elsie Tehark of Kanawha, Ralph of Lima Springs, Mrs. Alice Lateer of Clarion, Fred of Galt, Dick of Clarion, Mrs. Dorothy Noble of Garner, Henry of Walker and Harold of Clarion. There are 35 grandchildren.

WAYNE PAVEY GOES TO WEBSTER CITY AS BUTTERMAKER IN LARGE PLANT THERE

Wayne Pavey, who has been employed at the Klemme Co-operative Creamery for the past 11 years and 8 months, has resigned his position there to accept a position as a buttermaker at the Webster City Creamery.

The Pavey family expects to move to Webster City in about a week, or as soon as they can find suitable living quarters.

Wayne is a graduate of the Klemme high school and began work at the creamery. He has been active in Boy Scout work and for a time was scoutmaster of Troop 56 here. He is also an active Red Cross worker and is a qualified instructor in Red Cross First Aid work and conducted classes in First Aid last winter.

In his new work at Webster City Mr. Pavey will also gain experience in the manufacture of ice cream, and cottage cheese. The plant also sells milk and cream.

"ILL WIND" MAKES LUMBER

After a severe windstorm on June 24 had blown down old trees on the arm of Ed Reitsma five miles east of Sheldon, the enterprising farmer set about salvaging lumber from the damaged 75-year-old trees. With the aid of a neighboring saw mill company crew he was able to get about 40,000 square feet of fine boards.

WAS REFORMED CHURCH PASTOR HERE 1901 TO 1909

Died Wednesday At His Home In Monticello, Wisconsin After A Three Month's Illness

Dr. Albert D. Muehlmeier, 75, pastor of the Zwingli Evangelical and Reformed Church, Monticello, Wisconsin, for 32 years prior to his retirement in 1938, died at 2:30 this morning in his home following a 3-months illness. Death was attributed to old age complications.

In the spring of 1942, Dr. Muehlmeier was seriously ill and for many weeks was a patient in the Monroe hospital. However, early in August last year he was sufficiently recovered to attend a special service in observance of the 50th anniversary of his ordination in the Christian ministry.

Noteworthy Record

He had a noteworthy record of service to his church and to his community. The Monticello church constituency increased during his years of service from 60 to 275 families. During his active ministry in the Monticello parish he baptized 982 children, confirmed 725 young people, married 306 couples and conducted 421 funerals. He preached about 1,600 sermons and for many years played the organ and directed the choir in the Zwingli church in addition to having complete charge of the regular worship service.

Dr. Muehlmeier was born in the Wisconsin use at Franklin, Wis., on July 1, 1868, the son of Herman August and Sophia Waldecker. Muehlmeier He took his college and seminary work at Mission House, at that time his father, founder of that institution, was its president. He was graduated from the college in 1888 and from the seminary in 1891. He attended McCormick seminary, now known as the Presbyterian theological seminary of Chicago, from 1891-92. On Aug. 31, 1892, he was ordained into the ministry by his father and his brother-in-law, Rev. W. Steinicker.

Last December he and his wife the former Caroline Howard celebrated the golden anniversary of their marriage, solemnized Dec. 7, 1892, at Dale, Wis. Dr. Muehlmeier's first pastorate, where he served from 1892 to 1898. He came to Monticello May 15, 1898, serving until called to the Klemme, Iowa, pastorate on Aug. 11, 1901. He returned to the Zwingli and Reformation congregations on July 4, 1909, and served in Monticello until he retired.

The honorary Doctor of Divinity degree was conferred by Mission House in 1937.

Surviving are the widow; one son, Ewald, Milwaukee, seven daughters: Mrs. Arthur G. Raiche and Mrs. Richard Sack, Milwaukee; Mrs. Charles Rolph, Mrs. Wm. V. Baebler and Mrs. John S. Richards of Monticello; Mrs. Herman Meiers, Madison; and Mrs. C. Harold Nicholas, Cudahy; 15 grandchildren; three sisters, Mrs. J. D. Ellicker of Madison; Mrs. J. W. Grosshuesch, Sheboygan; and Mrs. Kuentzel of Elkhart Lake. His parents, a brother, Otto, and a sister, Mrs. Steinicker, are deceased.

Last rites were conducted Sunday afternoon in the Zwingli Evangelical and Reformed church, with the Rev. A. R. Achtemeier, present pastor, officiating.

REUNION

Mrs. Elliot Powell of Rockwell City was pleasantly surprised not long ago to receive a visit from her brother, Capt. William Holt of Honolulu whom she had not seen for more than twenty-five years. Capt. Holt, a veteran of the first world war, was in government service when the present war began. He was recalled to Army duty at that time, but now is on leave to bring his daughter to the United States to enter college.

Uncle Phil Says:

have "inalienable rights" on one hand and inalienable duties on the other.

Failure is a man who sells his experience for less than he paid for it.

A good comedian is worth his weight in gold.

A wise man never lets trouble interfere with his work, but makes work interfere with his trouble.

You can indulge your eccentricities when you are poor, but you stay poor.

The man who watches the clock always be one of the hands.

The man who slings mud loses and.

U. S. Armed Forces Use Parachutes for Pigeons

Carrier pigeons employed by the armed forces are today being lowered from planes in crates, suspended by midge-sized parachutes. If pigeons were released at 5,000-foot altitude from a plane flying 400 miles per hour without protection, wing feathers would be blown off by the blast of air from the propeller, and birds would freeze to death. After a parachute has descended several hundred feet in the crate, the door of the crate is automatically released, releasing the bird to its flight.

HOUSEHOLD MEMOS by Lynn Chambers

Ripe Cherries Make Sweet Jams
(See Recipe Below)

Jelly Season's Here!

Think of the good cheer in a sparkling, quivery dish of jelly to go with your golden brown biscuits or rolls in the cold of winter. Do you need more than that to start you on a spree of jelly-making? My guess is no.

There's a great interest in jelly-making in spite of sugar rationing, for many is the smart homemaker who realizes what a spark and zest those little bits of bright-colored jelly can lend to wartime meals. So, go out into the berry patch, and let's get started on a batch of jelly.

Cherries, plums and blackberries are coming into season and make splendid jellies. They're all easy to handle and make nice, rich, luscious jellies.

***Ripe Sweet Cherry Jam.**
(Makes 7 6-ounce glasses)
3½ cups prepared fruit
4 cups sugar
1 box powdered fruit pectin

To prepare fruit, pit about 2½ pounds fully ripe cherries. Crush thoroughly or grind. If a stronger cherry flavor is desired, add a few crushed cherry pits to fruit during cooking.

Measure sugar into dry dish and set aside until needed. Measure fruit into a 5- or 6-quart kettle, filling up last cup with water if necessary.

Place over a hot test fire. Add powdered fruit pectin. Mix well and continue stirring until mixture comes to a hard boil. Pour in sugar at once, stirring constantly. Continue stirring, bringing to a full, rolling boil and boil hard 1 minute.

Remove from fire. Skim. Pour at once into sterilized jelly glasses and paraffin at once.

***Ripe Plum Jelly.**
(Makes 7 medium glasses)
3 cups juice
4 cups sugar
1 box powdered fruit pectin

To prepare fruit, crush about 3 pounds fully ripe plums. Do not peel or pit them. Add ¾ cup water, bring to a boil and simmer 10 minutes. Place fruit in jelly bag or cloth, and squeeze out juice. Add small amount of water to pulp in jelly cloth and squeeze again, if there is a slight shortage of juice.

Measure sugar into dry dish and set aside. Measure juice into saucepan. Place over hottest fire. Add powdered fruit pectin, mix well and continue stirring until mixture comes to a hard boil. Pour in sugar at once, stirring constantly.

Lynn Says:

Jelly Forum: Pectin is the magic ingredient that makes jam "jam" and jelly "jelly." There must be a just right amount of it. Pectin is a natural jellying substance found in fruits and berries, but when the fruit or berry is shy on it, a liquid or powdered form of pectin may be added.

Jams and jellies may be kept for various lengths of time, but for best practical purposes it is best not to try to keep them for over a year.

Melt paraffin for jelly in a small pot over boiling water. Paraffin should not be smoking hot because it might lend a disagreeable odor to the jelly or jam.

It's possible to put up fruit juice to be made into jelly later if you do not have enough sugar to do it during the summer. Prepare fruit according to directions given in the jelly recipes but do not add water to the recipe. Squeeze the juice in a jelly bag if it is for jelly. Fill hot sterile jars for jelly. Fill hot process in a boiling water bath for 20 minutes.

Your Canning Cupboard

- *Ripe Sweet Cherry Jam
- *Ripe Plum Jelly
- *Cucumber-Raisin Pickles
- *Ripe Cucumber Sweet Pickles
- *Peach Nectar
- *Recipe Given

Continue stirring, bring to a full, rolling boil, and boil hard ½ minute. Remove from fire, skim, and pour into glasses quickly. Paraffin hot jelly at once.

Blackberry and Sour Cherry Jam.
(Makes 8 medium glasses)
3½ cups prepared fruit
4½ cups sugar
1 box powdered fruit pectin

To prepare fruit, crush thoroughly about 1 quart fully ripe blackberries. Pit 1 pound fully ripe cherries. Crush thoroughly or grind. Combine fruits. Measure fruit into a kettle, filling last fraction of cup with water if necessary.

Place over hottest fire. Add powdered fruit pectin, mix well and continue stirring until mixture comes to a hard boil. Pour sugar in at once, stirring constantly. Continue stirring, bring to a full rolling boil, and boil hard 1 minute.

Remove from fire, skim, pour quickly. Paraffin hot jam at once.

You'll enjoy pickles, too, for your winter menu pickups. I've found some perfectly delightful recipes for you which will not take too much sugar—just in case you want to use most of the sugar on jams and jellies. Remember that you must use a pure apple cider vinegar and good, firm, fresh cucumbers to get nice, crisp pickles:

***Cucumber-Raisin Pickles**
4 cups sliced cucumbers
1 cup salt
1 cup white vinegar
1 cup sugar
6 tablespoons raisins
1 tablespoon celery seed
1 tablespoon mustard seed

Soak cucumbers overnight in salt solution made of 1 cup salt to 1 gallon water. Drain. Combine remaining ingredients and heat to boiling. Add cucumbers. Boil 10 minutes. Pour into sterilized jars and seal at once.

***Ripe Cucumber Sweet Pickles.**
8 large ripe cucumbers
½ pound stick cinnamon or oil of cinnamon
1 ounce cloves (or oil of cloves)
1½ pints vinegar
3 pounds sugar

Parade the cucumbers, quarter. Take out seeds and cut quarters into medium-sized pieces. Scald in salted water (2 tablespoons salt to 1 quart water). Drain and simmer in clear water until they are tender but firm. Drain well. Tie the spices in a bag and boil them with vinegar and sugar for 5 minutes. Pour this mixture over cucumbers, cover jar and set away. Next day pour off syrup and boil for 10 minutes, then pour over cucumbers again. Flavor is improved by repeating the process several times. With last heating, place pickles in clean, sterilized jars, cover with hot solution and seal at once.

Like fruit drinks for winter? You can make delicious nectars out of fruits easily and use them when fresh fruit juices are no longer available:

***Peach Nectar.**

Select sound, ripe fruit. Peel and crush. Combine 4 cups fruit with 3 cups water and heat slowly to simmering. Press through colander, then through fine sieve. To each pound of fruit pulp and juice, add ¾ pound of sugar. Bring to simmering temperature. Stir until sugar is well dissolved. Pour into clean, sterile jars. Put on cap. Process 30 minutes in a water bath at simmering temperature (180 degrees F).

If you have a canning problem, write to Miss Lynn Chambers, Western Newspaper Union, 210 South Desplaines Street, Chicago, Ill. Please enclose a self-addressed envelope for your reply.

Released by Western Newspaper Union

BASEBALL A LA WAR COMMUNIQUE

NEW YORK.—It was admitted here today that a battle between the New York Giants and the Chicago Cubs is on. Official comment was limited, however, to a brief statement by the Giants that the fight is progressing favorably. Reports from Stockholm say that the Cubs have the upper hand. From Swiss sources comes a bulletin that the Giants scored heavily in the opening moments of the encounter.

By Reuters: The Giants claim an initial success. "We struck out two men in the first inning, and possibly three," said the statement.

The above was supplemented by the following bulletin from Giant headquarters in the third inning:

"Our side scored heavily in the second inning. It is believed we tallied five runs. Three runners were seen to cross the plate. One other runner was proceeding toward the plate when last reported. A fifth man was observed rounding third."

Later.—The Chicago Cubs deny a debacle. "At the moment of this bulletin," says an announcement from Cub headquarters, "one of our men has connected for two bases and probably three. He hit the second ball pitched, if not the first."

BERNE, SWITZERLAND.—The New York Giants, according to information here, had no pitchers knocked out of the box, as claimed by the Cubs. "All our twirlers carried out their objectives and returned safely," said a statement intercepted here.

NEW YORK.—No official announcement is available from either side, but on the basis of such information as can be pieced together the following summary is believed to be fairly accurate:

Giants: Six runs known to have been tallied; three runs probably tallied; four runs possibly tallied.

Cubs: Five runs known to have been tallied; five runs probably tallied; two runs thought to have been tallied.

Strikeouts: By Giants, eight positive, four probable. Cubs, four positive, eight probable.

VACATION DISCUSSION—1943

"Well, let's decide on our vacation, Wingate!"

"Let's! There's an outside chance something might come of it, Jennie, my dear."

"When shall we take our month's outing this year?"

"Our what?"

"Our three weeks."

"Are you crazy?"

"Oh, well, make it two weeks, then!"

"That's more like it. Let's take them in November."

"Where can we go in July or August for that matter!"

"You make it so involved, Wingate. Don't you want a vacation?"

"Certainly. But every time I begin planning one I imagine Eastman is watching me."

"Mr. Eastman says the government wants people to take vacations."

"Yeah. All he asks is that they don't use autos, buses or Pullman cars, that they don't travel very far and that they avoid starting off or returning on week-ends. You get a nervous collapse just trying to figure out how to do it."

"Our grandfathers and grandmothers took vacations without automobiles."

"Not in the places where we've been used to taking ours, dear."

"Traveling by railroad coach isn't a hardship, is it?"

"Not if you don't bruise easily."

"Lots of people travel that way when they need to go away for a rest."

"That's what makes them need to go away for the rest."

"You're just getting soft, Wingate. You need toughening up."

"A vacation this year is just the trick to do it. But assume we get some place. What do we use for transportation after we get there? You hate mules and I understand they don't keep camels."

"We can stay put after we arrive at the hotel."

"We never have."

"But this is different. A perfectly quiet vacation would do me good."

"It would be awful for me. I'd have to listen to all your squawks."

Donald Nelson says that next year American factories will turn out one complete airplane every four minutes. And as usual the public cries of "What's holding you up?"

This is pretty swift time for manufacturing a plane. But Uncle Sam is a speedy guy and we can hear him ordering "One four minute warplane! Sunny-side up!"

Maybe the heroes of this war will be the Minute Men in the Four Minute Bombers

For you to make

IF YOU crochet you can make lovely rugs for your home—if you are a knitter, you can use that skill on rugs, too! The round pinwheel rug is crocheted of just 4 balls of rug yarn in a dark color and 4 balls of light color. The knitted rug is a yard square and easy to make.

Rug (Pattern No. 5296) send 15 cents and 1 cent postage in coin, for each pattern, the pattern number, your name and address.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers. Send your order to:

Ink Spots
And Spatters
By Jergie

THE PREACHER PULLED A
FAST ONE ON EDITOR

Last Friday evening Rev. H. E. Harvey phoned the Editor to see if he would like to watch Harvey make apple cider. We would, we did.

The Reverend gentleman showed us how to crush the apples and squeeze out the juice in the cider mill. And of course asked us to try it out. We did.

We were assisted by Elwood Harvey (the preacher's son and also the printer's devil). Then C. G. Waterman showed up, took a look at all the activity and decided to go home and get some bottles. (But that was only an excuse to get out of a little work and to prevent getting mugged up a bit.)

Next Rev. Harvey disappeared from the scene, giving the excuse that he had to show a Belmont preacher and his wife around the church. Another piker.

The Editor and the "devil" continued to crush and squeeze apples until the last apple had gone thru the cider press.

About that time Waterman arrived on the scene and the preacher sneaked back. And both began guzzling the delicious cider the Editor and devil had made.

We hope the preacher's cider turned out as a corker. And that goes for the work dodging banker too.

We are through making cider.

CROCHETED SOCKS ARE
THE LATEST FAD

The other day Ed Jacobs was sitting in front of his store.

But the remarkable thing was the loud pair of socks he was wearing. "Regular nigger socks! Bright yellow, with red yarn crocheted around the tops."

We inquired why the fancy red tops, Ed. And therein lies another story.

Ed was getting out a pair of clean socks, looked them over and asked his wife how come the red yarn got around the tops. She did not know so Ed put on the socks and went up town.

Along came Leo Esbeck also with highly colored crocheted tops on his socks. And Esbeck did not know how the decorations got on his socks.

The men did some fine detective work and learned that the neighbor Mrs. H. D. Ramsay, had pilfered the socks from the washline put on the fancy work and then got the socks back to their happy home at the Jacobs and Esbeck houses.

(We might get shot for this.)

LOCKED IN THE CHURCH
NO WATER-MELON

Last Thursday evening after the Methodist choir were through with their rehearsal Ira Overholt very casually remarked: "There's an ice-cream watermelon in the kitchen."

Mrs. Marie Black and Mrs. Clarence Waterman waited for no further explanation, but dashed into the church kitchen at high speed to be sure to get their share of the delicious melon.

But what the ladies did not hear was the rest of Overholt's sentence: "so I wish there was."

The ladies felt quite foolish as a search did not reveal any melon. They decided to hide in the coal

bin to see who else would "bite" on the gag nobody did.

Thinking that the ladies had gone home, Rev. Harvey locked up the church, leaving the two ladies in the coal bin.

How they got out as a "military secret," and your guess is as good as mine.

But it was rumored around that a basement window was found to be open next day!

RUNGE TAKES LARGE CAT-
FISH IN IOWA RIVER

"Jack" Runge set up a mark for the local anglers to shoot at when he hooked and landed a five pound catfish while fishing at the Stille bridge at the Iowa River west of town Sunday morning.

This is, without a doubt, one of the best game fish caught in the river in the past couple of years.

KIEMME FARMER HAS SCYTHE
MADE IN CZECHOSLOVAKIA

Our local blacksmith, W. F. Pavay, called our attention Tuesday evening to the fact that he had something unusual in his shop. It was a scythe owned by Jim Vrba, who resides on his farm west of town.

The scythe owned by Mr. Vrba, came from Czechoslovakia and is very light in weight, in fact the blade weighs only slightly more than one pound. The blade is rather broad and slightly rounded on the under-side, and is made of very light, fine steel. In order to take nicks out of the blade and to sharpen it, it is not ground, but is hammered out and then honed with a fine stone to make it razor-sharp.

We have often wondered how the women in foreign countries could swing a scythe in the grain fields, but now we know, because the scythes they use are so light and easy to handle.

A man was stranded on a desert island, he was afraid of cannibals so he moved very cautiously. As he was climbing up a small hill he heard voices.

"Who in the hell trumped my ace?"

The man lifted his eyes to heaven and said: "Thank God, there are Christians on this island."

A lady was riding on the train with her son. When the conductor came by she said, "A fare for me, and half fare for the boy."

The conductor looked at the boy and said, "Lady, that boy's got long pants on."

"In that case," said the lady, "a full fare for the boy and half fare for me."

FEW IOWA FARMS ABANDONED
REPORT SHOWS

Only 98 Idle Farms in
State; Low in Nation

Fewer farmers were abandoned in Iowa in proportion to the number operated than any state in the nation between 1930 and 1940, it was disclosed Friday in a newly published report of the census bureau.

Ninety-eight abandoned or idle farms were recorded in Iowa, or about one for every 2,000 operated farms. There were 213,318 operated farms listed in the 1940 census for Iowa.

An all day meeting for teachers of the rural schools in Hancock County will be held in the courtroom at Garner, on Thursday, Aug. 16, beginning promptly at 9 A. M.

A program in keeping with text-book uniformity, dealing with reading, will receive the most emphasis. Reading Course of Study Handbook will also be discussed. The program should be instructive as well as inspirational in nature.

At the close of the meeting supplies will be issued to you. Bring your own shopping bag as we are unable to secure any for distribution this year.

A representative from the Bell Subscription Service will be on hand as usual, to handle magazine subscriptions for those desiring them.

This is an official notice and your attendance is requested.

Chas. S. Whitney,
County Superintendent.

Liver sausage or braunschweiger has the same high food values that other livers possess and will be enjoyed by the family when liver in other forms might be refused. For a delicious hot sandwich, mashed liver sausage may be spread on a slice of bread toasted on one side. The sandwich should then be sprinkled with grated onion or grated cheese and browned under a broiler flame.

BETTER IOWA
GARDENS
Storage of vegetables for winter use is a major problem that must be solved by each family that has no storage facilities. The family that wishes to make a small storage room in the basement or build a cave storage should get the job started soon. Those who plan to build a small vegetable and fruit cellar connected with the basement can secure a blue print with specifications for 15 cents by writing to the Agricultural Extension Service, Ames, Iowa, and ask for the Midwest plan 73402.

Many storages need more shelf space than they now possess for storage of canned fruits and vegetables, as well as for the fresh products. Temporary shelves are easy to make by using large building blocks or bricks as a base for board shelves. Several tiers as long and broad as desired can be made upon which products can be stored.

Families intending to use a permanent storage room or cellar should stock up on sufficient storage containers such as crates, boxes, crates and lined apple baskets. Boxes, crates, baskets and the like should be paper lined and possess lids for storage of low temperature vegetables such as carrots, beets, and parsnips. Further information on storage is listed in pamphlet No. 70 on Vegetable Storage, available at no charge at the county extension office or from the Agricultural Extension Service, Ames, Iowa.

It is very important that every gardener not having land of his own make arrangements as soon as possible for garden space for next spring. The garden space should be plowing this fall. Those who had to garden this year on freshly plowed sod land were disappointed in the results. Sod land to be used for Victory Gardens next year by all means should be plowed this fall. Much better vegetables will be the result because the sod will have a chance to decompose, and pests will be destroyed by means of exposure.

There was no opportunity for the plowing of community gardens last fall because rationing was not in sight at that time. The opportunity is good this fall for plowing of community plots. All community gardens should be mowed if possible and plowed immediately. If it is not possible to fertilize the gardens, it is all the more important that they be fall plowed, then cool season vegetables can be planted in the spring. Far greater production will result next season.

CONSERVE & PRESERVE

A short crop in peaches promises high point prices if they're available at all. Plums are more plentiful, but the wise homemaker will conserve her winter ration points by preserving a supply of both.

The sharp sweetness of fresh fruits can best be preserved by freezing. Home-grown, tree-ripened fruit is most satisfactory, but in any case they should be just at the right stage for eating fresh. Peaches should be washed thoroughly in cold water, then scalded quickly and peeled. Bruised spots should be cut out.

Fruits may be sliced directly into glass, tin, or waxed paper cartons partially filled with a cold sirup made with 4 cups of sugar to a quart of water. Strips of paper board can be bent downward across the contents of the container to prevent the peaches from floating on top of the sirup and turning brown. Peaches are best if served while a few ice crystals are still present.

Plums are washed, pitted and sliced, then packed into containers with a sirup made of 6 cups of sugar to 1 quart of water. Plums usually are cooked before or immediately after thawing.

Peaches for canning should be immersed in boiling water for about 1/2 minute until the skins will slip easily, then plunged into cold water. After peeling and halving, the fruit should be precooked in sirup for about 5 minutes, then packed hot into hot jars and processed for 15 minutes in the boiling water bath.

In canning, each plum should be pricked with a needle or fork to keep the skin from splitting. They may be packed raw or precooked. With precooking the processing time is 5 minutes; without, 20 minutes is needed.

Around
Iowa
TASTY EATING
American Express Agent Elmer Watson of Denison who has handled all kinds of shipments from alligators, bees and frogs to ordinary livestock had rather a shock the other day when a crate containing two big live Texas rattlesnakes passed through the office destined for occupants of a nearby tourist camp. His curiosity aroused, he asked the consignees the purpose of the snakes he was told they were delicacies for the table. When dressed and "pickled", the snakes are rated a cut higher than chicken as food.

IOWA JUNGLES
"Taint corn alone that grows tall in Iowa this year. In some Iowa towns the weeds on vacant lots are so dense and high that neighborhood folks suggest the putting up of signs carrying the legend "No Hunting." The Onawa Sentinel remarks there is always the possibility of renting these lots to the government for maneuvers in "jungle hunting."

HOME FROM SEA
Howard Snell, 20, ship's cook, first class, was home again at Belle Plaine, after two years at sea in that time he took part in ten sea battles in the Pacific and was wounded once. He reports back to his ship Aug. 20 when the vessel emerges from dry dock.

TOOK JOB SERIOUSLY
When Joe Dumboltson, drayman of Marion, quit business the other day after 21 years of service both with horse-drawn and motor driven vehicles, the Sentinel devoted quite a piece praising his long record for efficient service and deploring the loss of the community. "Joe took his job seriously," the newspaper stated. "You could always depend upon him. Not only has he hauled the freight and merchandise for Marion business men but he carried most of the furniture up and down stairs. He hauled trunks to and from the depot day and night, in storm and sleet as in good weather. Service was his keynote."

LIFE FULL OF BUGS
While in Decord on Business State Entomologist Carl Drake of Iowa State College received a copy of a cablegram from England asking his advice on how to control grasshoppers in Africa. With the in-borers making inroads in our own state, Entomologist Drake now has to turn his attention to African pests.

NEWS FROM HOME
Adel's best friend of the men in service is Lloyd Grove who likes to read a paid subscription to the Dallas County News to the men in the camps and overseas. If he finds relatives have already sent the boys the newspaper, he sends these a carton of cigarettes instead.

GOOD DIGESTION
The Madrid Register News reports that the stomach of a butchered cow on the State farm near Woodward revealed the animal had a taste for eating metal. In the stomach was found six 10-penny nails, sixteen other pieces of metal varying in size, a piece of child's toy three inches long and half an inch to two inches in circumference, besides six ordinary tacks.

COMBUSTION
Officials of the Anamosa schools were required to move 60 tons of stoker coal stored in a school house because spontaneous combustion had started a small blaze. Shifting of the coal in time probably prevented a more serious conflagration.

ANOTHER IOWA SHIP
Mrs. L. E. Draper of Buckingham township, Tama county, one of the Iowa relatives of the late Ernest L. Hilbert, gunner left in the battle of the Midway Islands, June 4, 1942, attended the christening ceremonies of the U. S. S. Hilbert at San Pedro, Calif., recently Hilbert, for whom the vessel was named, was a nephew of Mrs. Draper. His parents were one-time residents of North Tama county.

The practice of allowing rows of radishes, lettuce and other vegetables to grow up to weeds after the crop has been harvested is bad. It means weeds sowing which will cause trouble next year.

Get increased crop yields
at lowered production costs
Install DENISON
Drain Tile Now
• Eliminate wet spots
• Lifetime efficiency
• Low installation costs
PROFITABLE farming depends on efficiency of production. Sloughs and wet spots are unprofitable. . . get rid of them and make your land more fertile by installing Denison De-Aired Drain Tile. When properly installed, this hardburned shale drain tile actually extends the growing period because the ground becomes warm and germination takes place earlier in the spring. The low cost of tiling will surprise you. DON'T DELAY!! Stop in and let us tell you more about it. No obligation of course.

FOR FARMERS

A farmer has been told that the amount of Iowa lumber has been allocated to the War Food Administration. It is true that the War Food Administration has made an allocation of lumber for the war effort, but this does not mean that this amount of lumber for the war effort will be procured and will be procured by the War Food Administration. The War Food Administration has made an allocation of lumber for the war effort, but this does not mean that this amount of lumber for the war effort will be procured and will be procured by the War Food Administration.

William H. Badger, president of the Iowa Retail Lumber Dealers Association, Des Moines, said that the War Food Administration has made an allocation of lumber for the war effort, but this does not mean that this amount of lumber for the war effort will be procured and will be procured by the War Food Administration.

The War Food Administration has made an allocation of lumber for the war effort, but this does not mean that this amount of lumber for the war effort will be procured and will be procured by the War Food Administration.

FEARLESS

Just a clean, wholesome, fearless American boy... and his thinking about tomorrow's ball game, about batting in clean-ly, about what he'll do to that Bearcat's pitcher. He knows a war going on. Sure he does. His brother Bill told him about it, who's over there helping to win it... and when his cousin Bud, he too, will do his part fearlessly.

America! Fun-loving, hard-playing youngsters. There could be America without them. Today, they're developing keen, alert and strong, active bodies; tomorrow, they'll be guiding the nation's destiny. They'll be running America's railroads, bridging the gap between producer and consumer; between where you are and where you want to go.

Bud and his generation take over, ROCK ISLAND LINES will provide the finest in transportation.

KEEP AMERICA FEARLESS • BUY WAR BONDS

ROCK ISLAND LINES

Rock Island

America's Railroads • All United for Victory

Another important factor to be taken into consideration and the most important factor is that when the War Production Board made its allocation of lumber to the War Food Administration, they did not issue directives to the lumber mills instructing them to make the kind and species of lumber generally used by the lumber trade, nor did they issue a directive to the manufacturers of lumber, ordering them to ship the lumber on AA-2 ratings which the lumber carriers and already manufacturers are turning down dealers' orders bearing a rating of AA-2 rating which was supposed to get this lumber for the farmer in other words, in spite of the fact that the dealers of Iowa are operating under this plan, they are not getting the lumber and in fact they have the lumber they are supposed to be manufacturing for the War Production Board, but they are not getting it. A directive to the lumber manufacturers not to ship the lumber of Iowa, but the lumber of Iowa, well will not get the lumber of Iowa, WPB and the War Food Admin- istration want the lumber of Iowa.

We want the lumber of Iowa, know the facts, and we want to think that the lumber of Iowa has made a contribution to the war effort, there is to it and all the lumber to do is come and get it. The farmer will get in hundreds of cases the lumber of Iowa, and he got the lumber of Iowa, the War Production Board is not getting the lumber manufacturers, and they ship this lumber to the War Food Admin- istration, and the War Food Admin- istration is not getting the lumber of Iowa, but the lumber of Iowa, well will not get the lumber of Iowa, WPB and the War Food Admin- istration want the lumber of Iowa.

and directives issued that will actually get the lumber to the dealer and through the dealer to the farmer who actually needs it for his participation in the "Food for Victory" program. It is a problem--- maybe the farmers of Iowa can settle it.

HOBBY SHOW FOR EVERYBODY WILL BE HELD AT KLEMME METHODIST CHURCH

A feature of our summer recreation program will include a Hobby Show at the Klemme Methodist Church on August 27th. The show will include such hobbies as antiques, stamp, coins, wax candles, dolls, glassware, bottles, vases, glassware, scrapbooks, Indian relics, marsh is, landscapes, basketry, plaques, weaving, woodwork, birds, insects, rocks, butterflies and moths, flowers, china, old books, ect ect.

The show will begin at 2:00 p.m. and run through the evening. The committee of arrangements will be the Misses Novella Bredbenner, Evelyn Evelyn Arnold, Thelma Embrey, Irene Harms and Mrs. M. A. Wilcox. If you have a collection you think worthy of display call one of the members of the committee immediately.

A program of music will be given at 8:00 P.M. just preceding the Hobby Show. This will feature the hobby of music and recitation.

Lunch will be served including 5c donut and ice cream, etc. Admission to the Hobby Show will be free. The public is invited to attend.

STANDARD SCHOOL FUND IS DISTRIBUTED

County Standard School funds have been distributed in the office of the county superintendent is stated and the following list of standard school funds for last year in Hancock County. The total amount of these funds for these schools amounts to \$8,666.

The total amount of standard school funds for last year in Hancock County was \$8,666. The amount of funds for each school for last year was as follows:

Liberty No. 1 Ruth Upmeyer \$941
Liberty No. 3 Eleanor Truitt \$4122
Clas S. Whitney
County Superintendent

TWO HOUSE SOLD IN KLEMME

Monday Mr. and Mrs. Wayne Pavey sold their nearly new modern bungalow to Mr. and Mrs. George Tomlin, who expect to retire from the farm and move to town. Mr. Pavey has resigned his position as buttermaker at the Klemme Creamery and has accepted a position as buttermaker at Webster City, where he will begin work the last of this month.

Recently Albert Kraus sold his house, located just north of the Community Hall, to Wm. Theil, who will move to town. Mr. Theil will retire from the farm as he has sold it. Lawrence Block of Garner. We have not learned when Mr. Theil expects to move to Klemme.

There were a couple of soft ball games at the high school diamond Sunday when the Ell girls' team met the Liberty Girls 4-H team and the Liberty and Ell township boys also had a game.

Practically every gardener will be storing vegetables this fall for winter use. Permanent vegetable cellars or basement storages should be improved or constructed wherever possible. See your county extension director or write to the Extension Service at Ames, for information.

South America Develops Thriving Shoe Industry

With plenty of raw material from domestic production of hides and skins, the shoe industry in South America and Mexico was well developed before the war. Since the war, demand for shoes has increased and with it the incentive for further development of this important consumer goods industry.

Climate and custom have dictated the lines of development of the industry in the other Americas. Traditional styles, such as the huarache and the alpargata, are worn in many areas instead of shoes.

New shoe industries have received the encouragement of the various governments, particularly through protective tariffs.

In most countries in the other Americas, a large percentage of shoes and sandals are still made by hand in homes, or in small shops. Many larger cities have stores specializing in made-to-order shoes, also largely made by hand. In fact, in many places, the best shoes are made by custom shoemakers, instead of on a mass production basis as in the United States.

Brazil is the largest manufacturer of shoes in the other Americas, with estimated production of more than 20,000,000 pairs in 1931. The industry has expanded rapidly in recent years. Imports have declined and there has been a growing export trade.

Uganda, Main Source of Nile, Model Protectorate

Uganda, British east African protectorate which is celebrating its golden jubilee this year, is the African counterpart of Minnesota—a land of lakes and the source of the continent's largest river.

As the main origin of the Nile river, Uganda contributes heavily to Egypt's fertility. It had a finger in the making of history centuries before its own recorded history began in 1862. In the last 50 years it has become Britain's "model protectorate."

The Baganda, most numerous native race, take easily to the discipline of organized society. Before the British came they had been ruled by a strong native dynasty whose kings were called "Kabakas."

Tribal government functioned smoothly. British officials seldom needed to interfere. This understanding of African discipline is still the foundation of British authority. England honors the Kabaka by calling him "his highness."

The Baganda speak Bantu. Some have learned English and are typists and clerks in British concerns. Others are tradesmen. Most of them, however, farm for a living, and many own their own farms.

Canning Effect on Taste

It is evident that the effect of canning on the palatability of fruits and vegetables varies widely with the particular method used. In general, the drastic treatment of pressure cooker canning necessary for vegetables, gives the most pronounced effect because of the high temperatures. However, some of the methods which require long-time processing are also sometimes disastrous to color and flavor. This is especially true of oven methods for fruits of delicate color and flavor. The rate of heat penetration is slow in oven canning, and hence a long time is required for the produce to be heated through. In the meantime color and flavor are appreciably altered.

In determining the difference between home-canned and commercially canned foods, the time factor is important. Commercial canners heat the product rapidly to the required temperature and as soon as processing is completed, cool it rapidly.

Rail Widths

Ancient Roman chariots were built with a clearance of about 4 feet 8 1/2 inches between the wheels. The same width between the wheels was continued in early European coaches and carts and in the English tramways operated by horse power. Many early English locomotives were built on this gauge and a number of the pioneer railroads in this country were built to meet the specifications of English locomotives. In 1871 no fewer than 19 different gauges, ranging from three to six feet, existed on the railroads in the United States, but by the beginning of 1939, 99.4 per cent of railroad mileage was constructed in standard gauge lines.

The standard gauge of railways in the United States is measured from the inside of one rail to the inside of the opposite rail, about five-eighths of an inch below the top of the rail head.

Olives Yield Oil

Fruits of the olive species vary in color and differ somewhat in shape, but most of them are egg-shaped or oval. The liquid which is expressed from the fleshy part of the fruit contains from 20 to 60 per cent of oil. When treated commercially the pulp is pressed twice, thus yielding first and second grades of oil. The remaining pulp is then mixed with hot water and subjected to further pressure which brings out a substance that is made into technical oils. In addition to value as a food substance, olive oil is used in preserving sardines, and in manufacturing soaps of high grade.

What You Buy With WAR BONDS

Water Camel

Thirst is one enemy of armies and navies that may be frustrated by a generous supply of water. Typhus, another dreaded plague is another enemy that must be subdued in Africa, in the jungle islands of the Pacific.

So the "Lister Bag," more often called the "water camel," or just "camel," is used. The "Lister Bag" is a khaki colored canvas bag having a capacity of about 30 gallons. It will require many War Bonds to provide enough "camels" for our fighting forces at home and abroad. Yours too! "Back the attack with War Bonds." U. S. Treasury Department

OLD MILL PASSES

One recently destroyed a mill built of native lumber in 1857 at Fairbank in Buchanan county. Grain stored in the mill also was destroyed. The building was one of the oldest in Buchanan county and had been in continuous service all of its seventy-five years.

BREATHING SPELL

For the first time either in the incumbency of the last two Lucas county Sheriffs, the county jail at Chariton was empty for ten minutes one day recently. The vacancy occurred during the interval of a shipment home of several Fort Dodge runaway boys and the booking in of a new set of runaways.

JUST MISLAID

At LeMars, the "stolen" typewriter of the LeMars Chamber of Commerce was located in the office of the chamber itself. It had broken loose from its moorings in the tilt shelf desk and fallen down into the "innards" of the desk. When found it had a broken back.

Egg prices are expected to continue at ceiling levels say economists at Iowa State College.

Since walking barefooted helps to develop the feet, specialists recommend allowing an infant to walk barefooted on carpet, clean sand ground or well-grassed lawn, free from debris or articles that might injure the child's feet.

HAWKEYE PRESS CLUB EDITORS ATTEND CLINIC

The Mergenthaler Linotype Co. conducted a linotype machine clinic at the Fort Des Moines Hotel in Des Moines Sunday, which was attended by nearly one hundred and fifty linotype machine owners and operators. Carl Meyer, chief engineer at the Chicago branch, explained the working parts.

Publishers from the Hawkeye Press Club who attended the clinic were T. J. Farnan, Clear Lake Minn.; Warren Nelson, Thornton Enterprise; Lester Benz, Sheffield Press; R. A. Jorgenson, Klemme Times; Burt DuSeld and Wm. McCauley, Mason City Globe-Gazette; Theodore Klemmestad, Thompson Courier; and G. M. Carman, Buffalo Center Tribune.

The Hawkeye Press Club will hold a district meeting at Clear Lake Saturday to which all publishers in the state and their families are invited.

WEEKLY NEWS ANALYSIS

Allied Forces Meet Bitter Resistance In Final Phase of Battle for Sicily; Japanese Employ New Naval Strategy To Supply South Pacific Strongholds

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)
Released by Western Newspaper Union

Here's the way the Allies work in setting up a base after landing on hostile shore. As the first Allied wave struck Sicily, men waded deep in water pass supplies ashore from a lighter, while men in foreground prepare roads for tanks and other vehicles.

SICILY: Yanks' Test

More than three divisions of Adolf Hitler's crack German troops took up positions around San Stefano in northern Sicily to await the assault of Gen. George S. Patton's charging American Seventh army.

The San Stefano region loomed as the Axis' northern anchor for their shrunken lines in the mountainous corner of the island where they found themselves pocketed. Much like the Tunisian terrain, great difficulties confronted Patton's Yankees, who were faced with a tedious crawl up rocky slopes in the face of stiff machine gun and mortar fire.

To the west of the Axis defenses, stood the Canadians, encountering the same obstacles as the Americans. To the south, Gen. Bernard Montgomery's British Eighth army poised for action against strong German forces, which had held them up in the plains after a slashing tank attack.

Thus the final phase of the battle of Sicily opened.

Five Points for Italy

Successful as a diplomat once before when he pulled Adm. Jean Darn's French North Africa over to the Allied cause, Gen. Dwight "Ike" Eisenhower addressed himself to another soldier, this time Italian Premier Pietro Badoglio, in a bid for Italy's withdrawal from the war.

Commending the Italian people and Italy's royal house for removing Mussolini, General Eisenhower stressed five points in his address to the newly constituted government.

Said General Eisenhower: 1. Only the Germans in Italy are blocking peace; 2. Cessation of hostilities is possible immediately under honorable terms; 3. Discontinuance of assistance by the Italians to German armed forces is a prerequisite of peace; 4. A pledge that Italian war prisoners will be returned if Allied prisoners in Italian hands also are returned; 5. If hostilities cease, the liberties and traditions of Italy will be restored.

PACIFIC: Rip Jap Barges

Although Japan's merchant marine ranked No. 3 among the world's fleets before Pearl Harbor, her maritime position has since slipped in view of her losses and limited ship-building facilities.

As a consequence, the wily Nips have devised a new system for supplying their embattled South Pacific island forces: strongholds are now being supplied through small, swift coastal barges, in which the enemy sail at night, and in which they hide by day in the many coves along the shores lines.

Well aware of the Japanese system, American airmen have concentrated much of their bombing against these craft. Barges attempting to stock enemy troops at beleaguered Munda on New Georgia island have had rough going at the hands of U. S. aviators, and a concentration of the craft at Rein Bay, New Britain, was the target for a heavy Allied assault.

With the Allies threatening their sea-borne supplies and bombarding them from the sky with deadly torpedo and dive bombers, Jap troops, true to their tradition of fighting to the death, clung desperately to the last perimeter of their defenses at Munda.

FDR: Help to Servicemen

Declaring that America's servicemen and women must not be demoralized into an environment of inflation and unemployment, to a place on a bread line or selling apples, President Roosevelt outlined a six-point program for post-war recovery.

The program was the highlight of a speech in which the President declared Mussolini's ouster was the first crack in the Axis, and the initial step in Italy's democratic reconstruction.

The President's six-point program for demobilization includes: 1. Mustering out pay large enough to cover the period before employment is obtained; 2. Unemployment insurance; 3. Opportunity for education or trade training at U. S. expense; 4. Credit for unemployment compensation, old age pensions and survivors insurance for the period they were in service; 5. Adequate hospitalization, medical care and rehabilitation of disabled servicemen; 6. Sufficient pensions for disabled in armed forces.

DOCTORS: Face Draft

Out of the nation's 170,000 doctors, 47,000 already are in uniform, and out of the 70,000 dentists, 17,000 are in the services.

However, the army has requested a substantial addition to these numbers, and to meet the need, the War Manpower commission has planned to draft doctors and dentists between 38 and 45 years of age.

Under the WMC's plan, the army would waive its prohibition against the drafting of doctors and dentists over 37. Faced with induction as privates, the men will rather seek commissions which their professions ordinarily are granted when entering the service.

Heretofore, local and state committees have recommended induction of doctors and dentists.

MIDWEST: Looking for Trouble

August 16, farmers, small manufacturers and merchants from five midwestern states will meet with 25 senators and congressmen in the Radisson hotel at Minneapolis, Minn., to present the problems besetting them in a wartime America.

Robert La Follette

In calling the conference, Representative August Andresen of Minnesota declared: "One of the primary purposes of the congressional recess was to permit members to secure first-hand information from their constituents on the prosecution of the war and the effect of the present federal policies upon business and agricultural economy of our country."

Regional in character, the conference will not be confined to a single district, but will give the legislators an idea of the situation confronting a variety of interests. Senators Robert La Follette from Wisconsin and Guy M. Gillette from Iowa have endorsed the parley, which besides being open to their states also will take in Minnesota and North and South Dakota.

MEAT: More for Civilians

Action by the War Food administration assured civilians of increased meat supplies.

Whereas packers formerly were required to set aside 45 per cent of production for the government, WFA cut the figure 5 per cent. Moreover, a temporary slash was made in the government's purchase of pork products.

The action in beef was attributed to the heavy run of grass fed cattle expected from the southwestern and western ranges, while the cut in pork purchases was made at a time when hog marketing declines.

HENRY FORD: 'Would Have to Run'

"If I felt any better, I'd have to run." With those words, sprightly patriarch Henry Ford recently celebrated his 80th birthday.

Once again in active command of the great Ford works for the first time in a quarter century as a result of the death of his son Edsel, the elder Henry has supervision over his plants' production of motor equipment and bombers for the army.

Declaring that the general welfare of the community should be the guiding moral principle, Ford said that business and industry must build the physical basis of the good society.

"There must be more and more industry," Ford asserted. "It is essential to political and economic freedom."

WHEAT: For Feed

In an effort to bolster the nation's dwindling feed supply, the Commodity Credit corporation went into the grain markets. The CCC started the ball rolling by bidding for one million bushels in Chicago and revealing it planned to buy all wheat available at Minneapolis at the loan rate. The agency hoped to secure 100 million bushels from Canada.

If necessary, the CCC divulged effort also might be made to import wheat from Australia.

A Reporter's Bookmarks:

W. L. White's "Queens Die Proudly" (Harcourt-Brace) contains this beautiful wordage: "And the plane—it isn't something that belongs to the Government with a number; it's Old 99, the beautiful NEW Flying Fortress that belongs to you. It's more than your home—it's, well, a kind of a sweetheart. All of you picked her up off the assembly line at the Boeing plant where she was born—a beautiful, smooth, shining, naked thing. Then all of you took her up over the clouds and wrapped that beautiful blue star-spangled gown of the skies around her, which is the way every Fortress ought to be dressed, because they're the Queens of the high skies."

H. Ullstein's "The Rise and Fall of the House of Ullstein" (Simon-Schuster) is a tragic story of the slow death of Germany's greatest publishers via the swastika poison.

The history of its downfall has an uncanny way of paralleling some of the events already taking place here. The author reports that he told conservative German dailies to offer stiffer resistance to the rising tide of Nazism. But they, and even chiefs of his own paper, told him not to be so pessimistic about the danger within. They feared that such stories would lose subscribers—so they did nothing, and now they have nothing.

From "Exchange Ship," by Max Hill of the Associated Press (Farrar-Rinehart) "Clean people? The Japanese bath provides what probably is the dirtiest way of getting clean in the world. Scores of men, women and children bathe in the same water, which is hot but surely not enough to kill germs. . . . Each wing (of my prison) had a row of five Japanese-type baths, one of them usually out of order. That meant the 180 prisoners had four tubs, and the water wasn't emptied until the last man passed through the line. The native prisoners were first—but there was only one place for the foreigners—last."

H. Allen Smith's book, "Life in a Putty Knife Factory," contains considerable amusement, including: "A man who becomes the writer of a column is much worse off. His brain achieves such a state that no respectable gumma would ever attach itself to it. He becomes a straight-forward paranoiac. He suffers first from headache, tinnitus, palpitation, digestive disturbances, and incapacity for mental exertion. After that come intense egotism, selfishness, conceit, overbearing pride, violent temper, and moroseness. How do I know this? I was a columnist. My own favorite is W. W. Around newspaper offices, where it is fashionable to scoff, he gets very little outspoken applause. Your omniscient, swaggering newspaper man greets his name with a sneer. I never did. I wouldn't sneer even though it made me appear to be sharp as a tack."

"Time of Peace," an exciting tale by Ben Ames Williams (Houghton-Mifflin), contains this gem: "So now you've seen where your ancestors lived," Mark told his son as they came into familiar surroundings. "Don't ever forget that you're more than a New Englander. Out of your eight great-great-grandparents, two went from Massachusetts to Ohio, two went from Georgia to Mississippi, one lived in California, one in Oregon, one in Minnesota, and one—your mothers great-great-grandmother—came from Germany. . . . Two of your great-grandparents came from Wales. Your grandparents came from Ohio, Michigan and Minnesota. You've got all the blood strains in you, Tony. You're not a Westerner, nor a Southerner. You're an American."

Secretary Harold Ickes' "The Autobiography of a Curmudgeon" (Reynal & Hitchcock) offers the following in the chapter called Blessed Event: "Mouth-to-ear rumors about a public man are almost without exception so fiercely barbed that most people would hesitate to repeat them out loud if they should be said of a private citizen. The private citizen has easy recourse to the courts—protection under the law. So, too, I grant you, in theory, has the public man, but the more public he is, the greater the probability that should he prove that he didn't actually commit the crime, the publicity that he would get would leave the world convinced that he was in the neighborhood when it occurred. In other words, the people can believe virtually anything concerning a man in public life provided that it is sufficiently unbelievable."

If you are still squawking about rationing, then read "Round Trip to Russia," by Walter Graebner (Lippincott is publisher). Graebner's exciting book says that no civilian in Russia may travel by air or rail or own a car. Eggs, when you can get them, cost \$3 each. Newspapers are used for rolling cigarettes and put between blankets for more warmth. Ninety-five per cent of all food is rationed, and the annual civilian food consumption there is less than the annual civilian waste in the U. S.!

Washington MERRY-GO-ROUND

DREW PEARSON

Washington, D. C.
ASSIGNMENT IN SICILY

Unsung U. S. heroes who contributed heavily to Mussolini's downfall were Italian-American boys smuggled into Sicily several weeks before U. S. troops landed.

How they got ashore must remain a military secret. But the fact that they got there is now recognized as a part of military operations, just as the advance landing of Lieut. Gen. Mark Clark in North Africa, carrying bags of U. S. gold.

These Italian-Americans were especially trained in the dangerous, delicate job of winning over military garrisons in advance of a landing force. In Sicily they had the advantage of speaking the language and being able to visit the homes of their relatives, few of whom loved Mussolini. From there they were able to work around to various military leaders.

It has long been known that Italian military leaders were of two types. One is the professional soldier like Field Marshal Badoglio, who was in the army before Mussolini's time and has no love for the Fascists. Also he has no love for the Nazis, and so was not too difficult to win over to the Allied side.

Other type of Italian military leaders is the Fascist Blackshirt, who rose through favors from Il Duce, but who usually is susceptible to coin of the realm. Presumably U. S. advance scouts were supplied with what General Clark took with him in advance into North Africa.

At any rate, expert advance work by patriotic Italian-Americans, plus the popularity of the United States in Sicily, contributed to one of the most bloodless landing expeditions in history.

GEN. GIRAUD'S WATERLOO

General Giraud was shown all the sights of Washington during his stay here, including the war department's massive Pentagon building, rated as the largest office building in the world.

After the French commander had been led through the labyrinth of Pentagon corridors to General Staff headquarters, and later out into the sunlight, he was asked what he thought of the place.

"Well," remarked General Giraud, "I've escaped from two German prisons, but I could never get out of this building."

UNDER TWO FLAGS

The chickens hatched when American ships were put under the Panamanian flag to avoid neutrality laws are now coming home to roost.

As a result, the U. S. government now employs 16,000 seamen whom it pays in hard cash every month, but over whom it has no disciplinary control whatsoever. The seamen are working under the Panamanian flag, though actually they are American citizens. So when they get into brawls in American ports, they must answer to the Panamanian consul, though they are American citizens and draw American pay.

Certain state department officials are urging that the problem be solved by transferring the ships back to U. S. registry.

Note: At present, when one of these ships clears a U. S. port it must pay a \$20 fee to the consul of Panama, in spite of the fact that the ship belongs to the U. S. A.

AXIS DISTORTIONS

The Axis radio is trying to scare up a war in South America. The Bolivian army, with Peru's support, according to the Axis, is about to launch an attack on Chile to gain a port on the Pacific.

Here is the only grain of truth behind this propaganda: When Bolivian President Penaranda returned to La Paz from his visit to the United States, he stated publicly that Bolivian aspirations for a seaport had never been abandoned, that when the opportune time arose Bolivia would assert that claim.

Truth is, however, that Penaranda had no such militant motive in mind. Furthermore, moderate elements in Chile assert they would be perfectly willing to discuss the sale of the port of Arica to Bolivia.

If the Chilean moderates actually bring about negotiation for the sale of Arica, they will set a new high in good neighbor relations. It has not been long since the territorial ambitions of South American countries—as in the case of Peru vs. Ecuador and Bolivia vs. Paraguay—have been settled by a resort to arms.

CAPITAL CHAFF

When Augusto Rosso, former Italian ambassador in Washington, was transferred from Russia to be Italian ambassador to Turkey, the Nazis stopped his appointment. They said he was too pro-American. Rosso has an American wife, the former Mrs. Francis Bunker of Denver.

While the Italian nation was strictly rationed, Count and Countess Ciano added to their popularity in Rome by throwing elaborate parties. Caviar, lobster and champagne featured the menu.

ON THE HOME FRONT

with RUTH WYETH SPEARS

Odd pieces of lumber and plywood may be used to make simple frames and there are no practical cotton padding and stuffs on cotton covering materials. A simple frame for a chair of this type is shown here. It is padded with cotton batting basted in pieces of unbleached muslin to fit the back and well over the sides of the seat. A separate cushion filled with cotton, down or feathers is then made for the seat. Either plain or figured material with contrasting seam welting may be used for covering.

NOTE—Mrs. Spears has prepared detailed dimensions and directions for making this chair frame. Pattern also gives step-by-step directions for covering the frame after it has been padded. Ask for Pattern 250 and enclose 15 cents. Address: Mrs. Ruth Wyeth Spears, Bedford Hills, New York.

Enclose 15 cents for Pattern No. 250.

The gaily enameled unit insignia you see on a soldier's lapels and overseas cap are reproductions of his regimental shield displayed in the center of the eagle on his regimental flag. It's a part of U. S. Army tradition. Traditional, too, is the Army man's preference for Camel cigarettes. (Based on actual sales records from service men's own stores.) It's a gift from the folks back home, that always rates cheers. And though there are Post Office restrictions on packages to overseas Army men, you can still send Camels to soldiers in the U. S., and to men in the Navy, Marines, and Coast Guard wherever they are.—Adv.

FOR CHAPES SCRAPES MOROLINE PETROLEUM JELLY

Hard Workers

Hard workers are usually tempted. Industry lifts them above temptation.—Bovee.

CONSTIPATION HAUNTED ME—

It hung on and on. Medical laxatives relieved it only temporarily. Then—I found my constipation was due to lack of "bulk" in my diet. And I also found out that KELLLOGG'S ALL-BRAN gets at the cause of such constipation and corrects it. Boy, what I'd been missing before I tried ALL-BRAN! It's a swell-tasting breakfast cereal—and, as far as my constipation was concerned, it sure worked. I eat ALL-BRAN regularly now and drink plenty of water. And—I've "joined the Regulars"! Made by Kellogg's in Battle Creek.

Cheerfulness

All's for the best! Be sanguine and cheerful.

YOU WOMEN WHO SUFFER FROM HOT FLASHES

If you suffer from hot flashes, dizziness, distress of "irregularities," weakness, nervous, irritable, blue at times—due to the functional "middle-age" period in a woman's life—try Lydia E. Pinkham's Vegetable Compound—the best-known medicine you can buy today that made especially for women. Pinkham's Compound has helped thousands upon thousands of women to relieve such annoying symptoms. Follow label directions. Pinkham's Compound is worth trying!

Get Into Action For Full Victory!

HIGHLIGHTS . . . in the week's news

HURRICANE: A hurricane that struck Houston, Galveston, and surrounding Texas communities on July 27 left 13 dead and at least a hundred injured. Damage is estimated at ten million dollars.

FOOTBALL: Soldiers who are studying in colleges under army supervision may possibly be allowed to play football.

ADOPTIONS: Higher incomes among childless couples has increased the demand for babies who may be available for adoption, it is reported.

END OF WAR: Bettors are placing considerable sums at even money in London that the war in Europe will end before the close of the year, says a report.

War Goods, From Brushes to Bombs, Are Stored In Huge Warehouses of Utah Ordnance Depot

Munitions Are Made Nearby Factory Salt Lake City

By John Elbridge Jones
Released by Western Newspaper Union.

The military axiom that "an army travels on its belly" is true, but a modern army needs many other necessary supplies. Shoes, for instance, and trucks, tanks, tractors, munitions and guns.

To furnish these supplies when and where needed and in the proper amount, the U. S. army has built up separate organizations with the army, headed by Brig. Gen. Brehon B. Somervell, called "Service Commands." There is a "Service Command" for each military area not only within the U. S. but wherever the army goes.

For the first 12 months or more of this war all information regarding army operation and placement is a military secret; now—in drive for final victory—the army wants you to know how it operates; it takes care of your son or your husband—what it feeds him, what it clothes him—what it gives him to fight with and how it cares for him when sick or wounded.

With that in mind Maj. Gen. Kenneth A. Joyce, commanding general of the Ninth service command, with headquarters in Salt Lake City, recently invited a group of newspaper men to visit all of the army service forces. These newspaper men were shown everything that is told everything, but they were restricted not to reveal military information helpful to the enemy.

Non-Combat Goods.

All of the thousands of articles called "non-combat equipment," meaning, in general, everything the army uses except actual weapons and fighting machines, are procured by purchase or are made to order. Canned vegetables, blankets, safety pins, uniforms of all sorts, road machinery, and stoves are samples of these things not used in actual fighting, but most necessary just the same.

The Ninth service command procures and stores this non-combat equipment in Utah Army Service Forces depot at Ogden, under the direct command of Brig. Gen. Ralph H. Altob Jr. Here are tremendous warehouses and storage spaces—much of it in the open, with seemingly miles of rows of equipment such as trailers—trench diggers—trucks, carry-alls, scrapers, water tanks, plows, portable generators, barbed wire and bridge building material.

The depot is roughly a mile wide and three miles long. There are 15 permanent type warehouses of concrete and steel and nine temporary warehouses of wooden construction. They house everything the army needs and uses outside of munitions and implements of war.

Several are used for food, others for clothing, kitchen equipment, for automobiles, for drainage tiles, for rope, for everything.

On display were box lockers, 12 kinds of hats or caps, shirts and underwear, carrying bags, gloves, mess kits, sleeping bags, uniforms for army and for WACs and nurses, musical instruments, shoes, socks, tool sets, helmets, plastic

Inspectors at the Tooele Ordnance depot examine a batch of empty cartridge cases, returned to be melted into brass scrap. They must see that no live ammunition has got mixed with the shells, since it would explode in the furnace and possibly cause an accident.

foot tubs, flags, tents, tent stoves, and mountain tents. Among thousands of other articles were pack kits, gasoline lanterns, emergency rations, G. I. thread and needles, compasses, pliers, sunburn cream, chap stick, towels, and rubber pants.

Unique here was the fact that a part of the guard for daylight service is made up of women: women trained to do guard duty—to carry a gun and use it. Police dogs aid the guards at night.

Making Cartridges

Guns, cartridges, bombs and similar munitions, as well as war machines like tanks and armored trucks, are made at the army's own ordnance factories, or by private manufacturers, under government contract. One of these latter is the Utah Ordnance plant in Salt Lake City.

The plant area is about 5,000 acres with more than 175 buildings—10 miles of heavy track railroad and 17 miles of surfaced road. Inner and outer fences extend a distance of about 21 miles, most of which is under 24 hour surveillance by auxiliary military guard under direction of the army.

This plant is the last word in a modern line production system for manufacturing small arms ammunition, such as 30 and 50 caliber armor-piercing, tracer, incendiary and ball shells. Here the principal operations are making the shell, the bullet, and the primer—bringing them all together, and then filling them with powder. The finished ammunition is put into belts—or clips and then packed in metal-lined cases for shipment.

Outstanding in the plant is the continuous rigid testing and checking—for on the efficient operation of these munitions may depend the life of your son or husband. Finally a certain percentage of each batch is sent to the ballistics department, where shells are actually fired in guns used by the army and are checked for accuracy, fire power and penetration.

Tooele Ordnance Depot.

During war the various ordnance manufacturing plants may ship direct to the field of action, but a large part of the material must of necessity be held in reserve in storage. For this purpose the government has built huge storage depots in strategic locations. These basic supply depots are removed from the seacoast for protection, yet so located that war goods may be transported swiftly by rail, highway or plane to the points of embarkation.

The army has built the Tooele Ordnance depot at Tooele, Utah, about 40 miles southwest of Salt Lake City. The depot, comprising an area of some 26,000 acres, is served by two transcontinental railroads, giving quick access to the Northwest, the San Francisco Bay area and the Southwest—all important ports for the Pacific theater of war. Within the depot are 150 miles of hard surfaced highway and 77 miles of railway track. Five Diesel switch engines handle freight cars.

The ordnance depot performs three main functions—first it is the reserve storage for all munitions—including rifle and machine gun ammunition, shells and bombs of all sizes and weights. It stores reserves of ordnance equipment such as pistols, rifles, machine guns, cannon, trench mortars, and mobile fighting equipment such as tanks, jeeps, trucks and tractors.

Repair and Salvage.

Second, the ordnance depot is a service organization. It puts equipment together, gets it ready for shipment and ships it. It takes care

of the repair and rebuilding of damaged and badly worn equipment. In the depot area are huge buildings, one of them 525 feet wide by 540 feet long, used wholly for making repairs that cannot be taken care of at the front. Duplicate parts of all equipment are kept on hand—either for use in the depot or for shipment.

The third function of the Tooele Ordnance depot is one of salvage. Back to this depot are sent trainloads of used shells, large and small. The undamaged are shipped to the munitions factories for re-filling, and the unusable are sent to the smelters. The army expects to get back approximately 90 per cent of the shells, packing cases, ammunition belts, clips, etc., issued.

Women by far outnumber the men in the warehouses. Girls trained for the job operate motor driven fork lift trucks—which pick up huge cases and stack them—8, 10 and 12 feet high. The depot is manned mostly by civilians.

Most interesting of all the features of the depot is the storage of the actual munitions. Small caliber ammunition is stored in above-the-ground warehouses. Heavy ammunition and bombs are stored in "igloos."

There are about 1,000 of these igloos ranging in size from 40 feet to 80 feet long. In the shape of

Women and machines have displaced husky men in the Tooele Ordnance depot warehouses. Miss Katherine Boswell runs a fork-lift shop truck, that can move and pile ten cases a trip. The work done by one truck would cost \$40 an hour if done by hand.

half of a barrel, the walls and ceiling are made of reinforced cement nine inches thick, covered with two to three feet of gravel and soil.

One of the igloos visited was about half full, containing several hundred 1,000-pound semi-block buster bombs—all ready for shipment to Hirohito.

For protection the depot is watched over by a corps of auxiliary military guard under the direction of the army, who patrol in cars.

Not far distant from the Tooele Ordnance plant but entirely separate is another depot. Here the army stores and experiments with gas for the kind of warfare the United Nations hope to avoid. But, as proof of what President Roosevelt and Mr. Churchill say about being ready for it, it is there. It may never be used—but it's there waiting and ready if needed.

BUSHNELL HOSPITAL for soldiers is another department of the Ninth service command. Construction of the huge institution was begun shortly after Pearl Harbor. It is located at Brigham City, 60 miles north of Salt Lake City. At present has 2,000 beds.

Corp. John Kariger, 21, of Hersey, Neb., is one patient who probably owes his life to the new drug penicillin, administered at Bushnell. His thighbone was shattered by a bullet, and infection developed.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

By HAROLD L. LUNDQUIST, D. D.
Of The Moody Bible Institute of Chicago.
(Released by Western Newspaper Union.)

Lesson for August 22

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education, used by permission.

GOD GIVES LAWS FOR HIS PEOPLE

LESSON TEXT—Exodus 23 1-9, Galatians 3 23-28, 5 13-14.

GOLDEN TEXT—Thou shalt love the Lord thy God with all thy heart, and with all thy soul, and with all thy strength, and with all thy mind; and thy neighbor as thyself.—Luke 10 27.

Our God is a God of order. To have order we must have law, hence God gave His people not only the fundamental law of humanity's moral sense of right and wrong, and the Ten Commandments which are the basis of all codes of law, but also those detailed regulations needed for the law's interpretation.

The law of God was not intended to establish a legalistic system of salvation by work, but, as revealed in the New Testament, it was to guide and bring us to Christ, in whom it finds its true fulfillment.

These are matters of fundamental importance and suggest the need of a careful study of our three Scripture portions.

I. The Law Established (Exod. 23:1-9).

At Sinai the Israelites were brought into the presence of God in a dramatic and solemn assembly to hear the words of God from the mountain. These were later written as the Ten Commandments on the tables of stone. Here they learned in a new way of the majesty, the righteousness, and the love of God.

The Ten Commandments are recognized as the foundation on which all legal codes, ancient and modern, are built. They cover man's relation to God and his relation to his fellow man. They are unsurpassed as a comprehensive and compact statement of the moral law.

The passage in Exodus 23 gives us some of the rules and regulations for daily life which are in a sense an interpretation of the law. This portion gives us an idea of the type of laws provided by God for His people and reveals "the moral flavor of the whole divine legislation."

The thing which impresses us as we read of the divine requirements of justice toward all, of love for one's enemies, of refraining from false witness, of refusing all bribery, is that God's standards are very high.

God's law is good, it is right, of divine quality and perfect purity. It has, however, an even higher purpose than providing direction for life. We learn of that as we hear

II. The Law Described (Gal. 3:23-28).

What was the purpose of the law? It was and is a servant of God to lead the needy sinner to Christ. The word "tutor" in verse 24 does not refer to one who teaches, but the servant who saw to it that the school boy, possibly a bit reluctant, arrived at his destination.

The law convicts of sin and makes it evident to the repentant one that he needs divine help if he is ever to meet its demands. The law really puts a man in prison (kept in ward," v. 23), and makes him look to Christ to set him free.

When one trusts Christ he comes into the place of a son. He enters upon a spiritual maturity which makes it no longer necessary to have a tutor directing and disciplining him. He has entered into a new relationship by faith, and is a child of God.

Does this mean that the law has been set aside or abrogated? Not at all. Jesus Himself said, "Think not that I am come to destroy the law... I am not come to destroy, but to fulfill" (Matt. 5:17). This is our third point.

III. The Law Fulfilled (Gal. 5:13, 14).

Paul had warned against the folly of legalism. In Christ men are free from a slavish bondage to the law. But men, desiring to substitute license for liberty, were using the grace of God as an excuse for self-indulgence and sin.

Christ has set aside all the ceremonial requirements of the law, for He became the perfect, once-for-all sacrifice for sin, which was infinitely superior to all the offerings of the Old Testament law. He thus fulfilled the type of the offerings.

The moral requirements of the law were gathered up in Him, and in Him we have only one law to fulfill, the law of love. Obedience to that law meets all the moral requirements of the Old Testament law.

Liberty to the Christian is not a freedom to do as he pleases, not "an occasion to the flesh" that it may live in selfishness and sin. We are free only to be bound by the blessed law of love.

The tablets of stone were (and still are) important. Their laws have never been set aside or withdrawn. But in Christ God has done what He spoke of through Jeremiah the prophet, He has put His law in the Christian's inner being, and has written it in his heart. (Jer. 31:33).

PATTERNS SEWING CIRCLE

8463-10-20

Jumper Set

THIS should be a great success right off—slim, simple jacket topping a youthful, big-pocketed jumper.

For longer service wash cotton garments according to the instructions on the label.

To prevent figs, dates or raisins from clogging the food chopper add a few drops of lemon juice.

Have you ever tried drying the dishes with twin dish towels? A fresh dry towel in each hand disposes of them in the proverbial twinkling of an eye.

A little starch added to the water with which mirrors are washed will remove soil and give a polish to the glass.

Mending a small snag or rip before an article goes into the washing machine may save a larger patch later on.

If you buy wool material that isn't preshrunk, it's wise to steam-press it to shrink it before cutting out a garment.

Remove fresh grease stains from wallpaper immediately by molding a clean white blotter over stain and applying a warm iron. Move the blotter as it takes up the grease and use a clean portion to prevent spreading the stain.

Save colored bottles that beverages come in and use them for holding trailing vines, sprays or other greenery. They add a note of color to glass shelves in windows or in flower racks.

When washing out glass or pressed glass articles, apply the sudsy water with a small hand brush. It gets the soapy water into the crevices and removes dust which dulls the brilliancy of the glass.

Pattern No 8463 is in sizes 10, 12, 14, 16, 18 and 20. Size 12 jumper takes 3 yards 39-inch material, short sleeve jacket 1½ yards.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers. Send your order to.

Beggar Woman Quickly Made an About Face

He was extremely mean, and pretty well known for this characteristic in the town where he lived. One day an old beggar woman, new to the district, began her appeal.

Mr. Mean put his hand into his pocket as he approached, and she, full of hope, began to pour down blessings on his head.

"May the blessing of Heaven follow after you," she said, "all the days of your life."

Mr. Mean extracted his handkerchief and blew his nose as he passed on—but the woman, whose hopes were dashed to the ground, was not at a loss:

"And never catch up wid yel!" she added viciously.

Mosquitoes Prefer Animals
A recent study by federal entomologists shows that mosquitoes when given a choice, prefer the blood of cattle, horses, hogs and dogs to that of human beings.

The cryptostegia vine yields about 17 drops of rubber latex a day, a seven-year-old Hevea tree three to six pounds of rubber a year. Properly treated Hevea trees, when 10 years old, can give from 1000 to 1500 pounds of rubber per acre per year. About eleven pounds of rubber are used in making a small automobile tire.

Lay rubber articles flat when storing, allowing them to assume their natural position. Rubber loses its life when under a permanent strain.

Mrs. Frank Gruetzmacher and son, Harold, of Des Moines, were in Klemme Thursday looking after business matters.

Mr. and Mrs. Ben Coobs and Peggy were Sunday dinner guests at the home of Mr. and Mrs. Verner Nelson.

Mr. and Mrs. Wayne Pavcy and daughter Carol, were dinner guests at the home of Rev. and Mrs H E Harvey, Sunday.

Mr and Mrs Bert Mathews and Mrs. Wm. Smuth of Clear Lake were supper guests at the John Day home Sunday evening

Mrs Eddie Epps, who has been visiting with her parents, Mr and Mrs Herman Paul, went to Des Moines Monday for a tonsil operation

Dr. and Mrs E. A. Larson and son, Richard of Centerville, Iowa, and Mrs. Westberg of Des Moines, and her niece of Chicago, visited the past week at the home of Mrs C. A. Arnold.

Robert Ridder, who has spent the summer with his aunts, Mrs C A Arnold and Minnie Lenz on the farm, left Saturday for a visit at Sioux Falls, South Dakota, before going to his home at Watertown

A J. Kudje and family strated a they will spend at a cottage at ten day vacation Monday which Clear Lake Their daughter, Jackie, who has been attending summer school at Cedar Falls, will join them this week.

Mr. and Mrs. Emil Tiggerman of St. Louis, Mo., came Friday and visited until Monday at the Wm Tiggerman and Herman Paul homes. Mr. Tiggerman is a brother of Wm. Tiggerman, and Mrs. Tiggerman is a sister of Herman Paul

Sunday dinner guests at the home of Mr. and Mrs. Quentin Stille were: Kermit Stille and family of near Thornton; Art Carlson and family of Clear Lake, George Stille and family of Goodell, and Mrs J. J. Stille of Liberty township.

Novella Bredbenner returned home last Thursday after spending ten days visiting friends at Cedar Falls, Waterloo, Manson, and Cherokee While at Cedar Falls Miss Bredbenner registered for her Junior year of college work at Iowa State Teachers College.

Mrs. Loren Gast returned home from Philadelphia, Pa. where she had been with her husband, Aviation Student Loren Gast, who has been transferred to San Antonio, Texas. Mrs. Gast is at the home of her parents, Mr and Mrs. Ben Ridder in Liberty township.

Mrs. Swanetta Haefner is the new operator at the local telephone exchange.

When you have company or take a trip, that's news. Phone 12.

Mr and Mrs. E. G. Gregory of Colwell were visiting with Klemme friends Friday. They have been working at a war plant in Minneapolis since the close of school. Mr Gregory will be the superintendent of schools at Colwell this coming year and began his work August 1st.

Mr and Mrs. Conard Quandt and their grand daughter, Gracka Maria Gerardi, left Monday for Two Harbors, Minnesota, where they will stay at Quandt's cottage on the north shore of Lake Superior for several weeks, during the hay fever season which usually lasts until after a heavy frost

Mrs. Verner Stromer was pleasantly suprised last week when she received some pictures of her brother, Harold Alford of Brainsburg, and Actor Mickey Rooney and Actress Bonita Granville As Harold was returning from California he stopped at Reno, Nev and to his surprise Warner Bros studio was setting in Reno Mickey Rooney and his wife, Bonita, were on the set and in their spare time they enjoyed a ball game in which Harold took part He took several pictures of the couple and said Mickey Rooney was a very common person

Mr and Mrs. W F Pavcy drove to Mascen City Sunday evening to attend the band concert

Dr. W. F. Missman went to Des Moines Sunday to attend the state medical defense meeting held at Ft. Des Moines hotel and which was attended by about one hundred physicians He was accompanied by Mrs Missman, who visited with her sister, Mrs Gregory, and by Mr. and Mrs P M. Wilson who visited with their daughter, Mrs. Robt. Risser and son Bobbie.

Mr. and Mrs H Lewis and son, Duard, Mr and Mrs. C Kluckhohn and Luverne Lewis camped at the McIntosh Woods at Clear Lake from Friday afternoon until Sunday evening. While fishing with Mr Kluckhohn Friday evening, Henry Lewis hooked and landed a nine pound catfish which he caught on his fly rod The fish gave "Heinie" quite a battle as it was a pretty large fish to catch on light tackle

Guests at the farm home of Mr and Mrs. A. G. Lau in Liberty township the past week were Kathryn McHugh of Waterloo, Ia., and Sherrie Ann Lau of St. Louis, Mo., grand daughters of Mr. and Mrs Lau, and their friend Francis Smith of Mason City The latter returned to her home Tuesday and Kathryn McHugh returned to Waterloo Friday Sherrie Ann Lau will remain for a longer visit

The Times is in receipt of a card from Mr. and Mrs Leonard Lau, Vancouver, Wash., stating they have moved to 4412 East 9th Street They have had very ocol weather there and have to keep the fire going for a few hours each day The card further states "Sur chope we can go East when the boys get back from the war" Mr Lau is an instructor in the State School for the Deaf at Vancouver

Official Service Flags at Times Office \$100 each.

Chester Ward of Waukegan, arrived in Klemme Tuesday to visit his parents Mr and Mrs Ward and to help with the funeral services of Rev. Al Meuhlmeyer a former Klemme resident They returned home Monday afternoon

Rev and Mrs. Calvin Grosssch and his parents Rev and J W Grosshuesch left Saturday Montecello, Wisconsin to attend funeral services of Rev. Al Meuhlmeyer a former Klemme resident They returned home Monday afternoon

HELLO, FOLKS!

Lt and Mrs Ray A Jorgenson,
Jr of Dodge City, Kansas, are the
parents of a seven pound, one
ounce baby daughter born to them
Tuesday morning August 24th,
1943, at a Dodge City hospital.
Which all adds up to the fact
that the Editor and Mrs Jorgenson
are proud GRAND parents

4-H GIRLS CLUB MEETINGS ARE HELD IN COUNTY

The girls 4-H clubs have been
busy completing projects, holding
local achievement shows and com-
pleting all arrangements for the
county 4-H Achievement Show
held August 23 and 24

On Wednesday August 18 the
Concord Chums met with Lillian
Leth In addition to their achieve-
ment show plans, arrangements
were made for camping at Clear
Lake August 26, 27, and 28 Their
next meeting will be in October
as they meet every two months
for an all day meeting, due to the
fact that the girls live so far ap-

Thursday, August 19, was a
busy day The Bingham Boosters
met at Marjorie Fitzpatrick's
home. The Major Farmerettes met
with Ailene Oxley and each girl
canned some vegetables thought
from her Victory Garden The
Britt Buzzers met with Edith
Holck The Madison Livewires
met with Mercedes Formanek
They made plans to camp at
Clear Lake August 27, 28, and 29
The Liberty Busy Bees met with
Judith Haberkamp The girls
mothers were guests of the club

On Friday evening August 20
the Avery Sunbeams held their
local Achievement Show at Max-
ine Bachman's home with forty-
eight members and friends pre-
sent.

Horses worked only a part of the
time are never in as good condition
as those worked every day

Speech, after being discontinued
for several years, is again offered
and in this modern age oral ex-
pression certainly is required of
everyone, and those unable to ap-
pear before the public are defini-
tely handicapped

No School Monday P. M.

There will be no school Mon-
day afternoon of the first day of
school, so it will be unnecessary
for rural students to bring lunch
the first day

PARENTS INVITED TO ATTEND HONOR ROLL DEDICATION

Parents of Hancock county men
who have lost their lives in this
war are requested to write or see
Emil C Elling, Garner, immedi-
ately saying whether they can at-
tend the dedication of the Han-
cock County honor roll of service
men Sunday, Sept 5, at Garner
Parents of those men will be hon-
ored guests at the dedication
They will be notified of the exact
time of the dedication

FIFTY-FIFTY CLASS HAD PARTY FOR MR. AND MRS. PAVEY

The Fifty-Fifty class of the
Klemme Methodist Church held
a farewell party Friday evening
for Mr and Mrs. Wayne Pavey at
their home

A social time was enjoyed and
later ice cream, cake and coffee
were served Mr and Mrs. Pavey
were presented with a gift from
the class.

A mark of culinary cleverness is
the addition of toasted cubes of
bread to a tossed green salad just
before serving.

RESULTS OF LOCAL TUBER- CULOSIS SEARCH

Hancock County's yearly pro-
gram aimed at finding tuberculo-
sis cases while still in the early,
and curable stage, resulted in the
x-raying of 31 adults and children
at an x-ray conference held April
9, in Britt at the Memorial Hall

The annual program is spon-
sored by the Hancock County
Medical Society and the Hancock
County Tuberculosis Association
(County Christmas Seal Commit-
tee) co-operating with the tuber-
culosis control service of the Iowa
Tuberculosis Association and the
Iowa Department of Health Local
Christmas seal funds help finance
this service in the county

Miss Flossie McBride, a public
health nurse, was in active charge
of the program Beginning work
on March 1, 1943, she took histories
of 99 patients. Because tuberculo-
sis is a communicable disease, the
majority of histories were made
of patients who had been in con-
tact with known tuberculosis cases
or deaths Ten physicians in the
county referred patients because
of suspected contact.

Throughout the program facts
about tuberculosis were explained
to patients by the physicians and
the nurse It was emphasized that
the tuberculin test is a means of
discvering the presence of tuber-
culous infection before physical
signs of illness appear. A "positive"
reaction to the test does not in-
dicate the presence of active
disease, but must be followed by
an X-ray of the chest to discover
whether damage is being done to
the lung tissue.

Seventeen persons in the county
visited their family doctors for
the tuberculin test Five of these
tests resulted in positive reactions,
indicating infection with the dis-
ease Twelve were negative.

At the x-ray conference six
patients were x-rayed for the first
time, while 25 were patients who
had been examined previously
and for whom another film had
been recommended

Periodic re-examinations have
been recommended for some pa-
tients to disclose whether discover-
ed infection is making headway or
whether healing is taking place

One case of pulmonary tuber-
culosis was reported, which was
in the beginning stages. Fifteen
cases of the "first infection" type
of disease were listed. Eleven x-
rays were listed as negative for
tuberculosis

Results of all x-rays films were
sent to the family physician

ORDER CAFES TO CLOSE SHOP AT MIDNIGHT

The Garner town council passed
an ordinance regulating the hours
of restaurants and prescribed pen-
alties for violation. Garner's new
ordinance reads:

"It shall be unlawful to keep
open any restaurant or eating
house, holding a beer permit or
not, between the hours of 12 o'-
clock midnight and 4:30 a.m."

For violation upon conviction
the penalty shall be not more than
30 days imprisonment, or a fine
of not more than \$100.

ness associations

L. V. PERKINS WINS GRAND CHAMPIONSHIP TROPHY

Showing For The First Time Ed.
C. Thompson Wins Honors

It was a field day for two Klem-
me gladioli enthusiasts at the
Southern Minnesota Flower Show
at Albert Lea, Minnesota, Mon-
day, when Louis V Perkins was
awarded the Grand Championship
trophy for his prize winning glad-
iola "Carona," and Ed C Thomp-
son, who began raising gladioli
this spring for the first time, and
entered some of his flowers, was
awarded the Grand Championship
in the Novice Class and won a
coveted purple ribbon

Perkins "Stole" The Show

Mr Perkins, who has been a
familiar sight at "glad" shows for
the past ten years, took about
half of the places in the Albert
Lea flower show In the final judg-
ing eight of his gladioli were in
the judging for championship over
all and he took all three top hon-
ors He also came out with a whole
flock of Blue and Red Ribbons for
his entries in several divisions of
the show

Mr Thompson made a most re-
markable record as this was his
first experience in entering the
competition His flowers were en-
tered in the Novice Class, growers
of less than fifty varieties In this
class he won the Grand Champion-
ship ribbon, four Blue Ribbons for
first places and four Red Ribbons
for second places. His trophy
winner was a variety known as
"Ivory Key" It is a white glad
Mr Perkins' top winner, the Car-
ona," was also an ivory colored
flower with a pink border

Mr. Perkins had his flowers en-
tered in the Open Class, for grow-
ers of over fifty varieties, where
competition was keen among both
the commercial growers and the
amateurs

KLEMMME STORE HAS UNIQUE HONOR ROLL DISPLAY

Ed. Thompson has something un-
usual in the way of display at the
Thada Store Mr Thompson made
an honor roll of Klemme men in
the service The display is electri-
cally operated and lighted and
the names come into view on a
movable belt arrangement.

There are over one hundred
names on the roll and a number
of more to be added as a few
names were overlooked in check-
ing a list

Mr Thompson asks that if any
names from this community have
not been included, to let him
know so that the name can be put
on the honor roll.

Sparks falling on combustible
roofs are one of the principle
cause of fires on Iowa farms.

Lynn Chambers' Point-Saving Menu

*Broiled Liver Sausage and Tomatoes
Potato Chips Green Salad
Rye Bread Iced Coffee
Chilled Cantaloupe
*Recipe Given

Combine ingredients, add salt and mayonnaise Serve on crisp lettuce with bits of bacon

Have you discovered that cold sausage and meat loaves are low in point value and that they go further than the same quantity of fresh meat? And, if you really like a hot dish for a meal, that the cold meats are equally delicious when served hot? You'll like these suggestions:

Bologna Spaghetti.

(Serves 4)

1/2 pound bologna
1 cup onion, sliced
1 tablespoon bacon drippings
1 teaspoon salt
1/2 teaspoon allspice
1/2 teaspoon cloves
1/2 teaspoon pepper
1 1/2 cups tomato juice
3 cups cooked spaghetti

Dice 2 slices of bologna in skillet and brown with onion and bacon drippings Add to this seasonings and tomato juice and simmer until thickened. Add cooked spaghetti and heat thoroughly Serve with several slices of pan-fried bologna.

*Broiled Liver Sausage and Tomatoes (Serves 4).

1/2 pound liver sausage, sliced
4 large tomatoes, cut in half
8 slices of onion

Cut liver sausage into slices about 1/4 inch thick. Remove casing Place the slice of liver sausage on the broiling pan with tomatoes that have been cut in half and brushed with butter, seasoned with salt and pepper. Broil for about 8 minutes Liver sausage need not be turned As soon as tomatoes have broiled for about 4 minutes, top them with onion slices, if desired.

Frankfurters With Potato Salad.

(Serves 4 to 6)

1/4 cup bacon drippings
1/4 cup vinegar
1 beaten egg
1 teaspoon salt
1/2 teaspoon pepper
1 teaspoon sugar
4 cups cubed, cooked potatoes
1/2 cup chopped green pepper
1/2 cup chopped onion
3/4 pound frankfurters

Heat bacon drippings and add vinegar, egg, salt, pepper, sugar, potatoes, green pepper and onion. Stir until thick. Cover frankfurters with boiling water and allow to stand 7 to 8 minutes. Arrange frankfurters on top of potato salad for serving.

Here's a lovely, luscious dessert that will go with any of the above main dish suggestions. It's easy to make and very nutritious.

Here are the golden brown, rich, luscious pies being taken from the muffin tins all ready to serve. If you have a fresh fruit salad with the meat pie and a beverage, your whole meal's complete.

Apricot Whip.

(Serves 6 to 8)

1 No. 2 1/2 can apricots
2 cups milk
2 eggs
1/4 cup sugar
1/2 teaspoon salt
1 teaspoon vanilla

Drain apricots. Mash with spoon. Chill. Scald milk. Beat eggs slightly, then add sugar and salt. Add milk slowly, mixing well. Cook in milk slowly, stirring constantly until mixture coats metal spoon. Take from fire, add vanilla and chill. When ready to serve, fold in chilled, mashed apricots.

If you have a canning problem, write to Miss Lynn Chambers, Western Newspaper Union, 210 South Desplaines Street, Chicago, Ill. Please enclose a self-addressed envelope for your reply. Released by Western Newspaper Union.

By Clark Lee

(WNU Feature—Through special arrangement with Collier's Weekly)

If you should twirl the short-wave dials of your radio one of these nights and hear an announcer say: "This is Colonel Jiro Saito speaking from Manila," listen carefully!

The voice will be that of Japan's ace undercover man, a man you should know if you are to understand how the Tokyo war lords operate, how they are using every possible weapon in their bid for world conquest—trickery as well as troops; propaganda, bribery, fifth columnism and intrigue as well as submarines and airplanes.

And more important, it will be Jiro Saito or somebody very much like him whom the Japs will call on when they are eventually forced to cry "uncle" to Uncle Sam. The Japs don't expect to win their war to conquer the world all at once. What they want now in the Pacific is a stalemate and a negotiated peace that will let them keep part of what they have taken and give them time to prepare for the next step toward world mastery.

When the situation looks ripe, they will "depose" the militarists, put in a "conservative" cabinet of business men and one-time friends of America. They will produce men like Jiro Saito to plead their case, shy, soft-spoken, "so-sorry-for-you" fellows, who will attempt to convince the United States that it was all a mistake and let's be friends again.

When you listen to Jiro Saito's smooth, cultivated voice, speaking in grammatically perfect English, with just an occasional suggestion of Honolulu "pidgin," you will be hearing a man who exemplifies Japanese deceit. Saito is a medium-sized, round man of 48, with powerful neck and shoulders and with hair trimmed close to his broad pate in traditional Japanese army style. He looks like a typical Jap, but doesn't act like one. He spent his early years in Honolulu.

Started Two Wars.

There is nothing of the sword rattler or swashbuckler about him. On the contrary, he is extremely shy. Meeting him in peacetime, you would have thought him a nice, pleasant character, totally unlike the average run of Jap army officer.

But Saito has started two wars and stopped one. In his wake, there has always been a trail of bloodshed and tragedy. He was—and undoubtedly still is—the Japanese army's first expert on American psychology, its star secret agent, and a one-man fifth column.

You can scarcely stick a pin anywhere in the map of Asia without touching a region that has felt Saito's influence; and for the past decade and longer, a large part of Asia has been bathed in blood. Even so, there is no blood on Saito's own pudgy hands. He always gets out of a place before the shooting and bombing start, or he goes in after they have stopped. Indeed, in nearly 30 years in the ill-fitting khaki of the Imperial army, he has never plunged his sword into one of the emperor's enemies, never heard a shot fired except on maneuvers, never commanded troops in the field.

The portly colonel was very popular with the American correspondents in Shanghai. Squatting cross-legged at a geisha party, he looked like a bronze statue of a paunchy, heavy-jowled Chinese god, benevolent, but with a metallic quality about him.

Saito was especially sentimental about the Hawaiian Islands, where his father was consul general from 1903 to 1910, and where Saito attended private school and McKinley high, class of 1911.

"I feel more at home in Honolulu than any place in the world," the colonel told me.

By the summer of 1941, Japan decided it was time to drop the mask and take over southern Indo-China, which she needed as a jumping-off place for attacks on Singapore and the Dutch East Indies, and to protect her flank while she assaulted the Philippines.

Once again, the advance agent of empire was—you guessed it—Jiro Saito.

The colonel did his usual backstage job in Saigon, the capital of southern Indo-China. Then he emerged into the open as head of the military mission to supervise occupation of the strategic southern portion of the French colony.

The occupation of Saigon finally awakened the United States to the seriousness of Japan's penetration of southeastern Asia. But by then, it was too late. The Japanese had seized their springboards. They were ready for war.

We were soon to face the tragedies of Bataan and Pearl Harbor.

THE LIFE OF MUSSOLINI

Mussolini was once a tramp. Now he is twice a tramp. Forty years ago he was thrown off a caboose in Switzerland by railroad coppers. But that time he was able to get up.

His father was a village blacksmith and Benito was born with a bellows in his mouth. His dad had biceps like iron bands in his arms but Benito had them in his throat. Papa Mussolini shoed horses but Benito was no help. He would always try to talk a horse out of the idea it needed shoes and convince it that it would look better in patent leather boots.

Benito was supposed to shoo flies but he preferred to outbuzz them.

He never cared for the anvil or forge, finding it impossible to talk into an anvil or play recordings of his own voice in a forge. So he quit.

Pop, whose front name was Alessandro, also kept a saloon. This proves there were always queer ideas in the family. It is the only recorded case where a blacksmith alternately cried "Whoa!" "Back up!" and "What'll you have?" with no change of voice.

All this made the picture pretty confusing in Benito's boyhood. He would often find a teamster's horse in the barroom saying: "I'll take a cigar this time, pop" while the teamster was entering the blacksmith shop on all fours and demanding drinks for everybody in the house.

Natives love to tell about the time when pop put a brassrail in the smithy for the horses to stand on and drew beer through a bellows in the tavern.

Young Benito ran away to Switzerland. He started out with a quarter. No man ever went farther on two-bits up to a recent Sunday afternoon.

He became a soapbox orator. Discovering that people were crazy enough to think they knew what he was talking about, he never stopped talking. He became a newspaper publisher. Benito ran his own picture in the paper and the sheet went big because the public always goes for funnies.

He fought in the World war, improving his diction by threatening superior officers. After the war he came out with a program for saving Italy through a sustaining radio program. It was the only case up to that time of a man being his own radio artist and sponsor.

King Emmanuel thought it was a premiere for an American movie comedy and named Benito headman before he found it wasn't all in fun. It took him 21 years to correct the mistake.

For 21 years he spoke only from high altitudes and announced himself as a new Caesar with vitamins and screen prizes thrown in. Then he met Hitler and everything went black. And we don't mean black-shirt.

It is now reported he is thinking of going back to the combination blacksmith shop and saloon. It's a long time since the homefolks have seen a horse.

PRIVATE PURKEY ADOPTS A CODE

Dear Mom—Well, I am now with my old Pal, Moe. (Just say them last two words over and think of a city in Sicily and it will give you a cue to where I am.) I can't come right out and say where I am so you will have to get it from hints. Like when I wrote to tell Annie to keep her big Trap closed it was a sort of code to tell you I was in a place called Trapani.

I guess we better agree on a code to keep track of me from now on. It will all have to be based on the idea that I will be able to keep track of where I am which is no easy trick on account of we get rushed around so fast in this globule war. For instance, mom, if I write a lot about mess you will know I am in Messina and if I should write a letter and talk a lot about an insurance company you will know I am near Mt. Aetna. Catch on?

I am well and only had one close call in the invashun of Sicily. This was when I took four prisoners. A little later I decided to release them but they would not stand for it. They became very quarrelsome and refused to let me release them. I had to call for help. I also had a little row in one town when the natives started abusing us for arriving too late. They had wanted to give up 48 hours sooner. It was all straightened out when we explained our watches was slow.

Well, everything is going fine. I hope you and dad are fine.

Your loving son, Oscar.

When Japan meets its ultimate ruin it can at least have the satisfaction of stamping it "Made in Japan."

Ode to a Cow

She doesn't kick just once or twice, And even that is not so nice; But many times her cloven foot Inside my milking pal is put; She doesn't stop at that, oh no, She heaves at me a mighty blow, And then quite suddenly I find I'm sitting on my never mind.

—Barbara Nye.

PATTERNS SEWING CIRCLE

8462
2-7 yrs.

Pattern No. 8462 is in sizes 2, 3, 4, 5, 6 and 7 years. Size 3 requires 1 1/4 yards 39-inch material.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

Send your order to.

Industry Enlists Robot For Chemical Production

A "robot" control which opens and closes dozens of valves with split-second timing now controls processing in many of the nation's plants producing aviation gasoline, butadiene for synthetic rubber, and toluene for explosives.

In such plants steam, air and hot gases flow intermittently through an intricate system of piping and tanks. These gases must follow each other at predetermined intervals, and any error in timing or route of flow would slow up production not only through loss of materials but possible damage to equipment.

The processing might be compared to the job of scheduling, dispatching and regulating trains on a congested railroad system. One small error can tie up railroad traffic for hours, possibly resulting in collisions which would damage both trains and goods in transit.

The "robot" control performs the same functions in some parts of gasoline, butadiene and toluene plants as dispatchers and switchmen do in a railroad system. In many of these plants, even if the required numbers of skilled operators were available, it would be humanly impossible for them to open and close the numerous valves with the precise timing provided by the "robot" control, consisting of automatic cycle-timers and valve control.

Spinach Regains Its Lost Favor as Food Nutrient

Spinach has had a rather varied career. At one time everyone was urged to eat it because of its high calcium content, but when it was learned that the calcium was not all available for the body's needs, it fell into disfavor. However, when vitamin requirements and the amounts in different foods were realized, it was rapidly returned to favor.

Weight for weight freshly harvested raw spinach may contain two times as much ascorbic acid as orange juice and ten times as much vitamin A as milk. If by some chance cooked spinach is taboo in your household, now is certainly the time to introduce the tender green leaves into different salad combinations. While if the cooked spinach is a favorite, your family will probably appreciate getting it in a new form and continue to enjoy the delicate flavor.

Spinach may be combined with pieces of tomato and radish slices or with shredded carrots and French dressing to make colorful appetizing dishes. In fact many of the greens both cultivated and wild, are additions to salads provided their flavor is enjoyed by those you are serving. Similar combinations can be used in sandwiches.

Four Factors in Storage

For the successful storage of fresh vegetables, four important factors must be taken into consideration: temperature, moisture, ventilation, and light. Those which are similar in structure and growth require similar storage conditions. No one storage place can be used successfully to store all vegetables. Another thing that is very important is to put into storage only high quality produce—vegetables that are free from insect damage, disease, bruises, cracks, blemishes, cuts, sunburn, frost, or mechanical injury. Care must be used in harvesting to avoid bruising. Sanitation of the storage room or house is good storage insurance. Thoroughly clean and ventilate the place before putting any products in for the winter. The inside of the storage structure and all boxes or crates should be disinfected with a solution made by adding one pint of formaldehyde to six gallons of water, or one pound of copper sulphate to ten gallons of water.

Guard Against Gall Aphids

Because serious damage from spruce gall aphids may start at any time, Dr. Harlow B. Mills, entomologist for the Montana Agricultural Experiment station, urges daily inspection of the trees and prompt spraying the moment new growth starts to curl or shows the beginning of an infestation.

Spruce gall aphids are so tiny they are hard to see, Dr. Mills explains. However, at this time the female, hidden under cottony masses on the underside of last year's growth, has laid eggs which will hatch soon. Little nymphs will migrate to new growth and cause the characteristic unsightly gall. The gall resembles a spruce cone with needles extending all around it. It is green or purplish at first, turns brown later and eventually kills the tip.

Ear Sensitive

Believe it or not, the ear is so sensitive that it can detect the changes of less than one part in a million, according to Dr. Harold K. Schilling, associate professor of physics at the Pennsylvania State college. The ordinary air pressure against the ear is equal to the weight of a million mosquitoes per square centimeter (about one-sixth of a square inch). A change in pressure caused by adding only one-thousandth of a mosquito to the pile could be detected by the ear, Dr. Schilling said. If only two or three molecules of air move against the ear, and displace the drum a distance of only one of the molecules, the ear would notice it, the physicist stated.

Have New 'Speedometer' For U. S. Fighting Ships

Science has streamlined the vital job of "keeping the ship's log" of speed and distance on America's battle wagons.

An "underwater log," a precision instrument installed in the hulls of Uncle Sam's fighting ships, has been perfected by the Brooklyn marine division of Bendix Aviation corporation, pioneers in the development and mass production of such typically "automatic age" devices for sea, land and air transport and communications industries.

"The underwater log" system, developed by the corporation's engineers, in co-operation with the navy, is more than a sea-going version of a speedometer. In addition to indicating rate of ship's speed in knots per hour, this salt water robot totalizes in nautical miles the distance traveled by a ship from a given bearing, aids in the measuring of the draft and trim of a ship, and gives other speed and distance indications important for navigation and gunfire control.

The "underwater log" automatically transmits its speed and distance information by remote control to the navigation officers on the ship's bridge, to the fire control and gunnery officers in all parts of the ship and to the engine room. Its accuracy in constant operation as a faithful underwater watchdog is now legend among the officers and men of the U. S. fleet.

In convoys the underwater log has been especially valuable in obtaining more accurate information than previously possible concerning the comparative speeds and daily distances traveled by merchant ships and escorting vessels.

Here's Don-Jan-Yu, Tasty Steamed Flounder in Eggs

Chinese cooks do some interesting things with eggs that should be of interest to ration-harassed American housewives. Egg dishes supply needed protein, and—if cooked in the Chinese manner—they will turn any entrée into a hearty and tasty main dish.

Here is the recipe for Don-Jan-Yu, or Steamed Flounder with Eggs:

Cut in ½ inch slivers 2 pounds fillet of flounder; blend 1 tablespoon oil or melted fat, 1 tablespoon cornstarch; 1 teaspoon soy sauce; finely dice and add 1 tablespoon scallions and 1 tablespoon green pepper; then blend together and add 4 eggs, 1 cup water or chicken bouillon and 2 teaspoons salt and a dash of pepper. Pour over fish.

In deep frying pan or kettle with tightly fitting cover, place water ½ inch deep. On a trivet or rack deep enough to hold fish above water, place dish containing fish mixture. Cover and steam for about one hour. Serve with hot boiled rice.

Sun Helps Swedish Industry

Almost a fifth of Sweden is above the Arctic Circle. Climate is tempered by the warm Atlantic currents twisting into the Skagerrak. The polar ice cap slipped off the southern tip of the peninsula thousands of years ago, left hundreds of footprints as lakes, seamed the land with rivers. Mountains rise ruggedly in the north. Winter blankets the land with cold and darkness. Summer comes with a rush.

Biggest "sight" is the midnight sun viewed from one of the northern peaks. The sun is a worker as well as a wonder. It thaws the northern snows, melts glacial ice, creates streams that provide the "white coal" for industrial power developments. Before the war about two-thirds of the country's 10,000 miles of railway had been electrified. Electricity is taming the wilderness, lugging ore from the iron-packed hills in the north, taking the drudgery out of farm and household chores.

Poison Bait Kills Slugs

Special poison baits containing metaldehyde are the best means of control for slugs, which cause unusual damage to vegetable plants.

The unusual damage from slugs is due to abnormally cool, rainy weather, favorable to the pests. Slugs have soft unprotected bodies, very sensitive to loss of moisture and in warm, dry weather are forced to spend most of the time underground where they cause little damage.

Slugs are snails without shells. The most common kinds are about one-half to one inch long, dark colored, and soft and slippery to the touch. They feed at night and on cloudy, rainy days and leave a shiny film of mucous secretion of "slime" wherever they go. They attack young tender plants of all kinds, eating ragged holes in the leaves, and often cutting off the stems of small plants much as cutworms do.

Bread of China

Rice is the "bread" of China. It is usually eaten where grown, plays second fiddle to other grains in foreign trade. Variety is the spice of rice. Important kinds cultivated are common rice, swamp rice, upland rice and glutinous rice, besides several hundred other sorts. Unmilled or rough rice, growing or cut, is known as "paddy." Growth requires moisture, and also a climate a bit warmer than other grains must have. Swampy ground, or a field that can be flooded, is best. Central valleys of the Yangtze and its feeders provide the conditions needed for "wet farming."

Ground alfalfa and cracked corn showed no advantage over whole hay and shelled corn in producing gains on lambs in feeding experiments at Iowa State College last year

WEEKLY NEWS ANALYSIS

Catania's Capture Marked Beginning Of Axis Last Stand in Sicily Battle; Red Offensive Crumples Nazi Flanks; Yanks Continue Gains in Pacific Drive

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)
Released by Western Newspaper Union.

TELEFACT

WHERE THE AVERAGE CIVILIAN INCOME WENT

PER CAPITA
1941 - \$668
1942 - \$817

SICILY: Last Stand

Forty thousand Axis troops were all that were left to stand between the Allies and complete conquest of Sicily as the last phase of the battle developed. Of the 40,000, it was estimated that 35,000 were German and the rest Italian.

Although heavily outnumbered by the 10 Allied divisions reported in action, the Axis relied on strong natural entrenchments hewed into the rugged mountains to hold up the British-American drive. The advance against these positions was difficult, with the infantry slowly picking its way up the craggy but barren slopes in the face of stiff mortar and machine gun nests which had held their ground even after fierce Allied artillery barrage.

After being stalled for two weeks in front of Catania, the British 8th army spilled into the city after overcoming strong Axis positions set up along the several rivers winding through the country and in the tall fields of grain. Aided by the navy's bombardment of the enemy's coastal positions along the Tyrrhenian sea, the U. S. 7th army's drive pointed eastward to Messina, the Axis' last communication link with the Italian mainland.

MINERS: For Travel Pay

Pride might cometh before the fall, but in John L. Lewis' case, it was his interest in drawing underground pay for his 500,000 United Mine Workers that accounted for his appearance before the War Labor board which he had so often berated in the past.

Occasion was the WLB's hearing on the Illinois Coal Operators' and UMW's agreement for payment of \$125 a day to the miners for the time spent in traveling underground from the mine's entrance to the diggings. Lewis told the WLB that American coal miners are the only miners in any civilized country who receive no compensation for underground travel.

The agreement also calls for an eight instead of a seven hour day and a six-day work week, which, with the underground travel pay, would increase miners' daily checks by \$3. Stating that 1,482 miners died from risks in the pits last year and 72,000 were seriously injured, Lewis said the extra working hours would increase the men's exposure to such accidents. Furthermore, he declared, the miners received just \$37 more a year than the lowest classification of government clerical workers.

GRAIN: Going East

Six hundred million bushels of corn were used during the second quarter of 1943, the department of agriculture reported, with supplies as of July 1 totaling 872 million bushels. Of this amount, 842 million bushels remained on farms.

As of July 1, the department stated that there was a supply of 290 million bushels of oats; over 200 million bushels of barley, and 46 million bushels of rye. Approximately 300 million bushels of wheat were found available for feed.

In relation to livestock, feed supply is reported to be 20 per cent smaller than last year and 14 per cent below average.

STRIKE

In the first test of the Smith-Connally law, 1,005 employees of two plants of the Allis-Chalmers company in Springfield, Ill., voted to strike in protest of the National Labor Relations board's refusal to grant District 50 of the United Mine Workers an election to determine its claim as collective bargaining agent. A total of 836 voted against a strike.

The pallot read: "Do you wish to permit an interruption in war production in wartime as a result of this dispute?"

RUSSIA: Offensive Climax

The height of the Russians' summer offensive was reached with the fall of Orel. After a month of hard fighting, Marshal Timoshenko's forces swept into the city, even as the bulk of 250,000 Germans was being withdrawn to new positions to the west.

Gen. Timoshenko

Held by the Germans since October, 1941, Orel stood in ruin as the Russians moved in, with Nazi rear-guards tackling the Reds in hand-to-hand fighting in delaying action in the streets of the city.

In taking Orel, the Reds threw the full weight of their artillery, planes, tanks and infantry into the battle. Slowly, they ground down German resistance on the north, south and east sides of the city.

On the other end of the central front, the Reds announced capture of Belgorod.

SOUTHWEST PACIFIC: At Munda

The American attack on Munda in the Solomons stands out as a classic of military strategy.

In the final stages of the battle against a fanatical enemy resisting to the death, American forces drew a tight noose around the Japs, with one column moving to the west of the defenders' line while two other columns hammered in from two ends on the east.

When American planes failed to sufficiently reduce the Japs' hidden pill-boxes heaved in the jungle brush, 13-ton tanks were called into the fray, and these crackled through the dense foliage to advance on the enemy's well-concealed positions and draw their fire. Their gun-fire guided the tanks to their entrenchments and these were quickly subdued with point-blank barrages.

With strong Jap points overrun on the east, American warships and airplanes then moved in along the coast to the west and laid down a thunderous volley into the enemy's positions. As this combined barrage shook up the Japs in their pillboxes and caves, American troops picked their way northward, to ring the enemy from the west.

TAXES:

Corporations' Share

What is the corporations' share of the nation's tax burden?

Secretary of the Treasury Henry Morgenthau revealed that preliminary statistics show that 509,062 corporations filed returns for 1941. Except for 40,160 which were inactive with no income data, these corporations paid over seven billion dollars in normal, surtaxes and excess profit taxes. The government collected nearly 13 billion dollars in revenue for 1941, which would indicate that corporations accounted for almost 60 per cent of receipts.

Morgenthau reported that of the corporations reporting for 1941, 264,625 showed profits, with net income of 18 billion dollars. Approximately 43,648 more corporations made money during the year than in 1940.

MISCELLANY:

WAR PRISONERS: One out of every ten American soldiers in Japanese prison camps has died of disease since the Philippines fell, the war department reveals.

WOUNDED: Seventy per cent of wounded Russian soldiers recover and return to the battlefield, report British army surgeons who have been on a mission to the Soviet Union.

Faster Than Sound

To Lt. Col. Cass S. Hough of Plymouth, Mich., fell the rare distinction of traveling faster than sound, or more than 780 miles per hour, while undertaking two experimental flights for the U. S. army air force.

Last September, Col. Hough's P-38 Lightning climbed up to 43,000 feet. Then, he coolly nosed the plane into a powerdive and she zoomed downward at the record speed before being leveled off at 18,000 feet. Last February, Col. Hough took a P-47 Thunderbolt to 39,000 feet, and repeated the previous performance.

According to the 36-year-old daredevil, he made his first flight on impulse. As his plane went screaming downward, he said, it felt as though a ton of bricks lay on his back, and he could barely lift his arms to write down the recordings of his instruments. When he leveled off at 18,000, everything went gray, he declared, but he never lost consciousness.

FARM LAND: Value Rising

With the value of all farm land now above World War I level, government officials were becoming anxious over the possibility of another realty boom which would collapse with a disastrous drop in prices as in the twenties.

Between March and July of this year, farm real estate rose another 3 per cent. The increase occurred throughout all of the geographical regions and in two-thirds of the states. In Indiana, farm property sold 40 per cent above the 1935-39 average.

With commodity prices up one-fourth within the last 12 months and farm income for 1943 expected to exceed 1942's record levels, farmers were said to be active buyers in the market. What with high commodity prices prevailing, speculators also were supposed to be purchasing property for resale.

WAR ARSENAL: 80 Pct. Complete

Of the government's planned construction of 14½ billion dollars of war plant facilities, approximately 12 billion dollars has been completed, Chairman Donald Nelson of the War Production board announced. That represents a completion of 80 per cent of the program compared with 61 per cent at the start of the year and 34 per cent at this time last summer.

Greatest gains in the program were in the construction of plants for guns, combat vehicles, aircraft and ammunition. Facilities for producing ammunition are 95 per cent complete.

According to Nelson, the records for other programs showed synthetic rubber, 61 per cent finished; 100 octane gas, 39 per cent; iron and steel, 75 per cent, and chemical products 90 per cent.

Production Lags

Production of armaments and other goods needed by the army is lagging seriously, Lieut. Gen. Brehon B. Somervell, chief of army supply services, warned. He said that 300 million dollars' worth of supplies have not been delivered according to schedule in the last three months. Output of factories has been going down steadily, he continued, with July figures "decidedly worse" than those of June.

At the same time the treasury reported that actual war spending during July was half a billion dollars less than in June, this being the first month in which war costs have turned downward. Commentators say this decline is another indication of lower production, rather than smaller needs.

Urging all contractors to fulfill their contracts, General Somervell said: "If as a manufacturer, you are scheduled to produce a certain quantity of war material by a specific date, you have undertaken a specific military obligation."

CARGO PLANES: Back to Metal

New developments prompted the army's cancellation of contracts for all wooden transport airplanes and the return to metallic construction.

The wooden craft were designed to operate from small, unimproved landing fields and carry 4,500 pounds of cargo at medium range. But partly because of Allied air dominance, good airports have been put in use in distant combat zones, and the demand has shifted to faster, longer-range planes.

Furthermore, it was reported, aluminum production has increased in a volume sufficient to take care of additional plane building, while certain woods suitable for the type of transport designed are growing scarce.

GAS

Production of gasoline and other petroleum derivatives can be increased by recovering oil now left in wells, and by processing natural gas, oil sands and shales, Dr. Gustav Egloff, renowned scientist, told a joint congressional committee.

He urged governmental aid in developing synthetic gasoline methods, but added that he did not think that making gasoline from coal was advisable immediately. He said that eight million men would be needed to manufacture a year's supply.

Washington, D. C.

'FATHER' BARUCH

Gaunt, gray Bernie Baruch, whose relentless prodding of the war effort has saved more lives than any one can estimate, is worried over a lot of things besides tanks, airplanes and machine guns. Among other things he is worried over the human problem of reorienting the lives of people who have flooded cities, who have been thrown out of joint by the war.

Sitting on his park bench in Lafayette park, where he holds "office" conferences, Bernie sees the stream of girls, thousands of them from all over the U. S. A., dumped into government offices, into crowded boarding houses, and wonders what will happen to them when the war is over.

Baruch won't tell you—but his friends will—about how he handled this problem after the last war.

He had employed several thousand clerks and stenographers in his War Industries board, and after the Armistice he began to worry about whether these girls were going back to their homes or would remain in the exciting cities.

So he sent each girl a letter thanking her for the time and loyal work she had given her country. And as a hint that she should go back to her mother he suggested: "Anyone who will apply at my office can receive a railroad ticket back home."

Baruch also attached to each letter a \$10 bill.

The railroad tickets were paid for out of his own pocket, since the government does not pay for personal transportation, and it cost Baruch many thousands of dollars. He was a little fearful that some of the girls might have taken the tickets, then turned them in to the railroad. However, he hoped that he might have helped to get at least a fair proportion out of the city and back home.

HCL

The high cost of living which the coal miners have complained about recently was substantiated by an OPA survey of company stores in western Pennsylvania.

John A. Fath, who made the survey, came back with a report of "exorbitant prices and mark-ups" and insisted that company stores, which do no advertising or sales promotion, should sell their goods at lower prices than other stores, rather than higher.

He found suits selling for \$38.50 which cost the store \$12.50. He found a shoe box marked \$9.95, but inside the box he found the shoes themselves marked with crayon, "\$6.50."

Result of the survey already has been a voluntary price roll-back in the company stores. Now that the government has taken over the mines, the OPA is moving to make this company store price roll-back not voluntary, but universal.

Note—Fath was once a storekeeper himself in Millville, N. J., hometown of Leon Henderson. He gave Henderson his first job.

HONORS FOR WORKMEN

The Office of War Information is arranging a de luxe program for next Labor day, hailing the contribution of American workmen in the drive for victory. "Producing for Attack" will be the theme of the program, and it will include inspirational broadcasts by President Roosevelt and other top-ranking war leaders.

However, this isn't the only labor show on the OWI schedule this year. Another special celebration for Labor, to be known as "On to Victory" day also will be observed within the next two months.

It was conceived by Maj. Paul Hines, chief of the labor branch of the Fourth Service command at Atlanta, Ga., and promoted by Hervey Allen, author of "Anthony Adverse."

All war plants will be asked to declare an "hour off" on "On to Victory" day, at which time special "War Merit" emblems will be awarded.

Climaxing the "On to Victory" programs will be a nation-wide broadcast in the evening—according to OWI plans—featuring such speakers as President Roosevelt, Winston Churchill, Generals MacArthur, Eisenhower and Doolittle and Admirals King and Halsey. Joseph Stalin and General Chiang Kai-shek of China also may be invited to take part. All the speakers will have a special message for American labor.

The evening broadcast will conclude with the sounding of taps from the steps of the nation's Capitol, in memory of our war dead, and an answering taps by U. S. buglers in Europe and the South Pacific.

MERRY-GO-ROUND

One thing President Roosevelt talked to President Avila Camacho about while in Mexico was permitting 12,000 Polish refugees to enter Mexico from Europe. Mexico has consented.

Congressman Mike Monroney of Oklahoma is trying to rent Bill Bulfinch's palatial Washington house now mayor of Philadelphia.

John Carlson's book "Under Cover" on American fascism is really going places.

Portrait of a Man With a Hammer:

Things that still burn me up and knock me cold: The G-Men lost the decision against all those Nazi saboteur accomplices in Chicago... The high courts held that the FBI didn't "arraign them properly"... In time of war yet!... The G-Men, it seems, must no longer try to learn from a spy the names of his confederates... Until his arrest is announced! They must "arraign him" immediately, let the newspaper men announce the fact and tip off his confederates—to take it on the lam.

Add delicious reading: Going back over the files to read the boasts and threats of Virginia Gayda—the Italian Goebbels... It is mental desert... Just as good as the speeches of Nazificationists... If you throw a brick through a grocer's window to steal a loaf of bread—you get your name in the papers... If you're arrested by the Dep't of Justice as a Hitler agent, however, newspapers mustn't mention your name... If you attack Hitler agents in and out of Congress—you get panned (by name) in the Cong. Record.

Badoglio, who never fought Fascism, is getting better treatment from America than De Gaulle, who never stopped fighting it... Among other things we can't get excited about is how the war affects the stock market.

At last Goering has a good reason to wear all those chest medals... They're bullet-proof... Germany has admitted that it torpedoed the Robin Moor. Look back at the files. The obstructionists blamed it on Britain and everybody except Germany... Those of us who said it was Hitler were called warmongers... Add bond slogans: Digging into your jeans to buy more bonds is better than digging a foxhole... Swell novelty song: "Hitler's Letter to Mussolini" (with Benito's reply on the other side).

A reporter named Allan Chase didn't like the looks of Franco's gov't in Spain... So he went into the Latin-American countries to learn more about it. He found out... You'll find it in his new book, "Flanage," and he offers data to move your eyebrows to your hair line... Chase is no punch-puller... Names, names, dates and places... You'll be surprised whom you meet in his pages... A one-time household name movie gal star, for instance... Another person mentioned still sits pretty in high gov't office.

Memory Dep't: Remember the Americans who screamed that Fascism was invincible? Remember how they urged you to appease the Axis—because the urgers insisted we were too weak to fight back?... Remember the names they called Americans who urged that something be done to stop the spread of hate here?... Remember how they described Fascism as the "wave of the future"?... And now that wave of the future is a small swamp of the past.

In 1930 Gen. Smedley Butler (winner of two Cong. Medals) publicly criticized Mussolini... After the story broke about Il Duce's motor car crushing a child... In the hit-and-run manner... That's what Gen. Butler called him—a hit-and-run... In a speech at the Contemporary Club, Philly... Mussolini protested via the Italian Embassy... As a result, the Navy ordered a court-martial—but later rescinded it.

Manhattan Murals: The men in uniform and their lady friends—carrying on in the doorways of Fifth Avenue shops—in the dimout... The blind magazine mendicant, holding an arm load of heavy mags at the Roxy stage door, waiting for the chorines to buy... Sign in a midtown cafe: "Dishwasher wanted: Will pay Lockheed wages!"... Funniest sight in town: The camel in the park zoo—with its Summer haircut... The uppity 5th Avenue buses which have an official name, if you please—"Motor Coaches." Hm!... The seedy character (long, black beard and hair down to his shoulders) who is known as Hairless Harry... The 52nd Street (Swing Alley) victory garden scarecrow. It looks better than most night club patrons... The gambler who feeds hundreds of pigeons in that lot nearby every day—because he thinks it's lucky.

Have a laff: Laval warns the French people that the Allies want to set up a dictatorship in France... Mussolini flopped, and suddenly Laval comes out with a sour notice for dictatorship.

Now it is Colymist Sam Grafton who is scolded for referring to the King of Italy as "that moronic little king"... But why? The moronic little king says the war is to be continued—and His Royal Lowness signed the Declaration of War against the U. S.

THE upper sketch shows a combination living and bed room brought up to date with every inch of space used. The cushions (lower left) were replaced with a better like compartment for bedding. This was made of plywood as shown at the lower right. It was padded.

STUDIO COUCH WITH SMALL TABLES AND NO STORAGE SPACE. SLIDE COUCH UNDER BEDDING COMPARTMENT.

NOTE—Longer and longer grows the list that "money won't buy" But money does for using the things you already have are not on that list. The one shown here is from BOOK 10 of the series of homecoming booklets prepared for readers. BOOK 10 also contains more than thirty other things to make more from things on hand and available materials. Booklets are 15 cents each. Address.

Mussolini's Meteoric Career Recalled as He Makes Exit

Italy's Master
Rose to Power and
Why He Collapsed

By ELLIOTT J. PINE

On July 25, 1943, Benito Mussolini, dictator of Italy for 21 years, tearfully resigned his office, and turned his government over to King Victor Emmanuel. The immediate reason for the dictator's relinquishing power is said to be his inability to obtain greater military aid from Germany. The Fascist council voted 19 to 7 against accepting his plan of abandoning more than half the country to the Allies, and of establishing a defense line in the north. When Mussolini realized that he could not enforce his will as he was accustomed, he stepped down, or according to other accounts, was forced out.

More basic than this dispute on plans, however, was the increasing and bitter distrust of Mussolini and the Fascist party he headed. The Italian people, most observers say, never wished to enter World War II. Defeats, losses and hardships have turned the people away from Fascism, and recently was brewing ever hotter. When Mussolini went, Fascism ended too.

King Victor Emmanuel, who has always retained the shadow of authority, has given the official version of the situation in this statement: "His Majesty, the King-Emperor, has accepted the resignation from the offices of chief of government, prime minister, and secretary of state, which was tendered by His Excellency, signor Benito Mussolini, who has been appointed as chief of government, prime minister, and secretary of state, His Excellency, signor Pietro Badoglio."

At the time this statement was made public, it was pretended that Mussolini's ill health was the reason for his leaving office, but this other weak excuse was soon dropped.

The new government thus established by the king and Marshal Badoglio is generally considered to mark the end of the Fascist party. The structure that held Italy tightly together for two decades apparently has collapsed by the removal of one man. Actually the party has been crumbling within for years, say informed correspondents.

Fascism Began 24 Years Ago.

"Fascism" as a name dates from March 23, 1919, when Mussolini and others organized the "Fasci di Combattimento" meaning "Italian fighting groups." The word "Fasci" comes from the old Roman symbol of authority, the "fasces," a beheading axe with a bundle of scouring rods bound on the handle. It can be seen on the reverse of an American dime.

During the following two years, the little party increased rapidly. While Mussolini did not actually lead it, perhaps, he at least was one of its earliest and strongest leaders. He soon came out in front, a vigorous man of 38, with a compelling manner and oratorical persuasiveness.

He was born in 1884, the son of a village blacksmith and country school teacher, in Predappio, Romagna province. When he completed grade school, he became a teacher in a neighboring village, and soon took to stump speaking for the Socialist party. His political activities brought him into several clashes with the law. He became a writer, and rose to be editor of the Socialist paper, "Avanti."

During World War I, he served as a corporal, and he participated in the Fiume campaign of 1919. Soon after being discharged from service he met a few kindred spirits, and began the organization of the Fascists.

It was a time of great unrest and employment. Although victorious in the war, Italy had suffered heavy losses, and was oppressed by a ponderous war debt. Being a country naturally poor in resources and only slightly industrialized at the time, the post-war depression bore down more heavily than on other nations. Many were embittered about their frustrated hopes for territorial gains through the Versailles treaty. They blamed Britain and France for leaving Italy out.

The wealthy and conservative classes feared the spread of communism, and many churchmen added their voices to the clamor. The na-

tional assembly was divided into numerous bickering and log-rolling factions, and the premier, signor Facta, was not a strong enough man for a crisis.

The March on Rome.

Assembling the Fascist militia, the party's private army, in Civitavecchia, on October 27, 1922, he began the famous "March on Rome." When he approached the capital with 250,000 armed men, Premier Facta, and Marshal (then General) Badoglio begged the king, the same Victor Emmanuel, to stop the marchers with machine gun fire and the bayonets of the regular army. The king, who hated bloodshed, refused to give the order. Three days later, he acceded to Mussolini's demands, and appointed him premier. From that day onward, Mussolini has been continuously in complete control of Italy, until the other day. Ironically, he turned his power over to Victor Emmanuel and Badoglio, who might have stopped him 21 years earlier.

As soon as Mussolini found himself firmly in the saddle, he set about making himself and his party absolute. All political parties were banned except the Fascist, and many social, cultural and religious societies were closed down under the force of these laws. Party members were placed in every position of authority in the civil and military administration. Business and professional men soon found it to their advantage to join the party, or to get on good terms with some important member.

For a time, the Fascist regime appeared to be a decided benefit to Italy. Domestic order was restored, business and finance stabilized and

DON'T BOTHER THE PILOT—A propaganda poster showing Mussolini at the controls of a big bombing plane (he is an amateur flier), warned Italians in 1939 "not to disturb the pilot, especially when he is engaged in tempestuous navigation; nor ask the way at every turn."

This appeal for blind and unquestioning faith in the wisdom of the leader is the keynote of Fascism, as of all dictatorships. Mussolini "piloted" Italy into the war, then when the navigation really got "tempestuous" he "bailed out."

encouraged, employment stimulated by public works, and a program of social benefits put into operation. The Fascist regime floated international loans, built hydroelectric plants, opened mines, drained swamps, introduced new manufactures, and in many ways brought temporary advantages and prosperity to Italy, accustomed to backwardness and poverty.

But the Italians soon discovered the price of these gains was the loss of liberty. In 1925, Mussolini, or Il Duce, "the leader," as he liked to be called, had a law passed legalizing his position as prime minister, and rendering him responsible to no one but the king. This meant, in effect, that he could do as he pleased.

During the twenties Italy shared somewhat in the prosperity of the post-war world, but the great depression fell heavily on the nation, the more so because of its reliance on international trade. Its artificial prosperity began to crumble, despite tight controls, and unrest and dissatisfaction began to fester here and there, under cover.

Land Hunger.

Meanwhile Mussolini was thinking of expanding Italy territorially. The League of Nations had prevented him from undertaking any small wars of conquest, such as were common in the 19th century. In 1923, he had a "causid bellum" against Greece, but he did not push the issue to open war. Nothing occupied his large army excepting patrol action in North Africa.

In 1933, Adolf Hitler rose to power as chancellor of Germany, as head of the National Socialists, or Nazis, a party that had much in common with the Fascists of Italy. Mussolini soon welcomed his imitator, and began to plan international adventures.

Nevertheless, a year later, when Hitler began to threaten Austria, Il Duce offered to support that weak state. Next year Italy declared war

'Let Us Live Like Lions'

IN HIS SECOND YEAR of rule, 1923, Premier Mussolini was already showing his yearning to rattle the sword. He sent such a sharp diplomatic note to Greece on the murder of members of an Italian commission on the Greek-Albanian frontier, that world cancelleries feared a war was near.

on Ethiopia, Mussolini's first openly imperialistic move, and a successful defiance of the League.

Italian and German policies were moving closer together through similarity of interests, and Hitler and Mussolini began concluding a series of treaties and agreements that culminated in the formation of the "Rome-Berlin Axis."

Both Italy and Germany sent troops into the Spanish civil war. The Italian troops showed even then their distaste for fighting, but the officers gained valuable experience with new weapons and tactics, especially airplanes and tanks.

Mussolini joined in signing the Munich Agreement that was supposed to assure "peace in our time" as Neville Chamberlain put it. Knowing that a great war was around the corner Mussolini then turned his attention to bringing his army, navy, and especially his air force to full strength.

'Stab in the Back.'

When France was staggering to defeat in the spring of 1940, Mussolini thought he saw the long sought opportunity for important territorial acquisitions without much loss or risk. He entered to war on the side of Germany, hoping to get a few French islands. President Roosevelt characterized this move as a "stab in the back." From then on, Italy was in World War II. All looked rosy as long as the German blitzkrieg continued to smash ahead, but in 1941 English troops defeated the Italians in two widely separated African campaigns, and the Italian navy lost heavily in several actions.

Last year Italy went on the defensive. Mussolini sent some divisions to fight against Russia, others to North Africa, with the German Africa corps. Both sustained defeat and severe losses. The Italian people began to grumble ever louder against Fascism and Mussolini. He pinned medals on bereaved mothers and wives, made his famous balcony speeches, and tried to whip up morale with posters, parades of the youth organizations, and every other trick in his bag. But it didn't work.

Then came the North African campaign, when the Italian soldiers surrendered in large masses, plainly revealing their war-weariness. The invasion of Sicily moved so swiftly, not only because of the weight of armaments, but because of feeble resistance at many points. Everywhere the people welcomed the Allied troops.

When Rome was bombed, Mussolini's long hypnotic spell was broken. If he could not even protect the capital, said the people, how could he hope for victory? The Italians were tired of war, tired of privations and restrictions. Il Duce got out, just in time, according to majority opinion, to avert a civil war.

FASCISM ON THE RUN—A photograph showing Mussolini setting the pace for his army officers during maneuvers in September, 1938, ironically symbolizes the hasty exit of Fascism in July, 1943. This time, too, the running was fittingly led by Il Duce.

A SUBDUED AND TIRED OLD man, Mussolini, nearing 60, met Hitler a few months ago in a war conference. The former dictator, who once regarded "der Fuehrer" with disdain as an upstart imitator, has been forced to recognize the German as his master. For the last four years, Italy has been practically a vassal state.

Shrewd and realistic Mussolini probably could foresee his own downfall during the course of these anxious discussions.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

ISRAEL'S SIN AND RESTORATION

LESSON TEXT—Exodus 32:7-10; 34:4-9, 27, 28

GOLDEN TEXT—The Lord is long-suffering and of great mercy, forgiving iniquity and transgression.—Numbers 14:18.

God is righteous, and cannot look with approval or in forgiveness upon sin until His mercy has been stirred and set free to act by repentance. Then He whose wrath is hotly kindled against man's transgression shows Himself as the tender and gracious God, "keeping loving-kindness for thousands, forgiving iniquity and transgression and sin."

This grace of God is fully revealed in Christ and the redemption which He brought to man, but is prefigured in the experiences of Israel under the law.

I. God's Wrath Kindled (Exod. 32:7-10).

There are those who would have us think of God as a benevolent old gentleman who is easily hoodwinked by clever sinners who can talk fast to cover their iniquity. Even if He does see it, He is supposed to be so tenderhearted that He overlooks their sin.

Such folk had better read these words, "That my wrath may wax hot." The wrath of God is a real and awful affection of the divine nature and it is revealed against man who sins against His holy law.

The special sin of Israel on this occasion was idolatry, which is the setting up of some material symbol to represent the invisible God. Moses had been with God in the mount for 40 days. He had been the Lord's representative in their midst. His presence had evidently been the chief stabilizing influence.

Having their eyes set on a man, or a material object to take His place, they had lost sight of the invisible God. So they proceeded to establish this idol which would provide a center of worship. At first it was evidently intended to remind them of God, but soon it led them out into heathen revelry (Exod. 32:6, 17, 18).

Whatever a man puts between himself and God, even though he may at first intend it to be but a reminder of God, will lead him away from God. Ritual, symbols, theology, scholarship, all good in their places, may become the idols which separate present-day man from God.

II. God's Mercy Invited (Exod. 34:4-9).

Aaron had only a weak "alibi" to offer. The golden calf had practically made itself (see Exod. 32:24). How quick man is to justify himself instead of admitting his guilt. No doubt our excuses sound just as silly as Aaron's in the ears of God.

Moses knew better. The sin was dealt with in drastic fashion. When one deals with a wild ravenous beast, there is one remedy—"shoot to kill." Not only were the leaders of the wickedness slain, but the ground gold of the calf image was put into water, which all Israel drank. Thus were they all marked as sharing the guilt of this idolatry.

There is a lesson here for us. America is far from God. We need to seek His face in repentance. But let us remember that we (that is, Christian men and women) are a part of America. It is our guilt, and we ought to be on our faces before God, pleading for God's mercy upon our land.

Moses was now ready to seek the Lord's mercy for his wayward people. He is the intercessor, the intermediary. God had a man who had compassion and love in his heart, and the Lord heard him. Loving-kindness and tender mercy flowed forth in place of flaming anger.

Note that God has not changed. He is the unchangeable One. His wrath is still hot against man's sin, but man has repented, and moved out of God's wrath into His love and grace. That too is always being shown to His obedient children.

III. God's Covenant Renewed (Exod. 34:27, 28).

Moses had broken the first tablets of commandments. The people had sinned and were not then ready to listen to any word from Jehovah. But now they were prepared to receive it, and God renewed the covenant as He again gave Moses the law.

There is no need for despair in the heart of the one who deals with God. The missed opportunity for obedience and blessing may be gone forever, but God is still on the giving hand ready to meet the returning prodigal, ready to give beauty for ashes (Isa. 61:3) and to restore the years that the locust has destroyed (Joel 2:25). Amazing grace!

In the keeping of these commandments, Israel was assured of the blessing of God. As we pointed out last week, the real fulfillment of the law came in Jesus Christ, who did not set aside its requirements, but met them all, for all who believe in His name.

CALOX TOOTH POWDER

HOW NOT TO CATCH A FLY

The NAPKIN SWIPE METHOD is the original faux pas gesture of the diner's way of disposing of a fly. A fly, perched on the edge of a soup plate, becomes the target of a swiping napkin attack. Result: you destroy the fly, the dress of your hostess and your own dignity. A better way is to

Catch 'em with

HELP NEEDED TO HARVEST A THOUSAND ACRES OF POTATOES

There is a great need for potato pickers in Hancock County to assist on harvesting approximately a thousand acres of potatoes reports County Extension Director Paul Henderson. Boys, girls and women are urged to register for this type of work at the county Extension office. Men and older boys are needed to handle potato bags. Henderson also reports that onion pickers are needed right away.

TEACHERS WILL TAKE EXAMINATIONS

On September 4, at 9:00 a. m. in the office of the county superintendent, an examination in American Government will be held for teachers in this county who are entering Iowa and qualifying for an Iowa certificate. All teachers are asked to be on time so the examination may be completed in the half day.
Chas S. Whitney,
County Superintendent.

Good quality soybean hay ranks close to alfalfa in feeding value, agronomists at Iowa State College assert.

Local Happenings

Klemme and Vicinity

DRS. COLBY & HAYDEN, DENTISTS, FOREST CITY, IOWA. OFFICE PHONE 374, RES. 189.

Klemme Schools begin August 30th.

Mr. and Mrs. L. V. Perkins and daughters, Darlene and Jean, and Mrs. Perkins' mother, Stella Hinton; and Mr. and Mrs. Ed. J. Thompson were at Albert Lea, Minn. Monday to attend the Southern Minnesota G. I. Radio show. More about the show is given elsewhere in his issue.

Rye gives highest returns as a feed for 60 to 90-pound pigs when it is ground and mixed with other grains.

Dr. John C. Buthman of Algona will preside at the quarterly conference at the Methodist Church on Friday evening at 8:00 o'clock. All members and friends of the churches of Liberty and Klemme are urged to attend.

The W. S. C. S. of the Liberty church will meet at the church next Wednesday at 2:00 p. m. Mrs. Albert Lange is the hostess. Mrs. Louis Abele will give the lesson. This will be a mite-box opening meeting.

Because of the war, the Wessels family reunion this year met in smaller groups to save gas and tires. Sunday, August 23 the Harbearts group of the family met in the Belmont park for a picnic, with about sixty present. Mr. and Mrs. Rank Buss of Thornton; Mr. and Mrs. Ed Becker of Klemme, Dwight Helps and family of Klemme; and Sylvan Johnson and family of Forest City, attended.

Mr. and Mrs. R. A. Jorgenson attended a district meeting of the Iowa Press Association held at the shelter house at the Clear Lake State Park, Saturday evening. A pot-luck picnic supper was enjoyed followed by a speed boat ride on the lake, after which the publishers conducted a business meeting, with Ward Barnes of the Eagle Grove Eagle as the main speaker. Publishers and their families from the surrounding counties were present.

HOBBY SHOW FRIDAY AFTER-NOON AND EVENING

The Hobby Show promises to be a fine display. The show will be at the Klemme Methodist Church on Friday afternoon and evening of this week and the public is invited. Those bringing displays should have them here either Thursday at 7:30 to 9:00 p. m. or Friday 9:00 to 11:00 a. m.

Light lunch will be served by the members of the Fifty-Fifty class.

Soybean hay is about the same in feeding value as alfalfa.

THANK YOU, FOLKS!

I wish to take this means expressing my sincere thanks everyone who sent cards, letters, flowers, etc., and who called on me while I was in the hospital.
PAUL LAU

This year's Iowa oat crop placed at 189 million bushels. Last year production was slightly over 201 million bushels. The average yield in the 2 years estimated to be the same — bushels to the acre.

The value of barnyard manure on Iowa farms this year is \$1 million, soils men at Iowa State College estimate. This is about what the same amount of food would cost if it were purchased in commercial fertilizer.

MRS. LEWIS WILL TEACH IN GOODELL SCHOOLS

Mrs. Ernest E. Lewis of Klemme has been elected by the school board at Goodell to teach history and science in the high school. The Goodell school has a complete new staff of teachers this year. Others are Edward Fritz of Seattle, Washington, superintendent, Mrs. Henry Emmons, Goodell, English, Mrs. H. Hogenson, intermediate, and Mrs. Peck of Garner, primary.

Mrs. Emmons was Miss LaVohn Sherwood before her marriage. She is a graduate of the Klemme high school.

What You Buy With WAR BONDS

4 for 1

U. S. destroyers and other anti-submarine vessels of the Navy are equipped with quadruple tubes, meaning they are capable of firing four torpedoes simultaneously, making it more difficult for the target to escape.

Modern warfare is the most expensive destruction the world has ever experienced both for the destroyer and the destroyer. There is no point where we can stop in this war this side of peace so all of us will be required to buy an extra \$100 bond in the 3rd War Loan.

U. S. Treasury Department

BONDS OVER AMERICA

Since 1865 American stockraisers have been taking their animals to the Union Stockyards at Chicago, maintaining an institution that helped to make America great.

Entrance—Union Stockyards, Chicago

Keep Our Traditions Buy More War Bonds

In Hitler's Europe the farmers are producing too, but their product goes to Nazi Germany to feed the soldiers who are shooting thousands of prisoners who object to this form of tyranny.

Hundreds Of Articles On Display At Hobby Show

METHODIST HOBBY SHOW WAS WELL ATTENDED

Thousands Of Articles Were On Display Afternoon And Evening

The Methodist Hobby Show, sponsored by the Fifty-Fifty Class, was a great success both from the standpoint of attendance and also for the thousands of articles on display.

Two hundred and eight persons signed the register book, and probably a like number failed to register. There were a number of outstanding collections of hobbies, and hundreds of other items in lesser amounts.

Perhaps the outstanding hobby hard and tedious work and completeness, was the insect and butterfly collection, all neatly mounted in glass covered cases, by Miss Novella Bredbenner.

During the afternoon and evening hot coffee and doughnuts were served. Misses Jeanne and Darlene Perkins made and presented gladioli corsages to all of the ladies who attended the show.

Following is the list of exhibits on display:

Pillows, Mrs. Emery Weaver; Airplanes, Terry Keerner, Coin Collection, C. G. Waterman, Dogs, Evelyn Arnold, Pencils, Harvey Hubbard, Autographed books, Rev. Harvey, Stamps, Martha Bredbenner, Match Covers, Peggy Coobs; Roger Ridder.

Salt and Pepper Shakers, Shirley Stille, Mrs. Nora Mohler Buttons, Mrs. A. Wellerover Trinkets, Marjorie L. Napkins, La Nelle, Milk Bottles, Kermit Koerner, Candles, Thelma Chambers; Pressed Flowers, Novella Bredbenner, Insects and Butterflies, Novella Bredbenner.

Photography, C. Kilgore; Photo Tint, Wayne Chambers; Tin Type Photos, Mrs. J. C. Thomas; India Carved Ivory Fan, Mrs. H. E. Harvey, Oriental novelties, Ira Overholt, Plaster Casts, Emil Patet, Novella Bredbenner.

Model cars and planes, Donald Franklin; Model Planes and Ships, Roger Ridder; Crafts, Novella Bredbenner, Maralee Ridder, Thelma Chambers, Shirley Stille, and Tom Blank.

Miscellaneous trinkets, novelties, etc. Kermit Koerner, Mrs. Chambers, Peggy Coobs, Mrs. H. Paul, Mrs. Elder, Emil Patet, Ira Overholt, Mrs. Harvey, Gerald Koerner, Sharon Bridges, Donald Franklin, Novella Bredbenner, Rev. Harvey.

Post Card Collection, Mrs. C. G. Waterman, Weaving and Crocheting, Mrs. Herman Stille; Crocheting and paper weights, Mrs. Q. Stille, Woven Pictures, Mrs. A. Wellemeier, Mrs. Donald Bacon; Crayola Work, Evelyn Arnold.

Scrap Books, Mrs. E. J. Arnold, Martha Bredbenner, Tom Blank, Mrs. Emery Weaver, Mrs. C. G. Waterman, Marie Blank, Dr. Missman, Pastel, Charcoal, Crayon and Oil Paintings, Rev. Harvey, Irene Harms, Milo Patet, Mrs. Cecil Penick.

Indian Relics, Floyd Franklin;

Curtis Greiman Sells High Calf

Garner Boy Gets Best Price At 4-H Auction

Thirty-eight head of baby beefs sold for \$5,673.12, winding up the annual Hancock county 4-H achievement show at Garner Tuesday. The baby beef sale averaged \$15.22 per cwt. as compared with \$15.35 last year.

The Garner Shipping association paid \$16.75 for the top calf. The Garner sales barn paid \$196.80 for the calf bringing the most money per head. The top calf was owned by Clifford Greiman of Garner, and the calf bringing the most money per head was owned by Wayne Schoenwetter.

Hancock county merchants purchased 20 of the 38 baby beefs. Sold Wilson Packing company, Decker Packing company and the Hormel Packing company purchased the remainder.

HONOR ROLL TO BE DEDICATED AT GARNER, SUNDAY

The Hancock County Honor Roll which has been erected at Garner, a gift of Ed C. Buntentbach, Klemme, will be dedicated Sunday afternoon with the program beginning at 3:00 o'clock.

Selections will be given by the Garner high school band and a male octette, followed by the main address by Rev. Wolfram, County Chairman of the Hancock County Civilian Defense Council.

The honor roll will be dedicated following Rev. Wolfram's address, with special honors extended to the parents of the men who have died in service.

The program will come to a close with more musical numbers by the octette and band.

Parents of men who have died in the service are asked to communicate immediately with Emil C. Elling at Garner.

THANK YOU!

I wish to take this means of thanking all who sent me flowers, cards, letters and telephone calls, and who called to visit with me while I was ill at my home.

—Dr. D. P. Anderson.

We can print anything. Call at the Times Office.

Rugs, Mrs. Q. Stille; Bottles, Mrs. E. J. Arnold; Revolving Christmas Tree, Tom Blank; Needle Prints, Mrs. Pethick; Tree Varieties, E. J. Arnold.

Program Enjoyed

A program was also held in conjunction with the hobby show, the highlights of which were marimba solos by Marcelle Josten, daughter of Mr. and Mrs. Edwin Josten; piano solos by Gloria Haefner, daughter of Mr. and Mrs. Wilbur Haefner, and vocal solo by Rev. H. E. Harvey.

Prominent Ministers To Speak At Mission Festival Here

Our Men In The Service

The name of Gerald Barz should have appeared on the list of other county men who have been honorably discharged from the army. Gerald is the son of Mr. and Mrs. Herman Barz and served his country for about a year.

PVT LOWELL MAU NOW AT FAIRFIELD, OHIO

Pvt. Lowell C. Mau, son of Mr. and Mrs. Lewis Mau, Klemme, has been transferred from the U. S. Army Forces Field at Lubbock, Texas to Patterson Field, Fairfield, Ohio.

Pvt. Mau is an aviation mechanic in the U. S. Army Air Forces.

His address follows:

Pvt. Lowell C. Mau, 15th S. C. U. Patterson Field, Fairfield, Ohio.

DUANE JOSTEN LANDS SAFELY OVERSEAS

Mr. and Mrs. Alfred Josten have received word that their son, Pvt. Duane B. Josten has arrived safely somewhere in Australia. He enlisted on March 2nd and received his training at Camp Roberts, California.

Pvt. Josten is a motor mechanic in the field artillery.

Censorship rules do not allow us to print Duane's address, other than to state he has an A. P. O. number out of San Francisco.

SALVAGE HOSIERY IS STILL WANTED

War Production Board this week denied reports circulated that collection of used silk and nylon hosiery was to be discontinued. At no time, WPB stated, is the need for such materials greater to supply war needs. All Iowans should continue to turn in the used materials to their retail stores collecting them. It is interesting to note that Iowa stands high in previous collection, in tenth place among the states, with over 68,890 lbs. to its credit.

What You Buy With WAR BONDS

Sick Bay

In this war our wounded fighting men have a greater chance for recovery than in any previous conflict because of the medical aids and services that have been developed by the War and Navy Departments.

One of these aids is the Hospital Transport Plane service that has been bringing our wounded back from Africa.

Your increased and continued purchase of War Bonds is required to help the Treasury Department finance this hospital transport service. "Back the attack with War Bonds."

U. S. Treasury Department

MISSION FESTIVAL WILL BE HELD AT REFORMED CHURCH, SEPT. 5

Mission Festival Services will be held at the Klemme Reformed Church on Sunday, September 5, beginning with the morning service at 10:00 o'clock.

Sunday school will be held at the usual hour of 11:00 a.m.

An afternoon service will be held at 2:30 o'clock and the evening service will begin at 8:00 o'clock.

Guest Ministers Will Speak

Rev. E. H. Wessler, D. D., Sheboygan, Wisconsin, will preach in the morning, and also in the evening services, as well as to the Young Peoples Bible Class in the Sunday School.

Rev. Paul Laubengayer, Manly, Iowa, will speak on the Biloxi Mission in the afternoon.

Other Prominent Ministers

Rev. Herbert Wintermeyer of Hampton, will address the Adult Bible Class.

Rev. H. A. Achtermann, Hampton, will speak on the Childrens Department.

At noon dinner will be served to all members and guests.

Offering for benevolences will be taken at all of the services.

Rev. Calvin Grueschke pastor of the Klemme Reformed Church, extends a cordial invitation to all to attend these services Sunday.

PIONEER RESIDENT VISITED IN KLEMMME TUESDAY

Mrs. May Spooner Was First Bride In Town Of Klemme In 1892

Mrs. May Spooner and her son and his wife, Mr. and Mrs. A. Lloyd Spooner and her grandson Jack, all of San Antonio, Texas, visited in Klemme briefly while passing through here Tuesday morning.

Mrs. May Spooner has the honor and distinction of being Klemme's first bride. She was united in marriage on December 25, 1892 to Dr. A. L. Spooner. The wedding took place in the home of Mrs. Spooner's parents who at that time lived above the Schaefer & Dow store, now torn down. This store was in the corner west of the Wellemeier store.

Dr. Spooner was Klemme's first physician and he practiced medicine here for nineteen years, from 1890 to 1909.

DOGS COMING TO THEIR OWN IN HANCOCK

The County Auditor's office reported a total of 1,917 dogs registered in Hancock county thus far in 1941 and 1942 in 1940. Special Dep. Sheriff Frank Chisel, Deputy Sheriff Frank Chisel of Miller, who has served as dog catcher in Hancock county for the past several years, has completed his work of rounding up strays and delinquents.

HELLO, FOLKS!

Mr. and Mrs. Richard Ulrich are the parents of a seven and one half pound baby daughter born to them on Wednesday, August 18th.

The new arrival has been named Patricia Ann.

Mr. and Mrs. Glenn Lange, Twin Lakes township, are the parents of a 7 pounds and 8 ounce baby daughter, born to them Wednesday evening, August 25th, at the home of Mrs. Marion Rust at Garner.

Frosty Drinks Will Cool You!

(See Recipes Below)

Frost Yourself!

When the thermometer rises to a hundred mark, homemakers for cool ideas, and thirst-chasers are first on the list. Cooling is literally give you a frost insulate you from the warm of Old Man Sun.

Today's column I'm attempting to give you a parade of cool drinks to fit every pocket book, every occasion. They use fruit juices, prepared beverages, prepared drink powders, milk, citrus fruit and of course, plenty of

After you've prepared them, the coolest spot on the porch, into the most comfortable chair, start sipping!

Chilling fruit, juices, milk or beverages is of first importance in preparing your cool drink, but then we've probably already done this. Survey were made during these summer months, I'm sure it would show that a larger percentage of refrigerator is used for cool preparations than any other

one of the best bases for a good, drink is a citrus fruit. Doesn't it cool you already to think orange or lemon juice cool and in a glass with tinkling ice? Well, it does. There's a scientific behind this, for scientists tell that in hot weather the tissues of the body require more vitamin than when temperatures are moderate. That's one reason why oranges and lemons are ideal for summer drinks.

If you want something to serve company on a summer evening, here's a drink that will fill any or-

Hollywood Parade.

(Serves 15)

1 pint orange juice
1 pint orange sherbet
1 pint vanilla ice cream
1 pint chilled ginger ale

Beat orange juice, sherbet and cream with a whirl type beater until well mixed. Add ginger ale and serve at once.

Another kind of orange drink which is nice to fix individually for yourself in the afternoon when you're feeling a lag is this:

*Orange Cream.

(Serves 1)

1 cup orange juice
1 cup thin cream or evaporated milk
1/2 cup sugar

Beat egg yolk until light, add orange juice and blend thoroughly. Pour into glass and stir in cream. Serve to taste. Serve at once.

There are several delightful flavors obtainable in fruit powders that

Lynn Says:

The Score Card: Good news is sight with the word that coffee supplies in the country are coming back to normal and present prospects point to an end of coffee rationing by the middle of August. Even the current period of rationing provides more coffee per stamp than has been allowed since rationing came into effect.

Those of you who are canning get additional supplies of sugar with your stamps to make putting up fruit at home easier.

Fruits and vegetables are scarce this year because of lack help to pick them, and therefore prices run high. If you possibly can, get in touch with anyone who has crops and offer to help with the picking and packing of them—and also to get your own fruits and vegetables for home canning in much better condition than would be possible if you waited for someone else to do the picking.

ADOLF'S SOLILOQUY

A brush, a ladder mitt some shears—
I asked for noddings more
To make me happy in der days
Long, long before der war;
I'd slap some paper on a wall—
My card read "Hitler, A.;
Good Paperhanging"... How I wish
It read dot way today!

A pantry neatly painted und
A kitchen papered vell ...
A hall room in red, green und pink—
Ach, idt vas somedings schwell!
Vat I would gif to be today
Engaged in jobs like dot! ...
You take der "peerless marshal"
stuff—
I'll take der brush und pot!

I vistle as I go to work
Und slop der paste around;
It is a real goot Nazi dream ...
Until I hit der ground!
I'm fixing "borders" all der day—
Der old wallpaper kind—
Ven I vake up und look about
It wrecks mein peace of mind.

I gif no orders—none at all;
Folks gif dem all, you see;
Nopoddy gifs me damn salutes—
Der are no hells for me;
Und den mein dream goes up in
schmoke ...
Oudt goes der brush und pot ...
Und I am Fuehrer Hitler in
Full uniform, py Gott!

WOMEN, ARISE!

Mrs. Elmer Twitchell is out with a demand for a Fifth Freedom. She wants Freedom From Returning Bottles.

"If there is one thing the women of America are sick of," she writes, "it is returning bottles. It is getting worse and worse every minute. Once upon a time it applied only to milk bottles, but today the Pay-a-Deposit-and-Return-the-Bottle nuisance has become epidemic. I have figured it out and I think two-thirds of a housewife's time is spent saving bottles, finding something to put them in and remembering to tote them back. It's awful."

"Aren't you exaggerating?" asked Elmer.

"No," insisted Mrs. Twitchell. "What do men know about it? When did you ever return a bottle? If we women left it to the men not a bottle would ever be taken back and the deposit reclaimed."

"Oh, I often take them back," argued Elmer.

"Twice in eight months, if I remember correctly," said the wife. "Everything from a demi-tasse pill bottle to a soda pop, beer and maraschino cherry bottle has to be carefully kept, stowed and then carted back. When I drive the flivver to the market it sounds as if a crockery store was moving and I was carrying two loads. It's a major job remembering what bottles go to which stores."

"And you should see the faces on the storekeepers when they see me coming in with empties. They've got troubles enough without checking my returns, and they show it."

"So what?" asked Elmer. "So, how about arousing the women of America to a revolt or something? I'm starting a drive. I think I'll found an organization to be known as the American Women's League for Fewer Deposits on Bottles."

"Can I help?" asked Elmer. "Yes," replied Mrs. Twitchell. "Take back those two baskets of empties down by the furnace. I've been trying to think of it for a week."

A candy magnate has bought the Blue Network for eight million dollars. And yet there are people who still go on insisting that all candy does to a fellow is to increase his weight.

Of all the thrills that come through purchases, the acquisition of a great radio chain must be close to tops. What sensations must come to a man as he planks down a check and realizes all the power, prestige, influence, opportunity and fun he has bought, with all those commentators, quiz kids, masters of ceremonies and bawzy players thrown in!

What emotions he must feel as he realizes that he has signed a check and that in return he owns all those time signals! All those theme songs! All those sound effects (particularly the hoofbeats)! All those mikes, amplifiers and gadgets!

Sue Denton sent in from New Rochelle a reminder of bygone days that should bring a sigh from all Americans. It is this note from a paper during the Cleveland administration:

"The tax of 2 per cent on incomes exceeding \$4,000 was set as it today as unconstitutional."

Germans cannot understand how a ruler of a totalitarian state could resign like any minister in a democracy.—News item.

Have patience; they will!

PATTERNS

SEWING CIRCLE

Lucky Baby.

PERFECT summer wardrobe that will give mother as much pleasure as baby. Fun to make and easy to launder.

Barbara Bell Pattern No. 1765-B designed for sizes 8 mo., 1, 2, 3 and 4 years. Size 1 play suit and dress require 2 1/2 yards 35-inch material, slip and panties 1 1/4 yards.

ASK ME ANOTHER?

A General Quiz

The Questions

1. What was the most important naval battle of World War I?
2. What was the population of this country when Washington was President?
3. What is the approximate cost of training a U. S. pilot?
4. If it is 7 p. m. in New York, what time is it in San Francisco?
5. What is the average length of time spent by an American soldier at his meals?
6. What is the scuttle butt on a ship?
7. What is the largest army hospital in the United States?
8. What food crop exceeds all others in the world in tonnage production?
9. What is vellum?
10. How long does it take an American submarine to submerge?

The Answers

1. Jutland.
2. The population was 3,929,000.
3. For a trained pilot, \$27,000.
4. It is 4 p. m.
5. The average length of time spent by an American soldier at his meals is 18 minutes at breakfast, 19 at dinner, and 17 at supper.
6. A drinking fountain.
7. The Holleran General hospital on Staten Island occupying 383 acres, with 43 brick buildings, including auditorium, recreation hall, mess buildings and garages.
8. Potato.
9. A fine variety of parchment.
10. American submarines, when on the alert on the surface, can submerge entirely in 40 seconds, during which time the ballast tanks have to be opened and partly filled, the conning tower closed and all power connections switched over from the Diesel engines to the electric motors.

Here, at Least, We Have A Man of His Word!

Jones looked coldly at his friend Smith. "A short time ago," he said, "I thought you never meant anything you said. Lately I have changed my mind."

"Oh," replied Smith, somewhat surprised, "and what caused you to change your opinion of me, may I ask?"

"You remember borrowing five dollars from me?"

"Yes."

"You said that if I lent it to you, you would be indebted to me forever."

"Yes."

"Well, you're keeping your word like a man."

Praise From the Worthy
It is the greatest possible praise to be praised by a man who is himself deserving of praise.—From the Latin.

NO SUGAR NEEDED IN EASY-TO-MAKE ALL-BRAN MUFFINS

Here's an already favored recipe that's gaining new wartime fame ... ALL-BRAN Muffins without sugar! See for yourself how the flavorsome crispness of KELLOGG'S ALL-BRAN gives these delicious muffins a texture and taste all their own!

Kellogg's All-Bran Muffins

2 tablespoons shortening
1/4 cup corn syrup
1 egg
1 cup Kellogg's All-Bran

3/4 cup milk
1 cup flour
1/4 teaspoon salt
2 1/4 teaspoons baking powder

Cream shortening and corn syrup thoroughly; add egg and beat well. Stir in All-Bran and milk, let soak until most of moisture is taken up. Sift flour with salt and baking powder; add to first mixture and stir only until flour disappears. Fill greased muffin pans two-thirds full and bake in moderately hot oven (400° F.) about 30 minutes. Yield 8 large muffins, 3 inches in diameter, or 12 small muffins, 2 1/4 inches in diameter.

1832

Slenderizing.

WONDERFULLY designed slip and pantie set to make every last one of your clothes fit better. Note the slenderizing details.

Barbara Bell Pattern No. 1832-B designed for sizes 36, 38, 40, 42, 44, 46, 48, 50 and 52. Size 38 requires 2 1/2 yards 39-inch material, panties 1 1/4 yards.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

A JOB FOR ALL OF US IS
AHEAD THIS FALL

Every individual in Iowa must
buy more war bonds in the Third
War Bond Drive starting in Sep-
tember if Iowa's huge quota of 193
million dollars is to be reached.
The newspapers and other adver-
tising media of the state again
have been called upon to outdo all
their previous efforts in bond drives
to help the Government in its
war aims. Your newspaper has
never failed the Government in its
appeals for help. Your newspaper
appeals to you, the people, to buy
more bonds in the forthcoming
Third War Bond campaign. Your
money will be securely invested.

NO THERMOMETER NEEDED
TO TELL TEMPERATURE

A few years ago we read of a
method of determining the temper-
ature without the aid of a ther-
mometer, but we had forgotten
the formula until we found this

piece in Earl Hall's "Eye Observ-
ing Column" in the Mason City
Globe-Gazette:

"I guarantee you some fun with
this simple formula for determin-
ing within a degree or two the
temperature on any summer's eve-
ning when the crickets are doing
their stuff.

"Count the chirps in a 14 second
period. Add this to the base figure
of 40. And you'll find that it tal-
lies almost exactly with your
thermometer. I know. I've tried it
several times.

"Why it is, I don't know. But
it's a fact that crickets speed up
or slow down their chirping on a
basis of the temperature. The
warmer it is, the faster they chirp."

EDITOR GETS HIS ANNUAL
"TUMMY-ACHE"

One of the visits we try to make
each year is a trip to Ben F. Grei-
man's farm, northwest of Klemme.
The Editor and Mrs. Jorgenson
again made the annual pilgrimage
to the Greiman farm Monday eve-
ning.

It may seem strange to Ben and
Mrs. Greiman that we always time
this visit at the time of year when
the plums at the Greiman farm
are at their best. But we know
that the visit always means a trip
through the big orchard and that

Ben insists we sample all of the
many varieties of fine fruit. The
final result is that the Editor gets
a good-sized "tummy-ache" out of
the deal and the mussus gets a big
basket of fruit.

The Greimans have a large var-
iety of plums, apples, grapes and
berries. The plum season is about
over but the grapes are coming a-
long fine and the apple harvest
looks promising.

We'll be seeing you next year,
Ben.

HISTORICAL MINE

Numerous historical documents
and other papers of interest to the
Winneshiak county community
were discovered in the ruins of
Old Main, a campus building of
Luther College at Decorah by
workmen clearing the ground for
the new structure. The papers
were found in what is believed to
have been the cornerstone of Old
Main. Inside the cornerstone was
an old box and fruit jar contain-
ing many historical documents
pertaining to Lutheran church and
Luther College activities.

To raise fall pigs successfully,
proper housing is one of the most
important considerations.

GOOD POLITICS

Governor Bourke B. Hickenlooper
certainly means to keep in
good standing with the American
Legion. He has just appointed the
past commander of the Iowa de-
partment, American Legion, Dan
O'Brien of Des Moines, as private
secretary, succeeding the late
former commander Leo Duster of
Cedar Rapids.

BURMA-BLUE BY-PLAY!

At Clear Lake recently, during
a press convention, a good deal of
goodnatured chaffing went on a-
mong the publishers by partisans
of rival candidates for governor.
On the one hand the press boys
were admonished to keep the Bur-
ma road open, while on the other
hand, the delegates were advised
to adopt "In The Blue of Evening"
as campaign song. These north
Iowa publishers just cannot keep
business free of politics.

Oats losses of about 30 percent
because of rust, smuts, and other
plant diseases are showing up this
year in old oat varieties, while the
new varieties—Tama, Boone, Mar-
ion and Control—show little loss
from rust and smuts.

Save your kitchen fats and oils.

While not as profitable
ago, hogs will yield the
of all the livestock enter-
year for the majority of
economists at Iowa Sta-
say.

Much meat is lost and
bruising animals before
slaughtered.

Proclamation

RECOGNIZING THE FACT that in carrying the war into enemy territory, we shall need greater amounts of money than any nation has ever asked from its citizens in all history, I, FRANKLIN D. ROOSEVELT, President of the United States of America, do officially proclaim that on Thursday, the ninth of September, 1943, the Third War Loan shall be launched.

As Commander-in-Chief, I hereby invoke every citizen to give all possible aid and support to this Third War Loan drive, not only so that our financial goal may be reached, but to encourage and inspire those of our husbands and fathers and sons who are under fire on a dozen fronts all over the world. It is my earnest hope that every American will realize that in buying War Bonds in this Third War Loan he has an opportunity to express voluntarily and under the guidance of his conscience, the extent to which he will "back the attack."

The American people supported well the first and second War Loan drives and in fact did even more than was asked of them. Our need for money now is greater than ever, and will continue to grow until the very day that Victory is won; so we must ask far more sacrifice, far more cooperation than ever before.

IN WITNESS WHEREOF, I have hereunto set my hand and caused the seal of the United States of America to be affixed.

DONE at the City of Washington, this twenty-sixth day of July, in the year of our Lord nineteen hundred and forty-three, and of the Independence of the United States of America the one hundred and sixty-eighth.

By the President:

CORDELL HULL

Secretary of State.

BETTER IOWA
GARDENS

Gardeners who have more vegetables than they need should see that some relative or friend uses the surpluses. We must take upon ourselves the responsibility of seeing that no surplus garden products go to waste

* * *

Many towns and cities have garden surplus centers set up as clearing houses Families who have more tomatoes, corn or other vegetables than needed can place their names and addresses at the center at no charge Likewise families having need of more tomatoes corn etc can place their requests with the center You can learn whether your community has a center for garden surpluses by contacting your county extension director

* * *

The last plantings in summer gardens have been made. Radishes, kale, spinach, lettuce, and mustard were planted during the past several weeks Cultivation should be started with these summer plantings as soon as the seedlings appear above ground. Likewise cultivation should be continued with all earlier summer plantings such as carrots, Chinese cabbage and the like Some fertilizing as well as cultivation will help the vegetables grow more vigorously

* * *

Vegetables seedlings in summer gardens should be thinned if they are standing too close together in the row Much better production results by giving the plants space in which to develop Consult the Victory Garden Pamphlet No 60 or the seed packet for thinning distances Cut excess Chinese cabbage plants off at the ground level rather than pulling them The seedlings do not transplant well.

* * *

Gardeners growing endive for the first time will want to be sure to blanch the leaves Blanching improves the flavor, crispness, tenderness and appearance Any method which keeps the inner leaves dry and excludes light is satisfactory Two large boards fastened together in shape of an inverted V and placed over the leaves in a bunch and tie them together near the top, similar to the method used in blanching cauliflower Inspect the plants carefully during rainy weather and expose the leaves to the air if rotting of the leaves is evident

Cleaning up the garden should be taking place right along Sweet corn should be pulled immediately after the ears have been removed This is also true of all other plants that have passed their usefulness Removal of old plants will conserve fertility and moisture in the soil

ON VACATION

Eldora's distinguished citizen, the Hon John C Crockett, reading clerk of the United States Senate, under seven presidents, was back home recently for his summer vacation Mr Crockett has been urged by his friends to write a book on his Washington experiences, but so far has resisted the temptation

WOMAN JUDGE ADVOCATE

Mrs. Eleanor S Williams who practiced law for several year in Hardin county, recently was named judge advocate of the American Legion Auxiliary in annual convention at Sioux City

FEWER TEACHERS

Many Iowa schools opened this week short - handed in available teachers Many school boards still are busy scouring the state and nation for teachers to supply a need in various departments. Most younger men teachers have been called to war service and many women teachers have gone to better paying positions.

LAWYER IN NAVY

Don Burrington of Spencer, a former state representative and former assistant attorney general, has been commissioned a lieutenant junior grade, in the Navy.

DOUBLE WAR JOB

Railroad section men at Sibley gave their evening leisure hours to help the farmers shock grain. They recently participated in the shocking of more than 300 acres of grain, earning for themselves more than \$100.00.

MASSACRE RELIC
PURCHASED

The state conservation commission has accepted the site of the Abbie Gardner Sharp cabin at Spirit Lake as part of the Pillsbury State Park area The cabin was the pioneer home of the Gardner family at the time of the Spirit Lake massacre Seven thousand dollars were appropriated by the last legislature to purchase the cabin site from the heirs.

SHEEP BAND RESCUED

Twenty-five neighbors of Alfred Evenson, near Auburn, in Fayette county, swam the swollen Turkey river to rescue 32 sheep marooned on an island created by overflowing waters of the river There were no casualties

COW TRAPPED

When a cow on the Orlo Hafner farm near Guthrie Center caught her foot in a hole in the log-and-dirt dam while homeward bound from pasture, it took an automobile wrecker and crew to extricate her A leg had to be sawed in two before the cow was lifted from the dam after hours of work

What You Buy With
WAR BONDS
School Days

When our fighters fly at 400 miles an hour with a Jap Zero or a Messerschmidt on their tails there isn't much time for cogitation so the Army and the Navy show as many motion pictures of actual dog fights and air battles as possible to our student fliers.

Pictures of trainer flights, bombing flights and flights by fighters are all a part of the routine for our student pilots and must be drilled into them just as it is necessary for us to remind ourselves daily of the necessity to buy an extra \$100 Bond in September. U S Treasury Department

WEEKLY NEWS ANALYSIS

Italy's Industrial Belt Feels Weight Of Continued Allied Bombing Attacks; Grain Crop Production Shows Decline; U. S. Airmen Hit Both Ends of Pacific

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)
Released by Western Newspaper Union.

ITALY: Toe and Thigh

As the bulk of the German forces streamed across Messina straits from Sicily to the big toe of the Italian boot, Allied bombers struck at Italy's industrial belt high on the thigh of the leg-like peninsula.

As the final curtain was being drawn on the Sicilian campaign, suicidal German rearwards planted themselves in the craggy island's hill tops and mountain sides, and with mortar and machine gun fought

Entering Palermo with American troops, Private Joseph Mole of Jamestown, N. Y., found a 14-month-old abandoned waif named Josephine, seen in his arms. Relief authorities took over her care.

Allied advances fiercely, as the bulk of their forces were evacuated.

In those last hours, the German rearwards' position became more precarious as daring units from Gen. George S. Patton's American 7th army landed behind their lines, and aided by naval batteries and dive bombers slashed their way through bayonets to firmly entrench themselves on shore.

Despite heavy anti-aircraft fire which was said to have thrown up a wall of steel, waves of Allied bombers hit the important industrial center of Milan. Terrific detonations could be heard on the Swiss border miles away as the bombers pushed their way through the flak to drop their incendiaries and block-busters.

DRAFT: Induction Order

Now that Selective Service officials have authorized the drafting of fathers October 1, plans have been drawn for induction according to the importance of a man's occupation.

Under the new plan, a new classification known as "super-eligibility" would be created, under which certain skilled jobs in direct war production would place the employee last in the draft list.

The plan also would extend the list of non-essential jobs, holders of which would be eligible for immediate call, regardless of number of children. In this case, such men would be given the opportunity to switch to more essential industries.

Thus, those in non-essential occupations would be called first, before essential and "super-eligible" employees. About 300,000 fathers are to be drafted this year.

RUSSIA: Fighting Unsurpassed

Russia's resurging manpower rolled like a tidal wave over the endless Russian plains, and Germany's stubborn armies gave under the weight.

To the north, the Reds drove on Smolensk from two sides, leaving the Nazis a 140-mile gap in which to retreat along the corridor Napoleon Bonaparte used over a hundred years ago to pull his ragged and beaten army out of the country.

To the south, the Reds bore down on Kharkov, like they bore down on Orel, from three fronts, the north, east and south. Possessed with no natural fortifications, battered Kharkov, once the mighty "Pittsburgh" of Russia, lay exposed on the barren plains to the Reds' massed fire power and troops.

BUSINESS: Biggest Merger

Originally incorporated in New York state in 1851, the Western Union Telegraph company, with a capital of \$170,000, almost immediately established a policy of purchasing or consolidating with less formidable competitors.

Biggest step in the policy loomed recently when stockholders of the Postal Telegraph company voted to merge with Western Union, now more than a \$340,000,000 enterprise, world-wide in operation.

AGRICULTURE: Below '42

Total production of the five leading grain crops was set at 5,282,000,000 bushels for 1943, 700,000,000 less than harvested last year, on the basis of estimates of the department of agriculture.

Because of favorable growing conditions in July, the department looked for a corn crop of 2,874,711,000 bushels against last year's harvest of 3,175,154,000; a wheat crop of 834,894,000 against 981,327,000; an oats crop of 1,189,546,000 against 1,244,255,000; a barley crop of 348,848,000 against 426,150,000, and a rye crop of 33,314,000 against 57,341,000.

Combined production of the four feed grains—corn, oats, rye and barley—was estimated at 111,000,000 tons below last year's yield. Soybean harvest was set at 200,328,000 bushels.

Milk production held close to last year's level and egg output was at a peak, except in the West.

PACIFIC: Hit Both Ends

While American troops hemmed in the last surviving band of Japanese on New Georgia island in the Solomons, U. S. airmen lifted their Liberator bombers off of the Aleutian runways and headed them for the northern-most chain of islands of the Japanese empire.

As the Liberators rumbled over these islands, known as the Kuriles, 40 enemy fighter planes rose up in defense. But the Americans opened their bomb bays and death and destruction tumbled on the designated target areas. Two Liberators were shot down, but the others swung their noses homeward to complete the 1,000-mile trek.

Bad weather made the jungle on New Georgia a stew, but neverthe-

Latest addition to the U. S. fleet is this new aircraft carrier, Bataan.

less U. S. Doughboys slogged through the mire to complete encirclement of the remnants of the Japanese force on the northwest coast of the island.

ALLIED MEETING: Politics and War

With Allied forces at the gates of the European fortress, with Marshal Pietro Badoglio's military government of Italy reportedly receptive to peace terms, and with Russia having indicated willingness to negotiate with a "democratic" Germany purged of Nazism, Prime Minister Winston Churchill and President Franklin D. Roosevelt came together for their sixth personal meeting of the war.

Flying to the North American continent with Churchill was a staff of military and naval chieftains, and joining them for discussion were ranking U. S. army and navy officers. The combination of these staffs indicated further operations of joint character, such as those in North Africa and Sicily, where the services of the two nations teamed for effective action.

As Churchill and Roosevelt met, Russia threw a bombshell into the diplomatic picture by declaring that Premier Joseph Stalin had not been invited to the conference, and therefore neither he nor an accredited Soviet representative would attend. Russia's diplomatic jockeying to share in the dominion of Europe after the war will be one of the Allied leaders' chief considerations.

MISCELLANY:

SPORT OF KINGS: A group of 54 thoroughbred yearlings, offspring of such famous racing sires as Blenheim II and Sir Galahad III, sold at an average price of \$3,507 at the Lexington, Ky., sales.

STAR: While flying over Europe to take pictures for the aircraft gunnery school, Clark Gable's plane was hit 15 times, but returned to base.

People in the News

On March 8, 1942, Wiley M. Creps of Chicago was killed in action in the North Atlantic. Just recently, his father revealed that Creps was only 15 years old, having altered the date on his birth certificate to enter the service.

Seventeen-year-old Richard Lajeskje of Passaic, N. J., got off to a good start in the baseball world. The New York Giants paid

From left to right, Dick Lajeskje, Mel Ott and Mr. Charles Lajeskje.

the youthful shortstop \$10,000 to sign a contract, then shipped him to Jersey City in the International league for seasoning.

After 67-year-old Frank A. Wilhelm, Tacoma, Wash., paper executive, had sunk an eight foot putt in a golf match, he swung his arms over his head in joy. Then he dropped dead of a heart attack.

GAS: Ration Change

Reduction in the gas ration in the Midwest and Southwest was planned by the Office of Price Administration following Petroleum Administrator Harold L. Ickes' report of a critical fuel shortage. Formerly, rationing had been imposed in the area to limit driving and conserve tires.

According to the plan, A, B and C coupons will be cut from four to three gallons. Many holders of C cards will find their gas allowances trimmed from a maximum of 720 miles per month to 480. Preferred motorists like doctors, ministers and certain war workers will continue to receive unlimited supplies according to need.

It was said increased movement of oil to the East through the newly completed "big-inch" pipe line would draw from the affected area's supplies, contributing to any reduction in the gas ration there.

Harold Ickes

TAXES: Who Pays

Of the total of 22 billion dollars collected by the U. S. treasury for the fiscal year 1943 which ended June 30, the states of New York and Illinois contributed almost 28 per cent.

The treasury's figure showed that the people in eight highly industrialized states paid 59 per cent of the government's total revenue. Besides New York and Illinois, these states were Connecticut, Massachusetts, New Jersey, Pennsylvania, Ohio and Michigan.

By contrast, the treasury said North and South Dakota, each with a small population, paid about .08 of the total revenue.

Of the revenue collected, more than 10 billion dollars was in the form of individual and corporate income taxes.

LABOR:

Shun Lewis

Big, burly John L. Lewis found the road back to the American Federation of Labor, from which he once bolted to form the CIO, blocked.

Headed by AFL President William Green, the union's executive committee officially refused to accept the United Mine Workers' application for re-entrance. Instead, the council said that the matter would be referred to the AFL annual convention.

In rejecting Lewis' application, the council showed no disposition to bargain with him. Whereas Lewis had insisted that the UMW be accepted as presently composed, the council called for dissolution of UMW's District 50, which has been unionizing various branches of labor. Otherwise, the council said, District 50's activities might interfere with established AFL unions.

entrance. Instead, the council said that the matter would be referred to the AFL annual convention.

In rejecting Lewis' application, the council showed no disposition to bargain with him. Whereas Lewis had insisted that the UMW be accepted as presently composed, the council called for dissolution of UMW's District 50, which has been unionizing various branches of labor. Otherwise, the council said, District 50's activities might interfere with established AFL unions.

MINERS:

Seven weeks after passage of the Smith Connally anti-strike bill, 30 coal miners, including officials of various United Mine Workers locals, stepped into federal court and asked that the case be thrown out on constitutional grounds.

The miners' counsel declared that the anti-strike law was in opposition to the first amendment of the Constitution guaranteeing freedom of speech, and the 13th amendment to the Constitution against involuntary servitude.

Washington, D. C.

ISOLATIONIST CUPID

The nuptial rumor that the Chicago Tribune's Col. Robert R. McCormick was going to wed Mrs. Helen Essary, widow of the Baltimore Sun correspondent, was told to the President recently by one of his aides.

Both Colonel McCormick and Mrs. Essary are ardent isolationists and vigorous critics of the administration. In fact the colonel is considered the leading isolationist of the Midwest, if not the nation, while the Widow Essary, writing in the Washington Times-Herald, is probably the leading lady isolationist in the nation's capital.

So the President received word of this isolationist romance with considerable interest.

"I wonder," he mused, "what their progeny will be like."

Note—Later, Mrs. Essary heard about the President's remark and telephoned one of the White House aides to find out precisely what had been said. She did not comment as to whether the rumor of matrimony were true or untrue, but she showed great feminine curiosity regarding the President's comment.

DAY VS. NIGHT BOMBING

When Churchill and Roosevelt were in Casablanca, the British prime minister had a friendly argument with U. S. air generals regarding the feasibility of daylight bombing. Churchill was against it, arguing that the British system of night bombing was much safer, did more damage to the enemy.

However, latest figures just received by the war department show that Gen. Ira Eaker was right in sticking to day bombing. These figures show that U. S. bombers have knocked out Nazi fighter planes at a rate ten times greater than the British.

Here are the figures. In July U. S. airmen destroyed 500 Axis planes, lost 108 bombers of their own. In other words we knocked out five times as many planes as we lost.

In the same months, the British knocked out 129 enemy planes, but lost 258 of their own. In other words, the British lost two planes for every one they knocked out.

The British were operating at night when they could not see the enemy so well, but also when the enemy could not see them. American planes, operating in the daylight, could better concentrate on enemy fighter planes, but also were better targets for the enemy.

INFLATION REMEDY

The President has a non-inflationary solution to organized labor's demands for wage increases to meet higher living costs: namely, non-negotiable bonds, payable after the war.

Roosevelt revealed this secret during a confidential talk with R. J. Thomas, president of the United Auto Workers union, on price roll-backs, strikes and the War Labor board's Little Steel formula. Here is the summary of his views:

Prices. Roosevelt stated that he would make a vigorous attempt to roll back prices. He told Thomas that he would prefer that congress provide the money, but that, failing this, he would use either RFC or Commodity Credit corporation funds to restore the following food prices to their September, 1942, normal: Meat, canned goods, potatoes, milk and milk products.

It would be too difficult, the President said, to attempt a rollback of clothing and personal services. He pointed out that rents already have been rolled back to March, 1941.

Little Steel Formula. Roosevelt frankly stated that he was not enthusiastic about any arbitrary ceiling on wages—15 per cent above those prevailing in January, 1941. However, he considered the Little Steel formula the best brake on wage inflation so far proposed.

Instead, the President suggested that war workers would be much better off, and that the present wage stalemate between labor unions and the WLB could be broken, if workmen agreed to accept non-negotiable bonds, payable after the war, in lieu of wage increases.

CAPITAL CHAFF

Manhattan Banker Jimmy Warburg was not only the mysterious "John Durfee," spanked by the President for calling Victor Emmanuel the "moronic little king," but he also was the fictitious "Wallace Herick." Warburg has so dominated OWI's foreign broadcasts that some people call it the "Office of Warburg Information."

INSIDE EUROPE

Swiss Minister Charles Brugmann, brother-in-law of Henry Wallace, is probably the only man in the United States who has recently passed through Germany.

He not only visited Germany, but also France and Spain. In France he found the people downcast and downhearted. German soldiers on the streets of Paris went out of their way to be polite to the French people, even got off the sidewalks if necessary in deference to a Frenchman.

While Walter Winchell is temporarily away from New York, his column is being conducted by guest contributors.

By HARRY HERSHFIELD

Radio Story Teller and Columnist. Value of a painting often depends on whose nail it hangs from. None of these celebrities have played vaudeville, so there is little danger that their little masterpieces are plagiarisms on the "Berle-Youngman-Jessel" school. Here are some favorite jokes of famous people:

AL SMITH:

A citizen attended his first political jamboree. He wasn't there long before somebody copped his watch. He reported it to the district leader, who whispered: "Next to which guy was you standin' last?" Victim pointed to a fellow in the center. "Just don't say nothin' and it'll be O.K." In a few minutes the leader handed the watch over to its owner. "What did he say?" asked the grateful man. "Sh-h-h—quiet—he don't know I got it!"

MAYOR LA GUARDIA:

(Tells this one on himself)

Two Soviet representatives arrived at City Hall. Instead of the expected and accepted costumes of Stalinists, they wore high hats, etc. They looked at LaGuardia, in baggy everyday, and all he could say was: "Gentlemen, I represent the Proletariat!"

FANNIE HURST:

A dapper fellow walked into a bakery and ordered a special cake: "I want it 55 inches in diameter—nine layers—seven colored frostings. In the center, I want thy initials, R. N. I want it as soon as possible." "I'll have it for you in a week," was the answer. On the appointed day he called, inspected the cake: "It isn't exactly the way I want it—change the yellow frosting to orchid." On the second inspection, the fellow was delighted: "Perfect—perfect." "Where shall I send it, sir?" "No place—I'll eat it here!"

BERNARD SHAW:

When Lionel Barrymore was scheduled to appear in "Macbeth," there was much doubt among New York ticket brokers whether to "buy in" before the opening. McBride was the leading broker. All the "specs" were on hand for the premier. Lionel floundered through the part. Then came the big moment—his shout "Lay on MacDuff!" Came the answer, from the rear of the house: "Lay on, McBride!"

JIM FARLEY:

Joe Louis, in the Polo Grounds, finished an opponent in a few seconds of the first round. After the victim got in his dressing-room, he didn't say a word—he was still out. He dressed and his manager escorted him to the street. It was raining. The pug put out his hand and moaned: "Gee, this will hurt the gate receipts!" "Oh," cracked the manager, "I forgot to tell you—the fight was called off!"

JIMMY WALKER:

A hillbilly called on a girl for a year. Finally, her father flagged him: "Time I asked you something—are your intentions to my daughter honorable or dishonorable?" "You mean I have a choice?" queried the hillbilly.

ILKA CHASE:

A young radical refused to work. His old man let him have it: "Fine bum—why don't you go to work and make some money?" "Aha, I'm glad you brought that up. It'll come the revolution and we'll have a Utopia—we won't need the money!" "But why don't you go to work and make \$50,000—when it comes the revolution, then you can help them with it." "Aha—suppose it don't come the revolution—then I'm stuck with \$50,000."

MARC CONNOLLY:

When Caesar tried to take Ireland, he was repulsed by Clancy and Finnegan. Caesar returned with more legions—again was pushed back. Julius was now really mad. He gathered the full might of his armies and navies and started for Ireland again. This time, Clancy and Finnegan were careless. Sitting on a raft, they were surrounded, captured after a terrible struggle and brought to the Forum, as captives. Caesar threw the pair into the arena against 500 gladiators. Clancy and Finnegan mowed them down. Caesar burned. He ordered them to fight 2,000 lions. This day the crowd really turned out. As Caesar and his retinue entered the arena, Clancy pointed: "See that beautiful blonde with Caesar? Well, this morning, she looked at me and—just then there was a mighty roar—"Sorry, Finnegan, here come the lions—I'll have to tell you the rest later!"

PRESIDENT ROOSEVELT:

Ailing gentleman ambled into a doctor's office: "I'm having trouble with my eyesight and hearing." "Are you a drinking man?" "Yes, doctor." "That's it—stop drinking at once, report to me in a month." A month later he reported: "Doc, I still have trouble with my eyesight and hearing." "Did you stop drinking as I told you?" "Nope—what I've been drinking is so much better than what I've been seeing and hearing lately I decided to keep it up!"

Use Waste Space For a Linen Closet

EVERY homemaker knows how many steps could be saved if table linens could have a special closet in the kitchen or pantry. In one home that we know of space for such a closet was going to waste all because cupboard doors

or drawers would interfere with the door shown here in the small sketch. At the right you see how that space became an efficient linen closet complete even to smart laundry bag.

The high compartment has a door of plywood. Below this are shelves with a curtain on a shade roller. The curtain runs up and down between the shelves at the left.

NOTE: Mrs. Spears has prepared large sheet giving complete instructions for making this closet and the laundry bag. All dimensions are given and step-by-step directions are illustrated. An itemized list of all materials and things is included. Ask for Design No. 22 and enclose 15 cents. Address:

SNAPPY FACTS ABOUT RUBBER

It did have a bearing on rubber use—the close to 24 billion gallons of gasoline and oil by highway vehicles in 1941. California led the states with a mark on the edge of 2 billion gallons. These are members for the "A" card holder to conjure with.

Tires for our fighting aircraft come from 35 to 96 pounds of rubber, depending on the size of the plane. Inner tubes take from 24 to 54 pounds.

At a rubber plantation in Haiti, a 75-foot tree was pulled to the ground by the weight of cryptogamic vines which had fought one another to climb it.

Two Million More Women Needed for War Plants; Twice That Number Ready, Says Census Survey

Must Replace Men at Lathes and Forges to Supply Armies

By ELLIOTT PINE

Released by Western Newspaper Union. Nearly two million more women must be recruited for war jobs before the end of the year, says the war manpower commission. This is as many as entered industry in all of the twelve months between March, 1942, and March, 1943. In that period 1,900,000 women took over factory work of all sorts, as well as transportation and communications tasks that used to be considered exclusively men's fields.

These two million women will have to be found, along with 800,000 other men, handicapped workers and others not now employed, if the production is not to lag in the early phase of the great conflict, officials warn. The nation has very confidence that women will come forward to man the machines. According to census bureau surveys, there are about four million women available and willing to work, although these potential workers have only been registered in a few large cities. There are no doubt many thousands ready to help if they knew they were needed.

Women seem to be able to do almost any work that men can. Skeptics have had to admit, time after time, that they were wrong. For many years women have been employed in light factory work, like stringing parts, packing, dipping chocolates, canning vegetables, and so on, but whoever expected to see them in roundhouses, wiping locomotives, shoveling sand, or operating huge cranes and lathes in shipyards, or doing welding? Well, women are doing all these things, and doing them well. They have had to learn to use unfamiliar tools, and new ways of thinking and acting, and they have done it in a hurry.

It's in the heavy industries that the entrance of women is most startling. Figures show that during a one-year period employment of women in munitions increased 69 per cent, 36 per cent in steel making, 50 per cent in electrical manufacturing, 100 per cent in chemicals, 164 per cent in shipbuilding, and 184 per cent in aircraft factories!

These huge increases were not in any generally called light. While there has been plenty of need for help in all the clerical and light factory lines, the real openings have been in the heavy mechanical trades. It stands to reason that with heavy metal construction multiplied many times by war demands, and millions of men going to war, there must be a great lack of technically trained employees. Women have been the answer in Europe and they have been the answer here. They have cheerfully gone to training schools, obeyed rigid shop discipline, worked long hours at hard and accustomed tasks, and earned high praise from hard-bitten executives. Despite worry about "absenteeism" in some quarters, women have not been away from their jobs unnecessarily, in most cases.

More Than 15 Million. At the end of March, there were 15,000,000 women gainfully employed, according to Chairman McCullough of the War Manpower Commission. Of these 14,100,000 were in non-agricultural work, so about a million were on farms. Of course, of these 14 million women were not

strictly war workers, but most of them were doing things that were necessary, such as clerking in bakeries, or running elevators, or operating laundry machinery. It must be remembered that the civilian economy must be kept running, and that making cartridges and plane parts are not the only vital services in wartime.

But it is the women in heavy industry who have come forward to fill the breach, somewhat to the joyous surprise of everyone. A sample list of the work women are doing is given by Laura Nelson Baker in "Wanted. Women in Industry." She says women are "Sewing uniforms and barrage balloons, assembling radio tubes, drafting, wiring assemblies for bombers, inspecting, making gas masks, riveting, welding, operating gear cutters, lathes, grinders, drill presses and saws. These are but a few of the well-paid jobs that women are taking over from men. Often they show men up by their efficiency."

Many times women have found better ways to do the operations men have been doing for years. There have been many improvements in working conditions put in for the benefit of women that will no doubt remain when men return to the factories. Some of the changes introduced are, according to Mrs. Baker: "Safety devices, opportunities to change posture and position, machines at the right working height, and other provisions against fatigue are now in general practice. Steel jigs too heavy for women to lift were replaced with masonite jigs weighing less than one-tenth as much. Engineers put a new lever on a spinning lathe so it could be operated with 70 per cent less exertion than before."

So women are able to do things that used to require strength and endurance, by having a few changes

Women with technical educations are needed in research. Catherine Ferguson, a graduate of Northwestern university, where she majored in metallurgy, is assisting in the hunt for new alloys to replace strategic metals such as nickel and aluminum. She is shown beside a furnace in the laboratories of the General Electric company at Schenectady, N. Y., reading an electric pyrometer, or high temperature thermometer.

made. In fact, strength is becoming less and less important as machines take over the duties of muscles. Overhead cranes carry castings and other parts around from lathe to lathe, and shop trucks haul materials and tools about the huge plants. In really big factories, particularly in the aircraft industry, the workers ride about in busses.

Even with all these aids, war work is no "featherbed." In the shipbuilding yards, for instance, women do strenuous, dirty work, wearing cumbersome costumes for long hours. Forty-eight-hour weeks are common, and overtime is the rule some places that have been launching ships at unbelievable rates.

Get Same Pay As Men. Women shipyard workers are paid the same scale as men for the same kind of work. The scale is quite attractive, too, but the work, as said before, is hard, and somewhat dangerous. Every shipyard maintains a plant hospital with doctors and nurses in constant attendance. Workers are urged to report every accident, no matter how trivial.

In the aircraft industry, too, many thousands of women are helping to turn out the 7,000 planes a month that are needed to smash the Axis. Airplane manufacturing requires people able to work to fine tolerances, to be amazingly accurate, and yet speedy. In the modern plane there are hundreds of operations necessary, and women are working at most of them. Except for a few highly technical jobs, where women have not yet been able to get in, the years of experience necessary, they are doing everything from drafting to test-piloting. At the present pace, women will be able to make complete airplanes without any help from men!

This is a highly paid field, with much overtime work. Most women engaged in it have taken considerable training before entering, and

many have had some technical education in high school or college. There are comparatively few airplane factories, and most of these are located near big cities, as Los Angeles, Detroit, and Chicago. Because it is such an attractive field, women have gone into it eagerly, and there is not so much demand for new workers here perhaps, as in

In the huge ammunition plants that have made the United States the "arsenal of democracy" women can be found in many capacities. This lady war worker is tapering shell cases for anti-tank guns at the Frankford arsenal in Philadelphia.

some of the less glamorous industries.

One of the latter is the chemical industry. Here the work is not so arduous as in the manufacture of ships or planes or tanks, but it is just as vital to the success of the war. The wage rate is not so high as in the metal working crafts and similar lines, but it is still very interesting.

Chemical workers generally need some training before starting in the plant, but high school chemistry is often sufficient background for one of the advanced positions. There is opportunity for after-war careers in this field, probably more than in most other lines.

Safety Pins Necessary, Too.

While manufacturing of planes, guns, tanks, and other weapons and equipment used directly in combat is holding the spotlight, there are thousands of other articles most important to the army and navy that are made by companies turning out their regular peacetime products. Army quartermaster corps officers say that they buy at least 18,000 articles in the open market, that is, the same goods that are made for civilian use. Women are needed to make all these things, both for servicemen and for civilians, who must live during wartime too.

Those women who are employed on farms are doing a most necessary job, of course. They should not be tempted to leave their food production to go to a factory. Food is a "munition," and is so recognized in military circles.

With all this change in the traditional role of women, however, social minded thinkers are pointing out alarming possible after-effects when the war ends. They ask whether women who have been earning high wages and have achieved a large measure of independence are going to be content to return to their homes and live on the comparatively lower standard that their husbands' income will provide? Or whether there will not be more friction than ever between married people, as wives who formerly worked at high rates become dissatisfied with the frequently drab task of maintaining a home and caring for children? Sociologists, clergymen, jurists and others interested in social welfare are perturbed about what may happen.

There is also grave concern voiced about the effects of the times on children of war workers. Mothers who are away from their children for long hours are not able to give them that care and affection that no agency can supply. Many children do not get even the inadequate supervision of playground directors, kindergartens or nurseries. The results of haphazard parental direction in formative years may be a serious matter, a few years hence.

But this is war, and war is always profoundly disturbing to the social fabric. More optimistic commentators believe that America can recover from these shocks and come out of the war with conspicuous gains. Having millions of women who can do skilled work is hardly a thing for any nation to deplore. New products will mean a higher standard of living and thereby better health and educational opportunities for all.

When Mrs. Winifred Tennill's husband was drafted, she took his place in this machine in a war plant in Ohio. She is shown pressing a button which started construction of the first airplane parts made in the plant.

Mothers, sisters, aunts, nieces, sweethearts, and even grandmothers are pitching in to see that their soldiers at the fighting fronts are not endangered through lack of ammunition because of a labor shortage at home. Here are four grandmothers working at the Port Newark yard of a shipbuilding company in New Jersey. War Manpower Commission officials reported that from 1942 to 1943 women workers increased 1,900,000. A like number is needed by the end of the year.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

By HAROLD L. LUNDQUIST, D. D. Of The Moody Bible Institute of Chicago. (Released by Western Newspaper Union.)

Lesson for September 5

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education, used by permission.

ISRAEL CALLED TO BE A HOLY PEOPLE

LESSON TEXT—Leviticus 19:1-4, 11-18, 32-34. GOLDEN TEXT—Be ye holy; for I am holy.—1 Peter 1:16.

Labor Day, 1943, with a war-torn world, finds us facing a social order deeply divided regarding the rights and wrongs of the relationship between man and man, especially capital and labor.

For these many years we have talked of a planned economy where kindness and justice shall control all dealings of man with his fellow man. But to accomplish such a result apart from the hand of God to guide and restrain, has proved to be impossible.

Selfishness and sin control too much of the thought and action of our world. We need to be reminded, as was Israel in our lesson, that God has called us to be a holy people. His holiness is not just something of which one sings in a hymn or talks in a sermon. It means among other things, real social justice.

God has always stood for social righteousness. The underlying moral law of the universe demands it, and the law of God as revealed to His people developed and implemented it for successful functioning, were we only wise enough to see and follow it.

It is time that all God's people emphasize God's moral principles in the life of society. Never forgetting that its first business is to preach the redeeming gospel of Christ, the church ought also to make its influence felt for social righteousness.

Our lesson speaks first of the foundational matter in all social justice, namely:

I. Holiness of Heart Before God (Lev. 19:1-4).

Because God is holy, His people were to be holy. It was not a matter of choice or impulse. They belonged to a holy God, they were to be a holy people.

There is an idea current in the church today which has served Satan well, namely, that holiness of life is something which is not required; that it is expected only of a few folk who are spiritually minded, and that the other professed followers of Christ may go on living a worldly, careless, powerless life. It is the devil's own lie. God expects every Christian to be holy.

Such rightness with God shows itself in a rightness with others, which we note as our second point:

II. Holiness of Life Before Men (Lev. 19:11-18, 32-34).

How intensely practical and workable in daily experience were the laws here given to Israel. They are just as apropos to our present day.

1. Honesty (vv. 11-13). No stealing, no perjury, no lying, no oppression, no withholding of wages, none of these could be tolerated, for they dishonored God's name. Think what the elimination of dishonesty in dealing between men would accomplish. Most of our social problems would be solved overnight. Merchants would do well to read verses 35 and 36 in this connection.

2. Kindness (v. 14). The deaf cannot hear what we say about them, nor can the blind see what we do. But the eternal God hears and sees, and He expects us to be kind to them.

3. Fairness (vv. 15, 16). Some assume that a man must be rich because he is rich. Others are equally sure that the poor are always worthy of special consideration.

Note the condemnation of the talebearer. Every gossip who reads these words knows that God condemns that evil practice. Nor does He countenance indifference to the welfare of others. Their blood cries out to Him for deliverance (v. 16).

4. Love (vv. 17, 18). "Love thy neighbor as thyself." That is the standard. How much have we done to meet it?

A rebuke may be necessary, but love will not permit grudges, or the seeking of vengeance, even when we have been wronged.

5. Respect (vv. 3, 32). God's Word always stresses the need of a right attitude toward parents. Children need to learn anew the lesson of verse 3.

Then there are the aged (v. 32). Old age pensions doubtless have their place in our complex social order, but perhaps they would not be needed if men and women honored the hoary head and the face of an old man.

A pension does not take the place of honor and love for the aged, even though it may pay the bills. God has high standards.

6. Consideration (vv. 33, 34). The man who knows God will not be party to taking advantage of a stranger. He remembers that he too has been a stranger. To meet with loving kindness and tender care when one is in a strange place should inspire one to go and do likewise.

Lovely 'Bleeding Heart' Quilt

5578

REMEMBER the lovely pink and white and red Bleeding Heart plants that grew in country gardens and on country lawns? The quilt illustrated here was inspired by these. Block is 12 inches square. Do it in delicate green sprigged and red polka-dotted cottons.

Household Hints

A large piece of cellophane placed behind your table-top stove keeps grease spots off the wallpaper and is much more attractive than a piece of oilcloth, as it allows the wallpaper design to show through.

Marks caused by match-striking on a painted surface can be removed by rubbing with a cut lemon.

Household ammonia will remove finger prints from window panes and glass tabletops.

These hot nights place your fan in an open window, facing the room. The air should not strike sleepers.

When the word went out that soldiers overseas wanted packages from home—the response was so overwhelming that Uncle Sam reluctantly had to call a halt. Today, due to shipping space, there are Post Office restrictions on packages to overseas Army men—but you can still send packages to soldiers in the U. S., and to Sailors, Marines, and Coast Guardsmen wherever they are. When you do, remember—one of their favorite gifts is cigarettes, and the favorite brand is Camel. Sales records in Post Exchanges and Canteens show that Camel is first choice with men in all the services. So send him that carton of Camels today.—Adv.

To obtain complete pattern for the Bleeding Heart Quilt (Pattern No. 5578) amounts of materials specified, all cutting pieces given, finishing directions, send 15 cents in coin, plus one cent postage, together with your name, address and pattern number to:

With Time Time makes more converts than reason.—Thomas Paine.

A DAB A DAY KEEPS P.O. AWAY

New cream positively stops underarm perspiration odor

1. Not stiff, not messy—Yodora spreads just like vanishing cream! Dab it on—odor gone!
2. Actually soothing—Yodora can be used right after shaving.
3. Won't rot delicate fabrics.
4. Keeps soft! Yodora does not dry in jar. No waste; goes far.

Yet hot climate tests—made by nurses—prove this daintier deodorant keeps underarms immaculately sweet—under the most severe conditions. Try Yodora! In tubes or jars—10c, 30c, 60c. McKesson & Robbins, Inc., Bridgeport, Connecticut.

YODORA DEODORANT CREAM

With hybrid corn, the important thing is NOT where the seed was grown, but how it performs where you plant it. The best way to compare varieties and decide which ones suit you the best is to see them growing side by side in a soil and climate similar to yours. That's why DeKalb has more than 3300 proving grounds or demonstration fields, throughout the corn-growing areas.

FOREST CITY, IOWA

We Are Boosting For A Healthy School Year

WE ARE PROUD OF THE FINE SCHOOLS IN OUR COMMUNITY . . .

• KLEMME HAS ONE OF THE FINEST and most up-to-date School Buildings in North Iowa. We also have nice, comfortable schools in our Rural Community. We like to have our Rural Eighth Graders come to the Klemme High School where we have an excellent staff of teachers and a likeable body of students who will make you feel at home. Yes, we are proud of our School System as our Klemme Graduates go out into the world and are making good as farmers, businessmen, professional men, soldiers, sailors and marines, and our girls are successful as teachers, business women and home-makers.

• IF YOUR BOY OR GIRL is not now enrolled in the Klemme High School, plan now to send him or her to Klemme when they complete their eighth grade work next year.

A GOOD SCHOOL DEPENDS ON A GROUP OF HEALTHY CHILDREN

• WE CAN ALL STRIVE for the continued success of our fine school systems, both in Klemme and in the Rural Districts, by keeping our children STRONG and HEALTHY . . . and that is your children plenty of good, wholesome Milk, Cream, Cheese, Eggs and above all . . . liberal helpings of KLEMME CREAMERY BUTTER. There is no other food containing so many valuable VITAMINS to build strong, disease-resisting bodies as good BUTTER. Uncle Sam wants you to keep HEALTHY. So use BUTTER freely EVERY DAY.

Let KLEMME CREAMERY BUTTER Be An Important Part of the School Lunch Box Each Day!

Klemme Co-Op. Creamery

Klemme Soldier Has Thrilling Experience Aboard Bomber

Headquarters 7th Air Force, Klemme, Iowa, and S Callaway of Ellenwood, volunteered to do what had been stepping down into the bomb bay and disposing of the bomb which lay under the weight of the bomb bay might open them and send the bomb bay, picked up the 100 lbs. and passed them on to the crew members who last bomb at the bottom of the ship was the fused bomb had it exploded, would have blown up the ship. This too, the way of the others, and the crew members who dispose of the bombs was Sgt Glen Marckmann, gunner, Fontanelle, Iowa.

COUPLE MARRIED AT BANK, NEW JERSEY

Marie Schmidt, bride of Coast Guardsman Eugene Kluckhohn, announced that the wedding ceremony was performed at Red Bank, New Jersey, by Earl Leeven, pastor of the First Church, at 2:30 o'clock Sunday afternoon, August 7. The bride and groom resided at the Hancock County War Chest drive in October. The following have accepted appointment as chairmen: Town chairmen, Britt C F Ashman, Kanawha Mrs D L Wilkie Weden, Henry Bode Klemme, J C Thomas, G dell the Rev Harold Knight, Garner, Roy L McMillan, Crystal Lake, P J Kirkpatrick, Hayfield, H H Brown. Township chairmen Bingham Fred Bentele, Madison, John Kester, Ellington, W D White, Concord, Wm Brehnke, Garfield, Geo Ulrich, Britt, E H Olson; Orthel, Mrs Leo Sankry, Boone, Victor Loebig, Erin, Mark Miller, Liberty Ben V Groman, Ell, Addis Groman; Avery, John Henn, Twin Lake, Henry Nolte; Amsterdam, Lloyd Raber.

School Convention At August 13th Hancock-Winnebagos Sunday council will hold its annual meeting in the Britt Methodist church on October 13, 1943.

Mrs Alvin Lass are the mother of an 8 pound 8 ounce baby born to them at the home of Marion Rust at Garner, on September 7th. John Lass spent most of the afternoon in town telling everybody that he and his wife were distinguished people when they were in the grand class.

KLEMMME YOUNG PEOPLE TO ATTEND COLLEGE

Large Number Of Spring Grads To Take Up Higher Education

A large number of the Klemme High School graduates this year will be enrolled in colleges and various other schools of higher education. Waldorf College at Forest City has attracted three of last spring's graduates Eugene Habercamp, Arlene Wille and Dean Mettel.

Likewise the American Institute of Business at Des Moines will be attended by three K H S graduates of 1943 Audrey Mau, Marcelle Swanson and Betty Etchen.

Two young ladies will take up a business course at Hamilton University of Commerce at Mason City Betty Ward and Ardella Nelson.

Bruce Arnold will return to Iowa State College at Ames where he is a sophomore this year.

Eva Velau will attend Drake University at Des Moines while Luella Lewis will begin a nurses training course at the Methodist hospital in Des Moines.

Anna Lee Bruner has enrolled at the State Teachers College at Cedar Falls, and Miss Novella Bredbenner, who has been teaching at Allison, Iowa, returns to the State Teachers College as a Junior.

Elwyn Jacobs began his college studies Monday morning at Simpson College at Indianola, Iowa.

"Bill" Grishuesch will enter upon a college career at the Mission House College at Plymouth, Wis.

Stella Thiemann will take up the study of beauty culture at Thompsons School at Des Moines.

COUNTY GETTING SET FOR WAR CHEST DRIVE

Dr C V Hamilton has announced the names of town and township chairmen who will serve in the Hancock County War Chest drive in October. The following have accepted appointment as chairmen:

Town chairmen, Britt C F Ashman, Kanawha Mrs D L Wilkie Weden, Henry Bode Klemme, J C Thomas, G dell the Rev Harold Knight, Garner, Roy L McMillan, Crystal Lake, P J Kirkpatrick, Hayfield, H H Brown. Township chairmen Bingham Fred Bentele, Madison, John Kester, Ellington, W D White, Concord, Wm Brehnke, Garfield, Geo Ulrich, Britt, E H Olson; Orthel, Mrs Leo Sankry, Boone, Victor Loebig, Erin, Mark Miller, Liberty Ben V Groman, Ell, Addis Groman; Avery, John Henn, Twin Lake, Henry Nolte; Amsterdam, Lloyd Raber.

Dr Hamilton said that a meeting of all of these chairmen, together with the executive committee of the county war chest, will be held at Britt Thursday night, Sept 9th at 8:00 o'clock at the Community Hall.

The National War Fund, of which the Hancock County War Chest is a part, covers the needs of 17 member war relief agencies, including the U. S. O. and the October drive is to be the only one conducted for such purposes. The Red Cross is not a part of the National War Fund, however. The Hancock County War Chest quota is \$15,000.

YOUTH FELLOWSHIP HELD "RAILROAD" PARTY

The Methodist Youth Fellowship held their first fall meeting Sunday night with a special get-acquainted program in the form of a Railroad Party. After games had been enjoyed and refreshments served, the meeting closed with a candle-light devotional service. About 30 young people were present.

"Back The Attack"

Bond Drive Begins With Daylight Practice Alert

PRACTICE DAYLIGHT ALERT WILL OPEN BOND DRIVE

State Wide Daylight Alert Must Be Observed By Everyone

A state-wide practice daylight alert will be observed throughout the entire state shortly after noon on Thursday of this week.

In Klemme the regular noon-day whistle will blow. Shortly thereafter the whistle will again sound for the "alert" signal, followed in a few minutes by the signal to denote that the "action" is in effect. Klemme's loud-speaker system is being pressed into service for further announcements by W C Kerus, local Civilian Defense chairman.

The simple rules to follow are: Cease activity, stay off the streets. If in a car pull up to the curb or road and stay parked until the all-clear signal sounds, in about twenty minutes.

School children should make an extra effort to reach their homes before the signal sounds. The rural pupils should remain at school during the lunch hour.

Listen for the loud-speaker system for announcements.

PETIT JURORS FOR THE 1943 SEPTEMBER COURT TERM

Jurors for the September term of District Court will report for duty October 5th at 10:00 o'clock in the court house at Garner. The September Term begins on September 27 with M H Kepler, presiding judge.

The following have been drawn for jury duty:

James Yeakel, Kanawha; A. H. Sigler, Britt; E. L. Hatten, Britt; Mrs J H Champion, Britt; Melvin Neuburger, Klemme; E. H. Nelson, Kanawha; J J Hrubes, Britt; Dorothy Walter, Corwith. A. E. Duthridge, Klemme; Nettie Barber Kanawha; Ruth Yohn, Garner; Herman Lambert, Woden; John B Love Garner; Mrs Wallace Donavan, Britt; Harry Freese, man, Britt; Dora Johnson, Garner; Roy Lawhorn, Garner; Paul Havlik, Garner; H J Johnson, Kanawha; Lloyd Van Buskirk, Goodell; Lois Chambers, Goodell; Elmer Klipping, Forest City; Art Abele, Garner; Oscar Goldbuff, Hayfield; A B Cooper, Kanawha; John Clement, Garner; Norman Juhl, Garner; Clara Smith, Goodell; Elizabeth Mattoon, Corwith.

ONE HUNDRED FIFTY-EIGHT ENROLLED IN SCHOOL HERE

Two-Thirds Of High School Are From Rural Districts

Superintendent Leo Esbeck has made a check of attendance at the Klemme Grades and High School which shows a total enrollment of 158 in the school.

There are 82 pupils enrolled in the lower grades and 76 students in the high school. Of this number 52 are from the rural districts. The boys far outnumber the girls in high school this year, which is a rather rare situation. There are 49 boys and 27 girls in high school.

The First Grade has 11 pupils; Second Grade, 12; Third Grade 9; Fourth Grade, 9; Fifth Grade 9; Sixth Grade 8; Seventh Grade, 8 and Eighth Grade 16. In High School the Sophomore and Seniors each have 20 students, while the Freshmen and Juniors each have 18 students.

BALL GAME HERE FRIDAY WITH THORNTON HIGH

The fall baseball season gets under way Friday, Sept 10 when Thornton comes here for a game.

Thirty-three boys are reporting daily for practice, but only a few are experienced. The schedule is as follows: Sept 10, Thornton here. Sept 17 Open date. Oct 25 Sectional tournament. Oct 1 Kanawha here. Oct 8 Kanawha there.

EINAR SALLING SELLS CREAM ROUTE TO LYNFORD BACK

Einar Salling sold his cream route, trucks, and equipment the latter part of the week to Lynford Back, who took over the business immediately.

Mr and Mrs Salling sold their home in Klemme last week to Mr and Mrs Wm. Waddingham and they expect to leave soon for California to make their future home.

GOODSELL SCHOOLS OPENED MONDAY THIS WEEK

The Goodsell Schools opened Monday of this week instead of last week as Supt. Edward Fritz, of Seattle, Washington, could not arrive in time to start school last week.

Mrs. Ernest E. Lewis, of Klemme, is on the high school teaching staff at Goodell this year.

Mrs. Clarence Pals Killed In Crash Near Ventura

Our Men In The Service

LT KILGORE INSTRUCTOR IN NEW TRAINING CENTER

Helping pioneer the new I R T C Training Camp near Tyler, Texas, 2nd Lt Lyndon E. Kilgore is serving as platoon leader and instructor in Co C, 78th Bn Training Reg at Camp Fannin.

In his 26 months in the service the former Times printer and linotype operator previously had been stationed at Camp Wolters, Tex; Ft. Benning, Ga., and Camp Robinson, Arkansas.

This Infantry Replacement Center gives basic military training to replacements for all branches of the Army Ground Forces. It is at Camp Fannin where in 17 weeks that the civilian is transformed mentally and physically into a soldier.

PVT. CLARENCE KLUCKHOHN IN TEXAS CAMP

Pvt Clarence Kluckhohn, son of Mr and Mrs C E Kluckhohn is stationed at an army camp in Texas. His address is: Pvt Clarence Kluckhohn 37675082 Hdq Btry 575th A.A.A. A.W (SP) A A A T C Fort Bliss, Texas.

GARLAND BRINKMAN NOW IN RHODE ISLAND CAMP

Garland Brinkman, a member of the Sea Bees, son of Mr and Mrs Martin Brinkman, is now in Rhode Island. His address is: Garland Brinkman, S 2-c, 67th Const Batt, Co A, Camp Endicott, Davisville, R. I.

Lt "Bob" W Lewis, nephew of Henry, Vermer and Ernest Lewis was visiting in Klemme Monday evening. Lt Lewis was graduated last week from the army air force pilot school at Moody Field, Ga. and commissioned a 2nd lieutenant with the rating of army pilot. He is the son of Mrs. O. C Anderson of Mason City.

Pvt Marvin G Lemke arrived home Monday from University, Mississippi to enjoy a furlough visiting with his mother, Mrs Daisy Lemke.

Seaman Merle Schaefer of San Diego, California, arrived in Klemme Monday to enjoy a couple of weeks furlough visiting with his parents, Mr and Mrs Roy Schaefer. Merle, who is a mechanic in the navy air corps, made the trip home by hitch-hiking on planes. He rode on four different planes in order to arrive near home.

KLEMMME YOUNG MAN GIVEN HONORABLE DISCHARGE

Franklyn Kluckhohn, son of Frank Kluckhohn of Klemme, who has served in the U S Army for over a year, returned home Friday morning from Ft Leavenworth, Kansas. Franklyn was given an honorable medical discharge from further service in the army.

Record Breaking Offering At Klemme Reformed Church

The offering taken at the Klemme Reformed Church at the Mission Festival Sunday totaled \$801.00 and was the largest offering ever received in a single day. The offering is used for benevolences by the church.

OTHER OCCUPANTS OF CARS ONLY SLIGHTLY INJURED

Fatal Accident Occurred Two Miles South, One Mile East Of Ventura Monday Evening

Mrs Clarence Pals, who lived 8 miles north of Ventura, was almost instantly killed in an automobile collision 2 miles south and 1 mile east of Ventura at 8:15 p m Monday.

Mrs Pals and her husband were in their car headed south and at the time they reached the intersection met a car in which Elfrida Messelheiser and her companion, Mr Beers, Meservey, were going east.

The two vehicles met in the center of the intersection. Officers said the vision of both drivers was impeded and no reason or the collision was apparent.

Mrs Pals was thrown out of her car and crushed beneath it when it tipped over on her. She was dead before any officers arrived.

The sheriff's office at Mason City was notified and an investigation begun at once.

The other 3 occupants of the 2 cars were only slightly injured, it was reported at Mercy hospital in Mason City. The condition of Mr Pals and Mrs Messelheiser was reported good at the Mercy hospital Tuesday. Mr Beers had been dismissed.—Mason City Globe-Gazette, Tuesday, Sept. 7.

100 ATTEND HEMP TOUR

One hundred Hancock County farmers attended the Hemp Tour held on Friday afternoon. J M Townsend and Clifford Schaper, managers of the hemp plant cooperated with County Extension Director, Paul Henderson, and two Iowa State College specialists H R Eldrum and Ed Dyas in arranging the tour. They answered questions concerning variations in the fields and explained why these places were visited. Clifford Schaper's, Albert Rasmussen's, Martin Groce's, Neil & Walter Kahl's, Gene Koen's, McInnes's, the hemp plant and the hemp harvesting machines in Britt.

The outstanding thing noticed in each field was the fact that hemp is very sensitive to the presence of lack of available nitrogen in the soil. The cropping history also points out some good and bad practices. Hemp seems to follow some crops better than others. Hemp follows clover pastures quite well. It does not follow small grain with any marked success.

HANCOCK COUNTY REAL ESTATE TRANSFERS

Mrs Martha Hoeft, widow to Arthur H Hoeft, Lester H and Edna E Knopf Warranty Deed 8-14-43, \$100 SE 1/4 section 36-077-23.

Different Flags Used in Wars Waged by U.S.

Every war the United States has waged, with the exception of the present one, has been fought under a different flag. That is, the stars and stripes—or the stars and stripes—were arranged somewhat differently.

For example, in 1898 in the war with Spain, our flag had 45 stars. In 1917, in the war with Germany, the flag had 48 stars.

CLASSIFIED DEPARTMENT

Auto-Tractor Parts

Up to 50 per cent savings on new auto, auto, truck and tractor parts. Mail order promptly filled. Chas. E. Auto Parts Co., North Federal, Mason City, Ia. Phone 1-1000.

CHICKS FOR SALE

"EXCELLENT" Chicks, Poultry, Ducks, U.S. approved and U.S. pullover. Output large. Price, \$1.00 per pair. WESCOTT & WINKS HATCHERY, Summer.

FEATHERS WANTED

FEATHERS OLD & NEW—Wanted for pillow mfg. CO., 2219 Cole Street, St. Louis.

FOR SALE

Registered Spotted Poland China best of breeding good individual, reasonable prices. Chas. E. Auto Parts Co., MILLER BROS., R. R. 1, Thompson, Mo.

PARAKEETS, ALL COLORS, \$2.50 per pair. African Grey, \$3.50 per pair. CEDAR CREST AVIARY, Creston.

BARGAINS in Minnesota clover, ranches and 1,000 acre properties. Info., write OLE KARSON, Walker, Mo.

HELP WANTED

Wanted Women 18-35 for steady employment. Apply in person at P. M., on week days. Those now in cultural or other essential occupations need not apply. THE HOSKINS MANUFACTURING COMPANY, Waterloo, Mo.

SALESMAN: IF YOU CAN QUALIFY, can make big money selling estate. Not affected by war. Average order approximately \$100. Write for info. DEPT. 601-A, BOX 2382, Dallas, Tex.

POPCORN WANTED

Wanted POPCORN, Ear or shelled, Red and Yellow. Send samples, state quantity. Amount of POPCORN for sale. RABBIT POPCORN COMPANY, Waterloo, Mo.

Want Feathers, Horse Hair

We'll pay \$1.25 for fine goose feathers for duck feathers. Used feathers up to 10¢. Tail hair 6¢. In one 20¢. All quantities. Write for info. Farmers Store, Mitchell, S.D.

Albatross' Take Off

Wing power alone will not lift the black-footed albatross off the cliffs to take off from water or ground. It has to have a run of 60 to 90 feet against wind to rise.

To relieve distress of MONTHLY Female Weakness

Lydia E. Pinkham's Vegetable Compound is made especially for women to help relieve periodic pain, weakness, tired, nervous, blue feelings—due to functional monthly disturbances.

Taken regularly—Pinkham's Compound helps build up strength against such symptoms. It's a natural product that helps nature do its work. That's the kind of thing that's been almost a century. Thousands of thousands of women have reported benefits. Follow label directions. Worth trying!

LYDIA E. PINKHAM'S COMPOUND

Kidneys Must Work Well

For You To Feel Well

24 hours every day, 7 days a week, never stopping, the kidneys waste matter from the blood. If more people constantly remember that the kidneys must be kept in good shape, plus fluid, excess acids and the matter that cannot stay in the blood, the kidneys will be better understanding of the whole system properly.

Burning, scanty or too frequent urination sometimes warns that action is wrong. You may suffer aching, headache, dizziness, backache, getting up at night, nervousness, getting up at night, nervousness. Why not try Doan's? Doan's is a medicine that's been used in the country over 50 years. It's the action of the kidneys and body's flush out poisonous matter from the blood. They contain nothing but Doan's today. Use with confidence. At all drug stores.

DOAN'S PILLS

HOUSEHOLD MEMOS... by Lynn Chambers

Stuffed Eggplant Will Keep Your Points Down!
(See Recipes Below)

Harvest Foods

The summer is the truck garden—paradise, and this summer we might well say the Victory gardener's paradise, for there are many gay and attractive foods ripening now which may make a truly appetizing addition to your table. For example, the season's choicest tomatoes in their fullest, ripest red make a fine addition to the table now.

There are also golden-cared, tender corn, at its best when picked more than half an hour before cooking. And one of the most dramatic vegetables to do justice to is the eggplant—smooth, purple and shiny in appearance.

Most of you are undoubtedly familiar with eggplant served sliced and fried—and there's no doubt it's that way. But for a change, try it baked with a savory stuffing to make it a main dish feature of your dinner. The total cooking time for preparing it in this new way is 35 minutes—10 minutes for boiling the eggplant in rapidly boiling water, and then 25 minutes baking in a moderate oven.

*Stuffed Eggplant. (Serves 6 to 8)

1 eggplant
2 cups bread croutons
1 cup strips bacon, cut in squares
1/2 cup onion, minced
1/2 cup salt
1/2 cup pepper
1 egg

Cut whole eggplant in boiling water for 10 minutes. Cut lengthwise from top to bottom.

Remove pulp with spoon, leaving a shell about 1/2 inch thick. Chop pulp. Croutons Fry croutons in bacon fat. Add to eggplant.

Add the egg and season with salt and pepper. Fill eggplant shell with the mixture and top with the croutons.

Corn Flake Crumb Topping.
2 cups corn flakes
1 egg yolk
1/2 teaspoon dry mustard
1/2 teaspoon lemon juice
1/2 teaspoon salt
Paprika
Butter

Crush corn flakes to fine crumbs, mix with egg yolk, mustard, lemon juice and salt. Cover stuffed eggplant with crumb mixture, dot with butter and sprinkle with paprika. Bake in a moderate oven (350 degrees) for 25 minutes. Serve on platter.

Lynn Says:
Color in Your Meals: Do you realize that your eyes eat that before you actually eat it? If food looks dull and unattractive, your appetite lags. The food, if eaten is consumed without much relish.

The eye wants contrast. Pick colors that go well together. You can serve several green vegetables for one meal, but not several white vegetables or all-white meats and vegetables.

Combine meat and vegetables on a platter to get a design and plates besides! Use garnishes with care and give them opportunity to bring out the color in your foods. Sprinkle beets with a little lemon juice to make them a more attractive red. Cook green vegetables until done to assure them being crisp, green.

dash of lemon juice on apples, pears or other fresh fruit will prevent it from darkening.

This Week's Menu

*Stuffed Eggplant
Head Lettuce Salad with French Dressing
*Caramel Cinnamon Muffins
Sugared Peaches Beverage
*Recipe Given

a platter with corn on the cob and fresh, sliced tomatoes.

English Baked Squash. (Serves 6)

1 quart peeled, thinly sliced Hubbard squash
1/2 teaspoon salt
4 tablespoons sugar
1/2 cup rich cream
1 teaspoon cinnamon

Place squash in well-greased baking dish. Sprinkle with salt and sugar. Add cream and sprinkle with cinnamon. Bake covered in a slow (325-degree) oven for about 50 minutes.

Another vegetable comes in for honors—and very different but delicious is this dish, too!

Sour Cream Cabbage. (Serves 5 to 6)

1 head of cabbage
2 tablespoons butter
1 clove garlic
1/2 cup sour cream
1 tablespoon vinegar
1 tablespoon sugar
1 teaspoon salt
1 egg

Shred the head of cabbage medium fine. Melt the butter in skillet and cook in it slowly the clove of garlic, minced fine. Add cabbage and 1/4 cup water. Cover tightly. Bring to a quick steam, reduce heat and cook for 10 more minutes. Just before removing from range, add sour cream sauce made by mixing together the sour cream, vinegar, sugar, salt and egg beaten light. Pour over cabbage and bring to a quick boil. Serve at once.

Sausages and Spaghetti. (Serves 6)

8 link sausages
1 small onion, sliced
1 green pepper, chopped
1 1/2 teaspoons salt
1/4 teaspoon pepper
2 tablespoons flour
2 1/2 cups tomatoes
1 1/2 cups spaghetti, cooked

Cut sausages in inch lengths; fry until golden brown. Add onion and green pepper and brown lightly. Add seasonings and flour and blend. Add tomatoes and spaghetti. Bake in a greased baking dish in moderate (350-degree) oven 30 minutes.

*Caramel Cinnamon Muffins. (Makes 1 1/2 dozen 2-inch muffins)

2 cups sifted flour
2 teaspoons baking powder
1 teaspoon cinnamon
1 teaspoon salt
1 egg
2 tablespoons light corn syrup or honey
1 cup milk
2 tablespoons melted shortening
Sift together flour, baking powder, cinnamon and salt. Beat egg, add syrup, milk and shortening. Blend thoroughly and add to flour mixture. Stir only until flour is moistened. Stir in a moderately hot oven (425 degrees) 20 minutes. Prepare muffin pans as follows for these muffins: Into each muffin cup, put 1/2 teaspoon butter or margarine and 1 teaspoon corn syrup. Fill with batter 2/3 of an inch full.

Are you having a time stretching meats? Write to Miss Lynn Chambers for practical help, at Western Newspaper Union, 210 South Des Moines Street, Chicago, Ill. Don't forget to enclose a stamped, self-addressed envelope for your reply.

Released by Western Newspaper Union.

THE AUTO OF THE FUTURE

Airplane and auto companies are already busy on plans that will give post-war America a combination plane and motor car that will be at home on or off the ground.

Designs for a family jitney that will "fly through the air with the greatest of ease" when popper's patience with red lights runs out are being revealed. Some models combine all the hair-raising features of a jeep, a fighter-plane and a witch's broom.

One, the "aeroflyver," has quick detachable wings! And a demountable tail! Whoops!!

The "aeroflyver" has a regular auto body to which the flying features can be attached "as easily as changing a tire." It's gotta be easier than that, mister!

When you have cooked up a weekend trip that will be too monotonous if you stick on all four wheels, you clamp on the wings, rudder, etc., and—"Gangway! Daddy's playing sea gull!"

Then there's the "helocab," a combination helicopter and coupe. Nothing detachable about this baby. It comes all in one piece, looks like a Jap beetle that has been living with Henry Ford and can run, jump, fly and "hover."

No head-start, no impetus! It rises straight off the rear lawn like a cricket off a hot griddle. It can go backwards, forwards or stay still in midair like a kingfisher over a school of shiners. What fun!

It combines the best features of a Sunday bus trip to Finnegan's Beach with those of a tryout for the Air Corps, a balloon ascension and an afternoon over the hurdles without a horse.

The auto of the future will jump over traffic cops, skim the red lights, blitz the road rules and make touring an aerial exploit.

The question will not be "How many miles does she give per gallon?" but "How many states can she hop per hour?"

One of the first things an auto buyer will ask of the salesman is going to be, "Do I bail out from the left or right?"

And in time we can picture the ladies being appealed to by a sales talk emphasizing that parachutes come in old rose, beige, canary yellow and robin-egg blue, with compact attached.

It all sounds far-fetched but auto and aviation men are deadly serious about it. They insist that with the end of the war the flying urge will be international.

Mitza, bring in the kiddies! Here comes the flying laundry wagon, the milk ace and the Jones boy in his helicopter-jeep car!

VANISHING AMERICANISMS

1—Let's take a train ride and relax.
2—Plenty of seats up forward!
3—If you don't see what you want on our menu, ask for it.
4—Take this steak back and bring me back one that is really worth 80 cents.
5—Lemme see your dollar dinner?

6—This car is air-conditioned.
7—Big barbecue Sunday at Finnegan's Cove; tickets including dinner, beer and games, \$1.50.

8—Here, my good man, is a half dollar; go get yourself a haircut and shave.

9—We give the biggest glass of beer in the city for a nickel.

10—Owing to the quality served we are obliged to raise the price of highballs from 15 cents straight to two for a quarter.

11—You look hungry; take this dime and get yourself a sandwich and a cup of coffee.

12—Set 'em all up, Eddie, out of the change from that dollar bill.

13—They can't do that to me!

14—Let's order the \$1.75 shore dinner with both the fish and lobster on it.

15—If we buy one more the house will set 'em up.

16—Hey, waiter, more bread and butter!

17—Try our \$1.25 planked steak dinner.

18—The money isn't much but I like the job.

19—And make me an extra pair of trousers with the suit.

20—If I quit I'll give you at least two weeks' notice.

21—Have them send up a limousine for a demonstration.

22—This auto will take you anywhere!

23—Would you like another helping?

24—The customer is always right.

25—One thing you can be sure of in buying this house; it was built by a conscientious builder.

26—Do you think Hitler really wants war?

27—Taxes are paid out of the sweat of every man's brow.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

By HAROLD L. LUNDQUIST D. D.
Of The Moody Bible Institute of Chicago.
(Released by Western Newspaper Union.)

Lesson for September 12

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education, used by permission.

ISRAEL MARCHES TOWARD CANAAN

LESSON TEXT—Numbers 10. 11. 12. 29-36.
GOLDEN TEXT—Come thou with us, and we will do thee good—Numbers 10. 29.

There is a time to wait before God, to be instructed and prepared for holy living. There is also a time for action. When God says, "Move forward," His people are to arise and be on their way.

Israel, who had now been more than a year on the way from Egypt to Canaan, had been resting for a time at Mt. Sinai, there receiving instruction and being organized into a nation. They had set up a place of worship in their midst, and now they were ready to go on. That is God's will for His people. They are to

I. Move Toward the Goal (vv. 11, 12).

God had a schedule. He wanted them to move forward on a certain day (v. 11). Since the Jewish religious year, referred to here, began with the spring equinox, this was about the middle of May. The dry season was ahead—a good time to travel.

Those who think the purposes of God for men are nebulous and uncertain, and that He has no real plan for us, are obviously mistaken. His plan is good and acceptable and perfect; let us find and follow it.

We do not have a pillar of cloud and fire to move before us. We do not need it, for we, unlike the Israelites, have God's Word for our guide, and His Holy Spirit as the One who will tell every responsive soul when and where to go.

The important thing is to obey, promptly and willingly, and we shall have the blessing of God.

II. Bring Others With You (vv. 29-32).

Those who go up to the promised land should not go alone, they should bring others with them.

Moses, who had been in touch with the family of his father-in-law (known both as Jethro and Raguel or Reuel), now sees the value of having with him his brother-in-law, who was so acquainted with the great and terrible wilderness through which they were to pass that he could be invaluable as a guide and helper.

In giving him the invitation, however, Moses stressed the opposite thought—that it would be good for Hobab if he came with them. That was doubtless true, but it was not the right approach.

Men do not respond to the opportunity for advantage in spiritual things as readily as to the challenge to usefulness. The motive of acquisition is strong, but the best folk are not as interested in what they can get as what they can give.

The church may stress too much its value as a place of refuge and not enough the unparalleled opportunity it affords for sacrificial service.

When Moses changed his plea and revealed his need of Hobab, the response was immediate. He had thus won a friend and a helper.

III. Follow God's Guidance (vv. 33-36).

God gave special guidance on this occasion. The ark which commonly was found in the midst of the people, now moved out before them.

It was the symbol of God's presence. As they went out into the wilderness (which Deut. 1:19 calls "great and terrible") it was as though God Himself went before them.

Is not this always true? The "Captain of Our Salvation," Jesus Christ, is not One who carries in safety at the rear and sends up orders for us to attack life's problems. He goes before us!

The pillar of cloud hovered over the people as though to give them shelter from the beating sun of the desert. God is mindful of the road His people must travel, and in His loving-kindness provides for their protection and care.

In our day there are many who are tempted to question whether God knows of their trials and afflictions. He does, and He will not permit them to be tried beyond their ability to bear it.

When the ark went forward, their leader, Moses, addressed God in the stirring words of verse 35. The people whose God is the Lord may count on Him to scatter their enemies.

All of human life is either a journey or a battle, and often it is both. We must arise and make valiant war against the forces of evil if we are to move forward for God. But we must recall that our foes, as Christians, are also God's foes.

The battle is not ours, but God's, and we do well to call on Him to rise up and smite the enemy.

Note that after the forward march came a time of rest. God always gives His people an opportunity for needed rest.

7573

SOME of your garden favorites framing your initial will bring decoration and color to your linens. A pair of pillow cases or guest towels done this colorful way would make an ideal shower gift! It's all simplest stitchery.

Hulls of lima beans make good soup if they are put through a coarse sieve or colander. The pods cook quickly, and are rich in their taste of the bean.

Ventilated containers for bread and cake should be scalded, sunned and aired once a week during the summer months.

Should the clothes closet become moldy, air it with an electric fan. An electric lamp kept burning for a time will help dissipate the moisture.

Light-weight food containers for refrigerators allow food to cool more quickly than do thick heavy containers.

Wartime canning jar rings are made of unelastic reclaimed rubber. Stretch them as little as possible.

When you see news photos of soldiers "off duty" in camp or behind the battle-lines—notice how often you'll see them smoking a cigarette. There's a good reason for that. Army officials say that cigarettes are an appreciable factor in maintaining morale—and the soldiers themselves add that a carton of cigarettes from home is always welcome. What brand? Well, sales records in Post Exchanges and Canteens show that Camels are the favorite cigarette with men in all the services. Though there are Post Office restrictions on packages to overseas Army men, you can still send Camels to soldiers in the U. S., and to Sailors, Marines, and Coast Guardsmen wherever they are.—Adv.

Pattern 7573 contains a transfer pattern of six 4 by 5 inch frames and two 1 1/2 inch alphabets; stitches, materials needed. Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

Send your order to:

Lawyer Met His Match In Tinsmith, On and Off

A lawyer, noted for his success in cross-examination, asked a witness how long he had worked at his business of tin-roofing.

"I have worked at it off and on for some time."

"How long off and on?"

"Sixty-five years."

"How old are you?"

"Sixty-five."

"Then you have been a tin-roofer from birth?"

"No, sir; of course I haven't."

"Then why do you say you have worked at your trade 65 years?"

"Because you asked how long off and on I had worked at it. I have worked at the trade 65 years—20 years on and 45 off."

Here there was a roar in the courtroom, but not at the expense of the witness, and the lawyer hurriedly finished his examination in great confusion.

YOU CAN'T BUY ASPIRIN

Earth Slowing Up

The earth is gradually slowing in its rotation, with a consequent lengthening of our day amounting to about one-thousandth of a second per century.

SNAPPY FACTS ABOUT RUBBER

Rubber shortage will cause motor trucks to be operated this year only 60 per cent of their 1941 mileages, according to OWI. Ton mileage haul in intercity service, however, was up 10 per cent early this year.

Rubber latex, a milk-like substance, contains from 30 to 40 per cent solids; cow's milk has only 12 per cent solids.

Add lettuce to the list of rubber producers! Tests of three varieties of lettuce by the University of California, it has been reported, showed high content of rubber latex.

Thursday — September 9

THE 3rd WAR LOAN DRIVE STARTS —TO BACK THE INVASION!

What you will be asked to do

MARK WELL the date—Thursday, September 9th. For on that day, *you* must answer to your country's call.

On that day, the 3rd War Loan Drive opens. To you—and to every other true American—a clarion call goes forth to rally to the support of our flag.

You will be asked to back our fighting forces to the very limit of your resources. You will be asked to go ALL-OUT FOR INVASION by investing in EXTRA War Bonds—more War Bonds than you perhaps think you can possibly afford.

To meet the national quota, every individual in the country who earns a wage or draws an income or has accumulated funds must invest, if he possibly can, in at least one EXTRA \$100 War Bond. Those who can, must invest more—thousands of dollars' worth more. Each and every one must do his full part.

Scrape up the money from every source you can... turn in all the loose cash you carry with you... dig out what you had tucked away "just in case." Go without pleasures, luxuries, even necessities this September. And give our fighting men the things they need to fight with—and *win*.

These men are throwing everything they have into this fierce invasion push. They are giving

their blood, their lives. No one can put a price on such courage, self-sacrifice, devotion. But you show you're with them to the limit! You can—with Bonds... EXTRA Bonds this month.

World's Safest Investments

For this 3rd War Loan, you will be offered choice of various government securities. Choose the one that fits your requirements.

United States War Savings Bonds Series gives you back \$4 for every \$3 when the bonds mature. Interest: 2.9% a year, compounded annually, if held to maturity. Denominations: \$50, \$100, \$500, \$1,000. Redemption: Anytime after issue date. Price: 75% of maturity value.

2½% Treasury Bonds of 1964-1969; readily marketable, acceptable as bank collateral. Redeemable at par and accrued interest for the purpose of satisfying Federal estate taxes. Dated September 15, 1943; due December 15, 1969. Denominations: \$500, \$1,000, \$5,000, \$10,000, \$100,000 and \$1,000,000. Price: par and accrued interest.

Other securities: Series "C" Savings Notes; Certificates of Indebtedness; 2% Treasury Bonds of 1951-1953; United States Savings Bonds Series "F"; United States Savings Bonds Series "G".

DANDY HOUSE

with about 4 acres, located in Klemme.

Let's talk this over; it sure worth the money.

Come In And See Me

C. A. FRISBEE

Estate Garner, Iowa

KLEMMIE LOCALS

Mr. and Mrs. Howard Spittler are enjoying a visit from their foster son Staff Sgt Arthur Swamley, who is stationed at Camp Carson, Colorado and who came the latter part of the week on a furlough.

Miss Novella Bredbenner left today, Wednesday, for Cedar Falls where she will re-enter Iowa State Teachers College as a Junior. Miss Bredbenner has been teaching at Allison, Iowa, for the past five years.

A large number of people from Klemme and vicinity attended the dedication of the County Roll of Honor board at Garner Sunday afternoon.

Rev. Wolfgram, chairman of the County Civilian Defense was the speaker.

Mr. Eddie Epps and daughter Tallie returned Saturday morning from their trip to the West coast. They visited with their husband and father, Pvt Epps at Vancouver, Washington, and with relatives at Portland, Oregon.

Dr. and Mrs. W. F. Missman attended the wedding of Miss Bette Foster of Britt, to Harold Missman of Woden at the Methodist church at Britt, Saturday evening at 8 o'clock. The groom is nephew of Dr. Missman and is cashier of the Britt bank. The bride was employed at the court house for several years.

Mr. and Mrs. John Etchen of Des Moines came early Sunday morning and visited until Monday afternoon with Klemme relatives and friends. Their daughter Betty who had spent the past week here

visiting with friends, returned to Des Moines with them. They were also accompanied by Audrey Mau and Marcille Swanson, who will attend the American Institute of Business in Des Moines. Betty will also attend the A. I. B.

Mrs. Ernie Gerardi was called to Two Harbors, Minnesota Thursday by the serious illness of her little daughter, Gracka Maria. Mr. Gerardi arrived Wednesday afternoon from Wichita, Kansas, to accompany his wife to Two Harbors. Gracka Maria had gone to the north country with her grandparents, Mr. and Mrs. Conrad Quandt. She was taken to a hospital for treatment. Mr. and Mrs. Gerardi returned home Tuesday as their little daughter had recovered. Mr. Gerardi returned to his work at Wichita the same day.

CORRECTION

The statement was made in The Times last week that the Hobby Show at the Methodist church was sponsored by the Fifty-Fifty Sunday School Class. This was an error, as the entire church was responsible. However, the class was in charge of serving refreshments. The committee which planned the show consisted of Novella Bredbenner, chairman, Thelma Chambers, Irene Harms, Mrs. Lyle Wilcox and Rev. Harvey.

SALE OF BRIDGE LUMBER

Hancock County will sell at public auction to the highest bidder at the site of the bridge over the west branch of the Iowa River between sections 13 and 24, Erwin Township, approximately 100 pieces of used bridge lumber and piling. Date of sale is Monday, September 13, at 1:30 p. m. Terms cash on date of sale.

FRED C. MISSAL, Clerk.
B. A. Reemtsma, Auctioneer.

ALMOST ANTIQUE

A hay loft on the Lloyd Carpenter farm near Plainfield revealed something of interest when it was emptied for the first time in many years. A hay fork of a type that was not even recognized by hard ware dealers in business for 40 years was found. The fork consists of two straight cylindrical, sharpened iron rods down the side, a crossbar with a large cylindrical rod twisted in spiral form down the center and a five inch catch wheel attached to the spiral and mounted to the crossbar. The trip rope pulls the catch from the cog wheel enabling the hay to slip off the fork as the augur spins loose. The fork was patented March 6, 1866.

KLEMMIE REFORMED CHURCH

Calvin Grosshuesch, Pastor

No services or Sunday School on next Sunday, September 12th.

Confirmation Class:

The Confirmation Class will begin on Saturday, September 18th.

Ink Spots® And Spatters

By Jergie

ANOTHER OLD LANDMARK DISAPPEARS

Last week another old landmark disappeared from Klemme when the old shed across the street east of Mrs. Bredbenner's residence was taken down by Elmer Arnold and his men and the lumber hauled out to the Arnold farm for better use.

The shed was hardly noticeable where it stood under a large walnut tree, but some of the older residents can remember when it was an up-to-date buggy shed that was along side of the livery stable, which at one time was a flourishing business in Klemme. The old livery stable was taken down several years ago.

Some of the old boys around the community will remember when they went to the livery barn to hire a team of horses and then picked out the latest model buggy from the shed to take their one and only for a Sunday ride!

There were some mighty fine rigs stored in the buggy shed in those days: rubber-tired beautiful top buggies built for two, and canopy-covered surreys in which four or five could ride.

No worry about gasoline coupons then, or parking problems. No need to park along the road to spoon with your best girl; there was plenty of time for that on the way home as it was not hard to convince the team to take it easy.

HANCOCK COUNTY REAL ESTATE TRANSFERS

Emma Clark, widow, to John A. Chambers. W. D. 5-26-43, \$800.00. Lots 1 and 2 block 2, Goodell.

Walter E. Tenney & Lottie, wife, to Fred N. Knudsen. W. D. 12-1-42 \$1.00, NE 1/4 15-94-25.

Thank You, Folks

—V—

I have received orders to begin work as mechanic at the Britt Hemp Plant at once, so I have closed my shop. I wish to thank all my friends and customers for their loyal patronage. It has been a pleasure to work with and for you. But we have a war to win and it is up to each of us to do our part. I hope I can be back with you again in the future.

I have on hand quite a supply of Generators, Fuel Pumps, Fan Belts, Ignition Equipment, and other Accessories. If in need of these I will be at home evenings.

Roy I. Schaefer

Prusia Dillon Co.

14 East State Street

MASON CITY, IOWA

—V—

SEND ALL OF OUR FRIENDS IN KLEMMIE and those who wish to become our friends to visit us in new location just opened at 14 East State Street, Mason City, Iowa.

AS INDEED BEEN A PLEASURE to have served so many people from your community and we invite you to look for us in this new location where we promise a finer and better store than we have served you in the past. It's a welcome invitation, so come visit this week.

Don't Get Took!

—V—

Insulation is not as expensive as some out-of-town estimators have led some people to believe. They have estimated several jobs here at about twice the price that we quote every day. Several of our customers have asked us for estimates on the same job and have been amazed at the difference. At the same time our estimate in each case included a better grade of material, an inch greater thickness at less than half the cost!

There is just as much difference in the warmth of insulation as in two blankets. Investigate thoroughly before you invest. It is our business to help you and we will be here indefinitely. We are not a "fly by night" type of dealer. Don't get "took" by some one else. Consider when you can select from four nationally known insulations we have on hand...

WEEKLY NEWS ANALYSIS

Allied Military Representatives Plan Over-All Strategy for Defeat of Axis; Red Troops Close on Nazi Strongholds; October Draft Quota to Include Dads

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)
Released by Western Newspaper Union

With the historic Chateau Frontenac in the background, English-American political and military leaders meet for memorable conference. Seated from left to right are Prime Minister MacKenzie King of Canada; President Roosevelt, and Prime Minister Winston Churchill of England. Standing from left to right, Gen. H. H. Arnold, Sir Charles Portal, Sir Allan Brooke, Adm. Ernest King, Sir John Dill, Gen. George Marshall, Adm. Sir Dudley Pound, and Adm. William Leahy.

MEDITERRANEAN:

Zero Hour

The zero hour for Italy arrived. Across the Mediterranean, Allied transports massed in North African ports. Axis planes flying in to bomb the shipping were met by walls of steel anti-aircraft fire and scores of fighter planes.

Plowing along the Italian shoreline, Allied cruisers and destroyers poured heavy shells into important railroad junctions and power stations. Overhead, all kinds of bombers — fighter, medium and heavy — dropped high explosives on Axis troops moving along open roads and through mountain passes.

As Allied artillery pumped shells into Italy from Sicily, Gen. Dwight Eisenhower counted 167,000 Axis casualties in the 39-day campaign which won the island. Our own losses were placed at 25,000.

Peace and the Sword

Assault of Hitler's European fortress and policies for dealing with re-occupied countries—upon these momentous questions turned the sixth conference between President Roosevelt and Prime Minister Churchill in Quebec.

Formulating the military grand strategy were approximately 350 army and navy officials from the U. S., Great Britain and Canada. Over their maps they planned, first, the invasion of Europe, then, the conquest of Japan.

Joining Roosevelt and Churchill were their foreign secretaries, Cordell Hull and Anthony Eden. With them, the two Allied leaders discussed the measures to be taken in restoring order in re-occupied nations, and the policies to be pursued to meet Russia's territorial claims and demand for participation in the rehabilitation of Europe.

RUSSIA:

Push Nazis Back

Russian troops closing in on the charred ruins of what was once the mighty industrial city of Kharkov, found their advance delayed by strong German counter-attacks. But as fighting raged at the gates of the former "Pittsburgh" of the Ukraine, other Red forces worked their way northwest to seal off the last railroad running out of the embattled city.

Farther to the south, the Nazis claimed the Russians threw in tanks to re-enforce 150,000 Red troops hammering along the big bend of the Donetz river. This would indicate the Russians concentrated their striking power along the whole Ukrainian front, where the Germans have been making a slow retreat with the Reds pressing forward in the teeth of intensive defensive artillery, mortar and machine gun fire.

The Russians claim the Nazis have 211 divisions, approximating 3,000,000 men, on the eastern front, with 38 divisions in reserve in Poland.

TAXES

Americans buying goods over and above actual necessities may have to pay a spending tax in 1944. Such a tax is under study by the treasury department, which is considering sources for raising an additional 12 billion dollars in revenue next year.

The treasury also has under study a congressional proposal for taxing all income over and above an individual's normal peacetime return.

At any rate, individual and corporation income taxes, excess profits and goods' taxes face an increase.

FOREIGN PACTS:

Due for Congress' O. K.

Agreements that the executive branch of the government may enter into for the temporary management of conquered countries will be subject to a majority vote of the house and senate, according to plans developed in conferences between Secretary of State Cordell Hull and congressional representatives.

Such action would give congress a check over the government's policies in the restoration of order in the devastated areas. Since congress would be called upon to appropriate funds for the execution of such policies, it demanded the right to control their expenditures to protect this country's best interests.

In discussing the plan, Sen. Arthur Vandenberg of Michigan stated that mere congressional majorities for approving temporary agreements in no way would affect the constitutional provision for a two-thirds vote of the senate for the ratification of a final post-war treaty.

SOUTH PACIFIC:

Finish Job

Heading northward, American airmen nosed their craft for Weewak, New Guinea. Raiding that Jap air and supply base the day before, they had surprised the enemy and shot up 120 planes parked wing-to-wing on the ground.

As they returned, 30 Jap interceptor planes zoomed up. But the American air armada mowed its way through the attackers, knocking out 28. Then sweeping low over the airfield, the Yanks bombed and cannonaded the planes and hangars that had been spared. Of the total of 225 enemy craft that had been sent to Weewak to re-enforce the Japs on the Australian front, 215 were demolished.

Meanwhile, American warships lurking in the Solomons, pounced on a Jap convoy moving supplies to its beleaguered forces. Broadside struck three enemy destroyers, sinking one. Most of the barges in the convoy were shot up in splinters.

FASTEST TANK

Killing two birds with one stone, the army has produced the M-5 tank, with an automatic gear shift and two Cadillac engines which auto mechanics can easily service on the battle field.

Reputed to be the fastest tank, the M-5 has two hydraulic transmissions which operate through a transfer unit, to deliver

the power of the engines to the tank tracks. This is said to be the first automatic shift ever installed in a military vehicle.

To every one mechanic schooled in air-cooled aircraft engines generally used in tanks, there are 10 mechanics familiar with automobile engines, army officials said. Hence, adoption of an auto engine for tank use will allow the use of many mechanics for servicing on the front with a minimum of instruction.

GAS:

Planes Fill Up

Gasoline for airplanes, ships, tanks, trucks and other vehicles of the armed forces will consume 30.6 per cent of total production east of the Rocky mountains for the rest of this year and approximately 40 per cent by 1945.

Airplane consumption of gas is enormous, heavy bombers eating up a weight of fuel equal to the weight of its engines for each two hours aloft. Flying Fortresses average more than one gallon to a mile. In the Tunisian campaign, 1,100,000 gallons of gas were burned daily in the planes in Maj. Gen. James Doolittle's command.

Civilian allotment in the 17-state East-coast area approximates 13,776,000 gallons of gas daily. When 128 refineries in the U. S. begin producing 100-octane gas for military planes, their capacity will be in excess of the East-coast area's daily quota. Many are in operation, while others are being rushed to completion.

LEND-LEASE:

Record Shipments

America's lend-lease exports during the first half of 1943 exceeded normal U. S. exports for a full year during the 10-year period from 1929 to '39.

In round figures, lend-lease shipments amounted to slightly less than four billion dollars. Other exports of 1½ billion dollars for which America received payment, brought total shipments to nearly 5½ billion dollars.

CHINESE BLACK MARKET

If you think the U. S. Black Market is profitable, take a look at operations in China. A fountain pen costs \$10,000 Chinese currency in Chungking. Even with the Chinese dollar worth only five cents this is \$500 in U. S. dollars and a lot of dough to pay for a fountain pen.

You can also understand why U. S. fliers load up with lipstick before going to China. A lipstick brings \$5,000 in Chinese dollars in Chungking. This is about \$250 in U. S. currency.

This is also why lend-lease has sent a certain amount of silk stockings, champagne, perfume and other luxuries to Chinese war lords. They are sent to counteract similar imports by the Japanese which have a very undermining influence on a war lord worried over maintenance of his love-nest.

RUBBER DELUGE

Officials in the office of the rubber administrator are beginning to wonder what they can do with the hundreds of thousands of tons of synthetic rubber which will come from the new plants next year. It seems a little late, but they are now facing the elementary question of whether or not the tire companies can handle the vast quantities of synthetic rubber.

The greatest amount of rubber ever processed by the nation's rubber companies in one year was 540,000 tons. But next year we shall have nearly one million tons to deal with. Obviously, the present facilities will be inadequate.

But the problem is aggravated by the fact that tire manufacturing machinery has been knocked down and stored away so that rubber companies could convert to production for the war. Instead of tires, they have been making rubber boats, balloons, tank treads and life rafts.

Thus we have the problem of finding new plant space in which to bring that machinery back into production, and the further problem of creating entirely new productive facilities to take care of the increased quantities of rubber which will be available for manufacture.

SOLOMONS ISLAND

Few maps of the world show the location of Solomons Island, Maryland, a pinprick in Chesapeake bay. Locally it is famous only for its fishing and the fact that the steamships Leviathan, Mount Vernon and Monticello were laid up there to rust in deference to private shipowners.

Since the war, however, Solomons Island has become an important naval installation, and the navy department recently arranged for the shipment of some airplanes to Solomons Island on an aircraft carrier built for the British in a West coast yard. While the carrier was going through the Panama canal locks, London radioed asking its whereabouts.

"We're on our way to Solomons Island," replied the carrier's commanding officer.

"Why are you going to Solomons Island and where is it?" London queried in amazement.

"Get in touch with the embassy in Washington," radioed back the ship's commanding officer.

After some anxious moments, London learned in code that the carrier's commanding officer had not mutinied, nor was he going to the Solomons Islands, but to the U. S. naval base at Solomons Island, Maryland.

SMALL BUSINESS BLOW-UP

The government's program for the relief of small business is headed for trouble when congress reconvenes next month.

At secret sessions of the senate small business committee, headed by Senator James Murray of Montana, small business men complained about their inability to get government loans for war contracts and sub-contracts, while billions of dollars of government money is being shelled out to big corporations.

The senate committee heard complaints about the tight-fisted loan policies of the Smaller War Plants corporation.

One example given the senate committee was that of the Riverside Boatyard company of Miami, which tried to get a loan of only \$10,000 from the Smaller War Plants corporation to complete a war contract. After being turned down, the company got the \$10,000 loan from a private bank within 24 hours.

As a result, Senator James Murray of Montana, chairman of the senate small business committee, is planning some close scrutiny of the Smaller War Plants corporation.

MERRY-GO-ROUND

Just before Frank Tinsley, former press aide of the British Supply Council, left to join the Royal Canadian Air force, he wrote the Pennsylvania railroad: "As a British subject who has lived in the United States for 14 years, mostly as a newspaper man with Reuters, will you grant me one favor on leaving this grand country? Will you let me ride in a locomotive cab of one of your trains to New York, on my way to Canada?" . . . Tinsley left Washington in the cab.

Grain-Eating Insects Should Be Destroyed

Pests Spoil Millions Of Bushels Annually

When every bushel of grain is urgently needed as a war material, it is more important than ever to see that as little as possible is eaten or spoiled by insects that infest granaries.

To assist farmers in combating these little saboteurs, the University of California has published a bulletin entitled "Insects Affecting Stored Food Products." This booklet describes many of the pests of the South and Southwest and gives the methods for their control.

Among the most common is the granary weevil. It is chestnut brown, about an eighth of an inch long, and hard shelled, with a long snout. The adult female bores into a grain with her beak and deposits an egg in it. She can lay about 200 eggs in this way. The young hatch in a week or two and eat out the inside of the grain enclosing them. Three or four weeks later they become adults, and in turn lay eggs, so under favorable conditions seven or eight generations are produced in a single year.

In the household the granary weevil may be controlled by locating and destroying the infested materials, and by protecting other food

products from it. In two or three months it should be eradicated. In storage and warehouse, fumigation, heat, or cold treatments are usually required.

Grain Borer Nuisance.

A serious nuisance in the South is the lesser grain borer. It is somewhat less than an eighth of an inch in length, and has a cylindrical, stubby body. The larvae hatch in a week or two from eggs attached loosely to the grains. Wooden structures that have contained infested grain should be fumigated or sprayed to kill the adults.

A somewhat larger beetle is the cadelle. It is often more than a quarter of an inch long, and black or dark brown. It attacks stored grain as well as cereal products and shelled nuts, and often damages wooden storage bins.

Because of its long life and rapid reproduction, the saw-toothed grain beetle is one of the worst of these destructive insects. Its slender flattened body is about an eighth of an inch long, loosely jointed, hard-shelled, and brown. A row of spiky projections along the sides of its midsection give it its name.

Common Grain Eater.

Another common grain eater is the confused flour beetle, a reddish brown insect, about an eighth of an inch long, with a hard, cylindrical body. It is found in large numbers all over the world. It prefers flour or other processed cereal, but will attack grain too. Eggs hatch in a week to ten days.

Other grain-destroying insects are: the flat grain beetle, reddish brown, and a sixteenth of an inch long; the broad-horned flour beetle, similar to the confused flour beetle, but slightly larger, the yellow meal worm and the dark meal worm, both dull black in the adult stage.

Heat is simple means of killing these pests. Flour heated to 130 degrees will be freed of it, yet the flour will be uninjured. Fumigation is most satisfactory in large establishments.

Ring Worm on Calf

To stop ring worm on a calf's neck, first remove the scales by the use of a stiff brush, soap and water, says J. A. Arey, at N. C. State college, and then paint the spot with tincture of iodine.

Ring worm is a parasitic disease and occurs on the calf's head, neck, shoulders and rump. The hair comes out and a gray scaly crust is formed over the bare surface. The stalls should be thoroughly cleaned and whitewashed.

Women's Corps in Peace Time

By Edith N. Rogers
(Representative, Mass.)

(WNU Feature—Through special arrangement with Woman's Home Companion)

When the war is over the army services should continue to have women serving in their ranks. I was convinced that the army navy would need women to replace men in certain duties after the world war. But it was 25 years before I was able to get through congress a measure which created Women's Army Auxiliary Corps. Since then the navy, coast guard and marine corps have created units for women. I believe the whole country has approved.

Now is the time to make provision to keep women in these services on a permanent full-time basis. Immediately! Because war is like flood or a hurricane. As soon as it is over people lose interest in preparing against a recurrence. Because in the inevitable cutting down of the armed services to peacetime size one of the first units to be cut the ax, if only because it is the least needed, could be the women's corps. Because some, weary of the strain of war, will want the illusion that all can be as it was before the war began. They will try to force women out of the factories, the professions, the armed services, try to relegate them back to housework. We must plan to fit a certain number of women into our postwar economic life.

The woman in uniform has served as well in this war and the service have had opportunity to learn a valuable sea can be. Lieut. Gen. Brehon B. Somervell, anxious to determine what his officers thought of the work done by WACs, sent out inquiries to the men of his command. The replies were highly laudatory.

Volunteers for Africa.

Certainly there can be no question of the women's spirit. Recently, for example, Director Oveta Culp Elson by went before two companies WACs in Daytona, Fla. There was need of a contingent of WACs North Africa. After pointing out the dangers of the journey and the perils of the war theater, Mrs. Elson by called for volunteers. She hoped to get enough to make a respectable showing. She got 300—every woman in the two companies. This display of spirit, I think, explains why officers of the regular services—were skeptical about women in ranks, are now enthusiastic. The armed forces need women after the war? Of course! The army navy will need them as a nucleus for the force they will require we again become involved in war. During the truce between the wars I urged congress to appropriate money so the army could plan educational orders with manufacturers. The purpose was to create industry a skeleton force trained for war work. I think of the women's corps of the army and navy in the same way.

The English maintained a strong force of women in their armed services during the years after the war. When a large force was needed, they had the foundation upon which to build. In this country, was a year before we could get women's service into action. During that time thousands of soldiers were mobilized in noncombatant jobs which could have been handled as well by women. We cannot afford such a loss of time.

The armed services have learned that there are many jobs which women perform with enthusiasm. For example, men don't like to be telephone operators. Women in uniform have gladly undertaken this job, and should continue in it as well as in similar jobs as interpreters, clerks and weather bureau workers.

In years to come there will be new emphasis on certain activities in the armed services which only recently become important. I shall always want to have a regular airplane warning network as part of our defense system. This will require a trained personnel who should be under army supervision. There will be little point in training a large staff of able-bodied men to do this kind of work. Let the women handle it.

Nurses Set Precedent.

There is precedent. The army long ago established it by including women in permanent status by creation of the nurse corps. Recently the army also made provision for women dietitians and physical therapists.

It is impossible to estimate how many women the services need in peacetime. Certainly army and navy should admit many as they can use. It is not hard to find them—women feel there can be no greater privilege than to serve under our flag.

Soldier Newspapers Are Important Factors In Keeping Up Morale of Our Fighting Men

By ELMO SCOTT WATSON

Released by Western Newspaper Union.

THERE'S an old saying that if two men meet anywhere in the world and one of them is an Englishman, the chances are they'll suggest they start a club.

If that's true, then it's equally true that when any unit of the American army, larger than a squad, arrives at a new post, be it on home or foreign soil, one of the first things the soldiers do is to start their own newspaper! This seems to apply to the fighting fronts as well, for soon after the American forces in Sicily had captured the town of Vittoria, a one-page sheet, called the Doughboy News, made its appearance.

As a matter of fact, the News is a "transplanted" soldier newspaper. It is published by and for the men of the 45th division of the United States Seventh army and it was started while the 45th was in training at Pine camp near Carthage, N. Y., where the paper was printed in the shop of the Carhage Republican-Tribune, a weekly. Its editor is Sgt. Don Robinson, formerly a reporter in the Oklahoma City (Okla.) Daily Times.

The Doughboy News, however, is only one of more than 1,000 such publications—820 camp newspapers in this country, 72 navy papers and 110 service papers abroad. The number of these papers reflect two things:

1. The fact that Americans are the greatest newspaper-reading people in the world, so when an American marches away to war a newspaper seems to be an essential part of his "equipment."

2. Although the home town newspaper is one of the most welcome pieces of mail that a soldier, sailor or marine receives, even this isn't enough for these news-hungry Americans. They want to read news of their own "outfits," their own activities and have the thrill of seeing their own names in print. Hence, the service newspaper.

These service newspapers have a very imaginable variety of format, size and frequency of issue. There are dailies, semi-weeklies and weeklies. Most of them are printed by many of them, issued where printing facilities are not available, are mimeographed. But they all have one thing in common—they are primarily for the enlisted man and produced by enlisted men.

Outstanding among these publications are two which are international in their scope—Yank and the Stars and Stripes. When Yank was established last year it was intended to be a newspaper for men in the armed forces overseas—soldiers, sailors, marines, members of the coast guard and the merchant marine. However, six weeks after it started it was distributed to men in the camps at home as well as those overseas. Now it has eight editions—two in New York (one for the United States, the other for general overseas distribution), a British edition in London, a Caribbean edition in Puerto Rico, and others in Trin-

dad, Australia and Hawaii. Other editions are planned for Panama, Alaska and the Persian Gulf Command, the reason for all these editions being to speed up distribution.

On April 18, 1942, a new version of the Stars and Stripes, famous soldier newspaper of World War I, made its appearance in London. Unlike Yank, which began publication later, the Stars and Stripes was not to be for the whole army but for the AEF in the British Isles. It started as a weekly but in November, in response to a demand from its soldier readers who wanted more news from home than they were getting in the English newspapers, it began publishing daily. Since that time it has given birth to several lustrous "offspring" in Africa. Soon after the great invasion of November, 1942, the Stars and Stripes was hauled up on an editorial masthead in Algiers and began publication as a weekly. Later it began issuing a daily edition as well as a weekly; and daily editions are also issued in Oran, Casablanca and other African cities.

The African edition of the Stars and Stripes is typical of the American soldier newspaper—breezy and informal in the style of its writing, reflecting "the humor without which democracy would die." Like most service newspapers it prints much soldier verse and one of its poems promises to become immortal. In one of the early issues appeared an eight-line poem by Private William L. Russell under the title of "Tune From Tunis" which told about "Dirty Gertie From Bizerte."

"Tune From Tunis" was reprinted in Yank where Paul Reif, composer of "The Isle of Capri," saw

it, wrote some additional verses and set it to music. Since that time other soldiers have added verses of their own (most of which can NOT be printed) and now it seems likely that "Dirty Gertie From Bizerte" will be the World War II counterpart of "Mademoiselle From Armentieres" of World War I fame.

Another soldier newspaper which has won considerable fame for its verse is the Kodiak Bear, published by and for the soldiers, sailors and contractors' workmen stationed at Fort Greely and the naval air station on Kodiak island in the Gulf of Alaska. It started the same week that Pearl Harbor was bombed and one of its most famous poems was called "Valentine Verses to a Geisha Girl" which was an invitation to

Getsha Girl of far Japan
Get aboard an old sampan;
Paddle to some isle Pacific . . .
Kodiak, to be specific.

The poem went on to assure the geisha girl of the warmth of the welcome awaiting her, but ended with this abrupt warning:

Come straight to us, my Lotus-Flower,
Come to our bear-infested bower;
Bring your sisters, brothers, too . . .
Bring your whole damn fleet of two-girl subs.
But be ready for one heluva battle when you get here!

Although army regulations forbid giving out weather data, the Kodiak Bear has its own method of getting around that. For instance, there was this prediction:

The Weather:
Chungking: Belly cold.
Courtesy KODK Weather Bureau.

It is such things as these—bits of humor, typical American "gags," "wisecracks," jokes at the expense of themselves as well as their officers, both commissioned and non-coms (especially the latter!)—which help relieve the monotony and drudgery of the military routine and which make the service man's newspaper such an important part of his everyday life. Military officials testify to the fact that there is nothing like these newspapers to boost the morale of our men in the armed forces, maintain his interest in the job before him. So whether he's stationed in Alaska, Iceland, Trinidad, Australia or Iran, he looks forward each publication day to the arrival of HIS newspaper.

And as the African and Sicilian campaigns have demonstrated, he sees to it that his newspaper goes right along with him to the firing line. The Doughboy News, published in Vittoria, Sicily, may be the latest example of such a paper published deep in what was recently "enemy territory" but it's certain that it won't be the last.

The other day a staff sergeant who is the managing editor of one of the daily editions of the Stars and Stripes in Africa wrote back to his editor-father in the States:

"I'm waiting for the day when we publish either a 'Rome Daily' or a 'Berlin Daily.' Some fun, hey?!"

U. S. Soldiers Issued Papers During Wars
A new development of the Mexican war was the camp newspaper, nearly a score of which were published by soldier-printers on small hand-presses to serve the various army camps. The most important of these was the American Flag, of Scott's army, which was first published at Matamoros; after the war it was continued at Brownsville, Texas. William C. Toby, a correspondent of the Philadelphia North

American, published a North American in Mexico City during the occupation . . . During the Civil war various army and navy papers were issued, usually for brief periods, in both the Northern and Southern forces. Opportunities for such papers came when printer-soldiers were able to secure presses and use them during intervals between the requirements of active service. Among the camp papers were the Swamp Angel, published on Morris

Island, in Charleston Harbor during the siege; the Red River Rover, printed on ruled foolscap on board the steamer Des Moines; the Yazoo Daily Yankee, issued "semi-occasionally" during the siege of Vicksburg; and the Camp Kettle, published at every opportunity by the field and staff officers of the Roundhead Regiment, which was the 100th Pennsylvania. — From "American Journalism" by Frank L. Mott (Macmillan).

Star Dust

STAGE-SCREEN-RADIO

By VIRGINIA VALE

Released by Western Newspaper Union.

JOSEPH C. GREW, former U. S. ambassador to Japan, says "To beat the Japanese and to do the job thoroughly, we have got to understand them thoroughly." The latest March of Time, ". . . And Then Japan!" does more than hundreds of books and newspapers could do to help the public to do it. It traces the gains Japan has made, and shows how she is converting her newly won wealth into armaments and weapons; other scenes show the people, at home, in night clubs, and at work. It's a valuable background for current history.

Shirley Mitchell's had plenty of experience in being a sweetheart; she's done it on the air with Gildersleeve, Rudy Vallee, Groucho Marx, Red Skelton, Johnny Mercer, Wil-

SHIRLEY MITCHELL

liam Bendix, and currently with Fred Brady. She got her experience when she did daytime serials in Chicago on "First Nighter"; had a different one each week!

If you've ever seen when you heard Vera Vague on the Bob Hope program, just what she looked like, prepare to see her in the All Star Comedies that she's making for Columbia. She's working now in the first of a series of four.

When Paramount hired Victor Young to write original music for "For Whom the Bell Tolls" they had no intentions of causing him to be mistaken for a messenger boy, but that's what happened. Victor, who also conducts the music on John Charles Thomas' Sunday program, bought a motorcycle to convey himself to and from the Paramount lot and NBC, carrying his orchestration in a messenger's dispatch case, slung over his shoulder. So far as the general public was concerned, he was just another messenger boy.

It's a publicity story that just had to come along—all about the five-year-old tot who got so worried about what Fred Astaire would do for dancing shoes that she sent him her shoe coupon. Her name's Dorinda Hastey, and Astaire sent the coupon back.

Carol Ann Beery, 12-year-old daughter of Wallace, made her debut in films when Robert Benchley carried her across a ship's deck in "China Seas." Bent on being an actress, she's taking another whack at it in "Rationing," in which her father stars.

Harry Sherman, who tops the list of producers of historical outdoor pictures with more than 100 to his credit, now has eight leading actors for his U-A releases. The newest addition is Rod Cameron, who'll get the same kind of roles that carried William Boyd, Richard Dix and Albert Dekker to fame as Western heroes. You'll see him first in "Wherever the Grass Grows."

Comedienne Cass Daley has a new hobby; like Gracie Allen, she's a one-finger pianist, only she's discovered that she does better on a pipe organ. So she's acquired three pipe organs, all antiques, placed them in her bedroom, living room and den—and Husband Frank Kinsella, hearing her practice and glancing at the check stubs, is trying to switch her to collecting stamps.

Charlie Spivak, "The Man Who Plays the Sweetest Trumpet in the World," just can't understand Hollywood. His drummer doesn't believe in making faces; just plainly drums. But the 20th Century-Fox folks felt that in order to look like a swinging drummer in "Pin Up Girl" he ought to grimace so that he'd look like a "drummer"—and hired for him a tutor—who's never played a drum!

ODDS AND ENDS—CBS is interested in a girl vocalist for John Carl's Trio—he's the lad who started Dinah Shore . . . It's rumored that RKO will sign Victor Borger's lovely wife to a contract . . . Max Marcin, the "Crime Doctor" author, will appear in a quick flash in the next Columbia production of "Crime Doctor" . . . The amusing chatter handed out by the guest stars on the Bing Crosby program are the result of the joint efforts of Crosby and his writer, Carroll Carroll; Bing can think up some swell insults for the guests to hurl at him . . . Gale Page is coming out of retirement to replace Binnie Barnes in "Perpetual Emotion."

PATTERNS

SEWING CIRCLE

Smart Two-Piecer.
SKILLFULLY designed two-piece that can be worn to innumerable places for all its simplicity. Immensely flattering.

Pattern No. 8483 is in sizes 12, 14, 16, 18, 20, 40 and 42. Size 14 takes, with short sleeves, 4½ yards 36-inch material.

Pattern No. 8465 is in sizes 9, 11, 13, 15, 17 and 19. Size 11 takes 3¼ yards 39-inch material. 9 yards braid or ric-rac.

These Quilt Blocks Have Modern Uses

THIS old fashioned saw tooth quilt pattern has been used for the border of many handsome quilts. It is so modern looking and so simple to piece that it should serve many decorative purposes. Here it trims kitchen curtains of unbleached muslin. In addition to its old time use its angular note would make it effective as a border for luncheon cloths, aprons and various other purposes.

To make a pattern cut a square of cardboard, then cut diagonally; one half will make a triangle pattern. The size suggested in sketch may vary according to the purpose in mind. If a bright color is used for the plain triangles, a narrow border will make a good showing.

NOTE: Readers who plan to piece quilts and have not selected their pattern should send for the three patterns designed by Mrs. Spears which will be sent to you for 15 cents. Address:

MRS. RUTH WYETH SPEARS
Bedford Hills New York.
Drawer 10
Enclose 15 cents for the 3 quilt patterns designed by Mrs. Spears.

Early Coalman Couldn't Sell 'Dirty Black Rock'

In 1828, a few tons of coal were shipped into Cleveland to determine if this kind of fuel could be introduced here. An agent loaded on a wagon and drove up one street and down another almost pleading with the residents to buy at least a small basket full. But they weren't going to be fooled into buying this dirty black rock when they could get wood.

At nightfall the agent drove to a barroom and persuaded the proprietor to try some in the stove. This was the beginning of the coal business in Cleveland.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers. Send your order to:

MILLIONS on EARTH WILL HEAR THE VOICE OF GOD!

What is the mystic power that comes to some men and makes them outstanding, that gives them wealth, influence and happiness, while the majority must struggle against poverty, sickness and misery?
This power has been called Inspiration, but until now has never been defined.
When the Creator placed man on earth, He surrounded him with the necessities to maintain health, to acquire wealth and be happy, but when man destroyed his contact with God, he lost the ability to fulfill these wants, with resultant sickness, poverty, and unhappiness all of which is contrary to God's wishes.
Inspiration is a message broadcast from God to man, which man is supposed to receive in his Conscious Receiver, but man sets up obstructions in his Conscious Receiver, making it impossible to hear God's message, and fails to achieve the worthwhile things of life.
This movement has helped others remove the obstructions in their Conscious Receiver, enabling them to hear the Voice of God and achieve the worthwhile things of life.

Mr. and Mrs. Wesley Patterson of Bancroft were visiting with Klemme friends Monday evening. Mr. Patterson, who was athletic coach here the past two years, will leave for the army this week. Mrs. Patterson and baby daughter will reside at Missouri Valley for the duration. Mrs. Patterson will do part time teaching in Missouri Valley this year.

Miss Jacqueline Kudje, teacher in the Kanawha schools, spent the week end in Klemme with her parents. Mr. and Mrs. Art Kudje.

A reception and dance was held at the Community Hall Wednesday evening in honor of Mr. and Mrs. Raymond Bachman, who were recently married.

Mrs. John Clements returned home Tuesday evening from Alexander, Louisiana, where she had been with her husband who is in an army camp near there.

The Study Group of the Methodist Church will hold its fall picnic on Thursday afternoon at the church. Bring covered dish and sandwiches for the lunch.

Miss Thelma Chambers, teacher in the Britt high school, spent the weekend visiting with her parents, Mr. and Mrs. John Chambers near Klemme.

Mr. and Mrs. Will Barz of Garner were visiting with Klemme relatives Sunday and attending the Mission Festival at the Reformed Church.

Miss Blanche Fredricks returned home Friday from the Mercy hospital at Mason City and is making a good recovery from her recent operation.

Mr. and Mrs. Levi Klotzbach drove to Kanawha Sunday to visit at the Leslie Smock home and to help their grandson, Louis, celebrate his birthday.

C. J. Bartell is the relief agent at the Rock Island depot while H. D. Ramsay is on his vacation. Ramsay will return to work Sept. 20th.

Mrs. Henry Medaus recently improved her home in northwest Klemme by having the porches rebuilt and having concrete platforms made in place of the old wooden floors.

Mr. and Mrs. W. A. Polsdofer of Eagle Grove; Mr. and Mrs. V. R. Rice and family of Clear Lake and Leona Polsdofer of Rolfe were Sunday dinner guests at the Art Polsdofer home.

Rev. and Mrs. Zeidler returned to their home at Sabetha, Kansas, Friday after enjoying a vacation, part of which was spent in Klemme visiting at the Echard Zeidler home.

Miss Daisy Lemke is assisting with the work at the Quandt cafe while Mrs. Gerardi is at Two Harbors, Minnesota, where she was called by the illness of her little daughter.

Levi Klotzbach was unable to work for several days the past week at the Jacobs Store as one of his eyes was injured when a small metal chip struck and lodged in his right eye.

Roy Schaefer began work Monday at the hemp plant at Britt as a mechanic. It will be Roy's job to keep the hemp cutting machines and binders working in the fields in tip-top condition. He has closed his automobile repair shop here for the present.

Local Happenings

Klemme and Vicinity

DRS. COLBY & HAYDEN, DENTISTS, FOREST CITY, IOWA. OFFICE PHONE 374, RES. 189. to

Mr. and Mrs. Fred Bachman of Belmond were visiting in Klemme Thursday afternoon.

Mr. and Mrs. Arthur Wellemeier were at Forest City on business Monday.

Mrs. P. M. Wilson and Mrs. E. J. Schneider were Mason City visitors Friday.

Vernon McLaughlin and family of near Belmond, were guests at the Daisy Lemke home Sunday.

Duane Polsdofer spent a few days at the home of his sister, Mrs. Rice at Clear Lake.

Mrs. Ben Coobs, Mrs. W. F. Paveway and Mrs. Lena Schroeder were Forest City visitors Tuesday afternoon.

Mrs. Ernest Lewis spent several days the past week visiting with her mother, Mrs. Franz, at Grundy Center.

Lorence Polsdofer took his sister, Leona, to Belmond Monday evening where she will be employed.

The Wesleyan Service Guild met Tuesday evening at the home of Miss Lois Riemer in Liberty township.

Mr. and Mrs. Einar Salling will have a closing out sale of their household goods, Saturday. See advertisement for list of goods.

C. G. Waterman has improved his residence by having the roof reshingled, using a dark red asphalt shingle.

Mrs. C. G. Waterman and daughter, Mrs. Lyle Wilcox, took Mrs. Rosa Mitchell of Swea City, to Rock Falls, Friday, for a visit.

Mr. and Mrs. H. D. Ramsay and family are enjoying a two weeks vacation which they are spending at a cottage at Clear Lake.

Miss Ruth Stille of Des Moines spent the week end visiting with her parents, Mr. and Mrs. Lester Stille.

Mr. and Mrs. Wayne Paveway and daughter, Carol Ann, came Saturday evening and visited until Sunday evening at the parental W. F. Paveway home.

We're Sticking With The Bunch

THEY SAY THE ONLY TIME A banana gets skinned is when it leaves the bunch.

WHICH IS JUST ANOTHER WAY of saying "United We Stand."

HOW IT'S SAID IS NOT SO important, as it is to stick with the bunch and strip the hide from the Germans and Japs.

SO, UNTIL VICTORY IS OURS—we're buying War Bonds as often as we can from Uncle Sam.

AT PRESENT WE HAVE LARGE stocks of the following items:

LINOLEUMS by the yard
LINOLEUM RUGS, all sizes
MIRRORS
WINDOW SHADES, extra wide, too.

Nice, Fresh KILOWATTS?

NO POINTS NEEDED

You don't need a ration book!

There's plenty of electricity for everyone,
—your family, your neighbors, and all
the offices, schools, stores, factories and
farms,—for all war production!

You don't have to carry electricity home,
—you don't even wrap it up. It's always
on hand at your flip of the switch at
every electric outlet!

What's more, electricity is still at pre-war levels. You buy it by the penny!

Reddy Kilowatt
YOUR POWER-FUL SERVANT

There Still Is No Shortage of Electricity in Your Community, or
Anywhere in the United States!

The United States has more
electric power than Germany,
France, Italy and Japan
combined.

Power has never been "too little or
too late" . . . There is today no shortage
of power. . . I do not know of a
single instance in which the operation
of a war plant has been delayed by
lack of power supply."

CENTRAL STATES ELECTRIC COMPANY

Funeral Services Held Tuesday for Pioneer Resident

**FRED HENSCHEN DIED FRIDAY
EVENING FROM HEART
ATTACK**

Funeral Services Held Tuesday Afternoon At Reformed Church

Fred Henschel, for sixty-five years a continuous resident of this community, passed away at his home in Klemme Friday evening, September 10th, 1943, after a sudden heart attack.

Mr. Henschel had had several attacks during the past couple of years, but he kept on working steadily at odd jobs about the town.

Funeral services were held Tuesday afternoon at the Klemme Reformed Church in charge of the Hagemeyer Funeral Service. Rev. W. Wintermeyer of Hampton preached the funeral service in the presence of Rev. Grosshuesch.

The entire front of the church was banked with flowers.

A mixed quartette, composed of A. Bell, Arlene Schmidt, Harvey and Raymond Barz sang "In the Valley," and "In Heaven," accompanied by Miss Irene Becker at the piano.

Fred Henschel was born August 15, 1871, at Etawah, Franklin County, Missouri. He was the fourth of eight sons born to his parents, Mr. and Mrs. Herman Henschel.

He was seven years old when the family moved to Hancock County, Iowa, and has lived in Klemme and this community ever since. He attended our rural schools and became a member of the Ell Township Reformed Church by confirmation on May 7, 1890.

When the Reformed Church was organized in Klemme, Mr. Henschel became a charter member of the same and continued to be a faithful member until the day of his passing.

As a youth he assisted his parents on the farm, and after they became old, he took full charge of the farming operations and was, in the head of the household until his parents passed away, and the reason he remained single and did not set up a household of his own.

Fred Henschel was a good son to his parents, a regular attendant at church services, and was well liked and respected in the community.

When the Town of Klemme was organized and held its first election, Mr. Henschel was listed as one of the voters. He was later elected to the office of Assessor in the town and served in that office several years.

He reached the age of 72 years 26 days. He leaves of his immediate family one half-brother, Mr. J. Henschel, Garner, Iowa, and many more distant relatives and friends.

He was in the family lot in the Klemme Cemetery and the following were pall bearers: John Fred Kluckhohn, Fred Barz, Herb Goll, Martin Barz and Ben Goll.

THANK YOU!

I wish to take this opportunity of thanking all who remembered me with cards, letters, flowers and while I was in the hospital. I so thank those who came to see me.

Blanche Fredrick

**KLEMME FOLKS GIVEN THRILL
FRIDAY WHEN BOMBER
FLEW OVER STREETS**

People in Klemme and the surrounding country were given a real thrill Friday afternoon when a B-26 army bomber flew over the town Friday afternoon at a low altitude and made several turns above Main Street.

It was the first time that many of the residents had seen a large army plane at close range and realized what could have happened had it not been a friendly plane.

The big bomber was piloted by 1st Lt. Ray A. Jorgenson Jr. of Dodge City, Kansas, son of Mr. and Mrs. R. A. Jorgenson of Klemme.

Lt. Jorgenson, who is a pilot instructor, had with him two of his students and they were on a practice cross-country flight. They had been out of California through the Southern and Middle West states and came here from Detroit, Michigan enroute to Minneapolis to refuel. They flew over Klemme on their way to Dodge City in the evening and blinked the plane lights as they flew over town.

**POINTS ON THE FOOD SITUATION
BY HAZEL GRIMES
COUNT EXTENSION
HOME ECONOMIST**

1. What every American has been and being asked to do:
Produce food.
Prevent all waste of food.
Preserve fresh foods.
Share food.
Eat the right foods.
Substitute plentiful foods for scarce foods.
Help keep food cost down.
Participate in community food projects.
2. Green peppers may be saved for later use by the following method: Wash remove the stems and seeds. Pack into hot sterilized jars. Cover with a brine. Process 10 minutes in a boiling water bath. Complete the seal if not already done. The brine is made by dissolving 1 cup of pure salt in one quart of water.
3. Extensive surveys made by the United States Department of Agriculture indicate that there will be plenty of practically all kinds of vegetable seeds for planting Victory Gardens next spring. Saving vegetable seeds by home gardeners in general is not very successful.
4. The chicken population of the United States is the largest in history. 16 percent above last year's record crop. The average civilian's holiday dinner plate will have more chicken, but not quite so much turkey this year.
5. The same batch of apples and grapes may be used for both jelly and butter. After cooking the fruit some of the juice may be drained off for jelly before the strained pulp is cooked down for butter.
6. To help provide spreads for bread, manufacturers are making more margarine this year and the government has allotted more peanut butter and more nuts for commercial jam, jelly, marmalade and fruit butter.
7. Be sure the storage shelves for the canned fruit and vegetables are well braced. One report has been received where shelves collapsed and 360 quarts of fruit were ruined.

When the Town of Klemme was organized and held its first election, Mr. Henschel was listed as one of the voters. He was later elected to the office of Assessor in the town and served in that office several years.

He reached the age of 72 years 26 days. He leaves of his immediate family one half-brother, Mr. J. Henschel, Garner, Iowa, and many more distant relatives and friends.

He was in the family lot in the Klemme Cemetery and the following were pall bearers: John Fred Kluckhohn, Fred Barz, Herb Goll, Martin Barz and Ben Goll.

Friday the Klemme Shamrocks defeated the Thornton high school in a baseball game 12 to 13, with Greiman and Peck on the mound and Neuhring catching Harvey and Greiman each gathered three hits. Thornton's battery was Christensen, Orvich and Ingelbertson. Pihl led the batting for the visitors with two hits. Ten errors were chalked up against each team.

Town Boys And Girls Are Now Eligible For 4-H Membership

**"BILL" JOHNSON HAD NARROW
ESCAPE FROM DEATH**

J. W. Bill Johnson had a narrow escape from possible death and serious injury Friday morning when he was suddenly charged by a steer while working in the hog lot at his farm southeast of town.

The steer charged Mr. Johnson and knocked him down, rolling him over on the ground. One of Mr. Johnson's ribs flew off and it attracted the curious animal's attention just long enough for Johnson to scramble up and get over the fence to safety.

Mrs. Johnson was at the barn heard her husband's cries for help and came to his assistance.

Two of Mr. Johnson's ribs were fractured and he was bruised a bit. He was able to drive to town for medical attention and did not feel much the worse for his narrow escape.

HAMMER MYSTERY SOLVED

A hammer used in construction work many years ago by the father of Theodore Moen of Decorah became lost during the building of a wall around the original Winneshock county courthouse, and was found 20 years later under the east steps of the courthouse. Moen now uses the implement in his service trips for the local gas company.

What You Buy With WAR BONDS

Para-Ski Troopers

When will this war end? Nobody knows, so the Army is continuing its training of Para-Ski Troopers. They're parachute troops who know their way about on skis or any other place in snow covered mountainous country.

A great measure of the success of Russia's victories last winter is attributed to these troops who move with the silence of a snowflake. Our work on the home front is not so hazardous as that of the Para-Ski Troopers but it is important that we perform our daily tasks and make every effort to increase our regular purchase of War Bonds.

U. S. Treasury Department

**ANNOUNCE QUOTA FOR 4-H
MEMBERSHIP DRIVE**

A quota of 450 members for Hancock county during 1944 is the goal for which local 4-H clubs point. A special drive with a state goal of 44,000 members will be conducted during the week of October 4 to 9, as a part of the statewide enrollment campaign. Plans will be worked out by County Extension Director Paul Henderson and other 4-H club workers in the county.

The statewide campaign is intended to offer every rural boy and girl in the state the opportunity to become a 4-H club member. Paul C. Taff, assistant extension director for youth, has emphasized that this will include not only boys and girls living on farms, but also those who make their homes in towns of 2,500 or less and therefore may be expected to have some knowledge of farming and should find it possible to take part in the food production and conservation activities of the 4-H clubs.

"Forty-four thousand for 44" is the slogan for the statewide campaign. The wartime need for greater production and conservation makes it desirable to increase enrollment in the 4-H clubs. Older persons see also in the campaign an opportunity to assist the young folks in getting the training which will help them play their part in the post war world.

Further plans for Hancock county's participation in the membership campaign will be announced in the near future.

**JAKE HESS PURCHASED WALT
ROSENDAHL PROPERTY**

Jake Hess has purchased the Walter Rosendahl property in the north part of town, where Mr. and Mrs. Louis Perkins now reside.

Mr. and Mrs. Hess also own another residence in Klemme, the house now occupied by Mr. and Mrs. Ernest Lewis.

**DORCAS SOCIETY MEETS
THURSDAY THIS WEEK**

The Dorcas Society of the Klemme Methodist Church will meet on Thursday afternoon of this week at the church parlors with Mrs. W. F. Pavay and Mrs. Levi Ridder, hostesses.

The ladies will work on a quilt.

SIGHT WORTH SEEING

Thirty years ago the Cedar county fair advertised a feature "worth coming a hundred miles to see." It was two flights daily in an "aeroplane" by the expert aviator, Louis H. Gertson.

Farm Bureau Begins Planning For The Coming Year

Our Men In The Service

**THIRD SON JOINED THE U. S.
NAVY TUESDAY**

Donald, son of Mr. and Mrs. Roy Schaefer left Tuesday for Des Moines to enlist in the U. S. Navy. Donald is 17 years old today, Wednesday and is the third son in the Schaefer family to join the Navy.

**PVT ORVAL BARKEMA NOW
AT CAMP DAVIS, N. C.**

Relatives of Pvt. Orval Barkema have received word that he has been transferred from Portland, Tenn., to Camp Davis, North Carolina, within five miles of the Atlantic Ocean.

Pvt. Barkema has been on maneuvers since last May. His next address follows:

Pvt. Orval Barkema 37440073,
Battery B, 535th A. A. A.,
Auto Wpns "Mbl",
Camp Davis, North Carolina.

Calvin T. Schaefer, Seaman 1 Class, has recently been transferred to the naval base at Seattle, Washington, according to a letter received by his sister, Mrs. Emory Weaver.

**WE CANNOT PRINT FOREIGN
ADDRESSES**

Nearly every week The Times receives a letter or card from some parent whose son is in the service asking us to print his address so that his friends can write to him.

We are glad to render this service and will print the addresses of men in U. S. camps when requested. However, because of censorship, we are not permitted to print foreign addresses, those with an A. P. O. addresses, or in the case of Navy or Marine Corps, an address in care of the Fleet Postmaster.

This rule has been set up to protect the movement of troops, both in and out of this country.

Parents should also be cautious about giving addresses to strangers, and over the telephone. Make sure before you give out any information about your son's whereabouts.

**ELL TOWNSHIP FARM BUREAU
HELD ANNUAL PICNIC**

The Ell Township Annual Farm Bureau picnic was held on Thursday evening, September 9 at the number 6 school.

The following officers were elected for the coming year.

Director, Addis Greiman, Township Chairman, O. A. Steward, Secretary - Treasurer, Miss Ruby Schram, Emory Weaver and Lincoln Goll were elected to serve as Boys 4-H Club Leaders for the coming year.

**IOWA RIVER STOCKED WITH
SMALL MOUTH BASS**

Approximately 500 fingerling size smallmouth black bass were placed in the Iowa River about a week ago.

Other rivers which were stocked according to Jack Stevens, local game warden of Clear Lake, were West Forks river near Rockwell, 1,000, Winnebago river near the Red Mill northwest of Mason City, 600; Shellrock river near Plymouth, 600; Shell Rock river near Rock Falls, 600.

When you have company or take a trip, that's news. Phone 12.

**COOK ANNOUNCES FARM BUREAU
RESOLUTIONS COMMITTEE FOR 1944**

V. A. Cook, Klemme, president of the Hancock County Farm Bureau, today announced the names of the members of the County Farm Bureau Resolutions Committee for 1944.

Serving as chairman of the committee is Clark Lackore of Garner; others on the committee include W. J. Barz, Garner; Dr. C. V. Hamilton, Garner; Alfred Josten, Garner; Victor Loebig, Wesley; Frank Senneff, Britt; and Walter Kahl, Britt.

Duties of the Resolutions Committee, according to President V. A. Cook, are to study the agricultural problems in each township of the county and to draw up a proposed set of resolutions, setting forth the wishes of Farm Bureau members in the county with respect to the policies of the county and state Farm Bureaus in 1944.

Matters pertaining to state and national legislation are of particular importance this year because of the many controversial issues dealing with the management of the federal farm and food program and the desirability of devoting attention to practical solutions to probable post-war problems, said President Cook.

Plans are being made to discuss the most important issues, about which resolutions will be written, at township annual meetings. Resolutions submitted by the committee will be discussed and acted upon at the annual meeting of the county Farm Bureau.

V. A. Cook, who is voting delegate from Hancock County to the annual meeting of Iowa Farm Bureau in Des Moines in November, will have the responsibility of representing this county in the discussion and adoption of the state resolutions of agricultural policy at the state Farm Bureau annual meeting.

**SUGGEST CONCRETE FOR
BETTER FEEDING FLOOR**

Use of concrete feeding floors to save both feed and labor is suggested by Iowa State College farm management specialists and agricultural engineers. In addition, sanitation is improved since the concrete feeding floors are easier to clean and keep clean.

Harold Bratv, Iowa State College extension agricultural engineer, says that the feeding floor should be located convenient to feed and water supplies, and should be accessible from pastures, barns or feedlots. The lee of a building, all or woods is protected from cold winter winds. A southern exposure is best, as the heat of the sun prevents ice and snow from remaining for any great period of time.

Drainage
Drainage must be provided. If the floor is on sloping ground it probably has natural drainage and may not need grading or an under-drill. If it is on rather wet, level ground, 6 or 8 inches of crushed gravel or cinders should be filled in underneath the concrete.

The concrete floor should be 4 inches thick unless there is heavy traffic of farm machinery and tractors over the floor, in which case it should be 6 inches thick. The area will depend upon the number and size of troughs to be provided and the kind and number of stock to be fed. Usually fifteen square feet is provided for each hog and 40 square feet for each head of cattle.

No priority is required for construction using cement. However, it must be counted in on the total yearly farm construction that is limited to \$1,000.

NOTICE TO PUBLIC

My store will hereafter be closed during the noon hour from 12:00 to 1:00 P. M. because of the shortage of help. E. F. Jacobs. 1tc

HELLO, FOLKS!

Mr. and Mrs. LeRoy Johnson are happy parents of a baby girl. They thank them on Sunday evening, September 12, 1943.

HOUSEHOLD MEMOS

by Lynn Chambers

For Pickling Shelves
 *Spiced Cantaloupe
 *Apple Chutney
 *Green Tomato Pickle
 *Bread and Butter Pickles
 *Recipe Given

Fruit pickles take less time to prepare, vegetable pickles may take several days or even weeks, but both contribute to brightening winter menus.

Pickling Time

Summer has slipped by and with it has passed the time of putting up fruits and vegetables. But canning is not yet over, for fall brings with it many fruits and vegetables which home-makers like to pickle and preserve.

Pickles may be of either the fruit or vegetable variety for there are a great many varieties of pickles. Fruit pickles can be made in a short time, but those made from vegetables require a longer time—sometimes as long as several weeks. The best cucumber pickles take several weeks in order to complete the pickling process and make them crisp in texture, dark green in color. Cucumber is introduced gradually to the cucumber after it has had a preliminary treatment in brine or vinegar.

Crisp Pickles.

How does one get crisp pickles is a question most frequently asked. Select fresh, ripe rather than over-ripe vegetables and brine for pickling. Over-mature and old vegetables will shrivel during the pickling process.

Old spices and low grade vinegar are other causes of pickle failure. It's important to use vinegar which has a strength of 40-60. Cider vinegar is usually preferred because of its mellow flavor. As a rule onions and cauliflower, which are light, require a white vinegar to make a light-colored pickle. Both types of vinegars serve to modify the taste of the product and also to preserve.

Salt for Pickling.

Good quality salt is indicated for all pickles. Table salt or dairy salt (used for butter making) is good, but salt which has a lot of calcium has been found to prevent from caking is recommended. Chemicals interfere with the pickling process.

Equipment.

Pickles may be cured in large crocks, if desired. They are usually stored in glass jars with covers of the same type that are used for canning fruits and vegetables.

*Spiced Cantaloupe.

Peel rind and cut cantaloupe into pieces. Soak overnight in vinegar. To each 7 pounds of fruit add 3 pounds of sugar, 8 sticks of cinnamon, and 1 tablespoon whole cloves. Cook about 1½ hours or until fruit becomes transparent. Pack in sterile jars and seal.

*Apple Chutney.

Wash apples, cut in small pieces. Add granulated sugar, 2 cups seeded raisins, 1 cup of 2 oranges, finely chopped. Add strong vinegar, 1 teaspoon ground cloves. Add pecan meats, chopped fine. Mix all ingredients together until apples and nuts are tender. Pour into sterile jars and seal at once.

*Green Tomato Pickle.

Wash green tomatoes, slice in 1/2 inch rounds. Add 1 cup sweet red peppers, 1 small onion, 1 teaspoon ground cloves, 1/2 teaspoon ground ginger.

Lynn Says:

You Can Do It, Too! Readers write that they have hints to pass on to other readers, and I'm sure you'll like them for your own good.

Careful seasonings make for good cooking—and that means use of all salt and pepper. Mixed poultry seasonings add accent to soups and stews. Bay leaf, onion and sage are also good in soups and meats.

Prepare the hand when using curry powder, but do use it in any curry or fish dish if you like the spicy taste. It's especially good when you're using any of these herbs with rice.

A pinch of nutmeg is indicated for spinach, for that occasional scalloped fish or oyster dish. Clove and cinnamon blend well with smoked meats—use in cooking smoked ham or shoulder cuts.

THE POSTWAR WORLD

Elmer Twitchell was bored. Life was becoming far too comfortable. It was a hot day, so he pressed a button and—presto!—the air conditioning unit cooled off the home immediately. (Somehow it reminded him that autumn was not far away, and he had better phone the chemist for a bottle of that new fuel that would heat a ten-room house all winter.)

Presently he was jolted out of his plastic armchair. A second lurch threw him back into it.

"Hey! What's going on?" he yelled.

"Oh, I thought you knew!" explained the wife. "The new home is being delivered. They're taking away the old one."

Elmer knew they had traded in the house for a new model, but had forgotten the delivery day. He got out of the building and watched them haul it to the used-home market.

"Like it?" asked Mrs. Twitchell as they entered the new house.

"It looks good, but I suppose I'll have to master a lot of new controls," sighed Elmer.

Mrs. Twitchell explained that there were only a dozen new ones, including a switch that made person-to-person phone calls without any help from central, and a button that raised and lowered windows.

Elmer was puzzled by a roofless wing to the north of the new dwelling. Mrs. Twitchell explained this was where the helicopter was kept.

"Where do we put our auto?" he asked.

"The new model folds up. We can put it behind the piano," she said.

Elmer expressed a desire to inspect the helicopter, but the wife explained that the children were out in it.

"Will they be gone long?"

"Only about a half hour. They're only going about 600 miles, dear."

"I don't like the idea of my kids kiting around the skies," said Elmer. "They might get hurt."

"You're so old-fashioned," sighed Mrs. Twitchell.

It was lunch time. "What're we going to have?" asked Elmer. "I don't know," replied Mrs. Twitchell. "Just throw that green switch and see."

Elmer threw the switch. The east wall folded, revealing the Fireside Automateria, with hot and cold dishes prepared and presented by electronics or something.

There was a sharp siren from without. It was the Mookies leaving for Africa over the week-end in their combination trailer-plane.

"What's new over in Europe?" he asked after a while. "I hear there's been some riots in Vienna."

"Let's tune in on the television set and see 'EM," said Mrs. Twitchell.

That evening they went to the opera. The one in Milan, of course. Television again. After it was over Elmer felt hungry.

"Let's go to that place in London," suggested the wife, fiddling with the television set. Know what they're featuring?"

"What?"

"A plastic hamburger sandwich," said Mrs. Twitchell.

Elmer collapsed with a groan. There's a limit to everything.

Senator Truman says the postwar world will see the establishment of "a foundation that will secure for all men everywhere their basic rights." Don't say you weren't warned in time to duck!

CAN YOU REMEMBER—

Away back when salesgirls and salesmen were courteous and attentive?

And when "All roads lead to Rome" was meant for pedestrians and not aviators?

Henry Kaiser is ready to turn out an auto for \$400 and market the new car through gas stations, thus setting up an enormous distributing chain at once. You can drive up and look at a new model while the windshield is being wiped. And how nice it will seem, if the old car is hot, squeaky and sluggish to chirr, "Oh, I guess I'll leave this one here and take a new one."

Speaking of campaign speeches, we think the ace in the hole for all candidates next year will be a promise of two gallons in every tank.

Taxidermists, we see, are also among those listed by Mr. McNutt in non-essential occupations. Still, it might be a good idea to save a few to stuff and mount the war lords.

The six-cent cigar is to be abandoned. What this country needs most is a good fourteen-cent cigar butt.

Juvenile delinquency is reported on the rise. It is amazing how many kids are getting to be as bad as their parents.

PATTERNS SEWING CIRCLE

Jolly Jumper

SUCH fun having this jumper with flaring skirt and jacket, whose pocket is designed to accommodate hankies, pencils, etc.

Barbara Bell Pattern No. 1847-B designed for sizes 6, 8, 10, 12 and 14 years. Size 8 jumper requires 2 yards 39-inch material, jacket 1½ yards.

Flattering Frock

DISTINGUISHED frock to do you proud on many an occasion. Beautifully slenderizing and a marvel for flattery. So colorful, too, when print-trimmed.

That's Where

Doctor—So you are sick, my boy. And where do you feel the pain the worst?

Boy—Boo hoo! In school, sir.

Boy's Choice

Son—Can I have any kind of sea food I like?

Mother—Yes, dear. What shall I order for you?

Son—Salt-water taffy.

Sh-h-h-h

Author—You are late; my play started half an hour ago. Go in on tiptoe.

Friend—What? Is everybody asleep already?

Easy Way

Dorothy—I have a very literary boy friend. He recommended Einstein's *The Theory of Relativity* as a most interesting book.

Low—Excellent! And have you read it yet?

Dorothy—No; I'm waiting for it to come out in the movies, first.

What is the most welcome gift you can send to a man in the service? Well, surveys among service men themselves show that one of the favorite packages from home are cigarettes. And first choice among men in all the services is Camel, based on the actual sales records in Post Exchanges and Canteens. Though there are now Post Office restrictions on packages to overseas Army men, you can still send Camels to soldiers in the U. S., and to Sailors, Marines, and Coast Guardsmen wherever they are.—Adv.

ASK ME ANOTHER?

A General Quiz

The Questions

1. What is a campanile?
2. What name is given to an ornament worn as a charm against evil?
3. What kind of ship was the Constitution?
4. What is the approximate atmospheric pressure per square inch at sea level?
5. The whirlpool Charydis is off the coast of what island?
6. How high is Mexico City above sea level?

The Answers

1. A bell tower, especially one separated from a church.
2. Amulet.
3. Frigate.
4. A pressure of 14.7 pounds per square inch.
5. Sicily.
6. Mexico City is 7,415 feet above sea level.

SLAVE TO PURGATIVES FINDS FREEDOM!

Feels 20 Years Younger, He Says!

Everyone who has despaired of ever finding normal regularity should read this unsolicited letter:

"Six years ago, I was laid up. I'd taken many so-called 'cures' but it was the same old story. It wasn't that I didn't have to be stronger than the last. Then I tried KELLOGG'S ALL-BRAN. Soon I was 'regular' again, with none of the old gripping pain. I'm 60, but feel younger than 20 years ago when I was a victim of common constipation." Mr. A. Bousfield, 426 S. Villa Avenue, Villa Park, Ill.

What's the secret of such reports of ALL-BRAN's wonderful results? It's simply this: Lack of certain cellulose elements in the diet is a common cause of constipation. Scientists say KELLOGG'S ALL-BRAN is a rich, natural source of these elements—which help the colonic flora do their job—lightening and fluffing the accumulated waste for easy, natural evacuation. ALL-BRAN is not a purgative! Not roughage that acts by "sweeping you out"! It's a gentle-acting, "regulating" food! Eat ALL-BRAN regularly. Drink plenty of water. See if you, too, don't find the relief you've dreamed of! Insist on the genuine ALL-BRAN! It is made only by Kellogg's in Battle Creek.

NORTH IOWA TOWN RAIDED BY LOW-FLYING BOMBER

"Klemme, a beautiful little town in North Iowa, was demolished by a low-flying bomber Friday afternoon that swooped into town from the northeast, with machine guns blazing and cutting down people as they ran for shelter. As the plane swept across the town, bombs were released and the once beautiful little town was left a mass of twisted wreckage, death and black smouldering ruins. As the plane wheeled away from its target, farmers working in their fields and filling silos were machine gunned unmercifully by the marauder."

Such might have read the story if the bomber which circled over Klemme and community last Friday had not been a U S Army plane but an enemy bomber.

The appearance of the bomber over Klemme should give our community an added push to get behind the 3rd War Loan with every cent we can dig up for bonds.

Buy bonds and keep enemy bombers from our skies! Klemme, as well as every other town in North Iowa could be bombed if we don't back up the boys on the battle front with bonds on the home front.

BIG CELEBRATION WHEN IRA OVERHOLT CAME TO TOWN

Ira Overholt observed his birthday on Monday, September 13th. And the event called to mind that Ira came to Klemme just six years ago on his birthday, and Klemme was celebrating a Fall Festival and the Jay Gould "Million Dollar Spectacle" was strung out along main street its entire length.

Ira says he will never forget the first day he spent in Klemme. Being a good Methodist and a stranger, he thought it only fitting to go to the Methodist Ladies Aid stand for his luncheon, which he did.

Mr Overholt made himself acquainted with the "fat fellow" at the stand, whom he found to be Rev. "Bill" Zabulka. The Reverend gentleman did not seem particularly interested in the "Methodist stranger," presuming, probably he was one of the carnival hangers-on with the show troupe and appeared to be slightly tipsy, so Ira got the "cold shoulder" and thought Klemme was a heck of a town!

However, Ira soon learned that the people were very friendly and even the preacher "thawed out" when he had discovered his mistake. Ira's "tipsy" look was due to long hours of travel getting to Klemme.

Mr and Mrs Overholt have resided in a lot of towns, but they say Klemme is the best town they have ever lived in and they expect to make this their permanent residence.

JERGIE JR NEARLY COST US A BALL GAME

The Klemme and Thornton high school base ball teams were battling it out on the local diamond Friday and it was a nip and tuck affair and things were "tight" as Thornton was at bat.

At that critical moment Lt Ray Jorgensen, Jr., swooped low over the diamond in a big B-26 bomber and in the excitement the players forgot all about the ball game and were gazing in awe at the sudden

Hancock County Board Proceedings

9TH ADJOURNED JUNE MEETING

Garner, Iowa, Sept. 1, 1943.
The Hancock County, Iowa, board of Supervisors met in session on above date with F. J. Schoun, Penn Eckels and John Chambers present.

The minutes of the last meeting were read and approved as read.

On motion and second the salary of Raymond Nelson is hereby fixed at \$50 (Fifty Dollars) per month, effective September 1, 1943.

WHEREAS, Keith L. Balzar has resigned as Deputy County Coroner, he and it is therefore resolved by the Board of Supervisors of Hancock County, Iowa, that the resignation of Keith L. Balzar, Deputy County Coroner is hereby accepted and his bondsman are hereby released from any liability on and after September 1, 1943.

WHEREAS, Hancock County, Iowa, desires to cooperate in a program of uniform state wide aid to dependent children, and

WHEREAS, certain duties and requirements are set out in Chapter 130, Laws of the Fifth General Assembly and an appropriation of \$4,244 (Four Thousand Two Hundred and Forty-Four Dollars) is required for the administration of the act providing aid to dependent children.

BE AND IT IS THEREFORE RESOLVED BY the Board of Supervisors of Hancock County, Iowa, that there be and it is hereby appropriated a sum of \$4,244 from the Poor Fund of Hancock County, Iowa, as the County's share of aid to dependent children as provided for in Section 11, Chapter 130, Laws of the Fifth General Assembly. Said sum is hereby set aside for the purpose hereinafter indicated.

The foregoing resolution was offered and read by Supervisor Eckels, who moved its adoption was seconded by Supervisor Chambers whereupon the chairman placed the motion of its adoption and upon roll call the vote thereon is F. J. Schoun, Penn Eckels, and John Chambers, aye, Nays, none.

Whereupon the chairman declared the resolution adopted.

On motion and second the bond of D. E. Williams, as Justice of the Peace is approved.

On motion and second policy No. 40454 of the Security Insurance Company is approved.

Supervisor Eckels is appointed a committee to investigate and cause repairs to be made in D. D. No. 46-3.

Supervisor Schoun is appointed a committee to investigate and cause repairs to be made in DD No. 7.

BE IT RESOLVED that the claims hereinafter set out be allowed in amounts designated thereon and the County Auditor be and he is hereby authorized to draw warrants on the several funds of Hancock County, Iowa, in payment of such claims in amounts set opposite each claim.

appearance of the bomber. At the moment Jimmie Thomas was feasting his eyes upward and never even saw the ball that was thrown to him to tag a man at first. The Thornton boys advanced a couple of men on bases during the excitement and had the Klemme boys in a hole for a time, but Klemme managed to gain and eventually defeated Thornton 13 to 12.

Anyway the boys said it would have been worth losing the game to have a former high school student give them a thrill like that. Not many schools can claim a flying officer as a graduate.

TIME-23:59...

ONE MINUTE to midnight! Tomorrow is almost here and America's forces are ready...at sea, on land, and in the air...plans for the new day are complete.

The railroads of America are also ready with plans for tomorrow, despite today's titanic war transportation task.

ROCK ISLAND'S Program of Planned Progress has proven the wisdom of planning. It has gone steadily forward for years, improving engines, cars, right-of-way, facilities...progress that has made possible the movement of traffic in hitherto undreamed of volume.

It's a crucial test...of men and equipment...but, even more crucial will be our task when peace, down, and we will supply victorious America the transportation she and her millions of courageous sons will require and deserve.

This railroad is planning for that other tomorrow too...determined to become ever greater and more efficient, for...

...as yesterday, and today, so tomorrow ROCK ISLAND'S sole purpose is to provide the finest in transportation.

Insure Tomorrow Now—Support the 3rd War Loan!

ROCK ISLAND LINES

One of America's Railroads—ALL United for Victory

Rock Island

time for storage of the produce. The cave storage is the best all around storage for the farm.

Practically every farm home should be equipped with a vegetable and fruit cellar of some kind. Other farm produce can be stored in such a structure. Homes with heated basements can have a doorway made in the foundation wall and the storage cellar constructed outside. This makes an ideal storage structure since there is no need to go outdoors to get produce during the winter. A blueprint with specifications for such a storage can be secured by sending 15 cents to the Agricultural Extension Service, Ames, Iowa, for Midwest Plan 73402.

Now is the time to get all the things you need for the winter. The best time to get them is now. The best place to get them is here. The best way to get them is by mail. The best time to get them is now. The best place to get them is here. The best way to get them is by mail.

Remember that the basement storage room needs at least one window ventilation. Cover the window with a screen. Be sure to place a thermometer in the storage room because it is too risky to guess at the temperature. Good ventilation of the storage room will result in good vegetables up until next spring. On the other hand, poor management will result in poor unfitted vegetables and disappointment.

Those who wish to make their basement room ideal will want to build a false set floor and sides. This will allow for better ventilation and cooling. Pot or sphagnum moss should be kept wet at all times. Moisture is necessary to keep apples, root crops, cabbage and other leafy vegetables crisp.

All low-temperature vegetables should be stored in containers.

Entertaining?

Why worry about what to serve? Choose from our selections of delicious fresh baked goods. It's the modern way, the economical way, especially helpful these days when you must conserve on your sugar supply.

Mr and Mrs Otto Lehman
GARNER BAKERY
GARNER, IOWA

ers with lids

Early frosts may occur during September, and tender vegetables such as tomatoes, pumpkins and squashes should be harvested before there is danger of the fruits being frozen.

Pumpkins and squashes should be cut from the vines, allowing at least 2 inches of the stem on each fruit. Only mature specimens should be used within a short time. Handle the fruits gently to avoid damaging them. Only sound specimens store well.

Tomato vines may be pulled up before a freeze and hung in a cool basement. Many of the fruits will ripen on the vine. But the best method is to pick only the ripe and mature green fruits for storage. The gardener can be sure when a fruit is "mature green" by cutting a green tomato in half and observing the seed cavities. If the seed cavities are of a jelly-like consistency and seeds well developed the tomato is in the mature green stage. Immature fruits will not show this, and the fruits are deeper green in color. Mature green tomatoes will ripen in time. The fruits keep longer if stored at 55 degrees.

Gardeners need not fear that there will not be enough vegetable seeds for planting Victory Gardens next spring. Extensive surveys made by the United States Department of Agriculture indicate that there will be plenty of practically all kinds of vegetable seeds.

Saving vegetable seeds by home gardeners in general is not successful but careful gardeners with knowledge of requirements to produce good seed can save successfully some vegetable seed. Seed of onions and tomatoes can be saved fairly successfully by careful gardeners. The time it takes to select, take the seed out and package and store the seed hardly makes it worth-while, however. A 5-cent packet of tomato seed contains all the seed the ordinary family needs. It is more practical to let expert seedmen produce the seed. Results from most commercial vegetable seeds will be far more satisfactory in both quality and production.

Many new gardeners have learned to appreciate the fact that fresh vegetables right out of the garden are far superior in quality to vegetables shipped in from 1,500 or more miles away. The quality of vegetables depends upon harvesting at the correct stage of maturity. Some gardeners harvest certain vegetables too early, others harvest too late. The time of harvesting must be learned just as other garden practices.

GENUINE UNIQUES

A very widely-read northern Iowa newspaper gets a big laugh out of its own phrasing mistakes that are similar to those that sometimes creep into the best of newspapers. For example, the newspaper points out some humorous errors in its advertising columns such as the recent auction ad for sale of cattle, on which mention was made of a cow "giving plenty of milk, and other articles too numerous to mention". And classified ads that offered for sale a "wooden coal stove" and a "heifer bull calf".

COUNTY TREASURER HANCOCK COUNTY

WEEKLY NEWS ANALYSIS

Allied Bombers Concentrate Attacks On Enemy Airfields, Communications; Japs Continue Retreat in New Guinea; Civilians to Get 75% of Food Supply

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)
Released by Western Newspaper Union.

Killed in action against the Japanese, an American soldier is being borne back from the front lines by these New Guinea natives. Chaplain Owen Monahan of the 41st division follows the body. Natives are serving U. S. forces as stretcher bearers and supply carriers.

EUROPE:

Hell on High

As Allied troops poised for the leap into southern Europe, waves of American and British bombers whirled over the foot of the Italian boot, smashing at enemy airfields and communication lines in the effort to paralyze Axis troop movements to invasion points.

Principal concentration has been on Foggia, 80 miles northeast of the once-colorful, now heavily bombed, Neapolitan port of Naples. Besides the main airdrome at Foggia, 10 smaller auxiliary airfields were the targets for low level bombing and machine gunning attacks spearheaded by fast, U. S. Lockheed Lightnings.

Throughout the Foggia area, railroads, over which trains were carrying enemy troops, were shot up.

As a result of heavy, concentrated RAF raids on Berlin, it was reported that 12,000 people might have been killed, 50,000 wounded, and 500,000 made homeless.

LEND-LEASE:

'Repaid With Victory'

"Victory and a secure peace are the only coin in which we can be repaid" for lend-lease assistance thus far amounting to 14 billion dollars, President Roosevelt reported to congress.

Of the total in armament and food distributed through lend-lease, Great Britain received 4½ billion dollars; Russia, 2½ billion dollars; and Africa, the Middle East and Mediterranean countries, one billion, 300 million dollars. China, India, Australia and New Zealand have obtained lend-lease also to the amount of one billion 300 million dollars.

"The congress in passing and extending the lend-lease act made it plain that the United States wants no new war debts to jeopardize the coming peace," the President said.

SOUTH PACIFIC:

Smash Supplies

Using the airplane as an instrument for weakening the enemy by disrupting his supply, Gen. Douglas MacArthur sent scores of bombers along the northeastern New Guinea coast to blast at the small barges with which the Japanese have been replenishing their beleaguered forces in the Salamaua area.

As the Allied airmen swooped low to bomb and machine gun the tiny craft darting through the coastal shoals, or streaking for cover in the many coves along the shore, U. S. and Australian forces fought up to the gates of Salamaua itself. Having fallen back through the jungle under pressure of Allied infiltration tactics, the enemy girded for a last stand at his big New Guinea base.

In a Tokyo broadcast, the Japanese claimed to have sunk nine American cruisers and 11 destroyers and knocked out 836 planes since June 30. In addition, the broadcast declared, four cruisers and eight destroyers were damaged. The Japanese claims were without confirmation in Allied circles.

NAZI SPIES:

Trapped by FBI

After four years of investigation, the long arm of the FBI reached out to arrest four persons on charges of wartime espionage and smash a Nazi spy ring operating in principal war industry centers.

Alleged pivot in the ring was Grace Buchanan Dineen, wealthy 34-year-old French-Canadian who was reportedly taught espionage in Germany before coming to this country in October, 1941.

FIGHTING FRENCH:

Made Administrators

Until the people of France are able to choose a government, the French Committee of National Liberation, operating from Algiers, North Africa, will be recognized merely as an administrative agency of those parts of the French empire over which it has succeeded in obtaining control.

This recognition was made by the United States, Great Britain and Russia. It followed months of wrangling between the factions of Gen. Charles De Gaulle, who has had strong British backing, and Gen. Henri Giraud, who represented the pro-Vichy Darlan group which arranged for American landings in North Africa with Gen. Dwight Eisenhower. Recently these factions combined, with De Gaulle securing political leadership and Giraud military direction.

The Liberation committee's administrative authority, however, will be subject to the requirements of the Allied military command in such zones of operation as North Africa and the Near East.

RUSSIA:

Drive for Coal, Iron

With Kharkov, the "Pittsburgh" of Russia, again in their hands, Red forces hurled their might against the Nazis farther to the south in the Donetz basin, source of much coal and iron.

Giving way under the full weight of massed Russian artillery, tank and infantry attack, the Germans fell back slowly, in severe defensive fighting. But with the Reds driving forward frontally instead of slicing to the Nazis' rear, the Germans retained their freedom to move back and evade being surrounded.

To the north of Kharkov, Russian troops surged into Zenkov, thus passing the farthest point they reached during their winter offensive. But in front of Bryansk, stiff Nazi defenses had slowed the Russian advance to a crawl.

WORLD PROGRESS:

Seen by FDR

Declaring that the war was proving what could be accomplished through the co-operative action of nations, President Roosevelt told 30,000 Canadians at Ottawa that "great councils (were) held on the free and honored soil of Canada . . . which . . . look to building a new progress for mankind."

"There is a longing in the air," the President said. "It is not a

Prime Minister Mackenzie King (left) and President Roosevelt at Ottawa.

longing to go back to what they call 'the good old days' . . . Surely we can make strides toward a greater freedom from want than the world has yet enjoyed . . .

"I am everlastingly angry only at those who assert vociferously that the four freedoms and the Atlantic Charter are nonsense because they are unattainable," the President said. " . . . But I would rather be a builder than a wrecker, hoping always that the structure of life is growing—not dying."

ARMY RULE:

Judge, General Clash

Demanding respect for the full dignity of the judicial branch of the federal government, a U. S. judge clashed with the military governor of Hawaii over the release of two naturalized citizens of German ancestry.

Picked up shortly after Pearl Harbor when army rule was established over Hawaii, the two citizens have been held without hearings. Certain court functions were restored by proclamation in March, 1942, and then the citizens attempted to obtain their release from custody by securing a writ of habeas corpus.

When the military governor, Lieut. Gen. Robert Richardson Jr., failed to produce the two citizens after Judge Delbert Metzger had issued writs for them, the judge summoned him on contempt charges and then fined him \$5,000 for ignoring the order. General Richardson countered by forbidding further habeas corpus proceedings, either by a court or applicants, on grounds of military security.

The general said the March, 1942, proclamation excluded issuance of habeas corpus writs, but Judge Metzger said that the Constitution required the full and free and not just the partial operation of the courts.

JAPS

Calling for an end to what he called unfair criticism of the War Relocation authority, Representative Herman P. Eberhart (Pa.) declared that none of the 16,000 Japanese released from detention centers have been charged with disloyalty to the government.

In answer to charges that Japs at the relocation centers were eating better than the average American, Eberhart said food costs in the centers amounted to 40 cents a day.

Washington, D. C.

FURY IN THE AIR

U. S. air operations out of England are now by far the most extensive and toughest operations of the U. S. air forces. Fliers who have seen action in four theaters—China, the Pacific, North Africa, and Europe—say the first three are child's play compared with the current flak-and-fighter opposition of Germans.

The first flight a year ago was made without the loss of a single U. S. plane. The Germans were caught off guard by the daylight raid. But such things don't happen any more. It is no secret that U. S. losses on each raid over the continent are high enough to hurt badly, though not high enough to stop the operations.

War correspondents in Britain declare that U. S. airmen who fly these missions are the greatest heroes of the war. They have to face more fighting fury, and face it with more skill, than any other men in this war—whether fighting on land, sea or in the air.

PARATROOP MIRACLE

There was one thrilling bit of untold history regarding the Allied landing in Sicily which only now can be revealed. A division of U. S. parachute troops actually stopped about two Nazi divisions which were dashing to the seacoast to await Allied landing barges.

This occurred the night before the landing barges arrived. Had the paratroopers not succeeded in holding up the Nazis, U. S. troops might have landed literally in blood.

What happened was that the paratroopers, coming down mysteriously at night, not far from the Nazi divisions, fooled the enemy into thinking he was outnumbered. Actually, a paratroop division is far inferior in numbers to a division of ground troops. But the Nazis could not tell in the dark how many Americans there were, got the impression that the sky was packed with paratroopers.

So they decided to camp for the night and get ready for a fight the next morning. But by daylight U. S. landing barges were safely ashore.

LUDWIG'S WARNING

Emil Ludwig, famous German author and biographer, recently had a unique session with the army's school for military government at Charlottesville, Va., as to what the Allies should do with Germany after the war.

Ludwig gave a series of lectures on how to prevent another Hitler from arising and plunging the world into another war 20 years hence.

Based upon years of studying Bismarck, Hindenburg and the Kaiser, the German historian urged that there be a strong army of occupation by all the United Nations for at least five years.

"The German people should know for the first time in 130 years," he said, "what a foreign authority looks like. Only thus can they be brought to understand that they have been defeated."

Ludwig pointed out that German militarism always had come from Prussia, while Germany's culture had come from the south and west. Therefore he proposed splitting Germany up into two states: (1) Prussia, small and isolated; and (2) Bavaria, Saxony, and the smaller Catholic German states which are not militaristic and which would be joined with Austria. This would put the Catholics in one country and the Lutheran Prussians in another.

No 'Poor Misguided' Germans.

"Leave to the Germans all that other nations have," Ludwig recommended, "but take away their weapons, supervise their education, and give them political guardianship. If you do not, and if you speak of the 'poor misguided German people,' then 20 years from now your sons will be fighting another war against them."

"What I fear," continued Ludwig, "is that on the day after the death of Hitler, the Junkers, the generals will kowtow to you and say, 'We love Americans. Come, let us be brothers again.' I fear that some of you will say, 'Now let us make peace. They are good people, these generals.'"

"But they are not. They are not one whit better than the Hitlers. They merely have better manners," Ludwig declared.

Note: Ludwig paid tribute privately to the excellent job the army was doing at its school for military government. He said he had seldom met such an intelligent, progressive group of men, with such a grasp on the world's future problems.

CAPITAL CHAFF

Quite a few Italian soldiers in Sicily undressed, hid their uniforms, put on overalls and went home to work to avoid becoming prisoners.

When forthright ex-assistant secretary of war Louis Johnson got back from India his report was so critical of the British that state department officials scarcely believed parts of it. But after Ambassador Bill Phillips got back from his India survey, Undersecretary Sumner Welles told Johnson that pro-British Phillips was in complete agreement.

With Apologies

—By JAMES M. LANDIS—

(National Director of Civilian Defense.)

In war every threat to our country is a war threat. Enemy action at sea, sabotage, fire, flood, hurricane and civil catastrophe stem our fighting power as truly as an air attack—that is why Civilian Defense is not limited to protection against raiding bombers but has answered the Nation's need in countless other emergencies.

PROVINCETOWN HELPS IN SHIP DISASTER . . . COCONUT GROVE FIRE PROVES CIVILIAN PREPAREDNESS . . . VOLUNTEERS AID TORNADO VICTIMS . . . MIDWEST FLOODS FIND CCD READY . . . WAR EMERGENCY RADIO SAVES LEEVEE . . . AID GIVEN IN RIOT EMERGENCIES . . . WAR AGAINST BLACK MARKET.

Cape Cod. — Early on a Spring morning last year, Provincetown, at the tip of Cape Cod, got news that it would soon receive an unknown number of survivors of a torpedoed ship. During the day, out of fog and the crash of surf, the town received a dark commitment of dead and half-drowned men. A hotel was commandeered, auxiliary police roped off the streets from the landing point to the hotel, and in three-hour shifts the wardens and other defense workers transported the survivors to safety. They were cared for by emergency medical forces and were clothed and fed by Civilian Defense and Red Cross workers.

For an outstanding record during disaster, Provincetown was given national recognition in a citation from the U. S. Office of Civilian Defense.

Boston.—The work of the emergency Civilian Defense medical services at Boston's Coconut Grove fire was hailed as "an epic in medical history." Volunteers rushed to the scene to administer first aid and assist in removing the injured to hospitals, where 202 casualties were given blood plasma from OCD's blood bank. A master file system, set up by local Civilian Defense officials to operate during bombing raids, functioned as a check on casualties. In service to the fire-sufferers and the public, the defense forces showed that the work they had been trained to do for war could be used for a large-scale civil emergency.

Akron.—Leaving a path of wreckage and injury in its wake, a tornado struck northeastern Ohio the night of April 27. Within 40 minutes, 1,500 auxiliary policemen and firemen were entering toppling buildings to rescue victims. Auxiliary police rerouted traffic, recovered lost property and prevented looting of the stricken areas. In the morning, Civilian Defense volunteers staffed the property relief office to help those needing repairs for their homes. Emergency squads of auxiliary firemen helped make temporary repairs on houses, patching windows and repairing small roof openings. In all, 5,000 Civilian Defense workers saw Cleveland, Medina and Akron through the tornado.

Ohio.—Air raid control systems from northwestern Ohio to eastern Oklahoma alerted 25,000 Civilian Defense volunteers for flood duty as the Wabash and its tributaries overflowed their banks last May and the flood crests swept south. OCD volunteer offices rushed the recruitment of additional workers, while wardens and other defense forces manned the levees, evacuated river-edge families and helped feed and house flood victims. Civilian Defense auxiliary pumpers, mounted on barges, were sent in to give protection to districts the regular fire equipment could not reach and thus guarded against the fires that accompany flood. Many industrial plants were kept in operation.

Detroit.—Riots are a particularly harmful threat to the war effort. In the Detroit riots, Civilian Defense volunteers with the red, white, and blue emergency armband, went unharmed through battle-scarred areas, rescuing victims and helping them buy food. Volunteer nurses' aides gave emergency help in crowded hospitals. Through OCD, 472 units of blood plasma were supplied for riot victims.

In the recent one-day rioting in Harlem, New York, a volunteer civilian patrol of 1,500 residents, mostly Negroes, augmented by air raid wardens, helped restore the peace.

Anderson, Ind.—In the same Midwest floods, the War Emergency Radio Service got its baptism in action. WERS is a local system of two-way radio communication, using sets reassembled from junked radios by Civilian Defense volunteers.

At Anderson, Ind., WERS sets saved a crucial levee. Four portable radios were placed in operation on the levee and were used to deploy trucks, men, sand and equipment against the roaring waters. Other sets operated at the control center and other headquarters.

Uncle Phil Says:

Imagination is responsible half of our troubles—and our half.

When egotists meet, I've noticed an I for an I.

When you worry, remember this: Tomorrow you won't be worrying about this matter at all, about something else.

Stubbornness at least lessens number of yes men.

A gem of thought is often paired by a bad setting.

Art may be long at times, but is usually too short to make its ends meet.

Misfortune doesn't change a man only shows him up for what he is.

NEW EFFECTIVE HAY FEVER RELIEF

Hay fever, which annually causes more sneezes, more inflamed eyes and more red, stinging eyes than any other scourge may have a final big fling this September, because a Penn.sylvania electric engineer was served a dose of the real muck which was entirely salty.

The engineer, sneezing and all other hay fever manifestations stopped at a hotel where he served a dish of muck. He considered sneezing as much too salty. Finally, he decided, however, the hay fever attack seemed, ultimately, ceased. Next he had three meals, all overseas, and experienced his most comfortable time in years in the hay fever season.

His analytical hand quickly grasped the possibility that a saline substance in his food was responsible for his relief.

About this time, Dr. E. E. Selleck, a graduate of Columbia University, met the engineer, made notes, and when he returned home, began experiments. To Dr. Selleck declares he has found a certain means of relief for hay fever and is supported in his contention by other medical experts and a nationally known chemical manufacturing concern, the H. Lings-Smith Company, at Orangeburg, New York, has taken on making the remedy, which is called Nakamo Bell.

Describing the experiments, Dr. Selleck said, "After I was sure I had found a means of quickly relieving hay fever through the chloride group, I tested it in the most practical way I knew. I held three day clinic, to which many hay fever sufferers responded from ages ranging from 10 to 70 years. Each person was given tablets with a little water. Six relief came to all within ten minutes. Reports on these cases during the ensuing weeks showed practically a complete cessation of symptoms." —Adv.

IF CHAFE ANNOYS

Protect abrased skin and soothe with Mersano, formerly Mexican Relief Powder. Also relieves burnings of heat-rash irritated skin.

Druggists recommend

PAZO PILES

Relieves pain and soreness

For relief from the torture of simple Piles, PAZO ointment has been famous for more than thirty years. Here's why: First, PAZO ointment soothes inflamed areas, relieves pain and itching. Second, PAZO ointment lubricates hardened, dried parts—helps prevent cracking and soreness. Third, PAZO ointment tends to reduce swelling and check bleeding. Fourth, it's easy to use. PAZO ointment is performed by the Pigeon mark application simple, thorough. Your doctor can tell you about PAZO ointment.

Need Farm or Factory Help? Thousands of Workers In Japanese Relocation Camps Waiting to Be Hired

Early Every Trade Found Among Loyal Japanese-Americans

Farmers and factory owners are looking anxiously about help have available an almost untapped supply of intelligent and industrious workers. These people are the 90,000 Americans of Japanese ancestry who are now in the ten relocation camps in the West and Southwest.

The War Relocation Authority has employment for 16,000, and is planning to place 25,000 more by the end of the year. More than one-third of these American-Japanese farmers or have done some agricultural work. Others are skilled mechanics, and many are in professions. Occupations, in fact, range from doctors to ditchdiggers. Most of these people are American born and are considered loyal to the United States.

These workers may be hired permanently or seasonally by any farmer or other employer anywhere in the country, except in the military zone, a strip running along the Pacific coast.

The procedure whereby American-Japanese and loyal aliens are brought out of the camps and placed in the country is a simple one. A relocation office in each area has a staff of officers who look for jobs in different kinds of employment: farming, dairying, poultry raising, nursing, domestic, restaurant and hotel work, skilled and unskilled labor, factory work, various trades and professions such as dentistry, medicine, engineering, industrial designing.

Job offers received are screened for suitability of wage and work standards. If legitimate, the offer is sent to any or all of the 10 relocation centers which are in the states of California, Arizona, Idaho, Nevada, Wyoming, Colorado and Arkansas.

At the camp, job offers are cataloged, posted in mess halls and administrative buildings, and printed in the camp newspaper. Each evacuee has filed his working qualifications and each camp has an employment staff to assist the proper person to get the proper job.

An evacuee is not forced to take a job. He can select one for which he thinks he is best qualified. He makes his own arrangements. He responds with his prospective employer and, if accepted, informs camp authorities who then place him in the job. He may leave camp and go where he wishes in the United States except in the forbidden regions.

With American citizens of Japanese ancestry and Japanese aliens allowed to leave the relocation camps in the West once their loyalty has been assured. Each evacuee is registered by the War Relocation Authority and males of draft age are checked upon by a joint board of the War Relocation Authority and the War Relocation Authority. Also, each evacuee is checked against FBI records.

On the other hand, before an American-Japanese settles in a community, it is canvassed by WRA officers who seek reasonable assurance from responsible officials and citizens that local sentiment will not be against the newcomer. A definite leave usually is granted to an evacuee who has a place to live and means of support. Each evacuee must inform WRA in Washington of any change in job or address. An evacuee must receive the standard wage rate of the community. He cannot enter as "cheap

labor." WRA's motto is: "No more, no less than anyone else for the same work in the same community."

Both an American citizen of Japanese ancestry or a Japanese alien can obtain indefinite leave. An alien is checked more carefully and outside camp his movements have more restrictions.

WRA procedure to move American-Japanese out of the camps has been approved by the department of justice, the U. S. army and endorsed by the War Manpower Commission as a contribution to national security and manpower needs.

WRA's program of relocating American-Japanese began in the spring of 1942 when, for military reasons, some 106,000 Japanese were taken from California, the southern third of Oregon, and Washington and placed in 10 relocation centers in the West. WRA officials point out that the centers are definitely not internment camps or places of confinement. They were established by the United States government for two chief purposes: to protect the sustaining communities from evacuees who can contribute to the nation's support pending gradual reabsorption.

WELDER—Many Japanese-Americans, like George Y. Nakamura are excellent tradesmen. He is working in Chicago at a farm implement factory, whence he came from the Minidoka Relocation center, Ore., where he was maintenance machinist.

into a normal American life; and to serve as wartime homes for those who are unable or unfit to relocate in ordinary American communities.

Beginning January of this year, WRA initiated a program of steady depopulation of the centers by encouraging residents with good records of behavior to re-enter private employment in agriculture or industry.

Relocation offices were set up in Chicago, Cleveland, New York, Kansas City, Little Rock, Salt Lake City and Denver to seek jobs for American-Japanese.

Each relocation area has sub-offices. The Chicago area, for example, covers Indiana, Illinois, Wisconsin, Minnesota and the eastern half of North Dakota. Elmer L. Shurrell is supervisor of the area. Sub-offices are located at Indianapolis, Peoria, Rockford, Milwaukee, Madison, Minneapolis and Fargo. Relocation officers there carry on the same kind of employment and placement service given in the area headquarters.

Model Communities. Life in an evacuation center is no picnic. American-Japanese were abruptly moved from their own homes and placed in barracks, which though adequately constructed, were bare of furniture, had no running water, toilets or any conveniences we accept as normal.

A camp is laid out in blocks like a city. Each block contains two rows of barracks housing 12 living units. Each block has its mess hall, lavatories, showers and meeting hall. No family cooks for itself, but must eat with the other inhabitants of the block in mess halls which are staffed by full time American-Japanese cooks and attendants. Food for evacuees at camp is received from army quartermaster corps and cost must not exceed 45 cents per day per evacuee.

Each camp has schools, churches, playgrounds, recreation halls, YMCA units and sometimes a boy and girl scout troop. Each camp has a police force, a fire department and each block is represented in the camp council which meets regularly with WRA officials to determine camp administration and other problems which come up.

Each family is housed, fed and, if one member of the family is working, the government gives a small monthly allotment from \$2 to \$3.50 for each member for clothing.

Any able-bodied American-Japanese can work at the camp, and generally can do the same job he did on

the outside. American - Japanese serve as doctors, dentists, nurses, optometrists, watchmakers, clerks, civil engineers, carpenters, masons, farmers and in many other trades. Each one who works receives from WRA a monthly salary from \$12 to \$19 depending on his job. Since the WRA staff at each camp is very small, a huge amount of the administrative work is done by the evacuees who work as stenographers, bookkeepers, typists, clerks, interviewers, translators, switchboard operators, etc.

Each camp has co-operative food and clothing stores, a canteen, notion counters, magazine racks and even a post office. Most camps have large agricultural tracts and become largely self sustaining.

American-Japanese and Japanese aliens sometimes are known as Issei, Nisei and Kibei. Issei are Japanese born in Japan but who came here to live. Nisei are second generation Japanese, born in the United States and citizens of this country. Kibei are American born Japanese who have gone back to Japan for education and then returned to America. WRA investigates Kibei very closely, watches them carefully and is reticent about giving them freedom.

Mostly 'Nisei'

The great bulk of the 135,000 Japanese in this country at the outbreak of the war, including the 110,000 along the West coast, are Nisei. They are the young boys and girls, the men and women who have lived here all their lives and are just as American as we are.

They have broken away from Japanese customs. Their thought is American thought. They prefer American food and our way of doing things. They like to jitterbug, go to movies, have coke dates and parties like any normal American. Surveys have proven that the Nisei have a greater percentage of members with a college or university education than any racial group in the United States.

It is the belief of the WRA that the spreading of the American-Japanese throughout the nation instead of concentrated in groups along the coast will be a good thing both for all Americans and for American-Japanese.

Approximately 8,000 American-Japanese are in the United States armed forces. After Pearl Harbor they were given the opportunity to volunteer and thousands of boys enlisted from the relocation camps.

Two large units at Camp Savage, Minn., and Camp Shelby, Miss., contain most of the American-Japanese combat fighters. From Hawaii alone came a specially picked combat team of 2,500 American-Japanese boys. At Camp Savage many are training to be interpreters and language teachers.

Wherever they have been stationed, American-Japanese soldiers have won high praise from their commanding officers. They are training with extraordinary zeal even spending their free time in military study and voluntary drills. Instructors have to be keen and alert to avoid being tripped up by questions. It is a saying among these Japanese-American soldiers that "We have a year and three minutes to live," meaning a year of hard training, and three minutes in the thickest of the fighting, for they expect to go to the front.

WRA officials have found that adequate jobs can be found for the evacuees, but that housing is a serious problem. This is especially true in large cities where booming war plants have caused a heavy influx of war workers.

In the smaller communities this condition is less severe. WRA believes that a large measure of its success will depend upon how well the American-Japanese relocate in small towns and agricultural areas.

OVER THE PLATE—Strictly in the American tradition, these Japanese-American sixth grade boys play football at recess, at the Manzanar Relocation center in California.

Japanese Father's Last Wish Sends Four Sons to U. S. Army

Typical of the loyalty and affection of the Japanese-Americans feel the United States is the case of the Sakurai family. Twenty-five years ago four American-born Japanese boys were gathered about their father's deathbed in Seattle, Wash. Toyozo Sakurai left this last wish with them:

"My sons, you are of the Japanese race, but you are citizens of this country whose soil has blessed me. After I have gone it is my

wish that you conduct yourselves with dignity and that you honor and serve this country of your birth."

On December 7, 1941, three of them were living in Eatonville, Wash. They were married, and living in comfort and security. The fourth was working in Seattle. Early in 1942 all four brothers and their mother were removed to a relocation camp in Idaho. Here they remained for more than a year.

Then on January 28, Secretary Stimson announced that the army was going to form combat units of loyal Japanese-Americans.

All the Sakurai brothers volunteered, and were accepted, although the eldest was 37. They are training with an earnestness that surprises their officers, as are all the members of this unit at Camp Shelby, Miss. So the death-bed injunction of a Japanese immigrant who appreciated America is being fulfilled.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

By HAROLD L. LUNDQUIST, D. D.

THE SIN OF MOSES AND AARON

LESSON TEXT—Numbers 20 1-13, 27, 28.
GOLDEN TEXT—Be ye angry, and sin not.—Ephesians 4:26.

Sin is a serious matter, and even though men in our day may not call it by its real name, it is as much here as it was in the days of Moses—and it is just as awfully sinful as ever.

Sin is universal; it appears not only among the people, but also among their leaders. God's dealing with it is on the basis of "greater privilege, greater responsibility." No leader, especially in God's cause, can expect special consideration of his weaknesses. He must meet God and answer for his sin.

I. The Unbelief of the People (vv. 1-5).

It is well to bear in mind that the people of Israel who were now at Kadesh-Barnea, on the borderland of Canaan, had been here once before—40 years before. Here they had rebelled against God in unbelief because of the report of the spies concerning the land. Because of their unwillingness to take God at His word, they had been sent to wander 40 years in the wilderness until the explorers had died. Read that graphic and instructive story in Numbers 13 and 14.

Now they were back at Kadesh—and a new generation shows that the spirit of unbelief and distrust has a hold on humanity, and makes son like father.

They had run short of water. The spring which had served their fathers on the previous visit to Kadesh had run dry.

One would have supposed that all the mighty dealings of God in their deliverances over and over again, would have indicated the need of faith; but they had only a wailing criticism of God and His leaders.

II. The Answer—God's Power (vv. 6-8).

Moses and Aaron, now old men but still God's chosen leaders, took their sorrow to Him (v. 6). It was the right place to go, for power becometh unto the Lord (Ps. 62:11).

Instead of punishing the people for their unbelief, God calls upon His servant Moses to show them that He (God) is able. At a word from Moses, the rock would bring forth water before their eyes.

Is not that the perfect answer to all man's questioning and lack of faith—the revelation of the omnipotence of God?

But God's purpose is defeated (at least in a measure) by the

III. Unbelief of the Leaders (vv. 9-11).

Instead of taking their place as the servants and subordinates of God, Moses and Aaron claimed that they would provide water (v. 10). Instead of showing God's power by speaking to the rock, and His mercy in providing for the people, they uttered a rebuke; and then, by smiting the rock, took to themselves the honor that really belonged to God.

When called upon to act for God, they acted for themselves, and in their own name. They used for their own glory the power delegated to them by God. Let us beware that we do not fall into the same error.

Let us also note that if the punishment seems severe, we should recall that they had broken a type of Christ. Christ was the Rock. He was to be smitten at Calvary, that the water of life might flow forth. But He died once for sin (1 Cor. 10:4) and is not to be smitten again. We need now only speak to Him in faith and receive life.

In Exodus 17:5, 6, Moses smote the rock, presenting the first half of the type foreshadowing the work of Christ; now he was to speak to it, fulfilling the type, and in unbelief he destroyed God's picture or type of redemption. It was a grievous sin.

IV. The Answer—Judgment (vv. 12, 13, 27, 28).

Moses and Aaron were not to be permitted to enter the promised land, because of their failure. No doubt it was true that their departure to be with the Lord was in a sense "far better" for them; and yet it cannot be denied that there was disappointment in not seeing the conclusion of their long and arduous labors.

The lesson is clear. We may serve God long and faithfully, but that is not any excuse for "letting down" in our closing years. We dare not presume, as though our intimate touch with God and place of leadership gave us an "inside track," a right to take it easy, spiritually or morally.

Sin is always sin; and it is especially grievous in one who has the privilege of high position and of power with God.

God buried His workmen; but His work went on. For Aaron there was his son Eleazar (v. 28). For Moses there was a Joshua, "full of the spirit of wisdom" (Deut. 34:9). It is always so. None of us is indispensable.

ve shoes. The chicken and duck will take a clever crib quilt and completing the transfer is Pecky, the soft little rabbit uddle toy with the gay wink. Transfer 29571 is 15 cents.

SNAPPY FACTS ABOUT RUBBER

Experience shows that tire failures during the four hot months from June to September average 20 per cent higher than during the rest of the year.

Rubber sheeting should be washed with soap and warm water, thoroughly rinsed and then cleaned with a 5 per cent solution of cresol, to get the longest service out of the rubber. Roll, don't fold, when not in service.

The granddad of the present-day raincoat, the Macintosh, was patented in England in 1823 by Charles Macintosh, of Glasgow, Scotland.

Miss Evelyn Guelff, who taught in Klemme last year, is teaching in Omaha this year.

Mrs. John Johnson and daughter Ruth were guests Thursday afternoon at the home of Mrs. Arthur Kudje.

Mrs. C. G. Waterman and daughter, Mrs. Lyle Wilcox, and Mrs. R. A. Jorgenson were Mason City visitors Friday.

Mr. and Mrs. P. M. Wilson spent Sunday visited their daughter, Mrs. Robert Risser and son Bobby in Des Moines.

Mr. and Mrs. R. A. Jorgenson were dinner guests Sunday at the Lyle Liebendorfer home at Forest City.

Mr. and Mrs. Wallace Pavey and daughter, Mrs. John Clements, visited Sunday at the Wayne Pavey home in Webster City.

Mrs. Earl Schaeffer who has received an honorable discharge from the WAACS, came last Thursday to Forest City where she is visiting with her mother-in-law.

Mr. and Mrs. Fred J. Arnold and son Bobbie were at Humboldt on business Tuesday and while in that city were supper guests at the P. W. Johnson home.

Miss Ruth Johnson, registered nurse of Des Moines, came Wednesday for a couple of days visit with her parents, Mr. and Mrs. John Johnson and family.

Miss Lydia Bock and Mrs. Henry Jost drove to Knoxville, Iowa, last Wednesday for a visit with Bill Bock who is a patient at the Veterans hospital there.

Miss Jacqueline Kudje, teacher in the Kanawha grade schools, spent the week end in Klemme at the home of her parents, Mr. and Mrs. Arthur Kudje.

Mrs. Lyle Wilcox taught in the Arnold school for a few days the fore part of the week while the regular teacher, Mrs. Floyd Franklin was absent.

Pon. Brinkman is assisting with work at the Thada Store after school hours and Saturdays in place of Eugene Habercamp who has entered college.

Mr. and Mrs. W. J. Barz and daughter, Mrs. H. G. Voetberg of Garner, spent Sunday visiting with relatives and friends at Grundy Center.

Henry Schlichting and daughters Lydia and Meta, and son Fred, f near Mason City, were dinner guests Sunday at the home of Miss Lydia Bock.

Mr. Franklyn Thompson of La Fayette, Indiana spent the week end in Klemme visiting with his brother Ed. and family. Mr. Thompson is an instructor in Purdue University at La Fayette.

Mr. and Mrs. Ben Coobs, Mrs. Verner Lewis and LaVerne took Miss Luella Lewis to Des Moines Wednesday. Miss Lewis is beginning a nurses training course at the Methodist hospital.

Mr. and Mrs. Jerome Erdman and family, and Mrs. John Lackore of Forest City; and Mr. and Mrs. W. C. A. Gast of Garner, were dinner guests at the Emil Patet home Sunday.

Mrs. Eddie Epps and children returned to Des Moines Tuesday after spending several weeks at the parental, Herman Paul, home. Mrs. Epps and children will live in an apartment at Des Moines.

Cards received from Mrs. Antonio Keraus states that she arrived at her destination, Alameda, California. She is visiting with her son, Jesse Keraus and family and will spend the winter in California.

Sunday dinner guests at the L. V. Perkins home were: Mr. and Mrs. Lee Stewart and Miss Marjorie Brant of Webster City, Mr. and Mrs. Vic Perkins, Darlene and Jeanne Perkins and Miss Catherine Rogers of Estherville.

Einar Salling's sale of household goods advertised in the Times last week, drew an enormous crowd to his place Saturday afternoon. Everything sold at a good price and the bidding was lively. Mr. and Mrs. Salling expect to leave soon for California where they will make their future home.

Mr. and Mrs. P. M. Wilson and Mr. and Mrs. Billie Velau were visiting in Des Moines Sunday. Mr. and Mrs. Wilson visited with their daughter, Mrs. Robt. Risser and son Bobbie, while Mr. and Mrs. Velau visited with their daughter, Eva, and Stella Thieman. All enjoyed lunch at the Risser home later in the afternoon.

Donald, son of Mr. and Mrs. Floyd Franklin, was taken to the University hospital in the ambulance Friday. Donald was stricken with infantile paralysis a few years ago and will undergo an operation on his leg. Mr. and Mrs. Franklin left Sunday morning for Iowa City to be with their son, who underwent an operation this Wednesday morning.

Wedding Stationery printed and engraved at The Times Office.

Rev. and Mrs. Calvin Grosshuesch took their son, "Bill" to Plymouth, Wis., Thursday to enter the Mission House College. They were also accompanied by Rev. Grosshuesch's parents, Rev. and Mrs. J. W. Grosshuesch. The party expects to return to Klemme Thursday.

Mrs. Fred Nagel left last week for Des Moines where she visited with her daughter, Mrs. T. C. Wooten and then went to Grinnell for a visit with her daughter, Mrs. Ole Thompson. While there she received word that her sister in Royalton, Minnesota was seriously ill, so she returned to Klemme. Saturday Mr. and Mrs. Henry Jost took her to Minnesota to see her sister.

Mr. and Mrs. Tony Ahrens Goodell visited with Klemme natives and friends Saturday.

BACK THE ATTACK—BUY WAR BONDS

Northern Lumber Co.

Keith Albertson, Manager

Klemme, Iowa

THE LEAST WE CAN DO FOR HIM—

IS TO DO MORE IN SEPTEMBER!

Here's what YOU must do to Back the Attack

NOW, as America goes all out for the INVASION — your dollars must join the fight, too! For the very least you can do for your country — and for your loved ones doing the fighting — is to invest in MORE War Bonds in September.

Think of Jim fighting with Eisenhower... or Bill with MacArthur in the Solomons... or Bob up in Alaska. They've given their pledge to fight — and die if need be — for their country. They're ready to go all the way.

And we at home must see them

through all the way, too! That means every individual in the country who earns a wage or draws an income or has accumulated funds must invest in at least one EXTRA \$100 War Bond if he can possibly do so. Those who can, must invest more. This in addition to your regular War Bond subscription.

Yes, the least you can do for your men in service is to do MORE in September. MORE in the safest securities in the world — U. S. Government War Bonds. But do it now — it's for the INVASION!

Hurry! Hurry! Hurry!

THE END of September is in sight.

And the end of September brings us close to the end of the 3rd War Loan drive.

If you haven't bought \$100 worth of extra War Bonds—extra, mind you—dig up that money and buy your share today!

Men who are fighting for you... bleeding for you... ready to die for you... are waiting for the news that you people at home are backing them up 100%.

They know what invasion costs in blood

and lives. They know, too, what it costs in equipment, munitions, supplies, that must reach the front in a never-ending stream. And they're counting on you for the money that goes to keep that stream flowing.

No matter what you have to sacrifice... no matter how much it pinches... you cannot let them down!

They're calling on you to hurry, hurry, hurry! Get that \$100 extra into War Bonds before the drive is over.

What You Buy With
WAR BONDS
Services

Sunday morning as you sit in
church and see the vacant places
in the choir and wonder where the
people have taken the young people
in your community you may feel
that they are attending di-
rectly that they are attending di-

Explains and choral leaders are
on the larger ships and even
in the Army centers.
Millions of hymnals have been dis-
tributed to the men and women of
the services and you may rest as-
ured that a portion of the savings
are being placed into War Bonds is
for their spiritual welfare.
U. S. Treasury Department

To the People of this Community:

ARE YOU REALLY AT WAR?

What does being at war mean
to you? Less gasoline for your
auto? Less sugar in your coffee?
Higher prices for your food and
clothes? Separation from your
husband?

Sure, it has
meant all those
things, some
serious and
some really trivial for a period
when your actual safety is at
stake.

But has the war meant BLOOD,
SWEAT AND TEARS to you? In
many instances YES. The first
stage of invasion has already
pushed our casualties over the
100,000 mark.

The gold stars which decorate
thousands of our homes today are
a challenge to the vast majority
of us to do our best in the Third
War Loan. No good American
wants to see one more gold star
added to the firmament of glory.
We educate our youth for life,
not for death. If they die, they
die so that we might live. Every
extra War Bond you buy today
will back the invasion so that the
war will be shortened and so that
there will be less blood, sweat
and tears for you and your
friends.

FORMER KLEMMME WOMAN DIES IN OKLAHOMA

Mrs John B Feuerhelm of Jeff-
erson, Oklahoma, passed away sud-
denly while visiting with relatives
in Waukon, Iowa last Thursday
evening.

Funeral services were held Sun-
day at Waukon, Iowa.
Mrs Feuerhelm was a former
resident of Klemme and before her
marriage was Lizzie Martin. The
Martin family at that time lived
where the Albert Koerner family
now resides in northwest Klemme.

NOT ADVERTISING

A number of Harlan residents
did not learn until eight months
after Tech Sgt. Donn Curtright
returned to his home country after
serving overseas that Donn was en-
titled to wear nine different de-
corations. Among the decorations
Donn has in his possession are the
Silver Star, the Distinguished
Flying Cross, the Air Medal and
a special Presidential Citation.
Tech Sgt. Curtright is now sta-
tioned in Texas, where he is in-
structing flying students.

TO THE RESCUE

While working in a canning
factory in Storm Lake Mrs J L
Darland fell from a ladder outside
the building. Some bones were
broken and she suffered severe cuts
and bruises. Fellow workers start-
ed a fund to assist Mrs Darland
and were able to raise more than
\$125. The Elks lodge also voted to
donate the \$25 second prize in the
recent Shang-ri-La contest to Mrs
Darland. Mrs Darland was work-
ing at the factory hoping to earn
enough money to visit her husband,
now in the navy.

KILLS SPARROWS

After a recent wind storm, the
Clarence Border family of Mt
Vernor found 30 dead sparrows ly-
ing under the trees in a plum
thicket. The only explanation the
Borders could give was that the
wind blew so violently that the
birds were dashed to the ground.
No signs of lightning striking the
trees was found.

Mr. and Mrs. C. G. Waterman Celebrate 25th Anniversary

SURPRISE PARTY HELD AT CHURCH THURSDAY EVE

Mock Wedding And Program Held
Followed By Lunch

Mr and Mrs Clarence G. Wat-
erman observed their twenty-fifth
or silver wedding anniversary last
Thursday, September 16th in a
rather quiet manner, unaware that
their daughter, Mrs Lyle Wilcox,
had everything well planned for a
surprise party for them to be held
at the Methodist Church parlors in
the evening.

Unbeknown to her parents, Mrs
Wilcox had invited the members of
the Good Fellowship Sunday school
class, the members of the choir and
the nearby neighbors and families
to participate in the celebration be-
ginning at eight o'clock in the eve-
ning.

Mr and Mrs. Waterman, their
daughter Mrs. Wilcox and friend,
Mrs. Wesley Wherland of Minne-
sota, drove to Clear Lake Thurs-
day evening for dinner. But Mrs
Wilcox prevailed upon her parents
to return home in time for choir
practice. After choir practice at
the church Mr and Mrs Water-
man were directed to the church
parlors where they were surprised
and greeted by some eighty people.

A variety program was then put
on with R A Jorgenson as master
of ceremonies. Special musical
numbers were provided by Peggy
Corbs at the piano, Marcille Josten
with her marimba, duet by Patty
Kudje and Eunice Larsen, a vocal
solo by Rev. Harvey a humorous
history by Arthur Wellmeyer and
all high-lighted by a mock wed-
ding. Characters were Mrs. Fred
Kluckhohn bride, Art Wellmeyer
as the groom, Mrs August Baack,
bridesmaid, R A Jorgenson, best
man, Dr Anderson, C E Kluck-
hohn and Helen Lewis as flower
girls and Ira Geholt, the preach-
er.

All were outlandishly costumed
and looked more like a bunch of
circus clowns. "Rev" Overholt
read the "riot act" from a mail-or-
der catalogue, using a bull ring for
the single ring ceremony. The
ring was carried on a burlap pill-
ow by "V. S." David Anderson.

Mr and Mrs Waterman and the
guests of honor were seated at a
decorated table, on the center of
which was placed a three-tier de-
corated wedding cake. A nice lunch
was served to all by the commit-

FAMILY PICNIC HELD SUNDAY IN HONOR OF HOWARD SCHOENWETTER

A family gathering and picnic
dinner was held at the William Ax-
line Sunday in honor of Howard
Schoenwetter, son of Mr and Mrs
George Schoenwetter, who was
home from Athens, Georgia on a
vacation.

Those present were Mr and Mrs
George Schoenwetter and Howard,
Mr and Mrs Milton Weisbrod of
Fenton, Ralph Ludeke and family
of Clear Lake, Henry Ludeke and
son Paul of Meservey; Mrs Fred
Schlichting and daughter, Gladys,
Harold Lasahn and family; and
Mrs Art Schoenwetter.

Those who came to call in the
afternoon included Mr. and Mrs
Elmer Ludeke of Britt; Mrs J M
Neuberger and children of Ven-
tura, Mr and Mrs Lloyd Ax of
Mason City, and Leslie De Merritt
and family.

WESSELS BUYS BUSINESS AT CLARION

tee in charge

Talks were enjoyed by Mr. and
Mrs. Waterman and Rev. Harvey.
Further music was enjoyed as Mar-
cille Josten played the marimba
while Mr. and Mrs. Waterman op-
ened their gifts which had all been
placed on a table.

The party was closed by singing
"God Be With You 'Til We Meet
Again," and was dedicated to our
boys in the armed services.

Herb Plambeck To Speak At Farm Bureau Picnic Oct. 2

Our Men In The Service

STAFF SGT RAY KEEPER
HONORED ON RADIO

A Klemme staff sergeant was
saluted on the Columbia Broad-
cast "Blondie" program Monday
night at 9:30 o'clock when the an-
nouncer gave recognition to the
heroic deeds of Staff Sgts Ray
Keeper and Ralph Callaway of Ellenwood, Ga.
crew members of the bomber, "Pa-
cific Tramp," when they averted a
possible tragedy to the plane and
crew when they unloaded a "live"
bomb which had become wedged
in the bomb bay and would not re-
lease. Keeper and Callaway low-
ered themselves into the bomb bay
and extricated the bomb
which were then tossed out of a
window.

A number of Klemme people
heard the program in which Sgt
Keeper was given recognition for
fast-thinking and bravery.

SGT MILO PATET NOW IN THE LAND OF COCONUTS

A South Pacific Jungle
Sept. 17, 1943

Dear Jergie

Thought I would drop a fe-
lines tonight as I have a little time.
Suppose you are really pull-
ing the silver bars out now and the
yellows. Makes me mad when
I know that I can't go fishing, too.
If it is not too hot here, it is
raining, and they say summer is
yet to come!

Wish I could tell you where
I'm located but it is against rules.
Insects are bad, especially mos-
quitos. Water not too good un-
less it is medicated.

One nice thing about this place
plenty of coconuts and the natives
will climb the trees for a couple
cigarettes. They like the American
soldier but "no likee the other".

Food is good, considering every-
thing, especially after the long
boat ride.

Well, I better close for this time.
Write as ever,
Milo.

What You Buy With WAR BONDS

Powder Monkey

On board ship and in the artillery
their buddies call them "powder
monkeys." Not disrespectful, just a
personal, intimate term between
friends. Civilians call them gun
crews. During a battle the crews of
"powder monkeys" must work like
trojans bringing the ammunition to
the guns.

The gun may fire an anti aircraft
.50 calibre shell or a broadside from
the 16 inch guns of a great battle-
ship, but in either event the "pow-
der monkey" must pass millions of
dollars' worth of ammunition to
make the gun effective, and your
savings in War Bonds are necessary
to supply the financial ammunition
that provides the shells.

U. S. Treasury Department

ADDRESS WILL BE DELIVERED
AT THE BRITT PARK

Picnic Dinners And Sports Will
Round Out Program

Hancock County Farm Bureau
Day will begin at 9:00 a. m. on Sat-
urday, October 2nd, with ball gam-
es at the high school athletic field
in Britt. There will be sports
events for everyone through out the
day. Prizes will be offered in
most events.

Herb Plambeck Will Speak

At noon sports events will be
terminated for a time so that ev-
eryone may hear an address by
Herb Plambeck, W. H. O. Farm
News Editor, who recently return-
ed from England. The address will
be given at the Britt Memorial
Park. Following this, family groups
will have picnic dinners in the
park.

In the afternoon more self-ball
games and sports events will be
held.

Lots Of Sports

The following sports events will
be held throughout the day: Chair
quoits, Potato Masher Throw, Soft
ball Throwing; Clock Golf; Nail
Driving Contest; Softball games
and Tug-O-War.

Committees Appointed

Committees have been appoint-
ed as follows: General Committee:
Clark Lackore, Chairman; Mrs. H.
Oxley, Corwith, Mr and Mrs Im-
businga, Woden; Mrs Emory
Leaver, Garner, and Clarence Tre-
nary, Kanawha.

Chair Quoits Committee: Mrs. G.
Leach II, Chairman, Corwith; Mrs.
Win Moll, Garner, Mrs. Carl Ho-
st, Garner; Mrs. Wm. Holek, Britt
and Miss Ruby Schram, Garner.
Potato Masher Throw Commit-
tee: Gratus Cooper, Chairman, Kan-
awha, Walter Kahl, Britt and
Henry Stollenberg, Hayfield.

Softball Throwing Committee:
Leo J. Ulrich, Chairman, Garner;
Clarence Trenary, Kanawha; and
Hanson, Wesley.

Clock Golf Committee: Mrs. Har-
old Oxley, Chairman, Corwith;
C. A. Bird, Woden; Mrs. Cas-
Pannhoff, Garner; Mrs. Richard
Hubert, Britt; Mrs. Aaron Strom-
Garner, Mrs. Roger Schlawn,
Garner.

Nail Driving Contest: V. A. Cook
Chairman, Klemme; C. A. Bird,
Woden; Fred Korte, Britt, and Wm.
Holek, Britt.

Softball Committee: Floyd Frie-
low, Chairman, Kanawha; Imko
Husinga, Woden, and Helmer Hill
of Kanawha.

Tug-O-War Committee: H. A.
Graham, Chairman, Garner, and C.
J. Wille, Klemme.

LEFT AND RIGHT

Broken arms are quite common
in the Robert Hervey family of
Donnellson. One day last week,
Roberta, 7, fell and broke her left
arm. Three days later, Robert, 5,
fell and broke his right arm.

NOTICE TO THE PUBLIC

The executive committee of the
Hancock county rationing board
has issued the following notice to
the public:

"Members of the Rationing
boards serve without pay. Will
you therefore please submit
your rationing problems thru
the office of the rationing
boards during office hours, if
possible by mail, and not both-
er board members with your
problems at their homes or at
their places of business."

Effective October 1 the hours
during which the Garner office of
the rationing board will be open
to the public will be from 9:00 a.
m. to 4:00 p. m.

Watch Your Kidneys
Help Them Cleanse the Body of Harmful Body Waste. Your kidneys are constantly filtering waste matter from the blood stream. Kidneys sometimes lag in their work, not act as Nature intended. If related, move impurities that, if retained, poison the system and upset the body machinery.

Symptoms may be nagging backache, persistent headache, attacks of dizziness, getting up nights, swelling, under the eyes—a feeling of general anxiety and loss of pep at bladder. Other signs of kidney weakness, need order are sometimes too frequent urination.

There should be no doubt that proper treatment is wiser than neglect. Doan's Pills. Doan's have been with new friends for many years. They have a nation-wide reputation. Are recommended by grateful people country over. Ask your neighbor.

DOAN'S PILLS

HOUSEHOLD MEMOS... by Lynn Chambers

Put Nutrition in That Lunch Box (See Recipes Below)

Let's Pack a Lunch

You realize as your children begin the trek back to school with their lunch boxes that mid-day meals should carry a goodly share of the day's calories in them? Lunches that are a bite-and-run affair for a meal will not give children or workers nourishment from which they are to draw the pep and energy, vim and vigor they need to do their best day's work. Their loads are heavier these days than ever before, and the homemaker who behaves every homemaker on her toes to put in the box the best lunch she can pack.

Packing the lunch need not take much time or effort. Assemble the ingredients needed for packing a lunch at one convenient spot, and you can get right to work with soon as you've put breakfast in the table. Keep staples on hand to simplify the lunch-making problem. This should include such things as crackers and cookies, cheese, eggs, peanut butter, beans, sardines, dried fruits, nuts, marmalade, pickles and

Whenever possible prepare a dish for the family that can be utilized in the lunch in some way. If you have a meat or fish loaf, this can be used as a sandwich filling. Sandwiches are the mainstay of the lunch box. However, as they vary so often, it is well to vary the fillings as well as the bread. Such as possible to avoid that monotony. Cut them in halves—they're easier to eat. Wrap them in waxed paper. Keep them from drying out. Have the fillings moist to keep them from being unappetizing. Spread the bread with butter, mayonnaise or cream to keep it moist, fresh and tasty.

Sandwich Fillings. Chopped hard-cooked egg, pickle relish, mayonnaise on oatmeal bread. Cream cheese, chopped olives on whole wheat bread. Cream cheese or cottage cheese, jelly and marmalade with Boston Brown bread. Peanut butter or ground peanuts, chopped figs, dates or prunes, mayonnaise or cream to moisten on bread.

Ground dried beef with pickle relish and mayonnaise to moisten on rye bread. Or sardines in thick white

Lynn Says: "Lunches that go to school, to the defense office or office should be just as attractive as you can make them. Lunch is better than a bag, as it holds the food without having to get muddled."

Keep lunch boxes clean and air them out. If the box has an enamel lining it can be washed out with soap and water. Any box can be lined out between lunches, kept clean from crumbs. Use waxed paper to keep sandwiches fresh and moist, vegetables crisp and fresh. A vacuum bottle will keep beverages hot or cold, soups steaming hot. Easy-pack crackers with soup furnish energy—give a real homey touch to the lunch.

Try surprises often in the lunch box just for morale's sake. A piece of favorite gum, candy or nuts, an orange, sectioned and peeled and peeled fitted over a slice of ham to give the appearance of a ham, peeled but to keep it fresh and moist do loads, to give the child or worker a lift.

Lunch Box Menu	
Cream of Tomato Soup	Crackers
Ham Salad on Whole Wheat Bread	Chopped Egg Salad on White Bread
Carrot Strips	Fresh Apple
Cookies	

sauce on white bread or bun. Ground ham and carrots with sour cream dressing on buttered rye bread.

Cooked liver or liver sausage, mashed or ground fine with fried onion, minced, chili sauce on whole wheat, rye or pumpernickel bread. Ground veal, carrot and celery moistened with mayonnaise.

Chopped carrots, raisins, and nuts, moistened with mayonnaise, on white or oatmeal bread.

Oatmeal Bread. (Makes 2 large loaves) 2 cups oatmeal, uncooked 1/2 cup molasses 1 teaspoon salt 1 tablespoon shortening 1 cup boiling water 1 cup milk 1 cake yeast dissolved in 1/2 cup lukewarm water 5 cups flour

Measure oatmeal, molasses, salt and shortening into bowl. Add boiling water and let stand 1 hour. Beat in milk, dissolved yeast and flour. Let rise until doubled in bulk. Knead well. Turn into greased bread pans, let rise again until double in bulk. Bake 15 minutes at 425 degrees, then 45 minutes at 375 degrees.

Boston Brown Bread (Makes 2 small loaves) 1 cup graham flour 1 cup rye flour 1 cup cornmeal 1 1/2 teaspoons soda 1 1/2 teaspoons salt 1 cup sour milk or buttermilk 1 cup water 3/4 cup molasses 1 cup floured raisins Sift together the dry ingredients. Add bran remaining in sifter to dry ingredients. Combine sour milk, water and molasses. Make a well in the dry ingredients, pour in liquid and mix as quickly as possible. Add raisins with last few sweeps of mixing spoon. Fill greased molds 3/4 full, cover closely and steam for 2 hours.

Milk Drinks. Vary the lunch box beverage as often as possible, serving milk, hot chocolate or cocoa. For a change of menu, try an old favorite which contains iron—molasses milk drink, made by mixing 1 quart of milk with 2 or 3 tablespoons molasses and a dash of nutmeg.

Spiced milk: To 6 cups heated milk, add 3/4 teaspoon cinnamon, dash of nutmeg or mace and stir vigorously. Add sugar, if desired, and serve hot or cold as preferred.

Fruits make wonderful desserts and add a generous portion of the day's vitamin and mineral health. If an energy-producing dessert is desired, try a pudding: **Orange Marmalade Bread Pudding.** (Serves 6)

1 1/2 cups dry bread crumbs 1 1/2 cups scalded milk 1 1/2 cups sugar 1 tablespoon melted butter 2 eggs, slightly beaten 1 teaspoon vanilla 1/2 cup orange marmalade 1/2 teaspoon nutmeg Soak bread crumbs in hot milk. When cool, add remaining ingredients in order given. Place in a buttered baking dish and set in a pan of hot water. Bake in a moderate (350-degree) oven for 45 to 60 minutes, or until knife inserted in center comes out clean. Serve with lemon sauce or cream.

Roast Lizard

By Robert McCormick

(WNU Feature—Through special arrangement with Collier's Weekly)

Every American plane in the Pacific carries a combination cookbook and guidebook, but it's a strange example of either. The main idea behind the volume for the present is to save the lives of fliers forced down in the weird reaches of the South Seas. But after the war, it will be priceless to those of us who actually have the courage to take up beachcombing as a profession.

The book tells us how to roast a goanna to a turn. A goanna is a big lizard, and the tail makes a ravishing dish if properly cooked. The book also tells us that a stuffed bandicoot is elegant eating, that its flesh is scarcely distinguishable from rabbit. The fact that the bandicoot is nothing but a large rat with big ears has nothing to do with its taste.

And the yavato! There's a dish that would thrill you clear down to your toes. Cooked up in a casserole, the yavato is something right out of this world. It's right out of our world anyhow, since it's described as "a large cream-colored grub found in rotting wood."

The book was put together by Dr. Frank Roberts of the Smithsonian Institution in Washington. Much of the information in it was supplied by Dr. William Strong, director of the Ethnogeographic board, which sounds very dull, but the Ethnogeographic board has the delightful job of finding out all it can about the personal habits and environment of other folks all over the world.

How to Find Honey.

The book does more than merely tell how to cook the strange flora and fauna a man is likely to run into on a desolate island in the Pacific. The main body of the book is divided into two columns. First, the name of the food, then a description and an explanation of where to find it and how to cook it.

An ordinary fig may be quite a strange business to a pilot from Brooklyn, for example. Figs growing on trees don't look much like those in packages.

Then there's honey. Honey is a blessed thing for a hungry wanderer to come across. The trick of finding it revolves around recognizing the insects that make it. In the tropics, the honey bee is a mild, stinging little thing that looks like an ordinary fly. The book tells the boys to tie a bit of white cloth on one of the bees, or sprinkle it with flour, then follow it through its zigzag course to its hive.

There's plenty of food lying around in the Pacific, both on land and in the water. But you have to know how to find it, and how to avoid the items that are poisonous, of which there are fortunately very few.

The coconut palm is practically a grocery store all by itself. The meat of its nut is fine food, ripe or green. The liquor of the green fruit is refreshing. And when fermented, it becomes a powerful wine. The tip-top bunch of leaves on the tree is a true delicacy. It is known as palm cabbage, and it's cooked just like cabbage and tastes like it.

Baked Breadfruit.

Breadfruit is almost as much of an all-round dish as coconut. It grows in a large tree, and the fruit hangs on the tree like green balloons, with pock-marked skin. Breadfruit is a substantial item of food when roasted, baked or fried. After it's cooked, it can be sliced and dried, and it'll keep indefinitely.

But it's not all vegetables and no meat. The book has directions for tracking down and fixing up such things as scrub turkey, wild pigs, barking pigeons, parrots and white cockatoos. The Filipinos are nuts about locusts, particularly when they are pickled in vinegar or fried in salty fat.

Sea food offers a fine variety. The book tells of a number of shellfish that can be picked up around the islands in the Pacific. Things like the cockle, the cowry, the limpet, the conch and a lot of the other creatures, whose principal attraction has been their shells, are nice eating. So are prawns and freshwater mussels.

The Biting Cone.

The wanderer has to watch out for one shellfish, however. It's called the cone, because it's shaped like a pine cone. The cone is not only poison to eat, but has sharp teeth that shoot venom into you like a serpent's fangs. Furthermore, it seems to get positive pleasure out of using its teeth.

The book tells how to cook the shellfish if no kitchen utensils are handy. Simply build a fire on top of them. They stew in their own juices and come out quite palatable. Or they can be eaten raw.

THE 1943 VACATION TALKERS
"Well, we had quite a summer."
"Didn't we!"
"Going no place at all and having nothing to complain of!"
"Just think of all the places we didn't have to stop at!"
"And all the cooking we didn't need to accept. Wasn't it wonderful?"

"I don't remember a year when I felt so refreshed and rested."
"There was that summer eight or ten years ago when we only went away for three or four days."

"Yes, but three or four days can be quite a drain. There was that hotel with the awful rooms and the little windows with half the screens out."

"That's right. This summer we didn't have to endure a single summer hotel, even for one night, did we?"

"Not one, dear. No iron beds, no odor from the clamflats, no lousy hotel orchestra, no flies!"

"Just imagine it! An entire summer and our stomachs in good shape. Did you think it possible?"

"And I haven't had a touch of ptomaine."

"We haven't even had our regular indigestion from corn on the cob, or hot dogs and toasted marshmallows at beach parties. That's incredible."

"It could only happen in wartime, dear."

"I like to sit here on our own cool porch and meditate on all the hot roads we have missed, all the bum dinners we have skipped and all the arguments we haven't had with the hotel clerks over the final bills."

"I get a kick out of thinking of the dishes we haven't had to send back to the kitchen."

"And the horrible coffee we've escaped!"

"Yes, and funny people we haven't found it necessary to meet. Jolly summer, I call it."

"Any other summer and we would have been under the doctor's care by this time, don't you think?"

"Oh, yes. You were always done in by mid-August from vacation strain. I generally broke down in late July. This year we are in perfect shape. I haven't even had my feet cut by oyster shells or broken bottles."

"And we haven't had a single archery course arrow in our chests all season. How wonderful!"

"Don't you ever yearn for any of the old ordeals, inconveniences and impositions?"

"Hardly. Of course, now and then I have a slight yen to have sand in my ears and sit at a table with blueberry pie stains all over the tablecloth. But I fight it down."
"Still, we've been on this back porch all summer. Couldn't you stand a little change, dear?"
"Yes. Let's try the front one."

BERLIN VIEWPOINT

Battered and bruised and beaten, Taking it on the run, Crow have our fighters eaten, Downcast and drubbed and done; Back without luck or glory—Have Fuehrer Hitler paged! Tell him the stirring story—We are now DISENGAGED!

Africa gone completely, Sicily fled from, too; Nothing is going sweetly, Even our hopes are few; Backward we stagger reeling, Weary, upset, enraged; Still, there's that happy feeling—Getting so DISENGAGED!

"The car you couldn't buy is helping to win the war," says an advertisement. We expect to hear almost any day now of some patriot seeking a decoration because he repeatedly called up the auto agency and got no answers.

Eddie Rickenbacker says Germany is still too strong to be licked before another year. This must be the most depressing news a good many Germans have heard in a long time.

OLD PROVERBS REVISED

If a man writes a better pamphlet than his neighbor on explaining the income tax the world will beat a path to his door.

It is so hot in Naples that Vesuvius is being used for air conditioning the neighborhood.

Elmer Twitchell has a secret weapon against the Japs and Nazis. It's an insect powder.

DISAPPEARING AMERICANISMS

All clerks must be courteous at all times.

What do I care if you get through? I can always get somebody else.

Gentlemen will not remove their coats in the dining room.

It's a government order—so we've got to obey it.

Remember, there are two sides to every question.

PATTERNS SEWING CIRCLE

Young Favorite.

GIRLS are so fond of this particular dress. They like its grown-up look and they love the way it fits.

Pattern No. 8464 is in sizes 6, 8, 10, 12 and 14 years. Size 8 takes 2 1/2 yards 35-inch material.

Maternity Set

TRIM looking smock, with detachable collar and cuffs, plus a clever adjustable, wrap-around skirt.

Pattern No. 8475 is in sizes 12, 14, 16, 18, 20; 40 and 42. Size 14 takes 4 1/4 yards 35-inch material. 1/2 yard contrast for collar and cuffs.

In sewing on buttons, place the knot between the buttons and material, which prevents the knot from becoming untied.

Take eggs to the basement or other cool place immediately after gathering. Do not put them in the egg case until the following morning, for eggs cool slowly in a case.

Store coffee jars, once they are opened, in the refrigerator.

Sometimes walls and ceilings become stained and cracked from water. Often this water works its way in under window sills. If you cut a V-notch the full length of loose sills, on the under side, the water won't reach the wall to work its way through the outside walls.

Before papering a room where there are greasy or soiled spots on the wall, add a coat of shellac to the spots if the wallpaper is tight on wall and there are no cracks. This prevents the spots from coming through on the new paper.

Chopped, crisp bacon may be added to your favorite muffin batter for a delicious Sunday morning treat.

Store glassed foods, onions, potatoes, butter and flour away from the light.

A quick and delicious sauce for ice cream or pudding is made by heating maple syrup and adding one-half cup nut meats to it just before serving.

SNAPPY FACTS ABOUT RUBBER

There are about 400 kinds of trees and vines in the world that contain rubber latex, but Hevea brasiliensis, native of Brazil, is recognized as the best for commercial purposes.

Don't keep your car idle too long with the tires carrying the load. Drive it a short distance periodically. This flexes the tires and will prevent deterioration.

The Army is conserving rubber. It is estimated that by 1944 crude rubber requirements per vehicle will be cut 63 per cent as compared to the amount of rubber needed by the vehicle at the outbreak of the war.

WEEKLY NEWS ANALYSIS

Italy's Unconditional Surrender Marks Real 'Beginning of the End' for Axis; GOP Outlines Foreign Relations Plank; Red Army Retakes Ukraine Farm Lands

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)
Released by Western Newspaper Union

ITALY SURRENDERS: One Down, Two to Go

Five days after British and Canadian troops stormed across the Messina straits to land on the Italian mainland, Italy surrendered unconditionally to Gen. Dwight Eisenhower.

When Marshal Pietro Badoglio's government gave up, it marked the first split in the Rome-Berlin-Tokyo Axis. First indications of the Italian collapse came with the ouster of Benito Mussolini.

Left to hold Hitler's vaunted European fortress were German troops, themselves engaged in a major retreat in Russia, and the Nazis' smaller Balkan allies. While capitulation of Italy exposed central Europe to heavy bomber attack, the Alpine district presented a formidable obstacle to an Allied ground advance into southern Germany.

Hundreds of thousands of her troops killed or captured in North Africa, her elaborate railroad system torn to shreds, her fair cities smoldering in ruin, and lacking the natural resources to carry on war, Italy sought the easiest way out of the conflict.

SOUTHWEST PACIFIC:

Isolate Japs

Australian troops were hacking their way through jungle brush to the northwest of Lae, New Guinea, when a cloud of American planes appeared overhead. The next moment the sky was filled with tiny white puffs, marking out Allied paratroopers, floating to earth to assist in the encirclement of 20,000 Jap soldiers.

Gen. George Blamey

Previously, Australian units under Gen. George Blamey surprised the Japs by landing in force to the east of Lae. Moving quickly, they advanced on the big enemy base even while the Aussies and U. S. paratroopers were sealing off Lae to the northwest.

General MacArthur's trigger action not only cut off the Lae garrison from reinforcement from the north, but it also was designed to choke off stubborn Jap troops resisting an Allied advance before Salamaua, farther to the southeast.

HEALTH: Holding Up Well

Civilians are maintaining a better level of health than federal authorities expected, despite food rationing, longer work hours, and fewer doctors and nurses available, the Office of War Information reports. While mortality and sickness rates are slightly higher, the statement comments that the rise is not more than could be anticipated, considering wartime strain.

The only serious epidemic condition is the increase in infantile paralysis (poliomyelitis) and spinal meningitis. More than 4,500 cases of infantile paralysis have been reported throughout the nation this year, the largest number since 1934. Spinal meningitis cases total 13,368, the greatest number since 1914, when records began.

2,000,000 OVERSEAS: Marshall Reports

Of 7,000,000 men in the army July 1, 2,000,000 were overseas, Gen. George C. Marshall, U. S. chief of staff, revealed in his biennial report to the nation.

Of the 7,000,000 men, General Marshall said, 521,000 are officers, with 1,065 generals. More than 2,000,000 men are serving in the air force.

Experience shows that six tons of shipping are necessary to transport a soldier and his accessories overseas, and his supply requires one ton a month, General Marshall said.

At the time the Japs attacked the Philippines, General Marshall stated, six troop ships and nine cargo vessels were enroute to the islands.

WACS

Most of the officers of the Women's Army Auxiliary Corps (WAACs) have taken the oath in the new Women's Army Corps (WACS) the war department announced. Of 5,977 WAAC officers, 5,656 have transferred to the new organization without change of rank. Of the 319 women who have not been given the oath, 41 may yet join, but their cases are pending. The others have dropped out for failure to meet physical requirements or other reasons it was said.

MANPOWER: Control Coast Labor

With 160,000 more persons required for shipyards and 100,000 for aircraft factories on the West coast, War Mobilization Director James F. Byrnes announced that the WMC received control of the supervision of labor in that area.

A copy of a program already developed in the Buffalo, N. Y., area, the WMC's West coast plan involves: 1. Determination of necessary production schedules in various factories; 2. Shift of labor to essential employment from less essential work or services; 3. Allotment of manpower to the more important industries in the area; 4. Distribution of farm help wherever most needed throughout the West coast.

Time to Switch

Along with adoption of the West coast plan, the WMC's selective service bureau sought to co-ordinate its draft program with industrial needs.

First, the bureau ordered that all non-deferrable workers seeking to switch to essential production be given 30 days, or till October 15, in which to find such employment through registration with the U. S. Employment service. The WMC previously ruled that essential occupation, and not dependency, be the basis for draft deferment.

Second, the bureau instructed local boards that before they induct any workers skilled in 149 critical occupations, they must submit the names of such men to the U. S. Employment service. The service will then determine whether these men are more urgently needed by another employer.

GOP: Keep Sovereignty

Co-operation in the preservation of peace without the loss of U. S. sovereignty constitutes the basis of the Republican party's post-war advisory committee's recommendation for future American foreign policy.

Meeting on historic Mackinac Island, Mich., under National Chairman Harrison Spangler, the GOP committee struck the theme for its 1944 plank on foreign affairs.

While declaring that "we must do our full share in a program for permanent peace among nations," the GOP committee members said, "we must preserve and protect all our own national interests." If any proposed international co-operation should conflict with our best interests, the committee said, "then the United States should adhere to the policy which will preserve its constitutionalism as expressed in the Declaration of Independence."

For conquered countries, the committee recommended disarmament and destruction of war industries.

RUSSIA:

Regaining Wealth

Under the weight of massed Red attacks, German troops slowly fell back to the broad banks of the Dnieper river in southern Russia.

With many of the rich coal and iron deposits of the Donetz basin in Russian hands again, advancing Red armies also reclaimed much of the fertile farm land of the Ukraine, famed for its black earth and wheat and cotton fields. Slicing into the heart of this province, the Reds severed the Nazis' main rail connections to the north.

With the natural resources, Russian troops also recovered many former industrial cities, like Kharkov. But having been wrecked by warfare and their manufacturing facilities demolished by the Germans, reconstruction will be necessary to restore them to production. In the north-central sector, Red troops pounded at the gateway into White Russia, adjacent to the former state of Poland.

MISCELLANY:

OCTANE GAS: High octane gasoline that will give motorists 50 to 70 miles to the gallon is predicted as a post-war development of the oil industries by William Carney, a research chemist for a large refining company. The new automobiles using this 90 to 95 octane gasoline will have smaller motors and lighter bodies, made of alloys or plastics, it is believed.

U. S. TREASURY: Seeks Billions

High finance has come to the forefront with the treasury's efforts to raise 100 billion dollars for war expenditures during the present fiscal year ending June 30.

Approximately 50 million bonds valued at 15 billion dollars are expected to be sold during the treasury's present bond selling campaign.

All of the money will be sought from individuals and businesses, with banks offered a limited number of securities after the close of the public drive. However, the treasury has been obtaining 100 million dollars weekly through short term bill sales to banks.

With congress reconvened, Representative Robert Doughton's house ways and means committee was looking forward to consideration of new tax legislation to raise an additional 12 billion dollars requested by President Roosevelt. Present levies will yield 38 billion dollars.

RAIL WRECKS: High Toll

Crowded with passengers returning to New York, the Pennsylvania railroad's mighty Congressional Limited streaked through the North Philadelphia station. On it whizzed to Frankfort Junction, Pa. Then, a burned journal on the seventh car of the 16-car train gave, throwing the coach high into the air.

Hurling against a steel girder of a signal tower, the upper section of the coach was sheared right off. Careening wildly, the car behind smashed into the wrecked coach, and the rest of the train left the rails and plowed along the right of way. Fire broke out in some of the cars. More than 50 dead and 125 injured were removed from the wreckage.

Several hours later, the New York Central's Century Limited was roaring along near Canastota, N. Y., when its locomotive exploded, derailing nine of the 15 passenger cars. The first four cars lunged down an embankment; the others were strewn all over the tracks. Heavy, steel rails were plowed up and twisted into fantastic shapes. Three crewmen were killed; approximately seven passengers injured.

U. S.-BRITAIN:

Tongue Common Bond

Speaking at Harvard university, Prime Minister Winston Churchill declared the United States and Great Britain must march together "in those realms of thought which are consecrated to the rights and dignity of man."

"It would be a most foolish and imprudent act on the part of our two governments . . . to break up this smooth running and immensely powerful machinery the moment the war is over," Churchill added.

Commenting on studies being made by a special commission to construct a basic English language for use by all people, Churchill said such a common tongue offers far better opportunity for understanding between people than "taking away provinces and land or grinding them down in exploitation."

Stating that a common speech had drawn the United States and Great Britain close together in war, Churchill said that it may well prove the foundation for a common citizenship.

ECONOMIC DIRECTOR: Appointed for Italy

Former assistant to Vice President Henry Wallace when he was secretary of agriculture, and more recently head of the Farm Security administration, 41-year-old Calvin B. Baldwin was named area director of economic operations in occupied Italy.

As area director, Baldwin will have the task of co-ordinating the various programs of supply and production instituted by the Allies' civil commissions in governing the captured territories. With Italy essentially an agricultural country, particularly in wheat and fruits, Baldwin's experience in farm administration undoubtedly determined his appointment.

Joining attacks on Baldwin's political philosophy, Senator Harry F. Byrd charged him with admitting to a joint committee on nonessential expenditure that FSA representatives had formulated a long-range plan of using the government's power of eminent domain for breaking up large land properties into smaller holdings.

JEFFERS

William M. Jeffers, director of the wartime rubber program, has resigned his office, stating that he believes that his main task is accomplished, and that he wishes to return to the railroad of which he is president.

About 30,000 tons of synthetic rubber will be turned out this month, in contrast to the 67,000 tons which is the goal of the program, Jeffers stated, explaining that difficulties have been encountered in expanding factory capacity.

Washington, D. C.

BOMBING OF ROME

Pope Pius XII was completely cooperative with the Allies the first time Rome was bombed, but not the second time. Inside fact is that he called in Harold Tittman, American charge d'affaires to the Vatican, and protested in the strongest language. He gave Tittman a scorching scolding.

Reason for the Pope's ire was that on August 11, Tittman had informed him that Rome could be recognized as an open city by the unilateral declaration of Italy.

As a result, the Pope understood that Rome was an open city and apparently so informed Marshal Badoglio. The Pope was acting as intermediary for the Italian Government. Both he and Badoglio, therefore, apparently rested on Tittman's assurances and considered Rome an open city.

That was why the Pope was so indignant when, despite his earlier conversation with Tittman, Rome was bombed again.

Whether the State Department failed to communicate Tittman's message to General Eisenhower in order to head off the second bombing was something on which State Department officials declined to comment.

However, one explanation probably was that a city cannot be declared "open" by a unilateral declaration. Neutral observers must enter the city and definitely ascertain that troops, munitions works, airfields, and government offices have been removed.

This had not been done following Tittman's first conversation with the Pope, and that was why General Eisenhower bombed Rome again.

PRIORITY OF DANGER

Behind the closed doors of the OGD in Washington, plans for the civilian defense of the country are being revised. The new plans take into account the decreasing likelihood of attack, and the growing public indifference to black-outs and bomb shelters.

War chiefs insist the danger of attack has not passed, but they admit there is no point in whipping up the public to a frenzy of fear, especially in the safer areas.

They have now divided the country roughly into three zones, with the following "priority of danger"—1. Pacific Coast, 2. Atlantic Coast, 3. Interior areas.

The coastal areas are 200 miles deep, so that everything 200 miles inland is "interior" and relatively safe. The Pacific coast is regarded as more dangerous than the Atlantic, because the Japs are both uncontrolled and unpredictable.

When the revision is finally ironed out, public announcements will be made, and there will be a general relaxation of defense activities. But OGD will insist that the minimum measures of protection shall be ready for the siren.

Decision to relax the program was difficult for OGD, since it meant a scaling down of personnel, and a loss of jobs throughout the organization.

AIR FORCE DUPLICATION

Advocates of a single air force point to the manpower saving that might be accomplished, right under the noses of the Chiefs of Staff, if army air forces and naval aviation were combined.

On the edge of Washington, separated only by the Potomac river, are the army's Bowling Field and the navy's air base at Anacostia. Both fields are equipped with many of the same facilities, and those facilities are manned by forces which duplicate each other.

Each field has its own radio tower and radio staff; each has its separate communication staff, its own meteorological bureau and staff, its own medical staff, its own supply depot—and a dozen other services required at a big air field.

A single air force, combining both army and navy, would do away with this duplication both of equipment and personnel.

ARMY RED TAPE

Here is the type of letter which makes army men see red: "To Commanding Officer . . . Engrs., Atlantic Beach, Fla.

"1. The following enlisted man, your organization, has violated uniform regulations: Koval, A., Private First Class, 32261814 . . . Engrs.

"Soldier had his pocket unbuttoned. Place: 115 Pablo St., Jacksonville Beach. Time: 2:25 (9 25 p. m.).

"2. You will take the necessary action to correct this situation. By order of Colonel McClune.

"Fred L. Gassman, CWO, "144th Inf., Adjutant."

CAPITAL CHAFF

When Elmer Davis received a cable in Morocco that FDR had spanked OWI's broadcast about the "moronic little king" of Italy, Davis broadcast this telegram: "Maybe broadcast was a mistake but I still think the house of Savoy is a second class hotel."

Tom Johnson of the Army Jeeps will pioneer the new Pan American highway through Central America. With a jeep he expects to get through it several months before the road is scheduled for completion.

It's Like This Over There

By BOB TROUT
CBS News Reporter.

New York looks like a movie set, after London. Years of clothes rationing have made British civilians a little shabby. I thought Britain's women did a wonderful job of keeping themselves attractive on coupons, but the bright colors of Miss and Mrs. New Yorker's clothes made me blink. With one clothing coupon in England, a man can buy two handkerchiefs or one necktie or a one-fourth of a bathing suit. An "austerity" suit costs more than a half year's coupon allowance.

Britain's blitz days are over but London still hears the siren, sometimes two or three times a week. In London, it's never practice. The Germans haven't sent real bombing planes over London for a long time, only fighter bombers. They are speedy enough to avoid the defending fighters a fair proportion of the time. Their bombs cause pain and misery but don't slow British war production. Heavy RAF bombers which frequently visit Germany carry bombs that weigh 8,000 pounds. That is heavier than the German fighter-bombers that attack Britain.

The first American soldiers to arrive in the British Isles in this war landed in Northern Ireland. The secret was so well kept that most of the Irishmen who saw the troops didn't know who they were at first. Especially as they didn't look much like the Americans the Irish people have grown used to seeing at "the latest film at the cinema." Some of the Americans evened the score; they didn't know where they were.

The British have been very kind to the American soldiers, although rationing leaves them little with which to be kind. But courtesy and hospitality are not rationed. It's a real treat for an American correspondent in Britain to have lunch at a U. S. Army camp. Strange how that Army food is improved by the simple trick of eating it 3,000 miles from home. And eating it after some months of eating boiled Brussels sprouts, boiled potatoes (boiling doesn't require precious grease). And sausages that are 37½ per cent meat—no more, by law.

Note on American influence in Britain: A British tabloid newspaper printed this advice in a column of recipes: "Some of you have been growing corn (maize), and now you can use it for a delicious dish which will make a real change for you. Remove the green leaves. Put the corn into boiling salted water, cover with a lid, and boil gently until soft. To test when cooked: squeeze a grain with your fingers. To serve: should the corn be too long for your vegetable dish with a lid, wrap it in a napkin, put on a plate or dish, and serve at once. Spread a very little margarine along the cobs, take both ends in your hands and gnaw the grains off. It is good fun."

Movies and theaters are doing a big business, and there always seems to be a "busker" available to entertain those who stand in line waiting for the doors to open. Theaters start usually at 6 p. m. so that players can get home early, in case there is a "spot of bother." British reactions to certain scenes in featured American pictures are interesting. For instance, in "Major and the Minor," when Ginger Rogers broke an egg on Robert Benchley's forehead, groans went up from the British audience all over the house. But in "Sullivan's Travels," when Joel sniffs a frying pan containing five beautiful eggs, there were no groans. The entire audience, instantly and simultaneously, broke into a long loud sigh: "O-o-o-o-o-h."

In one rural area, a U. S. troops who had built themselves a small movie theater invited the local townsfolk to join them in watching the pictures in the long cold winter evenings. Some of the local people had never seen a movie before. One 68-year-old man, much impressed by the elegance and luxury of the home-made "theater," said: "Why, they've even got a fire in there."

I saw "Watch on the Rhine" in London a couple of months ago. All the action takes place in Washington, and I had meant to notice whether the English caught spoke the lines with a Potomac accent. But I forgot to notice because all I could think of was that the actors constantly left the door open, spoiling the blackout.

In the summer, with the clock moved two hours ahead, Britain is not really dark until nearly midnight. But in winter blackout begins about five in the afternoon and the blackout is still on when you get up in the morning. Pedestrians are allowed to use flashlights if they have been dimmed by tying a handkerchief over the lens, and are pointed straight down at the ground—not ahead. But the blackout is kind to bashful lovers and amateur astronomers. For the first time you can see the stars from the city.

NO MATTER if you move hither () or change there are certain treasures will mean home to you. A book, a piece of china and a perfectly useless but charming of bric-a-brac—by all means them with you and make dramatic setting for them. A shadow box cupboard will the trick. The one seen here

light and substantial, will glamour even to dime store and ends, and may be placed top of a table, a chest of drawers or a desk. No special scheme almost no tools are needed make it.

If you do not have a saw to the scalloped frame, mark it plywood and take it to the nearest woodworking shop to have it cut out at the lumber yard where you buy them. All you will have to do is screw them together on the front frame and paint stain to suit your room scheme.

NOTE—A pattern for tracing the design for this graceful shadow frame; complete list of all materials and illustrated directions for making and finishing will be sent for 15¢. Send your order to:

MRS. RUTH WYETH SPEARS
Bedford Hills, New York

If you were to say the first call of the day in the Army "Reveille"—you'd be wrong. "First Call." But you probably know what cigarette gets first with Army men—it's Camel. Camel is the favorite with all branches of the service—Marines, Coast Guard, too. (Based on actual sales records from ice men's stores.) And there are Post Office restrictions on packages to overseas Army men, you can still send Camels to soldiers in the U. S. and men in the Navy, Marines, Coast Guard wherever they are.—Adv.

ADVICE to NEW MOTHERS

Don't compel your baby to take nourishment through a hard, stiff nipple. Baby's refusal to take a sufficient quantity of food may be traceable to this unnecessary effort. The Faultless No. 10 Nipple of highest quality translucent rubber is soft, pliable and resilient. It provides for effortless feeding. Triple-foam lined. Fits all standard narrow nursing bottles. Withstands repeated sterilizing. 3 for 18¢ at all drug stores.

Get Into Action For Full Victory!

ation's Food Producers Achieve 1943 Goals, Elevate Sights to Meet Next Year's Demands

Farmers Beat Floods, Drought to Record Crops

America's farmers have done it again! Last year the skeptics said they'd never meet their goals. So farmers upped food production 13 per cent over 1941, for a total of 28 per cent more than the average for the five years before the war!

Farm Mobilization day 1943 and the skeptics were it couldn't possibly be done in time. So the farmers did it which of the most-needed crops they could grow the best planted the greatest acreage in 11 years! They brought in the largest numbers of stock and poultry in history, pushed egg, meat and poultry production to a new peak.

They are exhibiting a national food basket containing 4 per cent more than the 1942 record production, and 31 per cent more than the average for 1935-39!

Those farmers face another year—and doubtless another crop of skeptics who haven't seen, after seven consecutive years of record food production, that American farmers know what they're doing. They attack the problem of food for war with the spirit of the American fighting displays on the field of battle. Like that fighting man, they get it!

Estimated production figures for 1943 are significant. Despite a late and unfavorable spring, despite floods in the corn belt and hindrances such as labor and machinery shortages, nearly 352 million acres are being harvested. Crop production is slightly less than 1942's record harvest, but 15 per cent greater than the five-year average of 1935-39.

Crop acreage under cultivation in 1943 exceeds the 1942 acreage about 3 per cent. The decrease in production is largely attributable to smaller yields per acre on some crops, although some plantings were lost through the floods, others came to maturity but not be harvested for lack of "oil" or machines, or both.

Stock for food shows an estimated 8 per cent increase over the record, and 22 per cent over previous record set in 1941. An increase of more than one-third, or 31 per cent, is estimated over the average for 1935-39.

Recorded food crop figures are offset by the livestock increase, to push total food production about 4 per cent above the record, and 31 per cent over the five-year period average of 1935-39.

Meat Output Tops Record. Production of all meats for the year is estimated at an all-time high of more than 23 billion pounds, a 10 per cent increase over 1942, 14 per cent more than the average for the earlier five-year period. Production will exceed that of 1942 by about 18 per cent, but it is estimated that beef and veal, and lamb and mutton will show totals below last year.

Poultry and eggs will mark record production, if an anticipated four billion pounds of chicken and the hens lay their expected five billion dozen eggs. Results would push poultry production 34 per cent above 1942 and 72 per cent above the 1935-39 average, eggs going 13 per cent over the year's record and about 43 per cent over the previous five-year average.

Milk and milk products are expected to show considerable fluctuation. Maintaining of milk for human consumption at an expected level only about 1 per cent less than 1942—a record consumption—will be production of cheese and buttered milk about 13 per cent over last year. Government restriction on the use of milk solids will curtail ice cream production about 10 per cent, although butter production is expected to be upped about 10 per cent over 1942.

Housewives will be encouraged by rates on production of edible fat oils, exclusive of butter, at 10 per cent higher than 1942. Increase for lard is set at 15 per cent, for compounds and vegetable cooking fats at 12 per cent. Margarine at about 46 per cent. Along the field crops many record are anticipated this season. The

peanut harvest is expected to set an all-time high with a total of 2,986,450,000 pounds, 35 per cent more than the 1942 record and almost 2½ times the average for the ten-year period from 1932 through 1941.

Dry bean growers will harvest a record crop from a record acreage—23 million bags of 100 pounds each, or an increase of 17 per cent over last year's peak and 59 per cent over the 10-year average. Another record will be set when estimates of 10 million bags for the dry pea crop are realized. Last year's crop was seven million bags.

Potatoes dug this year will total some 443,067,000 bushels, another record and a sizable increase over

fruits will be consumed in larger per capita quantities than last year, but will not match the 1941 record.

Among the meats, civilians will get a larger per capita supply of pork during the current year but less of the other meats such as beef and veal, lamb and mutton. Nearly two-thirds of the prospective 1943-44 supply of all meats combined has been allocated to civilian use, 63 pounds out of every 100. This amounts to 66 pounds out of every 100 of beef, 80 pounds of veal, 59 pounds of pork, and 65 out of 100 pounds of mutton. The large amount of pork available, despite the apparently small allocation per 100 pounds, is due to the unusually large

Farmers' Scoreboard for the Year

the 1942 harvest of 371,150,000 bushels. Sweet potatoes are expected to exceed last year's crop by 24 per cent for a total of 81,255,000 bushels.

Although truck crops for processing will be about the same in the aggregate as in 1942, three of the four principal processing crops show marked increases. Processors can anticipate a harvest of 11 per cent more snap beans, 7 per cent more green peas and 4 per cent more sweet corn. Beets, a less important crop, also show an increase. Tomatoes, the fourth of the leading vegetables for processing, will probably be down about 2 per cent below last season's supply.

Where the Food Goes

Now that the farmers have come through with another topnotch harvest, what is going to happen to all this food? Well, civilians will get most of it—a good, round 75 per cent of the total. Of the remainder, some 13 per cent will go to the armed services, 10 per cent to lend-lease and 2 per cent to other outlets. The civilian portion is about equal to the average amount of food consumed in the years 1935-39. Civilian per capita consumption in 1943 compares favorably with consumption during that period and is greater for many commodities.

For example, preliminary estimates of per capita consumption are larger than 1941—record year for consumption on most foods—for chickens, eggs, fluid milk and cream, margarine, potatoes, sweet potatoes, dry edible beans, and the grain crops. Wheat, rye, milled rice, corn, oats and barley. While total fats and oils consumption will be about 1 point less than 1941, it will show an increase of slightly more than 1 point over 1942. Canned juices, dried fruits and fresh citrus

Women who are taking over the many difficult jobs deserve a large share of the credit for the enormous crops being harvested despite manpower shortages. Mrs. Elden King binds oats on her farm near Arlington, Ohio.

How Food Is Divided Up

	Civilian	Military	Allies	Territories, etc.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

By HAROLD L. LUNDQUIST, D. D., of The Moody Bible Institute of Chicago, Released by Western Newspaper Union.

Lesson for September 26

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

ABIDING VALUES FROM ISRAEL'S HISTORY

LESSON TEXT—Deuteronomy 11 13-25.

GOLDEN TEXT—Righteousness exalteth a nation, but iniquity is a reproach to any people.—Proverbs 14 34.

What makes a nation great? God's dealings with Israel answer that question. The history which we have just touched upon in our study of the first four books of the Bible is viewed in Deuteronomy.

Moses, realizing that the end was at hand for him and that a new generation was about to go into the promised land, reviewed the history of the people, restated their laws, and renewed the appeal of God for their obedience. This record is found in the Book of Deuteronomy, from which our lesson is taken.

We find here that the nation which

1. We worship the True God (vv. 13-15). There is a fundamental factor which underlies all real national greatness—love of God. This has an inseparable corollary—serving Him with all your heart, and all your soul.

Says the wise man of Proverbs (14 34), "Righteousness exalteth a nation, but sin is a reproach to any people." We have well-nigh forgotten that fact. We need to be reminded of it again in God's word to Israel.

What is the result? The blessing of God upon the land, the giving of abundant harvest, in fact, the open-handed generosity of God.

II. Heeds God's Warning (vv. 16, 17).

This is the negative side. God dealt with Israel through promises if they were faithful, and the threat of judgment if they forgot Him.

One is as important as the other in the leading of a nation—and in the rearing of children. We, like our heavenly Father, should faithfully keep every promise; but we should just as surely fulfill every warning of coming judgment.

America has seen the handwriting of God in warning concerning its waywardness and sin. Will it heed and avoid further judgment?

III. Honors God's Word (vv. 18, 19).

Loving God and His Word is not a matter for theological speculation or for sanctimonious discussion in some dark cloister. Thank God the Christian faith is at its best in the ordinary affairs of life. It finds its proper place in the tender relationship of parent and child. Its teachings are pure, delightful, simple and entirely appropriate to any occasion, whether one sits or rises, walks or lies down. God's words are the words to be laid up in the heart and in the soul, to be taught to our children, to be the constant and normal subject of conversation.

IV. Testifies for God (vv. 20, 21). Here again we have the home before us. And it is, of course, the home which makes the nation. If the home speaks for God, the nation will do so, inevitably and effectively.

We may not, as did the pious Jew, fasten a little container bearing God's Word on our doorstep, but we may make the home itself and the life of its inhabitants an effective testimony for God before our neighbors.

It is obvious that the home either speaks for or against God. A profession of faith in Him, an outward reputation for adherence to religious principles which does not vitally touch our dealings with one another and with the community in which we live—these clearly testify not for God but against Him. On the other hand, who can estimate the value of a sweet and orderly Christian home? Whether it be on a dusty city street, or on a quiet country lane, it is a light that cannot be hid.

V. Counts on God for Victory (vv. 22-25).

God promised that if Israel diligently kept His commandments, loved Him and walked in His ways, they would be a nation that would overcome and dispossess their enemies, and prosper in every good purpose.

God desires the nation which honors His name to stand before the other nations of the earth victorious and prosperous.

The purpose of the Lord for Israel was a far greater one than they ever achieved, because they fell into sin and drew back in unbelief. The limits of the land which He proposed to give them, as stated in verse 24, far exceed that which they did possess in Palestine.

God's plans are large plans. His promises to us, like those to Israel, are stupendous. We need to learn to take Him at His word.

"No man shall be able to stand before you" (v. 25) is the promise to Israel. "Ask what ye will" (John 15:7) is the promise to us. They failed because they did not believe God. Will we fail for the same reason?

A PERFECTLY straight piece of flowered rayon silk, chiffon or cotton—narrow velvet or silk ribbon and a charming monogram makes this lovely nightie. It requires the minimum of cutting and sewing and achieves a maximum charm in appearance. Do the monogramming in color to match the shoulder and waistline ties.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

To obtain Monogram Designs and Pattern for the Nightie (Pattern No. 5006) send 15 cents and 1 cent for postage with your name, address and pattern number to.

HOME NEEDLEWORK 530 South Wells St. Chicago.

ASK ME ANOTHER? A General Quiz

The Questions

1. How high is the dome of the Capitol in Washington, D. C.?
2. What name do the Scots give to a lake?
3. What is the lightest metal known?
4. The words cumulus, stratus and nimbus generally refer to what?
5. What President of the United States was a bachelor?
6. Where did Alexander Graham Bell give the first demonstration of the telephone?
7. The king of what country was killed while mountain climbing in 1934?
8. What was the city of Oslo's former name?
9. What season of the year does the word vernal pertain to?
10. In what way does the paper money paid to our troops in the Mediterranean area differ from our money here?

The Answers

1. It is 287 feet.
2. Loch.
3. Lithium.
4. Clouds.
5. Buchanan.
6. Boston, Mass.
7. Belgium (Albert I).
8. Christiania.
9. Spring.
10. The seal of the United States is printed in gold and was so printed to prevent the Axis from circulating U. S. currency seized from banks in Europe.

SHE WORKS ON THUNDERBOLTS!

Lunch—and then a Camel for SHIRLEY JORDAN, detail drafts-woman at Republic Aviation Corp., where the Army's famous P-47 Thunderbolts are rolling off the assembly line.

IT'S CAMELS FOR ME EVERY TIME—THEY HAVE A GRAND TASTE AND THEY NEVER GET MY THROAT

THE "T-ZONE"

—WHERE CIGARETTES ARE JUDGED

The "T-ZONE"—Taste and Throat—is the proving ground for cigarettes. Only your taste and throat can decide which cigarette tastes best to you... and how it affects your throat. Based on the experience of millions of smokers, we believe Camels will suit your "T-ZONE" to a "T."

Camel

CARD OF THANKS

I wish to publicly thank my neighbors and friends for doing my chores and looking after my farm during the time my wife was confined in the hospital. Sincerely—Kermit Schleib. 1tp

OVERHEATING STOVE OR FURNACE, FIRE HAZARD

Most of the fires caused by heating stoves and furnaces are the result of over-heating the unit during extremely cold weather. The stove or furnace should be of ample size to maintain the house temperature at a comfortable level and raise it fairly rapidly without rapid firing or overheating.

The fire hazard also may be reduced by proper installation, according to Harold Beaty extension agricultural engineer at Iowa State College. Combustible floors under heating stoves should be protected with insulation equivalent to one-eighth inch of asbestos covered with 26-gauge sheet metal. The insulation should project at least 12 inches at the sides and preferably 24 inches in front of the stove, so that sparks falling out of the stove will not start a fire readily.

Protect Woodwork

Woodwork should be protected if it is within 3 feet or less of the stove. A metal shield or other incombustible material extending about 5 feet from the floor will serve the purpose. The stove or range should be 18 inches or more from the wall.

The basement furnace should have an overhead clearance of 15 inches or more, regardless of the construction above it. Any woodwork within 2½ feet of the top of the furnace boiler should be protected by a metal shield. Air space should be provided between the metal shield and the wood above it. Better protection is afforded by the use of ¼ inch asbestos board covered with metal lath and a coat of cement or asbestos plaster.

Check Grates

Grates of furnace should be checked. If the ash pit was not cleared regularly during the previous year, it may be necessary to replace the grates. Keeping the ash pit as clean as possible aids combustion of the fuel and reduces the danger of overheating the grates.

Stove or furnace pipes should be checked each year. This precaution is especially important this year, since the humidity has been high and metals are likely to rust.

A 13 COMPLEX

Sailor Lynn Gross, farm youth of Winneshiek county Iowa survivor of the ill-fated light cruiser Helena in the battle of Guadalcanal last November 13, returned to the states on Friday, August 13, the Navy man was in 13 engagements during 13 months and the Helena was hit 13 times in the November 13 battle. The cruiser was sunk in its 13th engagement.

Rev H E Harvey left this Wednesday morning to attend the Methodist Conference at Ft. Dodge. There will be no services in the Klemme or Liberty Methodist churches Sunday.

Local Happenings

Klemme and Vicinity

DRS. COLBY & HAYDEN, DENTISTS, FOREST CITY, IOWA. OFFICE PHONE 374, RES. 189. 1tp

Mr. and Mrs. Herb Bailey of Belmond were visiting with Klemme friends Sunday afternoon.

The Klemme Reformed Church will entertain the Northeast Iowa Synod here on October 6th and 7th.

Mrs. Francis Ridder went to Chicago Tuesday evening for a visit with her children and families.

Mr. and Mrs. Alex Ross of Garner spent Friday afternoon visiting at the John Day home.

Mrs. Wilson Sandry has returned home from the Mercy hospital at Mason City where she was a patient.

Mrs. Louis Perkins and Mrs. John Clements went to Estherville Friday for a visit until Saturday with relatives and friends.

Mrs. Henry Ludeke, of near Meservey, has been visiting with relatives in Wisconsin the past week.

Mrs. Cecil Pethick is ill with pneumonia at her home in Liberty township. Her mother, Mrs. Guy Dodd of Clear Lake, is caring for her.

Pvt. and Mrs. Lowell Mau left Friday for Dayton, Ohio, where Pvt. Mau is stationed. He enjoyed a furlough which he spent visiting with relatives here.

Mr. and Mrs. Lewis Mau and son Pvt. Lowell Mau and Bonnie spent Wednesday in Des Moines visiting with Miss Audrey Mau who is attending the A. I. B.

Mr. and Mrs. Ed. Thompson and daughter Barbara, visited in Kanawha Tuesday afternoon. Ed. also looked after business while in the neighboring town.

Mr. and Mrs. Arthur Wellemeyer enjoyed dinner Sunday at the home of their son-in-law and daughter, Mr. and Mrs. Burton Hanson near Wesley.

Friday was the birthday anniversary of at least four Klemme people: Mrs. Lyle Wilcox, Rev. H. E. Harvey, Mrs. Harvey Barz and Levi Ridder.

Albert Yahne returned to his home at Garden City, Minnesota, Monday, after visiting with Klemme relatives and friends for the past week.

Mrs. Mary Waterman visited for a few days the past week at the Wes Schuldt home and then Friday she went to Clarion for a visit with relatives and friends.

Mrs. Wesley Wierland of Minneapolis came Wednesday evening by bus for a visit with Mrs. Lyle Wilcox, at the C. G. Waterman home. Mrs. Wierland is a sister of Lt. Lyle Wilcox.

Sunday dinner guests at the home of Mr. and Mrs. Harvey Barz were Mr. and Mrs. Fred Barz; Marvin Barz and family; Ronald Barz and family, and Walter Rosendahl and family.

The Catholic Church at Duncan will hold their annual Fall Festival on Tuesday, September 28th. The public is invited to attend. A ham and chicken supper will be served beginning at 5:00 p. m.

Mrs. Kermit Schleib returned home Friday from the Mercy hospital at Mason City. Her baby son, however, will remain at the hospital for about another week before he will be brought home.

Dr. and Mrs. D. P. Anderson and daughter, Neva Ann, left Friday morning for Kansas City, Mo. on a vacation. Dr. Anderson has not been well for some time and was advised to take a rest from his work.

Mr. and Mrs. Floyd Franklin returned home Wednesday evening of last week from Iowa City where they went to be with their son, Donald who underwent an operation on his leg at the University hospital. Donald is getting along fine and will be able to return to his home in about another week. His leg is now in a cast which he will have to wear for some time.

Mr. and Mrs. Ira Overholt were at Hardy Sunday for a visit at the home of Ira's sister. Mr. and Mrs. Overholt enjoyed visiting with a nephew who was home on a furlough from the army.

Howard Schoenwetter returned Tuesday to Athens, Georgia, after enjoying a vacation visiting with his parents, Mr. and Mrs. George Schoenwetter in Liberty township. Howard is a civilian instructor in radio at the University there.

Mr. and Mrs. Wayne Pavay and daughter, Carol Ann, of Webster City, came Saturday evening and visited until Sunday evening at the parental Wallace Pavay home. Carol Ann remained for a week's visit with her grandparents.

Mr. and Mrs. Arthur Wellemeyer drove to Thompson Monday evening to help their grand-daughter, Joanne, daughter of Mr. and Mrs. Donald Bacon, celebrate her seventh birthday anniversary. Joanne was very delighted with the present she received from her grandparents. It was a nice piano.

H. D. Ramsay and family, who have spent the past two weeks vacationing at a cottage at Clear Lake, returned home Sunday. Mr. C. J. Bartell, who has been relief agent at the depot during Mr. Ramsay's absence, has gone to Goodell for a couple of weeks to take care of the depot while Mr. and Mrs. Tony Ahrenkeil are on their vacation.

Mr. and Mrs. Conrad Quandt and their little granddaughter, Gracka Maria Gerardi, returned Monday afternoon from their cabin on the North Shore of Lake Superior at Two Harbors, Minnesota, where they had spent several weeks during the "hay-fever season." Mr. and Mrs. Quandt left again Tuesday for Utica, Illinois, being called there by the death of Mr. Quandt's sister-in-law, Mrs. Geo. Quandt.

HANCOCK COUNTY REAL ESTATE TRANSFERS

Lewis Bergen and Andrea, wife to George Cook. W. D. 8-3-43, \$1,800. 7 acre tract in NE corner of section 17, 97, 23.

Mr. and Mrs. Ira Overholt were Mason City visitors Friday.

THANK YOU!

I want to take this way of expressing my sincere thanks to all who sent me flowers, cards and letters, and who called on me while I was in the hospital.—Mrs. Kermit Schleib. 1tp

NOT MISSING AFTER ALL

Mr. and Mrs. Robert Schurtz of Mason City and Mr. and Mrs. Earl Glanville of near Hampton celebrating their wedding anniversaries together had a little excitement thrown in. After attending the Franklin County Fair together the two ladies took the Glanville car and drove out to the Glanville farm to spend the evening while the two gentlemen attended a sale. The men discovered Mrs. Schurtz's purse in the car and hid it under the cushion of the back seat. When they returned to the car they noticed that the back seat had been pushed out and the purse was gone. The men called county officials who started investigations. Mr. Schurtz decided that perhaps they should learn just what was in the purse so drove out to the Glanville farm. There, much to their relief, the "theft" was solved. Mrs. Schurtz had missed the purse, had driven to Hampton and obtained the purse from the car and then gone back to the Glanville's.

Mrs. Henry Medaus, Mrs. Herman Paul, Mrs. H. E. Harvey and Mrs. R. A. Jorgenson were Forest City visitors this Wednesday afternoon.

Rev. H. E. Harvey Returns To Klemme-Liberty Churches

BISHOP MAGEE ANNOUNCES PASTOR APPOINTMENTS IN THE ALGONA DISTRICT

Appointments of pastors and superintendents for the Northwest Methodist Conference were announced at Fort Dodge Sunday by Bishop J. Ralph Magee of St. Louis. Reading of the appointments closed the annual session.

Of the four superintendents transferred Doctor Frank Bean, pastor of Grace Methodist Church, Sioux City, was named superintendent of the Sioux City district to succeed the Rev. J. Madison who has accepted a call to a Falls, S. Dak., church.

New Superintendent Here

Rev. J. C. Buthman, who has been superintendent of the Algona district for the past two years, succeeded Doctor Bean as pastor of Grace church, and the Rev. F. Burgess of Spencer will be superintendent of the Algona

Following are the appointments in the Algona area, the asterisk indicating change of ministers:

Carl Burgess, superintendent; Andrew, to be supplied; A. N. A. Price; Armstrong, N. A.; Ayshire, Arthur; Rasmussen; Belmond, H. W. Faris; F. F. Robinson; Buffalo; Woden, A. T. Maberry; P. O. Hanson, Jr.; Clarion; Preul, Clear Lake, T. B. Collin; Corwith, G. A. Sheils, Jr.; Doliver - Huntington, C. Lake; Hayfield, Arthur; Emmetsburg, Arthur; *Estherville, to be supplied; F. C. Preul; Forest; C. H. Petersen; Garner, E. Berg, Goldfield, Joy Smith; Pe - Whittemore, R. D. Kit-

Anger, J. H. Miller; Have-ware, J. D. Wolcott; Kana- Moore, Klemme - Liberty; Harvey; Lake Mills, E. B. Lakota - Ledyard, E. J. Laurens, H. O. Ward; Lu- Livermore, R. P. Phillips; - Curlew, H. A. Walker; R. A. Grigsby; Prairie Cen- B. Mitchell; *Renwick-Har- W. Neal; *Rowan-Latimer; applied, *Ruthven, P. P. *Swaedale - Burchinal, to ned

City - Grant, W. G. Bohl; A. B. D. Jones; Thompson- W. E. Ellison; Titonka- L. Patterson; Wesley- J. A. Riggs; *West Bend- T. L. Paul.

Harvey Returned Here

Herschel E. Harvey, pastor of Klemme-Liberty churches for the past two years, was return-

ed from Alaska, where he has been Sanborn for the past two years prior to that time served Klemme-Liberty churches for the past two years.

Mr. E. Whyte, another Klemme pastor, remains at Klemme where he has served for years.

There were not a great many made in the conference

ST. CHURCH HAS NEW BULLETIN BOARD

The bulletin board has been in the front of, and to the improvement is made to match the church, both in height and will be lighted.

Mr. and Mrs. W. J. Anderson will be ready for the Fiftieth Anniversary of the church on Octo-

To the People of this Community: PLAIN WARNING TO YOU!

Here is a plain warning to you...

"This war will last until 1949 or longer if the home front fails to back up our men in battle!"

WAR! Knox, Secretary of the Navy.

Buying War Bonds to the point of temporary personal sacrifice is the most direct way you can comply with Secretary Knox's appeal.

"Temporary sacrifice" is the correct phrase because you are only lending your money when you buy War Bonds. This government which never has defaulted on an obligation will pay you back \$4 for every \$3 invested if you hold the bonds for 10 years.

The least you can do is to back the attack with War Bonds today. Buy extra Bonds above your normal Bond buying.

THE EDITOR

HERB PLAMBECK TO HEAD PROGRAM FOR HANCOCK FARM BUREAU DAY

An important feature of the Hancock County Farm Bureau Day to be held at Britt on Saturday, October 2, will be an address by Herb Plambeck, W. H. O. Farm News Editor. Family picnics will also be an important event of the day.

Following is the tentative program that has been arranged:

9:00 a. m. to 12:00 noon - Sports Events

12:00 to 1:00 - Picnics

1:00 to 1:30 - Band music and the entertainment

1:30 to 2:30 - Herb Plambeck

2:30 - Completion of sports events

In case of bad weather, the program will be given in the school house at Britt.

FRIENDS OF SCOUTING CAMPAIGN SET FOR FRIDAY IN KLEMME

The annual "Friends of Scouting" Campaign will be held here Friday of this week.

Several teams will be organized to call on the people of Klemme for funds to carry out Scouting in this area.

Scouting is a cause that deserves your financial support, so be ready with your contribution when a solicitor calls.

In the Klemme Troop there are sixteen boys. Four new Scouts have joined since the last registration. All boys in the community may receive the benefits of Scouting if they so desire.

The Scouting program is designed to build good citizens and good character. A dollar invested today in Scouting is an investment for the good of the future.

W. S. C. S. MEETS OCT. 7 AT METHODIST CHURCH

The W. S. C. S. of the Klemme Methodist Church will meet on Thursday afternoon, October 7th at the church parlors.

Mrs. Frank Ward will be in charge of devotions and Mrs. Sandy will have the lesson.

Mrs. R. A. Jorgenson, Miss Leona Lau, Mrs. C. C. Kilgore and Mrs. Henry Busse are on the serving committee.

HOME PROJECT OPEN MEETINGS TO BE HELD

Home Project open meetings for the vicinity of Klemme will be held as follows:

Friday, October 1, 2:00 p. m., Ell and Liberty townships at the home of Mrs. W. J. Anderson.

Thursday, October 21, 2:00 p. m., Avery and Twin Lake townships at the home of Mrs. V. A. Cook.

THE CHALLENGE

Los Angeles Examiner U. S. Treasury Department

Hancock County Behind In Third War Loan Drive

Federal Reserve Reports indicate that Hancock County residents have purchased less than one-half of their bond quota in the 3rd War Loan as of September 28.

Kossuth, Cerro Gordo, and Wright counties have already gone over the top. Can it be that Hancock County residents are less patriotic?

Bank deposits show a half million more money in Hancock County banks than six months ago. This is an appeal to each citizen individually to come through by Saturday, October 2 with another bond purchase. Let's get Hancock County out of the shameful position with relation to surrounding counties. Hancock County servicemen the world over are watching our "Back The Attack" record. Are we going to be found wanting?—War Finance Com.

Hancock County's quota is \$751,000. Up to Tuesday morning bond sales had only reached \$282,000. Bond sales at Hancock County banks up to Tuesday were: Hancock County National Bank, \$81,000; First State Bank, \$70,000; Farmers State Bank, Kanawha, \$50,000; First National Bank, Klemme, \$46,000; State Savings Bank at Goodell, \$35,000. Total for county: \$282,000.

ELWYN JACOBS ON SIMPSON COLLEGE FOOTBALL SQUAD

Elwyn Jacobs, son of Mr. and Mrs. Ed Jacobs of Klemme, is on the Simpson College football squad at Indianola, Iowa.

Elwyn is listed with eight other freshmen on the "Redmen" squad. Only one veteran of last year remains. The "Redmen" will open their season on October 15th with Cornell College at Mount Vernon. A return game will be played with Cornell on the Simpson Field on October 30th. This will be the annual home-coming day.

Supervisors Purchased Weed Killer For County

The Board of Supervisors last Thursday received a shipment of 7½ tons of weed killer to be used for destroying weeds in the county.

HELLO, FOLKS!

Mr. and Mrs. Wm. Neuberger are the parents of an 8 pound 8 ounce baby girl born to them on Friday, September 23, 1943, at the Mercy hospital in Mason City.

Mr. and Mrs. Clarence Trampel are the proud parents of a baby daughter born to them at the Mercy hospital, Saturday, September 24th, 1943. The little miss tipped the scales at 6 pounds.

Employed In State Savings Bank At Goodell

Mrs. Francis Dahlstrom of Mason City, daughter of Mr. and Mrs. Chris Back of Klemme, began work last week in the State Savings Bank at Goodell. She will reside with her parents on their farm south of Klemme.

What You Buy With WAR BONDS

Booby Trap Detector

In the snow, in the sand, on the beaches, on the roads, in the woods, everywhere the Axis soldiers hide "booby traps," to slow the movement of oncoming fighting men of the United Nations. The detector does the same work on land as the mine sweeper does at sea.

Like buying War Bonds, the soldier operating the detectors will never know just how much they have aided in the success of their campaign, but he knows his work is necessary and must be accomplished. If more Americans on the home front will come to realize this, the success of our War Bond campaigns will be assured.

September Term Of Court Has Only A Few Cases

Our Men In The Service

KENNETH KLUCKHOHN HOME AFTER TWO YEARS AT SEA

Kenneth Kluckhohn, F. C. M. 3-c son of Frank Kluckhohn, arrived in Klemme Friday from the West Coast to enjoy a few days at home while his ship is in port.

Kenneth has been in the Navy for two years and nearly all of that time has been at sea, in the Pacific where things were far from being quiet.

"Kenny" enjoys his work, however, and says it is very interesting. His job has to do with figuring the range and firing of the big guns on his battleship.

Although he has about a 28-day furlough, most of the time is consumed in traveling, so "Kenny" will be on his way back to his ship as we go to press.

SGT LEON LEMKE GRADUATES FROM TANK SCHOOL

Fort Knox, Ky. (Special) Another class of skilled tank mechanics, trained to keep the big General Sherburnes, General Grants and their little brothers, the light tanks, rearing into combat, had been graduated today from the Armored School Tank Department.

Graduates, announced from the offices of Maj. Gen. Alvan C. Gillem, Jr., Chief of the Armored Command, included Sgt. Leon Lemke, son of Mrs. Daisy Lemke of Klemme, Iowa.

During their training in the tank department the soldier student worked with the same tools issued to field crews and under the conditions they are likely to encounter in the field. They studied the mechanisms of the various tank from track to turret, tearing them down to learn how to keep them moving in combat.

The Armored School, one of the largest technical institutions in the world, is commanded by Brig. Gen. Joseph A. Holly. It graduates many more students each year than the largest civilian universities or colleges.

Garland Brinkman, U. S. Navy Sea Bees, came last Thursday to spend a week's furlough visiting with his parents, Mr. and Mrs. Martin Brinkman. Garland will return this week Thursday morning to his base at Camp Dickinson Rhode Island.

DONALD SCHAEFER IN NAVY TRAINING SCHOOL

Donald J. Schaefer, A. S., son of Mr. and Mrs. Roy Schaefer, who became the third member of the Schaefer family to join the Navy a couple of weeks ago, is now stationed at Farragut, Idaho.

Donald's address is: Donald J. Schaefer, A. S., Company 780 - 43, U. S. N. T. S., Camp Bennion, Farragut, Idaho.

Mr. and Mrs. George Buseman have received word that would indicate their son Wayne is now overseas.

Pvt. Henry Emmons, U. S. Army Air Forces base at Dodge City, Kansas, enjoyed a couple of days' furlough last week visiting with his wife and baby at the home of her mother, Mrs. W. L. Sherwood at Goodell.

Buy a bond before Friday.

JUDGE M. H. KEPLER PRESIDES IN HANCOCK COURT

September Term Began Monday With A Light Docket

The Hancock County District Court convened for the September term at Garner Monday, with the Hon. Judge M. H. Kepler of Northwood presiding judge.

Only 10 new cases have been listed for this term, all civil cases. A year ago 28 cases were listed for the September term.

The Grand Jurors reported for duty Tuesday, but the Petit Jurors will not report for duty until Oct. 5th.

The new cases listed are: Nickol C. Vaage vs Norma Vaage, divorce; Gladys Paulson vs Lester Paulson, divorce; Hattie Homes vs. Sidney Homes, divorce; Galloway Co. vs. Eise Sluk, suit on conditional sales contract; Tomlinson Lumber Co. vs. Hugh Jones, suit on account; Nellie Emerson vs. Rachel B. White et al, quiet title action; Rush Gabrielson vs. Bankers Mutual Life Co. et al, suit on insurance policy; L. M. Holland vs. Hugh Jones, suit for balance on a truck; Mary C. Reeser, administrator of the estate of Laura M. Williams vs. Chester R. Williams and Ethel Williams, suit on note; Dolia Baumgartner vs. Mac Schneider et al, partition case.

Two cases are noted for trial: Gladys Paulson vs. Lester Paulson and Hancock County Cooperative Oil Association vs. Wesley Alden, promissory note suit.

MORE HANCOCK COUNTIANS WILL ENTER SERVICE OCTOBER 7 AND 9

The following men who were at Camp Dodge Sept. 16th receiving examinations for service in the U. S. Armed Forces, will report for active duty on October 7th:

Herbert D. Diekhuis, Jr., Garner. Larry E. Fox, Britt. Roy S. Swanson, Kanawha. John F. Millard, Garner. John E. Sanford, Kanawha. George L. Tanner, Garner. Dale C. Welsh, Britt. Tom D. Iger, Kanawha. All of the above will enter the army training camps.

The following men will report for Naval training: Donald L. Dunfee, Corwith. Lester Regness, Forest City. William Conrad, Kanawha. Forrest T. Gilmore, Corwith.

Armour Mullin, Klemme, was assigned to the Army and will report October 9th. Robert Kimball, Klemme and George Schamber report for Naval training, October 9 and Dean Goll of Garner will enter the Air Corps and is awaiting call.

SCHEDULE MEETING TO PLAN GIRLS' 4-H PROGRAM

Members of the Hancock County girls' 4-H committee, local leaders and county officers will meet October 6 to plan their 1943-44 activities. Miss Hazel Grimes, county extension home economist, and Mrs. Edith Barker, in charge, Girls' 4-H clubs from Iowa State College, will work with the group.

The county club committee will meet at 10:30 a. m. at the Farm Bureau office in Garner. In the afternoon, leaders, assistant leaders and county officers will join the group to make plans for year-round club work.

The group will try to plan a well-balanced program for the 4-H girls.

In addition to the main home economics project, the program will again emphasize gardening, food preservation and poultry-raising. Health, citizenship discussions, music, parliamentary practice and recreation also may be included for various clubs.

SUBSCRIPTION RATES:
In Hancock and Adjoining
Counties per year in advance \$1.50
In Iowa, per year in advance \$2.00
Outside of Iowa, per year \$2.50

All subscriptions for papers going to
points within the county (and adjoining
counties) are considered continuing
subscriptions to be discontinued only upon notice from subscribers.
All other subscriptions will be discontinued
at the expiration of the term for which they
were paid. Payment will be extended if
arrangement is made by the subscriber.

MODERN HINKY DINKY SONG
SLAPS AT THE AXIS

Back in 1917 and 1918 world war
soldiers were singing the familiar
"Hinky Dinky Parlez Vous," at the
tip of their voices.

At the recent American Legion
Convention in Omaha, the new
streamlined version of the old
song was introduced. And once it
got started, this is what they sang:

"Hinky dinky not so well, parlez
vous.

His navy had a sinking spell, par-
lez vous.

At Midway Island he had his
chance.

He lost his face when he lost his
parts—

Hinky dinky parlez vous.

Germany's got to bur-
n—

We liked him once but he
couldn't learn, parlez vous.

For now we've got to take Berlin
To put his nose in the mess we're
in—

Hinky dinky parlez vous.

Mussolini cooked his goose—
parlez vous.

He proved he's just a dirty duce,
parlez vous.

Our bombers punctured his bag of
gas.

Then Italy kicked his—shins—
Hinky dinky parlez vous.

"More bad news for the Japen-
ese—parlez vous.

Our fleet's the biggest to sail the
sea, parlez vous.

With 14 thousand ships of war
We're going back to Corregidor—
Hinky dinky parlez vous."

Susan Habercamp Celebrated
Birthday With Her Daddy

Susan, daughter of Mr. and Mrs.
Wm. Habercamp who reside on
their farm north of Klemme, was
one year old Sunday and her
daddy was fifty-two years young
on Monday and that event called
for a celebration and a birthday
dinner. Mrs. Habercamp baked a
nice birthday cake and decorated
it with candles. 5 candles around
the edge for Susan, and two large
ones in the middle for Mr. Haber-
camp. 5 and 2 makes 5 for Susan
and 52 for daddy.

Of course Susan's little sister had
to help blow out the candles!

WHERE CAN I GET A NEW
FURNACE?

If your present furnace is
beyond use or repair, you
can still buy a new Green
Colonial—the same type,
the same highest quality
furnace built before the
war.

District No. 14, Hancock County,
Iowa, to C. R. I. & P. Railroad, and
TO WHOM IT MAY CONCERN

You are hereby notified that on
June 29, 1943, J. Howard Cozine,
et al. filed a petition requesting
that the open ditches of Drainage
District No. 14, Hancock County,
Iowa, be cleaned to grade.

You are further notified that
Wm. Henschen was appointed En-
gineer on July 2, 1943, to make an
investigation and report and did on
September 11, 1943, file his report
and does recommend that the
cleanout petitioned for by J. How-
ard Cozine, et al. be made as pray-
ed.

Said report is now on file and
may be amended at any time be-
fore final action is taken thereon
by the Board of Supervisors of
Hancock County, Iowa, acting for
and in behalf of Drainage District
No. 14 and the 8th day of Novem-
ber, 1943, at the hour of 1:30 P. M.
is a date set for hearing thereon
and hearing to be held at the
Courtroom in Garner, Iowa.

All objections to said improve-
ment as set out in the petition and
commented in the report of the
Engineer, and all claims for dam-
ages must be in writing and must
be filed in the office of the County
Auditor at or before the time
set for the hearing thereon.

The foregoing notice is publish-
ed by order of the Hancock County,
Iowa, Board of Supervisors in
accordance with a resolution ad-
opted on September 13, 1943, and
in accordance with sections 7440
and 7441, Code of Iowa, 1939, and
amendments thereto.

Please take notice and govern
yourselves accordingly.

Witness my hand and official
seal this 16th day of September, 1943.

FRED C. MISSAL,
County Auditor

(S. E. A. L.)
(Publish Sept. 22-29, 1943.)

Hancock County
Board Proceedings

1ST ADJOURNED SEPTEMBER
MEETING

Garner, Iowa
September 21, 1943

The Hancock County Iowa, Board of
Supervisors met in session on above
date with F. J. Schoun, John Cham-
bers and Penn Eckels present.

The minutes of the last meeting
were read and approved as read.

Supervisor Schoun is appointed a
committee to investigate and cause re-
pairs to be made in D.D. 102.

Resolution requesting Transfer of
Farm to Market Road Funds

WHEREAS Under the provisions of
Chapter 240 I. Code of 1939, there
have accrued to Hancock County's al-
lotment of the farm-to-market road
fund certain sums which are not re-
quired to match Federal aid nor re-
quired to pay for road projects her-
etofore requested by the board of super-
visors.

NOW THEREFORE, Be It Resolved
by the Board of Supervisors of Han-
cock County, Iowa

That we hereby request that the
sum of \$1,000 (Seventy-One Thousand
Dollars) be transferred from Han-

cock County's allotment of the farm-
to-market road fund to the special sec-
ondary road construction fund of said
county.

That the said funds when received
by Hancock County shall be placed in
a special secondary road construction
fund.

That said funds shall be used to
pay for the following special secondary
road construction projects:

F. A. S. 795 Grading, surfacing and
bridging 9 miles of the Hutchins Wood-
en road. Estimated cost \$40,000 (Forty
Thousand Dollars). Starting at the SW
cor. of Sec. 27-96-26 thence north 9
miles to the NW cor. of Sec. 15-97-26.

F. A. S. 796 Grading, surfacing and
bridging eight miles of the Miller
Crystal Lake road. Estimated cost
\$31,000 (Thirty-One Thousand Dollars).
Starting at the SW cor. of Section 15-
97-25 thence east eight miles on the
section line to the SE cor. of Section
14-97-24.

Passed and approved this 21st day
of September, 1943.

On motion and second the Insurance
policies, contracts and bonds of the
depositories for text books The F. W.
Zelger Drug Company of Garner and
the Nissen Drug Company of Britt,
are approved.

On motion and second the Board ad-
journe to October 4, at 9 o'clock A. M.

ATTEST
Fred C. Missal, County Auditor
F. J. Schoun, Chairman

THREE DIFFERENT TYPES
OF FIRE EXTINGUISHERS

Farm people who wish to install
a chemical fire extinguisher have
their choice of several different
types. Harold Beaty, Iowa State
College extension agricultural en-
gineer, points out that each has its
particular field of usefulness.

The soda-acid extinguisher is
effective when the fire is on wood,
paper and other ordinary combus-
tible materials and has not gained
serious headway, or in any case
where the cooling and quenching
effect of solutions containing large
percentages of water is very im-

portant. It is not effective on fires
in greases and liquids where a
blanketing extinguisher effect is
needed.

The carbon tetrachloride extin-
guisher is effective when the fire is
in electrical equipment and on
small quantities of liquids and
greases where the gas formed by
heating of the extinguishing liquid
can smother the fire. It is not ef-
fective on fires in which the cooling
and quenching effect of water is
quite important.

The foam extinguisher is effective
not only on fires where the cooling
and quenching effect of water is
necessary, but also on fires in
liquids and greases where the
smothering effect is important.

REGISTER FOR KINDERGARTEN
MONDAY, OCTOBER 4

Supt. Leo Esbeck requests that
parents register their children for
Kindergarten on Monday, October
4th at the Primary room at 3:00 p.
m.

Kindergarten will begin October
25th.

Ole Peterson, Britt, Appointed
Registrar for Three Townships

Ole G. Peterson of Britt has been
appointed registrar of vital statis-
tics in Erin, Britt and Othel
townships to succeed Earl Hesley
who resigned to enter service in the
U. S. Navy. Mr. Hesley was em-
ployed at the News-Tribune office.

How to Heat Your Home With Less Fuel This Winter

—V—
To insure the health and comfort of your family . . .
and to use less of America's fuel supply . . . take these 4
steps right now:

1. Inspect and adjust heating equipment.
2. Insulate roof or attic.
3. Install Storm Windows and Doors.
4. Weatherstrip and seal air leaks around the doors and windows; caulk all cracks around window and door frames.

FREAK LIGHTING
Lighting that struck in the corn field belonging to Harry Calhoun, near Chariton, damaged only one hill of corn. One stalk of corn was cut off about 30 inches from the ground; one stalk had burst and the other was stripped of its leaves.

Finishing hogs at lighter weights helps conserve feed

Last year civilians used 30 million pounds of soybean products.

BETTER IOWA GARDENS

It is not too late to start next year's garden. Now is the time to take stock of the past season's experiences and use them as a basis for planning next year's activities. This year many gardeners learned by bitter experience that potatoes are sensitive to poor drainage of soil. Gardeners who suffered considerable damage from rot will want to heed the warning that potatoes should be planted on higher, well drained ground next spring.

Arrangements should be made now to have garden areas plowed this fall. Sodded areas above all others should be fall plowed.

It is not too late to insulate an existing small basement room in the town or city home so that garden produce may be stored satisfactorily. The room should have a window for ventilation. If it is in the corner of the basement insulation will be needed only for the ceiling and two walls next to the furnace room.

Rock wool or balsam wool batting are insulation materials that may be used. The batting can be nailed on in a few hours' time, and the total cost will be only a few dollars. A properly insulated room can be kept cool enough to store carrots, beets, potatoes, parsnips and other garden crops.

A sudden change of weather in the fall usually means sudden harvesting of vegetables. To prevent their freezing, vegetables can be sheltered temporarily by placing them in the barn and covering with straw or hay. Or, they can be placed in the garage and covered with a tarp. Time must be taken later to sort out all injured immature or diseased vegetables, only those that are sound should be stored.

It is well to give vegetables and fruit storage rooms a thorough cleaning and disinfecting before fresh garden products are placed in them this fall. Spraying with a solution of copper sulfate or blue-stone. Use 1 pound of the chemical dissolved in 15 gallons of water.

Edible soybean plants may be pulled and taken indoors to cure further as soon as they have lost their leaves and the pods have

turned brown. If the plants are left in the ground too long, they will shatter their seeds on the ground.

Dry soybean seeds stored over winter will not be subject to damage by bean weevil. Weevils will not develop in other beans stored in a cold place all winter. However, weevils will attack when warm spring weather arrives.

PRICE CEILING ON LIVE HOGS OCT. 4

The New Price Policies Mean Marketing Should Be At Lighter Weights

October 4 is the date that price ceilings on live hogs are scheduled to go into effect. The price ceiling is \$14.75 per hundredweight, Chicago basis.

That is one of the points which Francis Kutish, Iowa State College extension farm economist, says hog producers will want to keep in mind as they plan their operations for the coming year.

Second is the fact that the support price will be \$13.75 per hundredweight for 200 to 270 pound hogs, Chicago basis, effective until Oct. 1, 1944. Effective Oct. 1, 1944, and until March 31, 1945, the support price will be \$12.50 per hundredweight, Chicago basis, or good to choice butchers weighing 200 to 240 pounds.

Market Lighter Weights

These established price policies mean that there is a need to market hogs at lighter weights. However, this does not necessarily mean that all farmers will have to market their hogs at the same weight. A man who is short of feed might want to market his hogs at 200 pounds, while another with plenty of feed might feed his hogs to 240 pounds.

The 1944 goal of hog production still will be high. Many producers will not have the opportunity to raise as many hogs as they did last spring. There is still need for the efficient producer who has the facilities and can obtain the feed to maintain hog production.

ORIGINAL LAND PATENT

Roy Clapsaddle of Ida Grove has in his possession an original land patent issued from the government to Milton Smith for 80 acres of land in Chicago. The certificate issued by Jacob Clapsaddle is dated February 18, 1846.

VACATION FROM CRIME

For the first time in his six years as sheriff, Ed Hipsley, Page county officer, reported that for one week-end there were no occupants of the jail. Other residents of Clarinda can recall that it is the first time in 15 years that such a vacancy has occurred.

Hog muzzles caused by a mite which lives beneath the skin and causes intense irritation. A portable wallow in which hogs may dip themselves will save labor in controlling the disease. A leaflet entitled "Portable Hog Wallow" which includes a picture and plans for the equipment, can be obtained through county extension directors or from the Agricultural Extension Service, Iowa State College, Ames.

The decrease in Iowa milk production as compared to a year ago is attributed to fewer cows being milked and cows being fed the smallest amount of grain and concentrate since 1938.

We can get too many hogs, economists at Ames warn. The bottom of the feed barrel is in sight. Adjust the fall pig program to fit the feed supplies in sight, facilities and ability to raise pigs, they advise.

Predictions are that farmers may expect a total supply of the principal protein feeds for the 1943-44 feeding year about 12 percent smaller in relation to livestock on farms than for 1942-43.

Hens that have yellow beaks and legs at this time of year have not been doing a good job of egg laying and should be culled. These with white beaks and legs are the heavy layers.

What To Do...

FIRST CLASS OPERATION AND TO AVOID COSTLY DELAY

—V—

SUGGEST THE FOLLOWING CHECK-UP ON COMBINE now before going to the field:

Check cutter bar, sickle and driving mechanism and sickle blades shear-cut on each guard.

Check canvas or drapers for torn edges or holes that will cause rollers to wrap.

Belts, all pulleys and sprockets are apt to get loose. Be sure they are tight.

Check straw racks and take up wood boxes where necessary. See that there are no holes in straw rack chaffer.

This is important for a clean job.

Thoroughly lubricate and run machine empty before field. Above all be sure all exposed take-off gears are guarded. . . . funerals are too expensive and the too busy to be running after you!

—V—

is the time of the year that Tractors freeze

and if you have forgotten water in radiator get it added and drain the radiator as it may be too full in the morning!

MARCH OF TIME

4-H ENROLLMENT WEEK

October 4-9 is Iowa's 4-H Club Enrollment Week. All young people of 4-H age are invited to join the 4-H Club Victory Army for 1943-44.

Rural boys and girls must carry greater responsibilities for good production and conservation than they have carried during the past two years. Meanwhile they will face new situations and problems arising from shortages of wholesome recreation, demands for military service and the general lowering of moral standards in a nation at war.

As leaders working with youth believe sincerely that the 4-H Club provides young people with inspiration and knowledge with helps them perform their tasks. In 4-H Club work, they find opportunities for wholesome recreation and discussion of their problems and responsibilities as young citizens.

These were the ideas expressed at a meeting September 23 of people interested in 4-H work.

The following people with the loyal support of many others have spent much time in the past in directing 4-H work and are making plans for a larger membership and increased interest for the new club year. 4-H County committee members - Mrs. D. E. Keat, Mrs. Lyl Fox, Mrs. C. J. Willie, Mrs. Ruby Schram, Curtis Greiman, Lester Wilhite and Emory Schaefer. 4-H Club leaders - Mrs. C. A. Bird, Mrs. Albert Geddes, Mrs. W. F. Dorrew, Mrs. Ray Baker, Mrs. Emory Weaver, Mrs. Aaron Stromer, Mrs. Irene Marshall, Mrs. Phil Puffer, J. E. Gourley, Howard Reitveld, Rudy Bienert, Lyl Fox, Curtis Greiman, Emory Weaver, Melvin Pearson, Curtis Upmeyer, Harlod Hall, Clifford Anderson and Lester Wilhite.

4-H Assistant leaders - Mrs. Robert Nyman, Mrs. Lewis Formanek, Mrs. Casper Panhoff, Mrs. Will Holck, Miss Bernice Weaver, Miss Lydia Pearson and Mrs. Rogar Schlawn. Pual Steiff, Alvin Swanson, Edwin Theiman, Lincoln Gell, Erwin Moll, Winton Etchen and Ed Greene.

4-H County officers - Clarice Greiman, Helen Formanek, Dean Goll, Marjorie Greiman, Herbert Goll, Donald Greiman and Ronald Bredlow.

Vegetables and fruit can be stored over winter in the basement providing a small room with a window is available. If lumber for two walls can be obtained, a satisfactory room can be built in one corner. Insulate the wooden walls and the ceiling with rock wool.

WEEKLY NEWS ANALYSIS

Nazi Forces Offer Stiff Resistance As Allies Continue Advances in Italy; Russ March Across Northern Ukraine; WFA Announces Control of Milk Sales

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)
Released by Western Newspaper Union.

News of Italy's unconditional surrender was greeted with open jubilation in the garment manufacturing district of New York, with celebrants ankle deep in improvised confetti, etc., as shown above.

ITALY: Battlefield, After All

Italy's unconditional surrender to the Allies did not spare that country from becoming a bloody battlefield in the war.

Trapped all along the Italian boot when the Badoglio government gave up the fight, German forces put up stiff resistance as Allied armies swarmed ashore to occupy the mainland. Bitter fighting occurred near Naples and in Rome, where Germans were reported to have seized control to establish their own puppet regime, in the name of Benito Mussolini.

Meanwhile, Italian service men, told to resist German attempts to prevent them from giving up, appeared divided in their loyalty to the Badoglio government. While Italian soldiers were reported aiding the Allies in the south, the Germans claimed many others were standing by the Axis in the north, where the Nazis planned a last ditch fight along the mountain range of the Po valley.

Escorted by the British navy, three Italian battleships and an assortment of cruisers and destroyers reportedly were steaming for Allied ports in North Africa, there to join in the fight against Germany.

Economic Problem

Though Italy's capitulation was of unquestioned military value to the Allies, its occupation posed difficult economic problems. To Calvin Baldwin of the office of foreign economic co-ordination will go the task of straightening the situation.

First, Italy is deficient in coal, iron and petroleum, though it has quantities of mercury, bauxite and sulphur. Secondly, the country's food production is unbalanced, insufficiencies in grains, meats, fish, oils and eggs offsetting surpluses in fresh, citrus and dried fruits, nuts, vegetables, cheese and rice.

Thus, if use is to be made of industrial facilities, raw materials would have to be brought in; if advantage is to be taken of her peculiar agricultural production, some provision of imports of other foods will have to be made.

RUSSIA:

Regain Resources

Proceeding to shorten their lines in Russia, made more necessary by the collapse of Italy, the Nazis fell back on the Dnieper river, surrendering the vital Donetz industrial basin as they retreated.

Farther to the north, the Germans' withdrawal put Russia in possession of much of the fertile farmland of the Ukraine, famed for its wheat and cotton.

Although the Reds regained access to coal and iron and foodstuffs, the Germans' destruction of the Donetz's factories and their requisition of the Ukrainian harvests deprived the Russians of immediate use of these resources.

In Moscow, a 224-gun salute marked the Russian successes.

CHINA:

U. S. Air Force Grows

The Japanese have sent a new Zero into Chinese skies, one with a higher ceiling and better diving characteristics, but gradual reinforcement of the 14th U. S. Air Force is making it more and more of a threat to the enemy's defensive and economic outpost on the Chinese mainland.

Shipment of Lightning P-38s to the 14th AAF gives Maj. Gen. Claire Chennault a speedy fighter to use in combination with bombers at his command.

Although the 14th AAF has been used in support of Chinese land armies and for pounding Jap communications, storehouses and industrial installations set up in occupied sections of the country, it looms of greater strategic importance as a threat to the Japanese homeland if northern bases are gotten.

AGRICULTURE:

Less Cotton

Continued hot, dry weather causing considerable deterioration in the western portion of the cotton belt, was a contributing factor in the department of agriculture's forecast as of September 1 of a 1943 cotton crop of 11,670,000 bales, 7 per cent below the August 1 estimate.

Lint yield per harvested acre was indicated at 25.7 pounds above the 10-year average, but below the record 1942 figure.

Regions hit hardest according to the department of agriculture, include Texas, where production estimates as of September 1 were 375,000 bales below a month ago; Arkansas, down 200,000 bales; Oklahoma, down 125,000 bales; Mississippi, down 120,000, and Tennessee, down 45,000 bales.

Wheat in Loan

Because farmers are able to obtain more for their wheat on the market than the \$1.28 a bushel advanced on loans by the Commodity Credit corporation, pledges on the 1943 crop approximate half of the total prevailing at this time last year. Then, 94,418,000 bushels were being held by the U. S.

On the 44,355,725 bushels in loan, \$56,964,137 was paid out, the CCC stated. Warehouses held 39,370,000 bushels, and 4,985,459 bushels were stored on farms. Officials estimated that the entire 1943 loan stock would not exceed 200,000,000 bushels.

As of September 8, the government held about 127,000,000 bushels of wheat, and was disposing of 1 1/2 million bushels daily for feed in deficit areas.

RUBBER:

Synthetic Hopes High

If all of the necessary materials going into the manufacture of synthetic rubber can be supplied in 1944, production should approximate 850,000 tons, Bradley Dewey, newly named rubber director, declared.

Even as Dewey spoke, the War Production board ordered 12 major textile mills to devote their facilities exclusively to the fabrication of cotton and rayon tire cords. Previously, the mills had been making cotton duck for the army.

Production of synthetic rubber in September will exceed 30,000 tons, Dewey said, and tires made from the material are equal to all but the top-grade from natural rubber. Next year, a minimum of 30 million tires will have to be made and distributed for essential civilian driving, Dewey added.

CONGRESS BACK:

Studies Draft, Taxes

The question of deferring fathers and of raising an additional 12 billion dollars in taxes confronted congress when it resumed sessions.

Consideration of a proposal by Sen. Burton Wheeler to postpone induction of dads until January 1 loomed in the senate, while Rep. Andrew J. May declared he would offer a bill to not only prohibit drafting of fathers—but also setting a limit on the size of the army.

President Roosevelt's rejections of 12 billion dollars of new taxes to raise total receipts to 50 billions a year is expected to arouse bitter debate in congress over methods for obtaining the money. A sales tax, preferably on manufacturers, a spending tax over certain exemptions, and increased income and corporation taxes have been suggested as revenue sources.

HOGS:

To bring the livestock population in line with feed supplies, the government announced that effective October 1, 1944, it will support prices for good to choice hogs between 190 and 230 pounds at \$12.50 a hundred pounds, \$1.25 less than at present. Under the new program, heavy hogs will not be supported.

Pigs farrowed next spring will be sold under the new regulation. According to the government, prospective feed supplies will justify a spring crop of 61 million pigs.

Washington, D. C.

ALLIED CO-OPERATION BETTER

Officials who have attended all the big strategy powwows—Washington, Casablanca, Washington again, and Quebec—declare that there is progressively better Allied co-operation, and a gradual disappearance of the friction which beset earlier conferences.

In the dark days just after Pearl Harbor, the British were plugging for an all-out war against Hitler, while the U. S. officers, outraged over Pearl Harbor, were out to scalp the Japs.

The decision to swing our weight with the British was made only after President Roosevelt had exercised his authority as commander-in-chief and overruled ambitious U. S. plans for the Pacific.

After that decision, there came disagreement about where to strike in the European theater. U. S. army staff officers argued in favor of a cross-channel operation, but Churchill and the British staff shrank from spilling blood against the steel-and-concrete shoreline of France and the Low Countries.

Instead, Churchill wanted the U. S. army sent to North Africa, to aid in the reconquest of the Mediterranean. Again, Roosevelt supported Churchill against his own military chiefs, but not until after strong debate in the inner councils.

Another issue was the question of aid to Russia and Britain, which U. S. army and navy officers wanted to cut down from the Roosevelt-Hopkins-Churchill estimates. The Russian cause was upheld against all comers by Harry Hopkins, and Maj. Gen. James H. Burns, executive of the munitions assignment board. Burns' favorite remark is, "Those Russians are killing more Germans than anybody else, and they ought to have the equipment to keep up the good work."

The major decisions that have come from all the controversies have now borne favorable fruit. The Mediterranean is cleared, U. S. forces have been tested under fire, landing operations have had full dress rehearsals for the bigger job of crossing the channel, and the Russians are "keeping up the good work."

So when the British and Americans get together now, there is much more warmth than at one time. There still are some friendly differences as there must be when strong men sit down together, and it is reported that U. S. military leaders still chafe at lack of action across the channel. But on the whole, success is making the road easier.

MILK SHORTAGE

Most serious food problem facing the civilian population at the moment is the threatened shortage of milk.

White House farm advisers warn that we will have a very real and acute milk famine on our hands unless the War Food administration and the Office of Price Administration act quickly to adjust the price of feed grain for dairy cattle.

Due to higher feed costs, dairy farmers, especially in the East, are unable to sell their milk under OPA price ceilings and stay in business. Dairy farmers in Pennsylvania and other Eastern states, hard hit by the drought, have been losing as much as \$35 per cow because of lack of pasture. As winter draws on, the pasture problem, plus higher feed costs, will vitally affect milk production all over the country.

So far the War Food administration, under its new chief, Marvin Jones, has done nothing to meet this pressing problem. But unless he does the President will be urged to take matters in his own hands and arrange for feed price subsidies through legislative action. Failing that, he can, by an executive order, provide feed funds from the Commodity Credit corporation.

CAPITAL CHAFF

Adm. Ernest J. King, commander-in-chief of the U. S. fleet, has two residences in Washington—a spacious home at Observatory Circle, and the yacht Dauntless anchored at the Navy yard. The admiral lives on the yacht, and his family lives at the Circle.

After the Ramirez revolt, the Nazis closed down their short-wave efforts to Argentina. But now that Ramirez has proved to be so friendly, the broadcasts have been resumed in full force.

Madame Chiang Kai-shek was very sick on her homeward airplane trip, by way of Africa and India. The pilot said, "The weather was rough as the devil and she was in a pretty bad way. She didn't say a word the entire trip."

SOLDIERS SEE THE U. S. A.

The war department has supplied figures showing the amazing distance which the average soldier travels in the course of training.

From the time of his induction to embarkation, each soldier is transferred six to eight times, for an average distance of 850 miles each time. This makes a total equal to two complete trips across the continent.

In World War I, there was far less troop movement. The average number of transfers was only three.

Walter Winchell

Man About Town:

One of our fightingest Generals was divorced quietly—while serving abroad . . . Mrs. F.D.R. probably will tour the world . . . It's another son for the Douglas ("Wrong Way") Corrigan in Texas . . . Sunny Ainsworth (Mrs. No. 7) cost \$75,000, which is about par for the course . . . Donald Nelson's next stop will be England . . . Ambassador Standley told chums that he "couldn't stand another Russian Winter!" . . . The State Department's next victim, insiders insist, will be ex-Gov. Lehman . . . Gen. MacArthur told some of his staff: "I would rather be the man who marched into Tokyo than be a defeated candidate!"

B. Baruch's "mysterious disappearance" from the Capital worried his friends. The reason he left suddenly: Nurse Higgins, who takes care of him, was stricken—and he rushed her to a New York hospital . . . Prosecutor O. John Rogge of the Dept. of Justice (he knocked out the Huey Long machine) will soon throw his Sunday punch at Berlin. The story will amaze the nation.

Averell Harriman's chief aide, Philip Reed, delivered a speech at a private luncheon the other day—hosted by Jesse Jones in Washington . . . Mr. Reed explained why the U. S. "had to produce more than ever!" . . . Because, he said, Britain has too large an army to produce arms. If we do not produce more—England "will have to reduce her armed forces!" . . . Grover Loening, the plane genius, says a plane that hasn't 25 to 40 "improvements" per month is obsolete . . . Fritz Kuhn's ex-favorite lawyer was just appointed to an important committee of the N. Y. Bar Ass'n.

Mrs. Woodrow Wilson will give the coin she gets from Zanuck (for the film on Wilson's life) to various war charities . . . Several French politicians, who escaped to the U. S., are living in Washington and New York with their mistresses, who were admitted via courtesy diplomatic passports.

Paul Robeson, despite the erratum, sings at camps and naval bases for the men. It was said he couldn't get official permission. Not so . . . The Army is sending fan mail to desk men asking them to state why they shouldn't be replaced by a WAC . . . A diplomatic incident is festering because the daughter of a Mexican consul was refused service in an Austin, Texas, spot.

The newsprint shortage is this acute: One gazette which requested 990 tons—got 19 . . . F.D.R. Jr. had another miraculous escape. Only officer saved in a recent bombing, which killed six officers out of the ship's seven . . . Labor is getting support in high places in the fight to resist drafting of labor . . . Our gov't tipped Moscow that Hitler would invade Russia six months before. Missing the date by one week . . . Gen. Marshall's reappointment was deserved. At 20,000 ft. over the Atlantic, he effected one of the greatest orders in military history.

Newsweek's Hartzell Spence lost his editorship with Yank because of a blast at the American Legion, Sgt. J. McCarthy replaces . . . "The Student Prince" ads quote drama critic Burton Rascoe as follows: "I saw 'The Student Prince' again, and for my money, it is the most completely satisfying of the various operetta revivals" . . . Since when are you paying, Bub?

Sights You Don't See From a Sight-Seeing Bus: The place downtown that tattoos your Social Security number on your chest or arms . . . The real American Indian, long braids, blue trousers, red silk shirt—carrying a cane—on 42nd Street near 5th . . . The new dating spot for uniformed lads and their gals—Father Duffy's statue on Broadway near 47th . . . The quotes from Nazi leaders in Radio City's "This Is the Enemy" exhibit. So fantastic they seem made up, but are real . . . The wolves who loiter around the 5th Avenue Library lions waiting for the lambs . . . The Greenwich Village cafeteria with tables reserved for Village eccentrics—so others may enjoy the nightly "show" they put on . . . The lovely trees in Washington Square—which once served as gallows.

The FBI is working on the case of Herbert Moy, born in New York, who now broadcasts for the Japs in Shanghai. He left here in 1932 . . . Patricia Lockridge, popular Girl Friday for Elmer Davis, will shelve her OWI job to join the staff of the Woman's Home Companion . . . Almost 40 per cent of the men who are shot down are saved by your nylon hosiery parachutes, girls . . . When inner circleers want to discuss the President (without eavesdroppers getting hep) they call him "Mr. Cook."

Blind Man's Baseball Has Cables to Guide Players

A baseball game played by the blind has only five men on a team—pitcher, catcher and three basemen—and the "ball" is a three-inch metal ring strung on a waister's box almost to second base according to Collier's. When the batter strikes the pitcher ring, the basemen, standing in line behind the pitcher, try to grab and shoot it back to the catcher.

For instance, if the ring passes the first baseman and the second baseman catches it and returns it to the plate before the runner reaches second, a one base hit is made. A home run is scored when all three basemen miss it.

The diamond is also enclosed by a cable to guide the players to the bases, which are run clockwise.

In the Navy a floor is a "deck," doors are "bulkheads," down stairs is "below," and a cigarette is a "Camel." At least, Camel is the favorite cigarette among Navy men, as it is among men in the Army, Marines, and Coast Guard. (Based on actual sales records from service men's stores.) And a carton of Camels is a favorite gift. Though there are now Post Office restrictions on packages to overseas Army men, you can still send Camels to soldiers in the U. S., and to men in the Navy, Marines, and Coast Guard wherever they are.—Adv.

HARSH LAXATIVES UNNECESSARY?

Millions Find Simple Fresh Fruit Drink Gives Them All the Laxative Aid They Need

Don't form the habit of depending on harsh, gripping laxatives until you've tried this easy, healthful way millions now use to keep regular.

It's fresh lemon juice and water taken first thing in the morning—just as soon as you get up. The juice of one Sunkist Lemon in a glass of water. Taken thus, on an empty stomach, it stimulates normal bowel action, day after day, for most people.

And lemons are actively good for you. They're among the richest sources of Vitamin C, which combats fatigue, helps resist colds and infections. They supply vitamins B₁ and P, aid digestion and help alkalize the system.

Try this grand wake-up drink 10 mornings. See if it doesn't help you! Use California Sunkist Lemons.

Clean Soldiers
The average American uses one and one-quarter pounds of soap per month. Our soldiers are supplied with two and one-half pounds.

Olivia de Havilland, star of the Warner Bros. picture, "Strawberry Blonde," recommends Calox Tooth Powder for teeth that shine.

SNAPPY FACTS

ABOUT RUBBER

If authorities prove to be correct, post-war tires may give 75,000 or more miles of service. Super-tough rayon, nylon or improved cotton carcass will help to make this mileage possible.

Army raincoats formerly containing 40 per cent crude rubber now are made almost entirely of synthetic resin and oil-treated material. Crude rubber content of boots and overshoes has been cut about 40 per cent.

A complete armored division on the road has 13,488 tires in use, not counting spares and reserve supplies.

HIGHLIGHTS . . . in the week's news

HANDICAPPED: Physically handicapped civilians can now receive federal assistance for surgery and hospitalization, as well as any special training that may be necessary to render them capable of self support. The funds are provided through the Social Security administration, Paul McNutt, administrator, announced in revealing details of the program.

WAR PRISONERS: About 1,200 American servicemen are held in Italian prison camps. These men will probably be released soon, as a result of the Italian unconditional surrender.

SHIPPING: American shipyards have completed and delivered more than 20 million tons of merchant vessels since Pearl Harbor, December 7, 1941, the OWI announces.

Mr. and Mrs. Kermit Schlei and baby son, Daryl, were dinner guests Sunday at the parental A. R. Hackley home at Clarion.

Rev. and Mrs. Wm. Zablika visited at the Elmer Arnold home on Monday morning on their way to Sanborn from the conference.

Larry Van Syock had his tonsils removed at the University hospital at Iowa City last week, but has returned home again.

The Barz relatives in this community held a family gathering and picnic dinner at the Klemme Park Sunday.

Daryl, the baby son of Mr. and Mrs. Kermit Schlei was brought home from the hospital at Mason City, Saturday. He is now gaining nicely.

The Griffen and Lange families enjoyed a picnic dinner Sunday at the R. V. Upmeyer farm home northwest of Klemme. About forty relatives were present.

Rev. and Mrs. Wm. Zablika, of Sanborn, Iowa, visited overnight Sunday at the Dr. D. P. Anderson home. They spent Monday visiting with old Klemme friends.

Mrs. Mary Waterman returned Sunday evening from Clarion where she spent several days the past week visiting with relatives and friends.

Miss Lyle Wilcox, daughter of Mr. and Mrs. C. G. Waterman, had her tonsils removed at the Mercy hospital at Mason City Monday morning.

Mr. and Mrs. John Day went to Sioux City Saturday afternoon and returned home Monday evening after visiting with Mr. and Mrs. Donald Nissen.

Einar Salling, who is staying at Ringsted for a few weeks, was in Klemme on business Thursday. Mr. and Mrs. Salling expect to drive to California soon where they will make their future home.

Mr. and Mrs. Charles Parson and Mrs. John Kelleher of Davenport were visiting at the home of Mr. and Mrs. Kermit Schlei Saturday. Mrs. Parson and Mrs. Kelleher are sisters of Mrs. Schlei.

Mr. and Mrs. Henry Jost and Diana, and Mr. and Mrs. Fred Nagel drove to Dougherty Monday for a visit at the Adriant Bielefeld home and to see the Bielefeld boy who was home on a furlough.

Lila Ruth Wessels of Belmond was a week end house guest of Miss Evelyn Arnold at the E. J. Arnold home. Miss Eloise Etchen visited at the Arnold home on Sunday.

Mr. and Mrs. Conrad Quandt returned home Friday from Utica, Illinois, Friday. They were called to Utica by the death of Mrs. Geo. Quandt, sister-in-law of Mr. Conrad Quandt.

Mrs. C. A. Arnold and Miss Minnie Lenz left Tuesday morning for Watertown, South Dakota for a visit with their brother-in-law and sister, Mr. and Mrs. Adolph Ridder. Mrs. Ridder has not been well lately.

Buy a bond before Friday.

Ira Overholt spent Thursday in Fort Dodge as a delegate from the Klemme - Liberty Methodist churches at the Northwest Iowa Methodist conference. A number of local people attended the Conference on Sunday.

Sunday dinner guests at the home of Mr. and Mrs. Harry R. Gibbs included Mr. and Mrs. Henry Kuppinger, Mr. and Mrs. Otto Meier and children and Miss Harriett Gibbs, all of Mascoutah, and Mrs. C. A. Arnold of Klemme.

Cpl. Jack Hubbard from the medical corps at Fort Riley, Kan., came last week to spend a 15 day furlough visiting with his parents at Goodell.

Mr. and Mrs. W. F. Pavey, Mrs. John Clements, Peggy Coobs and Dorothy Ellingson drove to Webster City Sunday for dinner at the Wayne Pavey home. Little Carol Ann Pavey, who had spent a week here with her grand parents, returned to Webster City with them.

Rev. Harold Knight and three children of Goodell, spent the past week in Lovilla with Mrs. Knight's parents, and at Albia with Rev. Knight's mother. Rev. Knight has been returned to the U. B. Church at Goodell to serve as pastor for his 4th year.

Those from Klemme who attended the Northwest Iowa Conference at Fort Dodge Sunday included: Mr. and Mrs. Ira Overholt, Mr. and Mrs. J. A. Chambers, Mr. and Mrs. Ben Coobs, Dr. and Mrs. D. P. Anderson and Neva Ann, Mr. and Mrs. T. C. Nelson, Mrs. H. E. Harvey, Elwood and La Nell.

AUXILIARY MEETING
OCTOBER 5
The American Legion and Auxiliary will meet at the hall on Tuesday evening, October 5th.
Mr. and Mrs. Frank Ward and Mr. and Mrs. Henry Ward are on the serving committee.

Mr. and Mrs. C. G. Waterman and daughter, Mrs. Lyle Wilcox, and Mr. and Mrs. R. A. Jorgenson were dinner guests Sunday evening and spent the afternoon at the Mrs. Mary Mutch home at Grundy Center where they visited with Mrs. A. H. Dulmes and son Dick, and Miss Ada Mutch. Dr. Dulmes is in service with the U. S. Army somewhere in North Africa.
Buy a bond before Friday.

Mr. and Mrs. Emil Beier closed a deal Monday for the Mrs. Caroline Schlawn residence property one block south of the post office. Mr. and Mrs. Otto Schlawn and Grandma Caroline Schlawn are moving to Garner this week when Otto has purchased a house. They understand Mr. and Mrs. Beier expect to remain on the farm for time before moving to town.

KLEMM GOODELL GARNER VENTURA

Methodists Will Celebrate 50th Anniversary Sunday, Oct. 10

Rev. HARRY E. WHYTE WILL TEACH SERMON SUNDAY MORNING HERE

Rev. Harvey A. Nelson Will Give The Evening Address

The members and friends of Methodism in Klemme and Liberty will meet next Sunday, October 10, in a carefully prepared program to celebrate the past fifty years of Methodist history in this community.

The first religious services were held at the home of Sebastian Ell in 1871 when Rev. Wm. Koerner, a circuit rider called at the farm home. This event marked the beginning of German Methodism in Hancock County.

In 1893, under the leadership of F. H. Wellemeyer, the German Methodist Church was built in Klemme. The English Methodist Church was built in 1895 during the pastorate of Rev. C. E. Anderson. Both churches were merged during the pastorate of Rev. A. W. Berger in 1923, and the new building was erected in 1930 while Rev. Harry E. Whyte was pastor.

Historical booklets have been compiled, which will be given out as souvenirs at the services Sunday morning.

Program For Sunday

The program for Sunday, October 10, and Monday, October 11th as planned by Rev. H. E. Whyte is as follows:

SUNDAY
Sunday School at 10:00 a. m.
Worship Service at 11:00 a. m. with Rev. Harry E. Whyte, Ida Grove, preaching.

Fellowship basket dinner for all at noon. Farmers bring chicken.
Service of Reminiscences, 2:30 p. m. Rev. F. Earl Burgess, District Superintendent, preaching.
Evening worship at 8:00 o'clock with Rev. Harvey A. Nelson preaching.

MONDAY
Breakfast Supper at 6:30 for all who wish to come.
Evening Worship at 8:00 o'clock with Rev. J. M. Howdeshell, preaching.

The local choir will furnish musical music in all these services. There are no services at the Liberty Church on Sunday, all the members from there are invited to attend the services in Klemme.
Souvenirs with the Historical Booklet and the complete program on the occasion will be given to the family who attends.

BIRDY BIRDS

Fifty pupils of Alice Condon in Liberty entered a contest making bird houses. The birds were made of such things as corn, pine, weeds and corrugated yarn. Lorenzen won first prize with 50 birds were entered.

EARLY METHODIST CIRCUIT RIDER

REV. F. H. WELLEMAYER

WILL SPEAK HERE SUNDAY

REV. HARRY E. WHYTE

"BILL" JOHNSON WILL HOLD PUBLIC AUCTION, MONDAY

J. W. "Bill" Johnson is this week using the columns of The Klemme Times to advertise a closing out sale at his farm 4 1/2 miles southeast of Klemme.

Mr. and Mrs. Johnson are retiring from their farm and so will sell their livestock and machinery on Monday, October 11, beginning at 1:00 p. m.

Turn to the big sale ad for complete list of property to be sold by Auctioneer B. A. Reemtsma. The First National Bank will clerk this sale.

MISS EVELYN R. HAVLIK IS BRIDE OF PFC. HAROLD CHRISTIANS

Miss Evelyn R. Havlik, daughter of Mr. and Mrs. Paul Havlik of northeast of Klemme and Pfc. Harold E. Christians, son of John Christians of near Klemme, were united in marriage on Saturday, September 18, 1943, at Montgomery, Alabama, the Rev. H. Wells, pastor of the First Baptist Church officiating, using the single-ring rite. The couple were attended at the altar of matrimony by Mrs. Wm. Wilson of Garner, sister of the groom, and Corporal Wilson Ruhe of Camp Ruckner.

The bride was attired in a dress of pink shark skin with white accessories. Her attendant wore a dress of aqua blue silk. Both the bride and Mrs. Wilson wore a corsage of gardenia with pink and white baby roses.

Mrs. Christians graduated from the Ventura high school with the class of 1940 and since that time has been with her parents on the farm, where she has now returned for the present.

The groom completed his rural school education and farmed until he was called into service in January of 1942. He is stationed at the army post at Camp Ruckner, Ala.

THADA'S STORE BEING REMODELED, MODERNIZED

The Thada Store is pretty well torn up this week and business is being conducted under a handicap while fixtures are being remodeled and re-arranged in the Grocery department.

The old, high-shelf fixtures are all being taken down and are being replaced by low, broad shelving and display "islands." The arrangement of the grocery store is also being changed.

After the grocery department has been completed, Mrs. Thada states that the dry goods and ladies ready-to-wear section will also undergo a change in appearance.

Iowa's honey crop this year is not a bumper crop, but it is unusually good quality, reports F. B. Paddock of Iowa State College.

THE PEOPLE OF HANCOCK COUNTY HAVE NOT "BACKED THE ATTACK!"

—V—

They have not purchased their quota of WAR BONDS! Hancock County is one of seven who have failed to make their quota in the State!

DOES THIS MEAN THAT THE PEOPLE OF HANCOCK COUNTY ARE NOT BEHIND OUR BOYS AT THE FRONT?

There will be a PATRIOTIC RALLY in all towns in Hancock County on SATURDAY NIGHT, OCTOBER 9th, and YOU will have an opportunity to BUY BONDS at the banks or bank offices in YOUR HOME TOWN.

SHOW YOUR PATRIOTISM
BUY BONDS!

Hancock County War Bond Com.

Our Men In The Service

HAROLD WICKS WINS WINGS AS A PURSUIT PILOT

Harold Wicks, son of Mr. and Mrs. Albert Kohl, Klemme and son-in-law of Mr. and Mrs. E. C. Buntinbach, was graduated from the U. S. Army Air Forces advanced flying school at Chandler, Arizona Friday, October 1st and commissioned a Second Lieutenant in the Army Air Corps.

Lt. and Mrs. Wicks arrived in Klemme Sunday noon for a week's visit with home folks before returning to the West Coast. Lt. Wicks will report at an army air field near San Francisco, Cal., next Tuesday where he will specialize on the fast P-38 pursuit plane. Lt. and Mrs. Wicks expect to leave for the west Saturday.

Klemme relatives have received word that John Clements and Alvin Keeper have both reached their destination safely in England. Both Klemme men are in the U. S. Army.

Sgt. Bob Schneider arrived home

Saturday afternoon to spend a few days furlough visiting with his parents, Mr. and Mrs. Elmer Schneider. Sgt. Schneider is stationed at Fresno, California, a member of the medical corps attached to the Air Corps. Bob had convoyed some troops to New York City, so had an opportunity to be home for a few days.

CADET DORANCE GRANGE GOES TO ADVANCED ARMY FLYING SCHOOL

Aviation Cadet Dorance Grange, son of Mr. and Mrs. Paul Grange of Mason City, has begun his final stage of army pilot training at the advanced army flying school at Victoria, Texas. After completing the final course, Grange will receive the coveted Silver Wings of a U. S. Army Pilot and will be commissioned a Second Lieutenant.

His new address follows:
A-C Dorance S. Grange, 43-K, Squadron C-1, A A A F, Victoria, Texas.

ST. SGT. SWAMLEY HAS NEW ADDRESS

Mr. and Mrs. Howard Spitzer have received a letter from their foster son, Arthur Swamley, giving his new address as follows:
St. Sgt. Arthur Swamley, Troop A, 4th Rcn Squadron, Fort Jackson, South Carolina.

Sgt. Melvin Schlei, of Pendleton, Ore., is spending a furlough visiting with his brother, Kermit Schlei and family and other relatives and friends. Sgt. Schlei is a mechanic in the

OBITUARY

Mrs. John Feuerhelm passed away very suddenly from a stroke early Friday morning, September 17, 1943. She had been called to Waukon and Lansing, Iowa, by the death of her uncle, William Wendel, who preceded her in death only two weeks.

Elizabeth Katherine Marten, only child of August and Mary Wendel Marten was born Aug. 13, 1871 on a farm west of Liberty Methodist church, Hancock County, Iowa, and most of her early life was spent in that community.

She attended the Academy at Garner and after completing her education she taught school. Later her parents moved to Klemme where they resided for many years.

While living in Klemme she was a clerk in the E. L. Schaud dry goods store. Later she went to northeastern Iowa where she was in charge of a post office.

On Feb. 23, 1910, she was married to John B. Feuerhelm of Lansing, Iowa, where they resided until 1913 when they moved to Jefferson, Oklahoma, which had since been her home. This home was blessed with one child, Wilma Arlene.

Deceased was a member of the Methodist Church since her youth and always found great solace and comfort in serving her Lord. She was a member of the Rebecca Lodge and W. R. C., and Grange Club.

Mrs. Feuerhelm is survived by her husband and daughter Wilma at home, and one adopted daughter Eunice (Mrs. Wesley Pickett) of Wichita, Kansas.

Services were held at the Martin Funeral Home in Waukon on Sunday, September 19th and the body was taken to Jefferson, Oklahoma where funeral services were held on Tuesday afternoon, September 21st at the Methodist Church.

Celebrated 2nd Birthday Anniversary

Dick, son of Mr. and Mrs. Clarence Swalve, who reside on the farm south of Klemme, was two years old Tuesday, October 5th.

Army Air Corps and is stationed at the same field as Sgt. Graydon Back, another Klemme youth.

REV. PAUL KITTERER GAVE OPENING ADDRESS THIS WEDNESDAY MORNING

Thirty Nine Congregations Represented By 150 Delegates

Today, Wednesday, and Thursday the session of the North East Iowa Synod of the Evangelical and Reformed Church is being held at the Immanuel Church in Klemme, with 39 congregations represented in this conference by about 150 delegates.

The program began this Wednesday morning with the Rev. Paul Kitterer of Elkader, President of the Iowa Synod delivering the opening address at 10:45 o'clock.

The afternoon session today began at 1:30 o'clock. Rev. Walter Scher, St. Louis, Mo., who is the representative of the Denomination delivered an address on "The Ministering Church."

Returned Missionary Speaks

Rev. Theo. Hilgeman, returned missionary from China spoke this Wednesday evening. The evening service began at 7:30 o'clock.

The speakers on Thursday will be Rev. Hilgeman, Rev. Robert Fauth of Waverly, Rev. H. Wintermeyer of Hampton, Rev. A. Bisming, Keokuk, and Rev. R. Eilers of Alden.

The members of the local congregation are entertaining the visiting delegates in their homes. Meals are being served in the Church dining room by the ladies of the congregation.

FORMER CRYSTAL LAKE GIRL BRIDE OF KLEMMME FARMER

Miss Laura Lundgren of Britt, and William Green of near Klemme were married September 18th, 1943, at the Lutheran Church in Garner, with the Rev. Kurjek officiating.

Zella Bea Hicklin of Waterloo, a friend of the bride and Harold G. Green of Corwith, nephew of the groom, were the attendants.

The bride wore a black crepe, street-length dress with black accessories. Her attendant was attired in light blue with brown accessories.

The bride is a graduate of the Crystal Lake high school with the class of 1942 and since then has been employed in Des Moines and Waterloo.

The groom has been farming northeast of Klemme for several years, and the couple will make their home on the farm.

CARD OF THANKS

I wish to take this means of expressing my sincere thanks and appreciation for the flowers and cards sent to me while I was in the hospital. I also want to thank my neighbors for their help on the farm while I was ill.

CLARENCE SWALVE. Itp

Means of Teaching
The disasters of the unfortunate should prove the effectual means of teaching the lesson of caution to the fortunate.—E. Davies.

END CONSTIPATION THIS NATURAL WAY!

Millions now take Simple Fresh Fruit Drink instead of Harsh Laxatives!

It's lemon and water. Yes!—just the juice of 1 Sunkist Lemon in a glass of water—first thing on arising.

Taken first thing in the morning, this wholesome drink stimulates bowel action in a natural way—assures most people of prompt normal elimination.

Why not change to this healthful habit? Lemon and water is good for you. Lemons are among the richest sources of vitamin C, which combats fatigue, helps you resist colds and infections. They also supply B₁ and P. They alkalize, aid appetite and digestion. Lemon and water has a fresh tang, too—clears the mouth, wakes you up!

Try this grand wake-up drink 10 mornings. See if it doesn't help you! Use California Sunkist Lemons.

Generous in Tips
At least 200 million dollars in tips is given each year to waiters and waitresses in American eating places.

Notes of a City Slicker:
When Alexander Woolcott graduated from Hamilton College he never stopped talking about his alma mater.

So when the dramatic critic passed on, it was natural that his ashes be interred at Hamilton College Cemetery—with a few intimate friends and associates attending the services. . . . It rained hard for a whole day and night before the urn containing his ashes was lowered to the ground. . . . However, some miscalculated. . . . The ribbons which the urn was lowered over were two feet short. . . . And so the urn had to be dropped into the hole partly filled with mud and water, and when it fell—all the mourners standing around the grave were drenched.

"Just like Alec!" said a bespectacled pal. "To the last—a critic!"

Katrina Paxinou, one of the stars of "For Whom the Bell Tolls," is one of the world's bitterest Nazi-fighters. Katrina learned how to hate them before she left her native Greece.

You can't get a work of art out of Italy if you are not an Italian citizen, according to Billy Rose, an art collector himself. . . . A pal of his, Italy not long ago offered \$100,000 for a Rembrandt and was informed that he could take it with him by giving a likeness of Mussolini painted over it. . . . The point, it was explained, could easily be washed off without damaging the Rembrandt. "If they see you with a picture of Il Duce," said the dealer, "they will not stop you."

And so the art lover paid the \$100,000 and had no trouble bringing the picture into the United States. . . . Where he easily washed away the painting of Mussolini to discover it was an oil of Mussolini!

We asked a movie director how some of them acquired great reputations. He offered this examination.

A famous character actor, one of his early films, was doing a desert scene in which he was to portray a man dying of thirst. The director tried to get the actor to register the proper emotion, but the terrible ham only managed to make farcical. . . . Finally, after repeated failure, the director gave up. To get the idea across, however, he decided to photograph the actor's feet throughout the scene, showing him staggering along the desert—dropping one of his possessions after the other: First he dropped his pack, then his gun, and finally his canteen. . . . The critics felt that scene the outstanding one in the film!

Becklers of the administration are having a field day with this one. In Sicily, they'd have you believe, a peasant invited a comrade to his home for a feast. . . . After bowls of soup, double offerings of wine and a three-inch American steak plus several ears of corn on the cob (loaded with ketchup and butter), Idaho potatoes (with more butter) and Georgia watermelon and oodles of New York corn for their delicious Yankee guest, the guest beamed with appreciation.

"What?" interrupted the host. "No corn dessert!"

"What corn dessert? How can we have corn?"

"What corn dessert?" asked the guest. "What's Tootsie Rolls?"

"Who knows?" shrugged the host. "End-lease!"

The Magazines: Liberty scooped the field with a report alleging that New York school children find their lessons so exciting they hate going to school when the bell rings. . . . I believe it. . . . Newsweek says that the 4th year of the war produced only one great Allied general—Sir Harold Alexander.

How about Gen. Eisenhower, who may be FDR's running mate in the 1944 Presidential race? . . . Walter Winchell's typewriter ran away from him, judging by his text in the magazine. Diplomatic jobs, he noted, are non-political and bring success worked at hard enough. . . . He said that now? . . . In the magazine there is a nice, warm tale of a newspaper man covering the Pacific. The biggest peril of the job, warns the author, is capital poisoning. . . . H. Brubaker's item in his New Yorker kid's magazine: "The housing crisis in Washington is evidently worse than ever. Pearson has had to move into a doghouse."

Col. Elliott Roosevelt, enjoying a well-deserved furlough in the Club the other night, was being congratulated by intimates. "You are thinner in the face," said a newspaper man, and then, turning to his ribbons, added, "but heavier across the chest."

The only decoration that really counts, was the reply, "is the Purple Heart Medal, which I wish I had."

The Purple Heart is awarded only to the wounded. . . . Elliott's adventure cost him 43 pounds.

Skip Bombing

By Henry F. Pringle

(WNU Feature—Through special arrangement with Collier's Weekly)

American fliers used a new secret and devastating method of aerial attack in the Battle of the Bismarck Sea, in which 22 Jap ships were sunk, 15,000 soldiers and an unknown number of sailors killed. Soon afterward it sank German and Italian vessels in the Mediterranean. On land, the new technique speeded the Axis rout in North Africa, although the details of this later triumph must still remain a secret.

The Japanese never knew what hit them in the Bismarck sea, in any event all were dead and did not send in no intelligence reports—not even to the sun-god in Tokyo. They certainly did not know that the debacle was the result of experiments at an army air force proving ground in Florida, of painstaking research by experts of the ordnance branch of the army service forces and of combat testing in the Aleutians and the South Pacific.

All that they knew was that planes—both bombers and fighters—roared in for a kill at insanely low altitudes. They twisted and turned as they came in on the target. They dropped no torpedoes, so they were not torpedo planes. Yet they dropped something with amazing precision, and it was powerful enough to send transports and warships to the bottom.

What the American fliers did, it may now be told, was to use the technique which has been called skip bombing. The correct name for it is minimum altitude bombing.

Usually Missed Target. Considerable inaccurate information has been circulated about skip bombing, since details of the Bismarck sea battle began to leak out. Bombs dropped by an airplane flying fast at very low altitudes have always skipped—just like stones thrown across the millponds of our youth. Bombs from higher altitudes pointed downward, naturally, and were guided to the target by their fins. Nearer to the ground there was no time for this. The bombs maintained the line of flight. They skipped across the ground or water and back into the air. They usually missed the target.

About a year ago it dawned on some officers at the Florida proving ground that this disadvantage might be turned into an asset. The fliers were not thinking about sinking Axis ships. What they wanted to do was to work out some bombing method which would stop tanks.

A tank is almost invisible from thousands of feet in the air and is virtually impossible to hit. But today's fast fighter planes are projectiles in themselves. It occurred to Brig. Gen. Grandison Gardner, proving ground commandant, that a plane might come in just above the ground at a very high speed, point itself at the tank and then drop a bomb. The bomb would continue to plunge forward and would, so General Gardner reasoned, hit the tank.

There were bugs in the notion, as he was due to learn. One of the bugs was that the bomb sometimes skipped clean over the tank. Later, when the idea was expanded to attacking ships, the bomb not infrequently hit the water and bounced over the ship. It would be necessary, General Gardner knew, to stop this skipping or to guide it. A delayed fuse would also have to be developed, so that the explosion would not wreck the attacking plane when real, instead of dummy bombs were used.

Perfecting a delayed fuse for the bombs was easy enough, but keeping the bombs from skipping over the target—when dropped at 10, 25, or 50 feet at 300 miles per hour—was far more difficult. So was working out the method of sighting.

The details of this, too, cannot yet be disclosed. This much may be said: It is so simple that a pilot in a single-seater can hit a tank, a moving train or a ship and can correct his aim at the last second. Behind the method lay interminable calculations and experiments. About a year after work had started, the new method of bombing had proved its worth beyond question.

No special bombs are required. Size can vary from 250 to 500-pound bombs for tanks; 500 to 1,000 pounds for unarmored merchant vessels; and up to 1,000 and 2,000 pounds for battleships. Moreover, almost any type of plane will do except those that are heavy and slow.

Mortality, thus far, has been extremely low because the attacking plane can shift its course at will until three seconds before releasing the bomb. Moreover, the pilot is flying so low that larger anti-aircraft guns, difficult to depress, cannot hit him at the range involved.

OUR OWN RADIO DOMESTIC MEDIATION BOARD

(After listening to a famous radio program.)

Q—Now we come to Case 877. Will you tell the board about your problem?

A—Well, I've been keeping company with a man for 32 years. I find I am becoming rather fond of him and I think we should be married.

Q—You think 32 years is too long for a courtship?

A—Yes. Maybe I'm being unreasonable, but I'm the impatient type.

Q—What does the man say?

A—Every night he just comes home, reads the newspaper, finds fault with everything. He shows no interest in me or the children.

Q—What children?

A—Our children.

Q—How old are these children?

A—The oldest is 36.

Q—But you said you had only known this man 32 years.

A—That's one of the things I want to have straightened out by this board!

(The three mediators, Oscar Wimps, jurist Theodore Spudd, famous psychologist, and O. Diddle Buggs, author, swoon, which is a great disappointment to them as they had counted on making quite a radio hit.)

Q—(continuing)—Now let's see what the man in the case has to say. You came here so you could be guided by the board's decision?

A—No, I just jumped at my chance to get on the air.

Q—What is your answer to this woman's story?

A—The last 10 years I have tired of her.

Q—Won't she let you leave?

A—Yes, but she won't let me take all the furniture and a half ton of coal!

(The interrogator finds the mediators are still out and proceeds with the next case.)

Q—What is your problem, madam?

A—It's about my 70-year-old mother. A couple of years ago I got married and we came home to live with her. My husband can't work as he has a mania for crossword puzzles. I tried working once and don't like it either. We were very happy with mother until the last six months.

Q—What is causing your unhappiness now?

A—Mother gave up her job at the iron mill!

Q—Since she is 70 years old, isn't it possible she has some excuse?

A—No. We had her examined by the family veterinarian, and he says she is still able to work all week if she rests Sundays.

Q—What do you wish to know?

A—I want to know if a mother has a right to stop work.

Q—Now, let's get the other side. Mother, what have you to say?

A—She's crazy. I would be working right now but she made me quit to come down here on this radio program.

Q—Why did you do it?

A—She said if we went over good we might get a regular air engagement.

Q—Judge Wimps, what is your view in this case?

Judge Wimps—I think the girl should return the \$300 and go back to her sister.

Mr. Spudd—Blood is thicker than water. A rolling stone gathers no moss. What we have here is a plain case of glandular disturbance. I recommend a suit for damages.

Mr. Baggs (very thoughtfully)—It was either Napoleon or Henry the Seventh.

The interrogator (rather muddled)—What are you talking about, Mr. Baggs?

Mr. Baggs—Isn't this a quiz program?

Pvt. Harry Kowal, in the hospital at Camp Blanding with a bad case of foot trouble, was asked how his feet got that way and replied, "A cute little WAVE just about walked me to death." All-Out Arlene says it served him right. "He should have met a WAC," she explains, "they know when a boy begins to get lame."

The latest rumor about Mussolini's whereabouts comes from All-Out Arlene, who wires from Africa that he is in the crater of Vesuvius, where it is comparatively cool.

Capsule Chronology of Fascism: It began with a black shirt, and ended in a blackout.

CAN YOU REMEMBER—

Away back when:

1—Your waiter returned the same night he took your order?

2—You thought a girl was absent minded if she didn't wear stockings?

3—You were "too busy" to see a refrigerator salesman?

4—You dared to raise your voice at your butcher?

Hitler has a new mystery weapon and he would use it except that all such things ultimately are used by our side with better results.

1766

Party Frock
YOU'LL look so charming and feel so cool in this lovely frock with eyelet embroidered yoke. Perfect junior fashion.

Barbara Bell Pattern No. 1766-B designed for sizes 11, 13, 15, 17 and 19. Corresponding bust measurements 29, 31, 33, 35 and 37. Size 13 (31), short sleeves, requires 3 1/4 yards 39-inch material, 3/4 yard eyelet embroidery.

ASK ME ?

A quiz with answers offering information on various subjects

The Questions

1. What war was being fought when the "Star Spangled Banner" was written?

2. The name Euclid calls to mind the science of what?

3. Do radio waves pass through a wire as electrical waves do or not?

4. When Lincoln was re-elected President in 1864, who was his opponent?

5. A garrulous person is one who does what?

6. What does the infantryman's full personal equipment weigh?

7. What did the North American Indians mean by the word "pemmican"?

8. When William the Conqueror invaded England in 1066, he and his troops were known as what?

9. What is the minimum age for representatives in congress?

10. What new medal, rated between the Silver Star and the Distinguished Service medal, is being awarded to our servicemen?

The Answers

1. The War of 1812.

2. Mathematics.

3. No, they pass along the outside of a wire.

4. Gen. George B. McClellan.

5. Talks much.

6. Sixty - three pounds, eight ounces.

7. Dried meat.

8. Normans (from Normandy).

9. Twenty-five.

10. The Legion of Merit, awarded to members of the armed forces for exceptionally meritorious conduct in the performance of outstanding services.

Exaggeration

"See here, what do you mean going around telling people I'm a first-class idiot?"

"It's a lie. I never said first-class."

Soon Found Out

She—I am deceived me before we were married. You told me you were well off.

He—I was, but I didn't know it.

Congenial

Husband—Now, let's think.

Wife—No, let's do something you can do, too.

A jingo is one who shoots off his mouth, but never learns how to fire a gun.

No Proof

"Daddy," said the talkative six-year-old son to his long-suffering father, "am I made of dust?"

"I'm afraid not. If you were, you'd dry up now and then."

A cloth dampened with vinegar or coal oil and rubbed over the windows before washing, will remove the smoky look.

Common table salt is the best cleanser for a milk strainer. Rub both sides of the strainer vigorously with the salt.

A bit of wax rubbed on the bottoms of rockers, will prevent them marking even the glossiest of floors.

Handle fruits and vegetables gently. Do not bruise.

Store berries, grapes and other delicate fruits unwashed in a cold place.

Rich, active suds and thorough rinsing are elemental requirements for successful laundering.

When washing overalls, slip the ends of the shoulder straps to which the buckles are fastened into the hip pocket. Pin securely with a safety pin, and the overalls can be washed without the trouble of removing the buckles.

Talkative Parrots
Parrots have been known to have vocabularies of 250 words, bird experts say.

SNAPPY FACTS ABOUT RUBBER

Fifty-three per cent of the cars on highways continue to waste rubber, for officials report that that number continue to be driven over 35 mph. A year ago 91 per cent of the cars traveled faster than the rubber conservation limit.

Kok-Sagyz, rubber-bearing Russian dandelion, was planted and grown in 100 different test localities in the U. S. last year. The B. F. Goodrich Company is aiding in this experiment.

If your tires show undue wear at the center of the tread, it is a signal that you are overinflating. This is as much a rubber waster as underinflation.

Jersey Shaw

IN THE NAVY

they say: "SACK" for bed

"BOOT CAMP" for training station

"SOOJEE" for water mixed with soap powder

"CAMEL" for the favorite cigarette with men in the Navy

FIRST IN THE SERVICE

The favorite cigarette with men in the Navy, the Army, the Marines, and the Coast Guard is Camel. (Based on actual sales records.)

CAMEL

YOU CAN'T BEAT CAMELS FOR RICH TASTE AND EXTRA MILDNESS

Entered At The Post Office At Klemme, Ia., as 2nd Class Matter

SUBSCRIPTION RATES:
In Hancock and Adjoining Counties per year in advance \$1.50
In Iowa per year in advance \$2.00
Outside of Iowa, per year \$2.50

All subscriptions for papers going to points within the county (and adjoining counties) are considered continuing yearly subscriptions to be discontinued only upon notice from subscribers or at publisher's discretion. All other subscriptions will be discontinued one month after expiration, if not renewed, but time for payment will be extended if arrangement is made by the subscriber.

ter is glad that someone in Chicago was thoughtful. When returning on a furlough to be married, Weber's suitcase was lost at the Union station in Chicago. The party who had picked up the suitcase by mistake, found a picture of Weber, his girl friend and an automobile with the license plate visible. The man called the Allamakee county courthouse to find the car's owner. Supplied with this information he sent the bag back.

SCULPTOR

Paul Reisman, formerly of Hungary, but now making arrangements to become a citizen of the United States, found an egg plant in Dave Young's market in Indianola that resembled Hitler. Paul fashioned the hair out of the blossom end of the stem; two brass screws make the eyes, the mustache is also fashioned to make a complete head of the one-time paperhanger. The likeness is on display in the windows of the Indianola Record and Tribune office.

YOUNG POET

Gordon H. Felton of Indianola is one of the youngest, if not the youngest, editors in the United States. In 1942, Gordon sent out 100 letters to poets over the country asking them to send contributions to a poetry magazine. Eleven poets answered and the first edition was soon published. Since that time the magazine has been published four times a year with a circulation going into every state. Gordon is now working on a book of poetry which he hopes to have published this fall. Many well-known poets have had poetry published in his magazine. Recently, Gordon was judge of entries in the 99th annual contest sponsored by the Texas Poetry Society.

NO DIFFERENCE

It makes no difference where a man might be at any time, apparently his belongings are not safe from thieves. While John Hoffman of near Plainfield was attending church services in Waverly, his car, parked near the church, was stolen.

ALL OVER THE WORLD

Audubon corn is making its appearance in various parts of the world. Last week, word was received from a soldier in the south Pacific that among the supplies received was corn packed by the Audubon Canning Company. A few weeks previously, similar word was received from someone in India.

"Swab the deck!" cries out a petty officer and the men fall to with their "holy stone" equipment and in a short time everything is spick and span.

Buy War Bonds and more War Bonds and you know that you are sharing in the effort that will free the world from war lord domination.

U. S. Treasury Department

a deduction in price paid on cream from such milk.

August is the peak month for fire of buildings from lightning.

COMBINING OF SOYBEANS IS IN FULL SWING

Paul Henedson, county extension director, announced Friday that the combining of soybeans is on in full swing in Hancock county and samples of beans brought to local elevators were of excellent quality and very low moisture content.

No frost damage is noticeable in most cases.

Yields are satisfactory and yields to 30 bushels to the acre have been reported in some instances.

FOUR GENERATIONS AT FAMILY GATHERING

A family gathering and dinner was held at the R. A. Jorgenson home Sunday.

Present were Titus Davis of Merriam, Kansas; Lt. and Mrs. Ray A. Jorgenson, Jr. and baby daughter Maryl Judy, of Dodge City, Kansas; Mr. and Mrs. Robt. Liebendorfer and son Jon, of Davenport, Iowa; Mr. and Mrs. Lyle Liebendorfer of Forest City; Mr. and Mrs. Joe Liebendorfer and son Dick, and Mrs. Bessie Starboard of Hampton; and Mr. and Mrs. R. A. Jorgenson, Sr.

Mr. Titus Davis is the father of Mrs. Lyle Liebendorfer and Mrs. R. A. Jorgenson, Sr., Grandfather of Robt. Liebendorfer and Lt. Ray A. Jorgenson, Jr., and the Great Grandfather of Jon Liebendorfer and Maryl Judy Jorgenson. Thus four generations were doubly represented at the Jorgenson home on Sunday.

For an escort for a summer fruit salad, serve molasses muffins made with thick buttermilk.

Straw sheds make good shelter for fall pigs.

BETTER IOWA GARDENS

A concrete or clay drain pipe 18 inches in diameter and 30 inches long may be used to make a satisfactory vegetable and fruit storage pit. A pit has the advantage of providing good storage for about three bushels of vegetables and apples. If the farm operator is a renter, the pipe can be taken along whenever a move is made. Some lumber yards stock this pipe. Or, it may be ordered through a lumber yard.

A hole should be dug 6 inches deeper than the pipe is long. Three or four bricks should be set on end in the bottom of the hole, and covered with galvanized wire. The pipe then is lowered into the hole so that it rests on the bricks and the rim is about 2 inches above the top of the ground. Four or five inches of sand or cinders are then put in the bottom for drainage.

A day or so before the vegetables are stored, water is thrown on the sand or cinders in the bottom and a lid is placed over the top of the pipe. After the vegetables have

been placed in the pit, the lid is replaced, and dry leaves are placed over all. The waterproof cover is needed on any type of pit storage.

* * *

If a pit storage place fails to keep vegetables satisfactorily, as sometimes happens, the most common reason is insufficient covering, which allows the vegetables to freeze. The covering should be set not only a good distance from the edge.

* * *

Pit storage cannot be used in localities where the water table is near the surface. In such locations the vegetables must be stored in a mound or bank on top of the ground.

* * *

A 6 to 8 inch layer of straw is spread on the ground and the vegetables are heaped on the straw. A 10 inch layer of straw then is placed on the vegetables, and the entire pile covered with a waterproof covering. When the weather gets close to the freezing point, the waterproof covering is taken off and a 3-inch layer of soil is placed on the vegetables and straw. More straw is applied to a final depth of 3 feet. The waterproof covering then is replaced.

I will sell all my personal property at Public Sale at my farm located as follows: 4 1/2 miles southeast of Klemme; 1 1/2 miles north, 2 miles east and 1 mile north of Goodell, on the place known to some as the Turkey Farm, on

Mattresses

JOKE NO. 1
FOR TEN YEARS OR MORE
Mattress Factories gave special attention to Inner Spring Mattresses. They advertised extensively and pushed them.

JOKE NO. 2
ABOUT A YEAR AGO THEY
discontinued making inner springs for the duration of the war.

JOKE NO. 3
THIS STORE "NOSED A-
round" and found that several factories had always specialized in good all-cotton felt mattresses; namely the Sealy Mattress made in Texas and the Land O Nod Mattress made in Minneapolis.

JOKE NO. 4
SEVERAL OF OUR CUSTOMERS tell us that they prefer a good cotton felt mattress to an inner spring. They say a good coil spring and a good cotton felt mattress makes the best bed that money can buy.

SO WHAT?
WE HAVE FILLED OUR Store with Cotton Mattresses.

We have one style of loose cotton mattress at \$13.00. (This kind may get lumpy.) And, we have six kinds which are made of felted layer cotton, and come in various grades of cotton and ticking, priced as to quality at

\$19.75 24.50 27.50

MY JIMMY
NEEDS YOUR
HELP!

Jimmy's over there
now, fighting our enemies
keep the Stars and Stripes flying.
Before he left, he told me they are go-
ing to need more equipment, more ammu-
nition and more food for INVASION of
our lands.
"The more bonds the folks at home buy
the more they'll be helping us fighters to
win." That's what Jimmy said.

★ ★ ★ ★

3rd War Loan of 15 billion dollars
will produce the money
pay for these essentials
for victory.
Buy at least one EXTRA
Bond besides your

regular bond purchases—many will have
to invest thousands!

Don't think that what you do isn't impor-
tant. It will take all every individual in
America can raise to put this 3rd War Loan
over the top. So buy more bonds out of
your pay—out of extra income—out of
"rainy-day" funds!

The quicker you do that the more
you'll help Jimmy and our other boys smash
through to Victory.

What do you say? It's the
safest, soundest investment
you'll ever make!

Let's go!

Students of the Shamrock Times have been giving start to the Junior class play. A number of students have been working on the play. The play is a comedy-mystery play called "The Scarecrow Creeps." After extensive try outs the parts were finally given to Laurice Lemke, Iva Christie, Ewald Grosshuesch, "Red" Butenback, Marjorie Hartbeck, Pat Kudge, Edward Barz, Marjorie Menders, and Mabel Sterba.

Monday was devoted to selling Bonds and Stamps being that this is the 3rd War Bond Drive. With the grades and high school we had the sum of \$73.15 worth of stamps and \$450 worth of bonds credited to the Klemme School. From now on every Friday will be devoted to the buying of stamps. So keep up the good work boys and girls.

Friday Sept 24 was a big day at Klemme High for the Freshman Class. It was the day of their roller skating party at Bayside. They were to meet at the school-house at 6:30 and then Tom Roths would take them in his truck. However at noon the truck went elsewhere so they frantically put their heads together and Pete Larsen suddenly got a bright idea. He disappeared and returned with the good news that his father would allow them to use his truck. Bumpy roads and noisy tires and

and a few jokes brought them to their destination. They received their skates and were soon on the floor. The spills taken by "Chuck" Christie and Betty Lacey made the party amusing and colorful. At 9:30 they were called off the floor by Miss Sherrill and Miss Dietrich. They stopped at June & Johnny's afterwards for a bite to eat. They were soon back in the truck and on the way home. Several thought the ride home was very cozy. They arrived home at 11:00 and the party broke up into smaller groups. The Freshman thought this party was very interesting for they got better acquainted with their classmates and met new friends.

This fall the Shamrock Baseball team coached by Mr. Esbeck started out with a great bang. Thornton surrendered unconditionally 13-12 after a low flying bomber piloted by a former high school student, Lt. R. A. Jorgenson Jr. Then we journeyed to Swaledale where we lost 25-10 because of the lack of air support. Last Saturday afternoon we entered Sectional play at Leland where we fell to Leland 5-0.

Out of the 30 boys that reported this fall the following have seen the most action: Harlan Nuehring, Verne Grieman, Jim Thomas, Terry Peck, Ronald Brinkman, "Red" Butenback, Allen Lau, Elwood Harvey, Raymond Schoenwetter, Portland Dorenkamp, Ed Barz, and Ewald Grosshuesch. The reserves also fell by the way side 11-3. With a return game scheduled for next Tuesday. Two games with Kenawha have been cancelled due to their winning of the tournament at Leland. Coach Esbeck would also like to see a large number of boys out for basketball when practice begins next Wednesday.

Oh the birds that sing in the spring tra-la-la. The girls glee club aren't exactly birds, but then this isn't spring either. Don't worry they're getting there. Their rendition of "The Jolly Miller" is "plenty good".

This year marching band has 20 members the concert band is slightly larger. We have one new member, Mildred Busse in the trombone section.

Wednesday a poll was taken in the history and literature classes. Below are the questions and the results:
1. Which of the American political parties do you favor?
Undecided 7
Democrats 20
Republican 20
2. If you had within your power to choose the next President of the United States, whom would you name?
Undecided 19
Roosevelt 15
Dewey 15
Wilkie 5
3. Do you think that after the war the United States should enter into an alliance with Great Britain?
Undecided 9
yes 18
no 28
4. Do you think that after the war this country should enter into an alliance with Great Britain, Russia, and China?
Undecided 13
yes 27
no 14

An acre and one half of cabbage gives off in a year 71,712 gallons of water or enough to fill a swimming pool 60 ft. long, 30 ft. wide and 5 1/4 ft. deep. The population of the Balkans is 60,000,000,000 half as much as the United States, while its area is the size of the state of Texas. There are many different races of people in each.

Thales was the father of geometry.

Mrs. Clancy was returning from shopping, and with the crowds and the high prices, he was in no pleasant humor. As she approached the door she saw Mrs. Murphy, who occupied the street floor, sitting at her window. I say Mrs. Murphy," she called out in deep sarcasm "why don't you take your ugly mug out of the windy air and put your pet monkey in its place? That'd give the neighbors a change they'd like."

Mrs. Murphy was ready for her. "Well now, Mrs. Clancy," she retorted "it was only this mornin' that I did that very thing, an' when he saw the monkey he bowed and shamed an' said, 'Why, Mrs. Clancy when did ye move downstairs?'"

The Advanced Home Ec. Class making a variety of things. The main things now are hot dishes. Last week there were quite a few ears shed, some of the girls were trying to peel onions for our onion and potato soup.

Do you know what the little rabbit said as he rushed out of the burning forest? "I've been deferred!"

The great event so far this year or the seniors is the class rings. They were the main attraction for couple of weeks.

Last week tea was served in Speech class. We were studying conversations and introductions so everyone in the class picked a character and acted like that person during our tea. There certainly were a variety of people from all parts of the world even Adolf Hitler was in his country for an hour.

A Chinese had a toothache and phoned a dentist for an appointment. "Two-thirty all right?" asked the doctor. "Yes, replied the Chinese. Tooth-ache, all right. What time I come?"

WEEKLY NEWS ANALYSIS

Allied Armies Start Drive to North Against Fortified Nazi Lines in Italy; Jap Key Base at Rabaul Is Encircled; Farm Groups Dissent on Subsidy Plans

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)
Released by Western Newspaper Union.

Shown scanning skies for re-appearance of strafing Messerschmitts, this American anti-aircraft crew aided in valiant defense of beachheads established by U. S. troops at Salerno in bloody fighting.

ITALY: Yanks on Offense

Their bases firmly established on the beaches of Salerno after eight days of bloody battle, Lieut. Gen. Mark Clark's Fifth Army went onto the offensive and drove Nazi panzer units back into the hills rising inland.

As the Germans retreated, General Clark's Doughboys made contact with Gen. Bernard Montgomery's British Eighth Army, charging northward from the toe of the Italian boot. Together, the two armies prepared to swing against the series of mountainous defenses erected by the Nazis to wear down the Allies before they reach the main enemy lines in the Po valley.

Although the Allies were first pounded by 88-mm. guns when they landed on the sandy beach, and harassed by German armored units before they could organize strongly for attack, their position was gradually strengthened by a constant stream of reinforcements. Clouds of Allied planes roared overhead to break German battle formations, and 16-inch naval guns poured explosives into the hills from which enemy batteries caused such havoc on the beaches earlier.

Losses in Sicily

Despite the Allies' whirlwind 38-day campaign in Sicily, they suffered material losses ranging up to 54 per cent, Secretary of the Treasury Henry Morgenthau declared in support of the current 15 billion dollar bond drive.

According to Morgenthau, operations in Sicily cost 13 per cent of all 155-mm. howitzers landed; 46 per cent of all 57-mm. guns; 13 per cent of all guns employed; 8 per cent of all medium tanks and 7 per cent of all light tanks; 54 per cent of the carriages for the 37-mm. guns; 36 per cent of the carriages for the 75-mm. guns, and 22 per cent of the carriages for the 105-mm. guns.

"In Sicily we met only a small fraction of the opposition we are getting from the Germans now in Italy," he said.

SOUTHWEST PACIFIC: Big Base Encircled

With Allied troops in command of the Solomons and firmly closing their grip on New Guinea, the great Japanese naval and air base of Rabaul has been encircled and neutralized as an advance post for action in the Southwest Pacific.

Hardly had General MacArthur's troops closed the noose before a big naval battle was reported in the area between New Guinea and the Solomons, thus indicating that the Allies were moving swiftly to capitalize on their position.

With Allied bombers faced with shorter runs and therefore enabled to carry heavier loads to the big base, and with the U. S. fleet ready to spring into action from neighboring waters, the encirclement of Rabaul removes the Japs' immediate threat to Australasia. At one time the Japs threatened to overrun the entire region.

JAPS: Woo Subjects

In an effort to enlist the active support of the 700 million Asiatics already under her heel, Japan has promised them self-government, taken scrupulous care to respect their religions, invited their young students and leaders to Tokyo, where they have been entertained by the emperor, and exchanged technicians with them.

Premier Tojo

According to diplomatic advices, the program has had its effect. With the assistance of the natives, the Japs are getting bauxite for aluminum from Burma; iron from North China and Manchuria, oil from Java and Borneo; copper, tin and manganese from the Philippines and foodstuffs from Thailand. In addition, the wily Japs are installing factories in the conquered countries.

Under Tojo's leadership, it was said, the Japs are ready to sacrifice five million men to beat the Allies. They expect the war to be long, but consider present action in the South Pacific as merely outpost skirmishes.

WHISKY: No Production

Because of a boost of 20 per cent in the estimated requirements of industrial alcohol for the newly established synthetic rubber industry, distilleries will not be allowed to switch to whisky production for the rest of the year. Previously, distilleries nourished hopes of being given two weeks to build up dwindling stocks of whisky and blends.

The decision to place greater reliance on alcohol for synthetic rubber than on petroleum resulted from conclusions that use of the latter would interfere with the aviation gasoline program. Furthermore, it was said, the government objected to the diversion of grain to whisky at a time when it was trying to maintain the nation's food standards.

This Excuses Everybody

As chairman of the house ways and means committee, Rep. Robert Doughton presided over congress' shaping of the present income tax.

Recently, Doughton summoned the committee to a night session to see whether something couldn't be done to simplify the filing of returns.

Doughton, it seems, had to get a "tax expert" to make out his own form!

HOME DELIVERIES:

Cut Oct. 11

To assure continuation of motor transportation against wartime shortages of fuel, replacement parts, equipment, tires and manpower, Director of Defense Transportation Joseph B. Eastman ordered curtailment of retail and wholesale merchandise deliveries.

Effective October 11, milk deliveries to homes will be limited to four times a week; meats, fruits, vegetables, fish and bread to three times, and dry groceries, laundry and dry cleaning to two times. Permission was given for delivery of ice every day.

Wholesale deliveries will be cut to six times weekly for bread, bakery products, cream, milk, dairy products and repair parts; five times for meats, eggs, fruits, vegetables, fish, live plants, laundry, dry cleaning and cut flowers; and once for alcoholic beverages, wines and bottled malt beverages.

RUSSIA:

Oil Hopes Blasted

Once set up as the cornerstone of the Nazis' drive for the Caucasus oil, Novorossisk was abandoned by them as the Germans pulled back to the Dnieper river for a last ditch stand in Russia.

The German withdrawal along the whole front to the Dnieper was regular, with the Nazis within 100 miles of the broad, curving river, from Bryansk in the north to Loozovaya in the south. Only along the coast of the Sea of Azov were the Germans any distance from the Dnieper, and here it was believed they were holding deeper defenses to permit their troops in the Crimea to pull out.

Every indication pointed to the Germans' use of the Dnieper as their last strong natural defense in Russia. If the Reds cracked the Dnieper, the Germans would have no suitable defensive terrain left, but would have to fall back on the Dniester river, in Europe itself.

MEXICO:

Tourist Boom

"American tourists are crowding Mexico and buying up everything from gin and electrical appliances to bobby pins and elastic." it is reported.

The people of Mexico are not feeling the war as acutely as are the people of the United States as rationing has not gone into effect there. There is plenty of everything, it is said, but Americans are buying much of the surplus goods American money is welcome.

Washington, D. C.
INDIA AND U. S.

Despite the Churchill visit and the impending campaign in Burma, conditions inside India still remain one sore spot where Anglo-American relations, frank and friendly as they are, could stand some cleaning up.

All of the President's special advisers have brought home more or less the same reports. They include: Laughlin Currie, member of the White House staff; ex-Undersecretary of War Louis Johnson; Special Ambassador Billy Phillips.

Latest evidence of Indian sore spots is a report to Leo Crowley, new Economic Warfare administrator from his New Delhi representative, John Fischer, who writes:

"The government of India, the British army, and many Indian businessmen view the opening of an OEW (Economic Warfare) office here with frank and deep-rooted suspicion. This suspicion is not directed at us alone, it falls on all American representatives in India.

"The American Mission was established here in 1941 in the face of considerable reluctance on the part of the government of India (Previously the United States had not been permitted even a consulate in New Delhi.) The OWI, OSS and even lend-lease representatives have told us that they have been received here with open misgivings—and in the case of the first two agencies, sometimes with hostility. Before our arrival, the government of India raised a number of questions regarding our mission with the American Mission.

"We have reason to believe that our movements have been under close observation, both here and in England, and that surveillance is likely to continue.

Reasons for Coolness.

"There seem to be two main reasons for this attitude," Fischer reported to Crowley.

"1. The fear that American representatives may send to Washington, through channels not subject to British censorship, information concerning the internal situation in India. This, the government of India seems to believe, might stimulate American sympathy for the Nationalist movement and criticism of the government's ineffective administrative techniques.

"2. Fear of American post-war commercial competition. This concern seems to be shared alike by the British and many large Indian businessmen. It has been so pronounced that the mission thought it expedient, shortly before our arrival, to assure the government that OEW activity in India is in no way concerned with trade promotion.

"To offset the cool attitude of the government of India, the American Mission has received us with a helpfulness and kindness which has exceeded expectations. . . . we are confident that despite all this we can manage fairly well."

TO RELAX RATIONING OF FARM MACHINERY

Agricultural officials have been closeted for several days working on an announcement which will be good news to farmers. They are planning to relax the rationing of farm machinery.

Relaxation will take two forms. One will be to permit farm machinery companies more latitude in distributing their products to different parts of the country. The other will be to take certain machines definitely off the ration list.

Although plans are not quite complete, it is probable that most farm machinery will be unrationed from now on except tractors, combines, hay batters, beet lifters and similar mechanized equipment. In general, tractor implements will be taken off the list, though tractors will stay on.

It will still be necessary for farmers to go to their ration boards to get permission to buy certain farm machinery, but this will be only for the purpose of making sure that they are legitimate farmers and really need the equipment. The old system of strict rationing on most farm machinery will go by the boards.

Hitherto, farm implement companies have been required to distribute their products equally throughout the United States, so that some counties where little wheat is raised have received as many binders as counties in the middle of the wheat belt. Or in some cases, too much corn machinery has been sent to counties where little corn is raised, while corn belt counties have been slighted.

The new order will permit farm implement companies to use more discretion in order to avoid inefficient distribution.

CAPITAL CHAFF

While congressional solons were away, the house-cleaners have been busy. All the paintings on Sighseers' Row have been cleaned, statues have been given a much-needed bath, and the subways leading to the senate and house office buildings are resplendent with a fresh coat of paint.
